Community Colleges of the
Western Association of Schools
and Colleges

Abbreviated Institutional Self-Study in
Support of Reaffirmation of Accreditation

FALL 2008
SPECIAL INTRODUCTION

In the spring of 2005, Santiago Canyon College completed a comprehensive Self-Study Report. This was followed by a visit of Commission representatives in October of 2005.

At the January 2006 meeting of the Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges, the Commission reviewed the institutional self-study report and the report of the evaluation team that visited Santiago Canyon College in fall 2005. The Commission acted to reaffirm accreditation for a six-year period.

At the same meeting, the Commission also acted to synchronize the comprehensive visits of the two colleges of the Rancho Santiago Community College District.

In order to facilitate this change, Santiago Canyon College was asked to complete an abbreviated Self-Study, accompanied by a visit of the Commission representatives, in the fall of 2008.

The items listed below are those areas that indicate the Commission’s expectations of what will be included in Santiago Canyon College’s Abbreviated Self-Study Report.

Juan Vázquez
President

SCC ABBREVIATED 2008 ACCREDITATION SELF–STUDY REPORT

CERTIFICATION OF THE 2008 INSTITUTIONAL ABBREVIATED SELF-STUDY

TO: Accrediting Commission for Community and Junior Colleges
Western Association of Schools and Colleges

FROM: Santiago Canyon College
8045 East Chapman Avenue
Orange, California

The Abbreviated Institutional Self-Study Report is submitted to the Accrediting Commission for Community and Junior Colleges for the purpose of assisting in the determination of the accreditation status of Santiago Canyon College.

We certify that there was a broad participation by the campus community, and we believe that the Abbreviated Self-Study Report accurately reflects the nature and substance of the institution.

PHILLIP YARBROUGH

BACKGROUND OF SCC (1971 – 1998)

The vision for Santiago Canyon College began in 1971 when the Orange Unified School District joined with the Santa Ana Unified School District to form the Rancho Santiago Community College District. In that same year, the residents of the City of Orange voted to levy a self-imposed tax to raise the funds to purchase the initial 30 acres in the area of east Orange that became the new college site.

The Orange Campus first opened its doors as the second campus of Rancho Santiago Community College in 1985. In May 1996, the Rancho Santiago Community College District Board of Trustees took action to make the Orange Campus the second college within the district to create a multi-college structure. At that time, the college in Santa Ana, Rancho Santiago Community College was renamed Santa Ana College (SAC), and the Orange Campus became Santiago Canyon College (SCC). Since its beginning SCC has grown an average of approximately 2% annually.

PHILOSOPHY OF SCC

SCC endorses the “open door” policy of the state of California, which offers higher education for high school graduates and others over the age of 18 by offering both credit and non-credit (adult education) classes. The wide variety of classes provides an opportunity for quality education to the 195,000 residents who compose a rich tapestry of diversity in the services area cities of Orange, Villa Park, and parts of Anaheim and Tustin. This population is comprised of a wide range of diversity in education, socioeconomic levels, and languages spoken in the home. While all credit classes are taught in English, the majority of the classes at the continuing education site (Orange Education Center) are classes in English as a Second Language (ESL).

In 1998, SCC applied for and was awarded eligibility status for accreditation by ACCJC. SCC was accredited by WASC in January 2000. A mid-term report addressing the recommendations of the 1999 WASC visiting team, was completed in 2003, followed by a successful mid-term visit. No additional recommendations were issued following the 2003 mid term visit. In fall 2005 SCC completed its institutional self-study. The college was fully accredited for six years in January 2006 following an October 2005 on-site visit by a WASC accrediting team. In January 2006 the Commission also voted to synchronize the comprehensive visits of SAC and SCC. To facilitate this change, SCC was asked to complete an abbreviated Self-study Report, accompanied by another visit of the Commission representatives in the fall of 2008.
SCC CHANGES IN 1998 – 2005

- During the 1998-1999 academic years the SCC faculty defined departments and moved from a model of faculty-led, clustered divisions to departments with department chairs. These original department chairs were instrumental in the academic planning process that resulted in a more comprehensive instructional program in fall 1999 and formed the first SCC Academic Senate. At this time the faculty defined its first governance structure and primary areas of academic and professional responsibility, per AB 1725. In the spring of 2001, the college was reorganized into divisions. At this time, a vice president of academic affairs, a vice president of student services, three academic deans and a dean of counseling and student services, each with appropriate support staff, were assigned to the college.

- In 2002-2003, the main SCC campus consisted of four permanent buildings and 28 portables on a 64-acre campus. This campus was surrounded by undeveloped land on one side and suburban development on the other three sides. The Orange Adult Learning Center was renamed the Continuing Education, Orange Center. It is commonly referred to as the Orange Education Center.

- A new president, Juan Vázquez, was selected to lead the college, and a new position of vice president of continuing education was added. The governance structure of the college was reorganized and the first Educational Master Plan (EMP) was completed following a two-year comprehensive planning and data collection process. At SCC a registrar was hired and the number of full-time admission specialists increased.

- The community passed a $337M bond to assist the district to acquire land and undertake construction and renovation projects at SCC, SAC, and the district office. The district purchased the 18.77 additional acres of undeveloped land adjacent to the SCC campus, bringing the total campus area to 82 acres. A new facilities plan, approved by the Board of Trustees, was designed by the facilities committee for new buildings, their locations, roads, pedestrian walkways, and more.

- Classes were offered during the day, evening, and weekend, with schedules of classes varying in length from full semester to four-week sessions. The increase in students required many new programs, courses, and changes in the number of student services.

- The Student Services and Instruction Building was completed and ground was broken for the new 40,000 square foot Library. A 90,000 square-foot building on a nine acre plot was purchased by the district to provide new facilities for the continuing education classes. This center was named the Orange Education Center. The district’s Community Services program was decentralized and two full-time staff members were assigned to operate the SCC portion of the program.

- A Title III grant was received to assist with the implementation of student learning outcomes (SLOs) into all programs and courses, including an assessment component.

- The college increased its offerings to 43 degrees and 26 certificate programs. To ensure the quality of education, SCC had a total of four vice presidents, five deans, and an appropriate support staff.
IMPROVEMENTS 2005 – 2008

• The college completed a second five-year Educational Master Plan and its first Technology Plan. The Technology Plan included equipment and planning for the main SCC campus and the Orange Education Center (continuing education).

• The Library, Fine and Performing Arts and Communication Division was established and a new Dean hired for this division. Performing Arts and Communication had previously been part of the Arts, Humanities and Social Sciences Division, which is now the Humanities and Social Sciences Division.

• The Library increased its holdings by nearly 50% with a $700,000 State Book grant.

• A new Writing Center opened in the fall of 2007 to provide supplemental instruction for basic skills students and other students needing learning assistance to improve writing skills.

• The Academic Success Center (ASC) increased its course offerings that assist non-credit students to transition into college credit classes. 3713 students were served in 2007.

• The ground breaking for the new science building took place in spring 2008.

OUTLOOK FOR THE FUTURE

• The next five years promises to be another dynamic and exciting time for SCC. The college will continue to re-invent itself and carve out new historical progress with each passing day. This allows it to mold and shape its future to adapt to the changing needs of the community it serves as well as the global changes that are occurring.

• Through all of its expected and unexpected changes and growth, the success of the students toward transfer, employment, and lifelong learning remains the top priority of the college.

• By following the future plans as described in the 2007-2012 Educational Master Plan, the college will start again on a new and wondrous journey to meet its new goals and objectives for the success of the students.

ABSTRACT OF ABBREVIATED SELF-STUDY

The abbreviated self-study covers the eleven recommendations made after the 2005 on-site visit and the planning agendas that were stipulated in the full self-study report of 2005. These planning agendas identified areas of the college that the staff felt needed to be improved or incorporated into a rapidly growing college.

Since the self-study and re-affirmation of accreditation in 2005, the population of SCC has continued to increase yearly, and this has led to growth in all aspects of the college, including the number of administrators, permanent facilities, staff, programs, departments, courses offered, and number of certificates and degrees offered and completed.

As discussed in this abbreviated self-study, the college has made steady progress in incorporating student learning outcomes into its courses and programs, completed its second Educational Master Plan (EMP), and began the process of developing assessment models and incorporating them into the SLO process. The college is confident that by the end of 2010 all courses and programs will have completed their SLOs and will have made excellent progress toward completing the assessment phase of the SLOs.

Inasmuch as this time period only covers three years rather than the anticipated six years for a full self-study, not all of the recommendations or planning agendas have been fully completed, but good progress has been made as presented in this abbreviated self-study.
ORGANIZATION OF THE ABBREVIATED SELF STUDY

Planning Phase

In the summer of 2006, the vice president of academic affairs and the president of the academic senate were appointed by the president of Santiago Canyon College (SCC) to serve as co-chairs of the abbreviated self-study.

The planning for the self-study process began with the organization of the steering committee and the development of a timeline and organizational chart.

The whole steering committee met in the fall of 2006 to begin the process of identifying faculty and staff to serve on the individual committees who were charged with addressing the recommendations and planning agendas. Committee members were selected based on their role in the college and their expertise in governance structures.

The steering committee met on a regular basis to review the progress of each subcommittee.

Preparation Phase

Each committee worked within the guidelines of the timeline to respond to the recommendations and planning agendas. It was the responsibility of each chair to ensure that a thorough and accurate answer to each recommendation and planning agenda was completed.

The document was then circulated throughout the college for additional input or comments before it was reviewed for final approval by the academic senate and the board of trustees.

</tr>
</thead>
</table>
| Planning Agenda for I. A. 1 | Mary Halvorson  
Tricia Evans | Julie Slark  
Nga Pham |

SCC will continue to analyze the needs of its students and the community based on the growth of the student population, the demographics of the students and the reason they indicate they are coming to SCC, local labor and industry needs and the make-up of the community. The institution will add new programs and services as needed.

| Planning Agenda for I.B.1 | Aracely Mora | SLO Committee  
Title III Coordinator  
Mary Halvorson |
|---------------------------|--------------|--------------------------------|

SCC will use appropriate activities, such as those listed above, to ensure that the collaborative spirit of the college continues and remains focused on the same priorities. At the same time, SCC will use its five-year SLO plan for training faculty and staff to develop appropriate SLOs for their respective programs and courses. The Title III funding received effective fall 2005 will help realize this plan by supporting the training of a core of teachers to assist with the development of SLOs for future programs and courses.

<td>Planning for the educational equipment and materials for the new building is an ongoing staff project, and SCC is strategically positioned to offer state-of-the-art technology to its students, staff and faculty. Staff is evaluating radio frequency identification technology (RFID) to improve materials management and security, and evaluating various “smartboard” technologies for the bibliographic instruction classroom and the technology training classroom. Best Books for College Libraries (five volumes) has been purchased and the library faculty members plan to use it as a major tool to evaluate and build the library collection. In conjunction with the district’s Information Technology Services (ITS) personnel, a proposal for a wireless network throughout the college to facilitate use of personal laptops and wireless devices is being developed. Finally, librarians are committed to attending at least one professional conference during the next academic year to continue to explore new technologies that support student learning.</td>

When the new dean is hired, policies, procedures and programs will be reviewed in order to assess whether additional services need to be offered to students, staff, and faculty. Additionally, library faculty will begin to develop specific student learning outcomes designed for structured library bibliographic instruction sessions. | John Weispfenning | Library Faculty and Staff |
### Planning Agenda for II. C. 1 (c)

The significant increase in bibliographic instruction sessions highlights the need for additional librarians as well as for extended coverage at the reference desk during evening hours when a bibliographic instruction session has been scheduled.

The hiring of an additional librarian in fall 2005 will be a key factor in initiating dialogue about innovative scheduling that will best benefit students. In addition, librarians need to continue to use the library’s DDP as a vehicle for charting and documenting the need for additional librarians.

In an on-going attempt to improve services and provide adequate resources in a fluctuating economic climate, librarians will continue to explore grant opportunities. This will entail research on grant writing, attendance at grant writing seminars, and mentoring by other faculty members.

In order to better inform the campus community about the scope of library services and library resources, librarians will develop a template for use in bibliographic instruction. Such a template will ensure consistency in the delivery of instruction and will be developed collaboratively with faculty from other departments.

The district’s Human Resource Department will assess the college’s personnel to ensure employment equity and diversity consistent with the district mission. SCC will continue to promote diversity of faculty and staff according to its student population.

The college will offer appropriate staff development activities for classified and academic staff that will ensure they are kept informed of up-to-date policies and procedures, as well as workshops and seminars that improve the work environment, support the college mission and goals, improve the skills of employees, and continues the dialogue regarding the infusion of student learning outcomes.

To follow the facilities plans of the district and SCC to continue to build-out the SCC campus to meet student and staff requirements as the enrollment increases.

The SCC Facilities Committee has initiated the process of looking at short and long-term plans for the ancillary services. The committee has also initiated the development of interim plans for space as it becomes available when constituencies move out of their existing facilities into a new building. It is the goal to have these plans completed and submitted to CPAC by the fall of 2005.

Working in cooperation with the district and SCC’s master plan architect, the Facilities Committee will explore alternatives that would provide additional parking during the major construction period of the next five to ten years.

CERTIFICATE OF ELIGIBILITY

1. Authority
The authority for Santiago Canyon College (SCC), accredited in January of 2000 as the second college of the Rancho Santiago Community College District (RSCCD), is the Board of Trustees. The Board derives its authority from California Education Code 70902 and from its status as the elected community entity who holds the institution in trust for the benefit of the public.

2. Mission
The current education mission of Santiago Canyon College (SCC) was revised and adopted by the Board of Trustees in February 2008. It is the responsibility of the SCC College Council to review the mission statement on an annual basis and make recommendations for its revision and updating.

The mission statement is included in the college catalog and class schedule, appears on all college meeting agendas, and is posted on the web site, in all classrooms, the library, and many other public locations. It appears in all other publications deemed appropriate, such as the quarterly college newsletter, and The Courier.

3. Governing Board
Elected by the voters from the three trustee areas, the governing board of RSCCD consists of seven members who are responsible for the quality and integrity of the institution and who ensure the efficacy of the institution’s mission.

The board exercises the right to be an independent policy-making body in accord with the California Education Code and reflects constituent and public interest in activities and decisions as reflected in the minutes of the regularly scheduled board meetings.

The Board of Trustees has adopted board policy # 9002 “Statement of Ethical Conduct” and annually reviews their compliance with this policy to ensure that none of the RSCCD board members have employment, family, ownership, or other personal financial interest in the district.

4. Chief Executive Officer
The Chief Executive Officer of Rancho Santiago Community College District is the Chancellor, Edward Hernandez; he has served in this capacity since 1997.

The chief executive officer of SCC is Juan Vázquez, the fourth CEO, who was appointed president of the college by the Chancellor of RSCCD and confirmed by the Board of Trustees in June 2002. He commenced his duties and responsibilities with SCC in August of 2002.

His primary responsibilities are to provide effective leadership to define the goals of SCC, develop plans, and establish priorities for SCC. He must ensure implementation of federal, state, and local statues and regulations as well as board polices. His other primary responsibilities are to effectively manage fiscal and human resources to provide noteworthy educational programs and ensure communication and cooperation between SCC constituencies.

5. Administrative Capacity
Santiago Canyon College has sufficient staff, with appropriate preparation and experience, to provide the administrative services necessary to support its mission and purposes. A plan has been developed to provide adequate administrative support commensurate with the anticipated growth of SCC.
In 2001-2002 SCC re-organized its administrative staff to include three additional instructional deans, a vice-president of continuing education, and promoted the director of administrative services to a vice president position. The new dean of the Library, Fine and Performing Arts and Communication, was hired in the summer of 2007, and a new Associate Dean of Exercise Science and Athletics was appointed in spring 2007.

6. Operational Status

The annual enrollment growth rate of SCC averaged two percent annually during the years 2000-2007. Classes are offered in the day, evening, and during weekend college and encompass a wide variety of lengths from four weeks to a semester. In fall, 2007, 2074 full time and 8426 part time students were enrolled in the credit programs, and approximately 10,000 full and part time students were enrolled in the non-credit classes, including inmate education classes. Additionally, students were enrolled in fee-based community service classes. All courses offered on the SCC main campus, the continuing education campus, and adjunct community facilities are listed in the schedule of classes in the SCC catalog and posted on the college's registration web-site. The community education classes are published in a separate class schedule.

7. Degrees

The SCC college catalog contains a listing of the 43 degrees and the 26 certificate programs offered, as well as course credit requirements, and the unit length of study for each degree program.

Degree requirements for specific degrees, as well as descriptions and explanations of courses offered, are provided in the catalog. In spring 2007, 358 SCC students completed an AA degree, 26 earned an AS degree and 124 credit students earned a certificate.

8. Educational Programs

A wide variety of educational and vocational programs are offered for both credit and non-credit students.

For credit students, SCC offers general education, transfer, vocational programs, and certificates that are consistent with the missions of SCC, the RSCCD Board of Trustees, and California Community Colleges.

All courses are conducted at levels of quality and rigor appropriate to the degree offered. The college has identified the general education student learning outcomes and student learning outcomes at the program level. Student Learning Outcomes for all courses are being identified; this process will be completed in fall 2010. The completion of associate degrees, which requires a minimum of two years, meet high standards, and have resulted in valid articulation agreements with state and private four-year institutions.

Students may complete a high school diploma or a General Equivalency Diploma (GED) through courses offered by the continuing education (adult) division.

9. Academic Credit

Institutional policies and transfer requirements as well as the awarding of credit are clearly and accurately described in the SCC college catalog.

Specifically, SCC awards academic credits based on the Carnegie formula; one semester unit of credit is defined as one hour of recitation or lecture plus the required two hours of preparation for each class hour, or three hours of laboratory work each week for a semester.

10. Student Learning and Achievement

SCC conducts regular and systematic assessments of its programs. The Educational Master Plan, which is revised for publication every five years,
the triennial program review, and the quadrennial course review all support this regular and systematic effort.

All programs and courses are moving forward in a planned, systematic manner to identify and link specific student learning outcomes to already established, broader SCC general education student learning outcomes. A timeline to meet this objective has been created and was approved by the College Council in the fall of 2004. According to this expected time frame, by 2010, all courses and programs will have identified their respective student learning outcomes and assessment processes. Specialized training for faculty to ensure the completion of these SLOs is an integral part of the Title III grant awarded SCC in fall 2005.

Administrators, faculty, and staff are working on an on-going basis with the district’s institutional research department to facilitate and assess student achievement in specific programs as well as student achievement for the college-wide identified student learning outcomes.

11. General Education

SCC’s philosophy and comprehensive general education student learning outcomes ensure that students acquire a breadth of knowledge and intellectual inquiry.

Appropriate competency is expected in reading, computational skills, oral communication, and computer skills and application as reflected in the proficiencies required of all students receiving an A.A. degree. There are specific courses required for the major, with a minimum of 18 units for each degree. Students must complete these courses with a grade of C or better.

Degree credit for general education is consistent with a level of quality and rigor appropriate to higher education, with general education courses spanning the six general academic areas of: Natural Science, Social and Behavioral Sciences, Humanities, Cultural Breadth, Language and Rationality, Lifelong Understanding and Self-Development.

All of these academic areas, appropriate to higher education quality and rigor, have articulation agreements with the UC and CSU systems and various other private institutions of higher education throughout the US.

12. Academic Freedom

RSCCD board policy # 4201 addresses and ensures that SCC maintains an atmosphere in which intellectual freedom and academic independence exist, and ensures that the faculty and students at SCC are free to examine and test all knowledge appropriate to their disciplines as judged by the general academic community. Beginning in the fall of 2004, a copy of this board policy was included in the fall and spring faculty packets and posted on the website. Beginning in fall 2005, the Academic Freedom policy was also placed in the college catalog.

13. Faculty

SCC has a sufficient core of qualified and experienced full-time and adjunct faculty to support its educational programs. Each of the faculty members meets the teaching and hiring requirements that demonstrate competency and sufficient knowledge to teach their assigned classes.

The responsibility of each faculty member to develop and review curriculum and use proper and adequate assessment systems is outlined in each job announcement.

All faculty packets contain a clear statement addressing these facts,
which includes the requirement to meet general education SLOs.

Between 2001 and 2007, more than 50 full-time and approximately 125 part-time teaching positions were added to SCC to enhance support and commitment to existing and new programs and the increased student population. To continue to meet the growing student body, six additional full-time faculty members were hired for the 2007-2008 school year; as resources permit additional full-time faculty will be added.

14. Student Services

A 30,000 square foot building, dedicated to student services and instruction, was completed and opened in the fall of 2004. This new building houses major admission, student services, and records functions, 10 classrooms, and 10 faculty offices.

Under the direction of the new vice president of student services, hired in 2005-2006, the student services department provides a full range of services consistent with the characteristics of its highly diversified student population and the mission of SCC.

The characteristics of SCC students and their needs are carefully monitored on an on-going basis through multiple means, including regular research studies. Inasmuch as SCC’s students are ethnically diverse and have a wide range of educational preparation for college readiness, special services are regularly evaluated and enhanced to serve these students.

The student services division now includes Admissions and Records, Counseling Center, Career Center, Matriculation, Transfer Center, and the Job Placement office. There are also extended opportunity programs and services (EOPS), CalWORKs, Disabled Student Programs and Services (DSPS), Financial Aid, Outreach and Retention Services, Student Activities, as well as a Health Center, Cross-Cultural Center, and the Re-entry Students/Women’s Center.

During the 2005-2006 academic year, the SCC financial aid office received approval from the U. S. Department of Education to be a stand-alone institution for financial aid processing. A full-time administrator was hired, who ensured the implementation of our new program. In 2007-2008 we completed the second full cycle of processing financial aid.

Also hired during the 2000 – 2007 period was a full-time articulation officer, a full-time tenure track counselor, a full-time outreach specialist and a full time student program specialist as well as a learning disability specialist-assistant professor.

In the non-credit, continuing education (adult) division, student services include academic counseling, a career center, outreach department, and the “Passport to Your Future,” program, designed to help students matriculate from non-credit to credit programs.

15. Admissions

Under the direction of the SCC registrar, hired in 2003, and the director of admissions, hired in 2004, SCC’s admission policies are consistent with its mission and appropriate for its programs. SCC has an open enrollment policy for high school graduates, people in possession of a California high school proficiency certificate, people 18 years of age and older who can profit from instruction, and high school students who qualify for the career advancement placement program. The qualifications for admission are clearly identified in the catalog as well as instructions of how to prepare for proper course placement and registration.

16. Information and Learning Resources

In May 2006, a new 40,000 square foot, two-story Library facility opened.
It can accommodate 100,000 volumes. Seventy-seven computer work stations, thirteen group study rooms, a Library Instruction Lab, Faculty Development Center, Student Innovation Zone and a copy, print, and a self-check-out station have created a unique learning environment for students, faculty, and community users.

SCC also has a Media Service Department, Tutoring Center, Math Study Hall, Writing Center, and an Academic Computing Center, and a non-credit/credit Academic Success Center, located on the college campus to help students transition from non-credit to college credit classes.

17. Financial Resources

RSCCD maintains a five percent reserve fund; this is two percentage points above the state requirement for California community colleges.

Despite the economic uncertainty for community colleges during the past few years, and the need to continually update and revise its budget, SCC has maintained a reasonably stable funding base. More importantly, it has continued to plan for financial development by identifying and utilizing all available financial resources to support its mission and educational programs.

All constituents of SCC have agreed that the Educational Master Plan (EMP), implemented in 2007, will serve as the primary planning source for resource allocation. Based on annual evaluation components of the departments through their portfolio planning process (DPP), each of the departments, disciplines, and programs, update their section of the EMP annually, and it is completely revised every five years.

The information from the EMP is used by the College Council, who has budgetary oversight for SCC, to identify resource needs and ensure that the funds are appropriately allocated and distributed to meet SCC’s goals and objectives that support its mission.

In 2002, 65% of the voters passed a $337 million Measure M capital construction bond for RSCCD. This new funding has allowed the district to continue to improve current facilities and build new ones. The first building built on the SCC campus was the Student Services and Instruction building, which opened in the fall of 2004. A new continuing education facility, the Orange Education Center (OEC), was opened in January of 2005, about one mile from the previously rented facilities. Approximately 60% of the funding for the new Library came from a special state revenue bond, with the balance from the Measure M monies. The funding for the new Science Building, which is currently under construction, and the Maintenance facility came from the bond measure. Other buildings are scheduled during the next 5 years as funding permits.

18. Financial Accountability

In all fiscal matters, SCC adheres to specific board-approved policies and procedures that govern the responsible allocation of funds to support all of its educational programs and support services.

The following board policies are examples of how the fiscal procedures of RSCCD are governed: General Money Management policies and procedures BP # 3300; Audit Regulations BP # 3104; Fiscal Powers BP # 3200; Budget Administration BP # 3204; Financial Reports BP # 3216; and Fiduciary and Legal Considerations BP # 3305.

The annual external financial audit is conducted by Macias, Gini & Company, LLP, using approved audits for colleges and universities as its guide.
19. Institutional Planning and Evaluation

At SCC, many committees and councils contribute to institutional planning and evaluation through regularly scheduled meetings.

Facility, faculty, program, and course needs are evaluated and updated on an annual basis through the Educational Master Plan. This “living” document is analyzed and revised annually, as appropriate, to assess the progress of the college toward achieving stated goals that support its mission.

Program reviews are conducted by all departments on a rotating basis, with each department, discipline, and program conducting a complete program review every three years. During this review, each entity reassesses its mission, educational objectives, quantitative/qualitative data, and their progress toward their respective goals.

Considerable progress has been made toward incorporating student learning outcomes (SLOs) into all courses and programs. In the 2002-2003 academic year, a SLO Task Force, which became a permanent sub-committee of the Curriculum and Instruction Council in fall 2004, identified the general education SLOs, implemented workshops to train all faculty members, and began the on-going task of helping faculty write appropriate student learning outcomes. Funding from the Title III grant ensured adequate and proper training of staff to assist them to add SLOs to their respective courses, and a core of faculty is being trained to ensure implementation of SLOs into all future courses and programs.

In addition, faculty are being trained in assessment methodology, and several departments are in the process of researching and implementing measurements at the course level.

20. Public Information

In the fall of 2005-06, SCC published its first independent catalog. This catalog contains accurate and current general information about its mission, courses, programs, and degrees, as well as student services offered.

The names and degrees of faculty members, a list of the governing board members, and other items relative to student attendance, honesty, ethics, and withdrawal are listed in the catalog. Additionally, the catalog gives necessary information for admission, student fees and other financial obligations, degrees, certificates, academic, non-credit, and occupational programs, graduation and transfer requirements, and all major polices that affect students.

These polices include academic regulations and honesty requirements, nondiscrimination, acceptance of transfer credits, grievance and complaint procedures, sexual harassment, and refund of fees. A listing of all related policies and procedures is also posted on the SCC web site.

21. Relations With the Accrediting Commission

The Board of Trustees assures the accrediting commission that Santiago Canyon Colleges demonstrates honesty, integrity, and consistent information to all constituencies, the public, and in its relationship with the accrediting association and all other external agencies.

Furthermore, SCC is proud to provide assurance that it adheres to the eligibility requirements and accreditation standards and policies of the ACCJC, and agrees to comply with all commission requests, directives, decisions, and policies, including making complete, accurate, and honest disclosures of its programs, staff, and activities in its self-study report.
# RS CCD Functions/Mapping of Responsibilities

<table>
<thead>
<tr>
<th>Function</th>
<th>District</th>
<th>College (including Continuing Education)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program/Course Development</td>
<td>Board of Trustees has final approval of all new program/course curriculums. The District provides supporting research necessary to develop new programs such as labor market analysis and demographics of the community. They also provide analysis of program/course productivity and monitor, in partnership with the college, resources available for new programs. Contract Education is a primary responsibility of the District.</td>
<td>Program/course development is the primary focus and responsibility of the college and faculty therein. All new programs/courses must follow the college curriculum approval process via the College Curriculum Council that reports to the Academic Senate. New vocational programs also go through a regional approval process. The college CIO and Vice President of Continuing Education oversee all curriculum processes and report to the president.</td>
</tr>
<tr>
<td>Course Scheduling</td>
<td>The District has responsibility to negotiate the instructional calendar with the faculty union. Those negotiations ultimately impact the scheduling process for the majority of classes.</td>
<td>The colleges are accountable for developing a schedule of classes that reflect the needs of most students. It is the responsibility of the college CIO, vice presidents, and the deans to develop a schedule of classes that meets the FTES goals of the college/district in a productive and efficient manner.</td>
</tr>
<tr>
<td>Program Review</td>
<td>The Assistant Vice Chancellor of Educational Services provides assistance to the college in the development of a program review model. The district research division provides research data that is necessary for any program review. This data includes a productivity measure, course/program student success data, student demographics, and department faculty full-time to part-time ratio.</td>
<td>The colleges, primarily through each Curriculum Council and Academic Senate, develop the program review model. The program review model and the review model process are reviewed on a cyclical basis for its effectiveness. Each program is reviewed every three years. The results of program review lead to appropriate changes within the program to improve student learning outcomes.</td>
</tr>

Responses to Recommendations
RESPONSES TO RECOMMENDATIONS

RECOMMENDATION 1:
The college should continue to develop and refine the Educational Master Plan (EMP), as part of its cycle of evaluation, so that the college goals and objectives are clearly identified, are based upon an analysis of qualitative and quantitative data, are measurable, and are regularly re-evaluated. (1B2, 1B3)

PROGRESS TOWARD RECOMMENDATION
Using the mission statement of the district and SCC as its foundation, SCC completed a second Educational Master Plan (EMP) in the spring of 2006 for the years 2007-2012. The format of the 2002 – 2007 EMP proved to be a successful foundation for the planning and resource allocation for SCC. The document included a collegewide vision, mission statement and goals of the college, as well as discipline, department and program mission statements, goals, objectives, and expected future needs, such as staff, equipment, and/or facilities for each discipline, department, and program (changed to Department Planning Portfolio (DPP) in 2008) The EMP was updated annually and served as a measuring tool to determine the degree to which the college and the DPPs met their stated goals and objectives.

A section was added to the 2007 – 2012 EMP entitled Assessment of Progress.

This section provided an opportunity for the college and each DPP to analyze and document the progress made during the previous five years. The qualitative and quantitative information in the Assessment of Progress section was obtained from analysis of student success rates, student Satisfaction Surveys, and statistical data on attendance, retention, grades, certificates, degree completions, new programs added, and transfer data. This information will assist in planning for the future.

Progress was also evaluated via program reviews, use of technology advisory committees, program/course quadrennial reviews, budgeting, and evaluations. Taken together, this information evaluated the global progress of SCC toward meeting the established goals and objectives of the original EMP.

The systematic cycle of evaluation, integrated planning, resource allocation, and re-evaluation of all components of the college was made possible by the universal acceptance and use of the EMP. It provides the guide for structured and planned growth of the college, and has proven to be highly effective for SCC.

12 Measures of Success (June 2007)
RECOMMENDATION 2:
Building upon the groundwork and planning timeline in place for instructional student learning outcomes (SLOs), the college should complete the work it has begun so effectively in that area.

PROGRESS TOWARD RECOMMENDATION
The college completed its general education and program student learning outcomes. General education outcomes were completed in 2004.

Next, Student Learning Outcomes (SLO) workshops and training provided faculty with the expertise to develop program level SLOs. Core to the development of program and course SLOs was the understanding that these SLOs supported and promoted student achievement and success within the general education curriculum. The completed SLOs are now part of each department and program's educational master plan and are documented in the SCC Educational Master Plan (EMP) document.

In spring 2007, the Student Learning Outcomes Review and Assessment Committee (SLOARC) and the SCC Curriculum Council began the process of designing a course outline that reflected student learning outcomes for all courses. The result was the development of a student learning outcomes matrix, which requires faculty to identify course student learning outcomes and to indicate the relevance of those student learning outcomes to the general education outcomes. Beginning fall 2007, and each year thereafter, all new courses, revised courses, and courses due for quadrennial review will use the new course outline.

The establishment of general education, program and course SLOs has made it possible for the college to embark on the next phase of its five-year, Title III, SLO plan. In fall 2007, the SLOARC began its review of assessment models and tools. This phase addresses the establishment of assessment methods to measure student progress towards achieving course, program, and general education outcomes.

The resources provided by the Title III grant made it possible in fall 2007 to hire a statewide SLO consultant who provided all day training on various assessment models to faculty and administrators representing all academic departments. District assessment experts were also included in the discussions and review process. Assessment methods are now being reviewed and faculty has been trained on assessment methodology.

The Student Learning Outcomes and Assessment Review Committee, along with several departments, has begun to address assessment methods for degree and certificate programs. As a result, several academic departments are developing and piloting various assessment tools.

The Educational Master Plan committee is meeting with the SLOARC to develop technology-driven mechanisms that ensure and reinforce the integral relationship between general education, program and course SLOs, and the Educational Master Plan.

In fall 2007, the Curriculum and Instruction Council revised the program review model to ensure that the achievement of student learning outcomes was an integral part of the process. Outcomes Assessment, which includes a series of standards that serve to guide the faculty in their evaluation, is a major component of the model. To determine the standard of excellence in the Outcomes Assessment component, faculty must engage in a review of documented support evidence.

This review includes an assessment of student learning needs and styles, a review of student learning outcomes for each course, an analysis of the assessment of those outcomes, the interpretation of data to determine the extent of student learning, and the degree to which the course level SLOs support general education student learning outcomes. Based on the interpretation, analysis, and evaluation of the documented evidence, faculty assign a rating to each standard in the component. An action plan must be developed for each sub standard rating as well. Faculty members are required to address how their findings will inform their Educational...
Master Plan.

Significant progress has been made towards implementing SLOs at the program and course levels. The college is continuing to investigate and study appropriate assessment models that will relate the synthesis of learning for students in all programs and courses.

Complimenting the progress made in developing SLOs for courses and programs, the Division of Student Services has made outstanding progress as well.

In the spring of 2006, the Division of Student Services implemented a comprehensive timeline and framework for the establishment of student learning outcomes (SLOs) within every department and program. When fully implemented, this framework will systematically utilize the department’s SLOs in guiding, assessing, and improving all student services departments and programs.

The first planning retreat with program leaders occurred in January 2006; Julie Slark, RSCCD Assistant Vice Chancellor for Educational Services, facilitated the day-long retreat, which featured an SLO primer as well as several small group discussions. On April 9, 2006, the all student services staff meeting was dedicated to “Starting the Student Learning Outcome Dialogue” facilitated by John Hernandez, SCC Vice President for Student Services and Julie Slark, RSCCD Assistant Vice Chancellor for Educational Services. This seminar allowed for an in-depth SLO presentation and small group activities with student services faculty and staff, and provided an overview of how this process would unfold.

On June 7, 2006, student services registered for an audio conference on “Getting Started with Assessment in Student Affairs” that was attended by approximately 15 program leaders and staff. This audio conference provided critical assessment information to get program leaders thinking about identifying appropriate methodologies when conducting assessments.

On July 17, 2006, student services program leaders once more held a one-day planning retreat to finalize a student learning outcomes implementation framework. The following outcomes were achieved from this retreat:

- Organizational flow chart that provided a visual of the Student Services SLO framework
- Timeframe and timelines
- SLO Mapping Grid that matched departmental SLOs with the college’s learning outcomes
- First draft of an SLO status report that will become a template for an annual report.

The timeframe and timelines were useful in operationalizing the SLO framework. The following timeline items were developed and consequently were completed or are in progress:

- December 2006: each Student Services department identified 1-2 SLOs
- January 2007: Staff development session on Assessment Methods
- End of February 2007: Develop assessment plan for SLOs
- 2007-08 academic year: Implement SLO assessment
- June 2008: submit SLO status report for 2007-08

On January 19, 2007, an in-service training was presented on “Completing our SLO Framework through Assessment” facilitated by Dr. Marilee J. Bresciani, Associate Professor of Postsecondary Educational Leadership at San Diego State University. Dr. Bresciani’s research focuses on the evaluation of student learning and development. This seminar provided program faculty and staff an opportunity to receive additional training on outcomes-based assessment and provided the necessary “next steps” for finalizing assessment methodologies in each department and program.

To date 100% of all student services programs have defined the expected student learning outcomes for their areas; identified appropriate assessment
methodologies for their expected student learning outcomes; and are all moving forward with assessing their expected student learning outcomes. Several departments have already completed their assessment cycle and all will have documented this process by June 2008 utilizing a standardized SLO Assessment Report template.

Implementation of assessment plans and SLO measurement will continue on an ongoing basis; this systematic assessment cycle ensures that Student Services (1) implement identified learning outcomes and identify methods to gather data, (2) interprets the results or evidence of the assessment, and (3) evaluates program goals, activities, and outcomes on an on-going basis to ensure decisions for program improvement, planning, budgeting, etc. are shaped by the results of the assessment.

Revised Review Model
RECOMMENDATION 3:
The college should capitalize on the strengths of the new program review process by assuring that the reviews are completed fully and thoughtfully and that the resultant analysis and conclusions inform the annual DDP (now DPP) and EMP process. (IIA1a, IIA1c, IIA2a)

PROGRESS TOWARDS RECOMMENDATION:
The college has made great strides in its efforts to enhance the program review process to assure that the reviews are complete and thoughtfully executed and that the conclusions arrived at through this process inform the educational planning process.

In fall 2007, the Curriculum and Instruction Council reviewed and approved a revised program review model. Major components of the program review include:

1) goals and objectives
2) curriculum and program management
3) resources
4) faculty
5) internal and external communication
6) outcomes assessment—student learning outcomes
7) outcomes assessment—program outcomes.

Each major component consists of a series of standards that serve as prompts to guide faculty in their evaluation. This model, built on the strengths of the existing template, was redesigned to ensure that the evidence of each discipline, department, and program was thoroughly reviewed and documented. In order to determine the standard of excellence for each component of the program review, the model requires a specific review of documented support evidence.

Faculty are required to review, interpret, analyze and evaluate such evidence as:

1) successful course completion rates
2) rates of progress through course sequences
3) demographics and other characteristics of students
4) number of students earning degrees and certificates
5) numbers of students who transfer to four year institutions, take and pass external license examinations or find jobs in the field
6) faculty load information (FTEF per FTES) and other pertinent information.

Such a review produces a rating that indicates whether or not the standard is met, and, if met, to what degree of excellence. In addition, the new program review model includes the requirement that departments describe the actions that will be taken to improve sub-standard ratings.

The revised model requires that once department faculty have completed the review process discussed above, they provide a written description of how the department plans on utilizing what has been learned through the analysis process to inform the DPP and EMP planning process. This is required for each major component of the academic program review.

In spring 2008, the Math, English, Reading, Communication, Physics, Chemistry, Astronomy, Geology, and Library departments used the revised program review model to assess their instructional programs. All academic departments and programs will have completed the process by the end of the academic year 2008-2009.

EVIDENCE FOR RECOMMENDATION 3
Program Review Model—Old Version
Example of Completed Program Review Model—Old Version
Program Review Model—New Version
Example of Completed Program Review Model—New Version
RECOMMENDATION 4:
Student services should revise its program review process to include more interpretation of data and complexity of analysis. Program reviews should meet a high standard of thoroughness, including the specific assessment of SLOs.

PROGRESS TOWARD RECOMMENDATION
To assist in the evaluation of the services and programs of student services, program reviews are scheduled on a three-year cycle that has been developed and implemented since the last accreditation visit. As of fall 2006, all student service areas have completed a program review. However, as was noted in the last accreditation visit, the level and complexity of analysis was uneven and should include more interpretation of data.

At their 2007 retreat, Student Service program leaders reevaluated the student services program review process. This resulted in a revised template that will include the following six sections:

- Signature Page
- Program Description (vision, mission, overview of services-functions, and a funding source statement)
- Organizational Chart
- Student Learning Outcomes (SLO statement, methods, implementation of assessment process, results, decisions, and recommendations)
- Program Accomplishments (qualitative and quantitative data, survey evaluation results, other relevant data to access program effectiveness)
- Analysis (evaluation of strengths and weaknesses, challenges, and opportunities, recommendations for areas of concern; discussion of future direction, including facilities and technology)

Finally, it was decided that rather than having a rotating program review cycle with various due dates, all student service departments and programs will, in the future, submit program reviews at the same time, namely, June 30, 2009 and subsequently every three years.

EVIDENCE FOR RECOMMENDATION 4
July 17, 2007 Student Service Program Leaders Retreat Agenda
Student Services Program Review Template

RECOMMENDATION 5:
As was recommended in ACCJC’s Evaluation Report of 1999, the college should complete the program review process for all learning support services. (II.C.1)

PROGRESS TOWARD RECOMMENDATION
The Tutoring Center & Academic Computer Lab completed a program review in Spring 2005, and the review was updated in Spring 2007 to include the most recent assessment findings and analysis.

The Library reviewed and modified the templates for academic and student services program reviews in Fall 2007 to produce a combined template that allowed the Library to evaluate the effectiveness, strengths, and weaknesses of its academic program as well as of its student learning support service components. The Library piloted the revised template through its program review in Spring 2008.

The Tutoring Center & Academic Computer Lab and the Library will be reviewed in the future on the same three-year timeline established for other academic and student services units.

EVIDENCE FOR RECOMMENDATION 5.
Program Review – SCC Tutoring Center and Academic Computer Lab
SCC Library Program Review template
Academic Program Review – Library
Library Program Review Meeting Minutes 2/19/08
RECOMMENDATION 6:
The library and other learning support services should engage in and complete the identification of SLOs and use them to assess student achievement and thereby identify areas that can improve student learning. (II.A.c, II.B.4, II.C.2)

PROGRESS TOWARD RECOMMENDATION
Identification of Outcomes
The Tutoring Center & Academic Computer Lab and Library have completed the identification of student learning outcomes (SLOs) for their programs.

In early 2008, the Tutoring Center & Academic Computer Lab moved from assessment solely with non-direct measurements to including direct measurement of student learning outcomes related to study skills, such as reading strategies, note-taking, and preparation for examinations.

Outcomes:
Students who access services provided by SCC’s Tutoring Center or Academic Computer Lab will be able to do one or more of the following:

1. Identify main ideas and key words.
2. Demonstrate correct use of punctuation, word choice and formatting rules.
3. Conduct research using EBSCO databases or other internet search engines.
4. Develop Word documents, save files, and send files.
5. Utilize effective time management, information organization, and review techniques.

In Fall 2006, the Library faculty identified student learning outcomes (SLOs) for both credit (i.e., library courses) and other instructional programs (i.e., group bibliographic instruction and reference consultations) as follows:

Credit Instruction Outcomes:
(Library and Information Studies 100, first taught Fall 2007)

1. Students will identify how information is organized and stored.
2. Students will utilize information technology tools to locate and retrieve information.
3. Students will develop appropriate search strategies and determine the information requirements to address their questions or issues.
4. Students will analyze and evaluate information sources for accuracy, authority, currency and ownership.
5. Students will complete research in other libraries.

(Library and Information Studies 103, first taught Fall 2007)

1. Students will identify and utilize Internet-specific vocabulary.
2. Students will understand how information is stored and retrieved on the Internet.
3. Students will identify key terms and form search strategies to locate information.
4. Students will analyze and evaluate web-based information for accuracy, authority, currency and ownership.
5. Students will understand the ethical issues related to Documentation and intellectual ownership of Web-based information.

Bibliographic Instruction and Reference Consultation Outcomes:
After a group library bibliographic instruction (BI) session or a reference consultation, students will do one or more of the following:

1. Identify various types and formats of potential sources of information.
2. Use the library catalog to determine the availability of information in the library.
3. Use library periodicals databases to determine the availability of article information in the library.
4. Retrieve information online and in person.
The instructional librarian currently is revising the LIBI 100 and LIBI 103 courses for quadrennial review in Spring 2008; these courses will incorporate SLOs.

Assessment of Achievement and Improving Student Learning

The Tutoring Center & Academic Computer Lab annually surveys students for their satisfaction with services and self-perceptions of efficacy. The survey instruments and most recent results can be seen in the unit's program review. Beginning in Spring 2008, these indirect assessment measures are being supplemented with direct measurements of SLOs. A pilot assessment will be given to a sample of students who access the Tutoring or Academic Computer Lab services. Recent changes to program operations have been based on the annual surveys, such as opening on Saturdays and adjusting hours of operation one-half hour earlier to meet student needs.

Through its surveys, the Tutoring Center identified the need to work more closely with academic departments and faculty. Beginning in Fall 2007, this was addressed by adding regularly scheduled group study sessions for Human Anatomy (Biology 239), Human Physiology (Biology 249), Introduction to the Solar System (Astronomy 109), Introduction to Stars and Galaxies (Astronomy 110), and Introduction to Geology (Geology 101).

In the Library, faculty revised the written assessment tool used to assess SLOs for bibliographic instruction (BI) in Fall 2006. Using the Fall 2006 results of this assessment tool, the Library faculty tightened the plan of instruction and implemented a new online assessment tool in Fall 2007.

The Fall 2007 online BI assessment results were reviewed and discussed in the context of student learning implications and potential instructional changes during Spring 2008 flex meetings. One result of these discussions was the implementation, on a trial basis, of a pre- and post-test assessment tool during spring 2008.

The Library also surveyed faculty from across the campus to identify the level and type of library-related assignments and faculty preferences regarding library instruction models was distributed in late November 2007. Survey results were reviewed and analyzed for departmental planning implications vis-à-vis instruction program goals and models during Spring 2008 flex and this process will continue in subsequent meetings.

Program Review – SCC Tutoring Center and Academic Computer Lab
RECOMMENDATION 7
The college should review the evaluation process for staff, faculty, and administrators and ensure that all supervisors adhere to written timelines. (III A. 1b)

PROGRESS TOWARD RECOMMENDATION
This recommendation has been met. The college in cooperation with the District Human Resources department now has a process in place to ensure that all supervisors adhere to written timelines.

This process is now used for all classified employees and administrators. Six weeks before an evaluation of an employee is due, supervisors receive a written notice from Human Resources. The due date is clearly given. If the evaluation is past due, the supervisor receives a past due notice and a copy is sent to the president of the college. The president follows through with his appropriate cabinet members to ensure the evaluation is completed.

Failure of a supervisor to comply with the timelines would be cause for a performance review and subsequent performance improvement plan for that supervisor. Since this process has been in place, especially given the second notice to include the President’s level, evaluations are completed by all supervisors according to the timelines.

Faculty evaluations, for both full and part-time faculty, are monitored by the respective dean of each division. To ensure faculty evaluations are done in a timely manner, each division office tracks evaluation timelines of faculty and notices are given to the faculty member involved. The faculty evaluation process for part time, full time tenured, and probationary faculty is strictly followed.

To further ensure timely and proper implementation of evaluations, a series of mandatory training workshops for appropriate supervisors were held. The workshops provided evaluation training related to various employee groups. The district plans to schedule these workshops approximately every two years.

At the Orange Education Center (continuing education division), the vice president discusses evaluations with managers once per semester. Timelines and processes for the various employee groups are discussed in detail.

Of the various employee groups, the 200 plus part-time faculty evaluations pose the greatest challenge for the OEC administrators and staff. To streamline the process and assist with meeting established timelines for the evaluation of part-time faculty members, the administration created and uses an evaluator observation form and a database tracking system.

EVIDENCE FOR RECOMMENDATION 7
Classified evaluation forms
Administrator evaluation forms
Faculty evaluation forms: part time, full time tenured and probationary faculty
Sample division office spreadsheet
Training workshop handouts

RECOMMENDATION 8
The college should work with the district incorporating SLOs into the evaluation process for faculty members and others directly responsible for monitoring SLOs and achieving them. (III A. 1c)

PROGRESS TOWARD RECOMMENDATION
Significant progress was made toward this recommendation. To apply the evaluation process for faculty members more directly to indicate individual responsibility for monitoring SLOs and achieving them, the faculty association and the district negotiated an agreement that a faculty member would include addressing SLOs in their self evaluation, beginning fall semester 2008.

A self evaluation is part of the evaluation process for all full-time faculty. The faculty member is asked to “describe your participation in the improvement of student learning related to student learning outcomes, assessment, and subsequent evaluation.” The administrator will also address their participation and influence relative to SLOs and assessment in their self evaluations.
The district is working with the classified association to include appropriate criteria related to an employee’s responsibility if he or she is directly involved in monitoring and achieving SLOs.

The college recognizes that this responsibility varies per individual, but all groups recognize they have a role in improving student learning.

EVIDENCE FOR RECOMMENDATION 8
Faculty Self Evaluation form
Administrative Self Evaluation form

RECOMMENDATION 9:
The college should develop a technology plan to articulate institutional priorities in addressing technology needs. (IIIC2)

PROGRESS TOWARD RECOMMENDATION:
This recommendation has been met.

The SCC Technology Committee worked on a Technology Master Plan during the academic year 2006 – 2007. It was finalized and approved by the committee in the fall 2007. It was then forwarded to Academic Senate and the College Council for approval.

The new Technology Plan is a comprehensive technology plan for Santiago Canyon College’s main campus and the campus of the continuing education division (Orange Education Center). The time period coincides with the Educational Master Plan (EMP). A modified version of the Tech Plan was included in the EMP document.

The Technology plan is a formal, bound document, with a unique front cover. It combines a comprehensive written narrative supported by 33 appendices. These appendices consist of database reports, spreadsheets, charts, and diagrams.

In addition to the printed report, the technology plan is posted on the college web site www.sccollege.edu. It can be found under the Technology Committee web page.

EVIDENCE FOR RECOMMENDATION 9
Copy of EMP
Copy of Technology Plan

RECOMMENDATION 10:
The college, with the support of the district, shall examine the budget allocation model and ensure that the college identifies all discretionary general and categorical funds that are available to support the needs of the college. (III D 1a)

PROGRESS TOWARD RECOMMENDATION:
During the past two years, the college has received additional funding from a variety of sources, including a Title III Grant, Career Technical Education Grant, Basic Skills Initiative Grant, and Instructional Equipment Grants.

At the same time, the growth in FTES has increased the college’s allocation of the general funds based on the district budget allocation model.

The college and the district regularly examine the budget allocation model.

Both the SCC Student Services and Administrative Services vice presidents are members of the District Budget Planning and Resource Allocation (BAPR) workgroup that meets eight to nine times annually to look at specific budget issues, many of which relate specifically to the budget allocation model.

The workgroup is currently evaluating what expenditures are fixed costs. In the current budget planning process, fixed costs are fully funded by taking monies off the top of general apportionment. Once this has been completed, the colleges and district offices are allocated their share of the general apportionment dollars. The larger the fixed costs, the fewer funds available to allocate to the colleges.
RECOMMENDATION 10
2005-2006 RSCCD Adopted Budget
2007-2008 RSCCD Adopted Budget

PROGRESS TOWARD RECOMMENDATION
In 2005, the District contracted with TCS (Total Compensation Systems, Inc.) to prepare any actuarial report on the costs of funding other post-retirement benefit liabilities (OPEB obligations). The completed report, dated December 19, 2005, determined that the actuarial valuation for retiree OPEB liability (district wide) to be $111,243,936. The Annual Required Contribution (ARC) was identified as $7,535,015. Of this amount, $2,637,112 is the annual “pay-as-you-go” payment for the retiree health insurance directly to the providers. The pre-funding annual amount in the ARC for current employees and current retirees is $4,897,903.

The District is an early implementer of GASB 45. As of March 31, 2008, the District has $21,306,940.72 in the Retiree Benefits Fund. The District annually contributes, in addition to paying the actual current year retiree benefits premiums, an amount equal to 1% of total salaries to the Retiree Benefits Fund. This is a contribution of approximately $1.3 million for the 2007-2008 fiscal year.

The District contracted with TCS once again in 2007 to conduct an updated actuarial report for OPEB obligations in conformance with GASB 45. The final report is expected to be completed by June 2008. We would expect that increased updated numbers will be provided for the total liability and ARC.

RECOMMENDATION 11
The college, with the support of the district, determines the annual costs of funding its post-retirement benefit liabilities as soon as possible, so that the potential impact to the college budget allocation can be incorporated into the financial planning process. (III D.1c)
Progress on Planning Agendas
The institution demonstrates strong commitment to a mission that emphasizes achievement of student learning and to communicating the mission internally and externally. The institution uses analyses of quantitative and qualitative data and analysis in an ongoing and systematic cycle of evaluation, integrated planning, implementation, and re-evaluation to verify and improve the effectiveness by which the mission is accomplished.

I.A. MISSION

The institution has a statement of mission that defines the institution's broad educational purposes, its intended student population, and its commitment to achieving student learning.

Readers Note: Many of the SCC planning agendas in this section address SLO issues. Therefore, the focus of the individual planning agendas is underlined to designate the emphasis of the specific planning agenda's progress.

Planning Agenda

SCC will continue to analyze the needs of its students and the community based on the growth of the student population, the demographics of the students and the reason they indicate they are coming to SCC, local labor and industry needs, and the make-up of the community. The institution will add new programs and services as needed.

Progress Toward Planning Agenda

The goal of SCC is to keep its programs current and relevant for a variety of students, including those seeking basic skills or remediation, personal enrichment, career training or transfer preparation as well as incumbent workers in need of advanced skills, certification or professional development.

This relevancy is achieved through ongoing analysis of the needs of students through a variety of data collected from local in-class surveys, student feedback, counselor classroom visitation, tracking of enrollments, assistance from RSCCD Research Department, government documentation, and active technical advisory committees.

To ensure that all agreements are current and viable and new programs are researched, SCC's articulation officer maintains ongoing communication with all disciplines and transfer institutions.

As a result of this data gathering system, new programs (Electrical Certification) and courses (Arborist, others) have been added to SCC's catalog based on labor market needs. Other programs have been expanded to new locations and times (Human Development at the County Office of Education, Public Works classes held during the day for county employees.) New services are added as requested. These have included web advising, online registration, and a number of more comprehensive reading courses.

SCC developed a new Elementary Education AA degree that was approved by the Board of Trustees and the State Chancellors office. It will be offered for the first time in the fall of 2008.

Student Services added the College Assistance Migrant Program (C.A.M.P.), which is a federally funded program designed to increase the number of migrant students attending college and to assist them in their first year of college.

Schedules have been developed, modified, and enlarged based on enrollments (early weekday sections of transfer courses) and more online offerings implemented in several disciplines. These have included Human Development, Public Works, and online components such as Blackboard® have been added along with use of in-class technology (student use of “clickers”) in several courses in Psychology, French, Human Development, and Project Management.
Labor needs research, requests of local employers, and working with partners such as Workforce Investment Board resulted in additional courses offered in areas of certification for landscape professionals, continuing education for Water Utility workers and in community services and fee-based courses such as Real Estate Exam Preparation. Other fee-based courses through Community Services were based on community requests and surveys.

To serve the growing English learner population in the local workforce, a Vocational English as a Second Language (ESL) component of the Arborist program was offered in conjunction with Continuing Education (non-credit programs). A Spanish-speaking instructional assistant was hired to assist with technical water utility math, and a lab aide was hired to assist in the CAD (computer aided drafting) class.

All occupational programs have active Technical Advisory Committees, which meet several times each year, including Surveying, Human Development, Public Works, Water Utility, and Arborist.

I.B. IMPROVING INSTITUTIONAL EFFECTIVENESS

The institution demonstrates a conscious effort to produce and support student learning, measures that learning, assesses how well learning is occurring, and makes changes to improve student learning. The institution also organizes its key processes and allocates its resources to effectively support student learning. The institution demonstrates its effectiveness by providing: 1) evidence of the achievement of student learning outcomes, and 2) evidence of institution and program performance. The institution uses ongoing and systematic evaluation and planning to refine its key processes and improve student learning.

I.B.1

Planning Agenda

SCC will use appropriate activities to ensure that the collaborative spirit of the college continues and remains focused on the same priorities. At the same time, SCC will use its five-year SLO plan for training faculty and staff to develop appropriate SLOs for their respective programs and courses. The Title III funding received effective fall 2005 will help realize this plan by supporting training of a core of teachers to assist with the development of SLOs for future programs and courses.

Progress Toward Planning Agenda

The college continues to address this planning agenda. Training of faculty and staff in SLOs has been a priority for the college. Title III funding has supported a variety of activities designed to assist in the development of SLOs at the program and course level.

In Year One of the grant these activities included:

1) Four workshops conducted for full and part time faculty which served to provide basic information regarding SLOs
2) Attendance by faculty leaders and administrators at various SLO and Assessment conferences and workshops
3) A follow up survey of faculty in spring 2005 to measure faculty understanding of SLOs as a result of training activities, and
4) The development of a SLO manual to be used in training of faculty.

Year Two activities included:

1) In-depth SLO and assessment training by the college’s SLO facilitator for 18 faculty leaders, including department chairs
2) An investigation of various types of assessment models and faculty dialogue regarding appropriate assessment models
3) Discussions with the RSCCD Director of Research regarding assessment models and the establishment of an assessment database

4) Attendance at SLO and Assessment conferences and workshops

5) The development of a revised course outline to include SLOs.

Year Three activities included:

1) In-depth SLO and assessment training for an additional 15 faculty

2) Continued work with RSCCD Director of Research regarding the establishment of an assessment base

3) College-wide training presented by an assessment consultant on assessment models.

These training activities have resulted in the establishment of SLOs at the program level for all disciplines. The implementation of SLOs at the course level is an ongoing process that is expected to be completed by fall 2010. SLOs are required for all new courses and for courses in the quadrennial review process.

I.B.3

The institution assesses progress toward achieving its stated goals and makes decisions regarding the improvement of institutional effectiveness in an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and re-evaluation. Evaluation is based on analyses of both quantitative and qualitative data.

Planning Agenda

Prior to the next EMP revision, the college will evaluate its global process toward meeting the established goals and objectives of the five-year plan (2002–2005).

Progress Toward Planning Agenda

In the fall of 2006, a college-wide EMP Planning Day was held on the campus of the Orange Educational Center. During the first session of the meeting, an in-depth discussion was held to evaluate the college’s success in meeting its original goals and objectives during the years 2001-2006. The conclusion of the discussion indicated that activities met many of the goals of the first EMP. This is reflected in the second EMP under the section title Assessment of Progress.

In the second session of the day, faculty, staff, and administrators divided into groups to evaluate and, as necessary, re-write the goals and objectives of the college for the years 2007-2012. The results of this day-long activity was that a new set of goals and objectives were developed that incorporated the needs and expectations of the group.

I.B.6

The Institution assures the effectiveness of its ongoing planning and resource allocation processes by systematically reviewing and modifying, as appropriate, all parts of the cycle, including institutional and other research efforts.

Planning Agenda

Upon completion of the first five-year cycle of the EMP, a thorough evaluation will be made.

Progress Toward Planning Agenda

At the college-wide EMP Planning Day, for the third session, all staff members participated in an evaluation of the current EMP template and analyzed a new proposed EMP template prepared by the EMP committee. The final decision was to add a section to the current EMP entitled “Assessment of Progress.”
I.B.7
The institution assesses its evaluation mechanisms through a systematic review of their effectiveness in improving instructional programs, student support services and library and other learning support services.

Planning Agenda
In 2006 – 2007, SCC will engage in a college-wide dialogue to evaluate the effectiveness of the EMP during its first five-year cycle and to determine how the process affected the various departments, disciplines, and programs.

Progress Toward Planning Agenda
At the all-day Educational Master Plan (EMP) planning meeting faculty, staff, and administrators had the opportunity to review the process and results of using the EMP. The College Council and the EMP Committee found that using the EMP as the foundation for planning and resource allocation for departments, disciplines, and programs had been successful and should continue to be the master plan for the college.

Evidence for I.B.7
EMP Plan 2005 – 2012
EMP Meeting Agenda for Day Long Planning
The institution offers high-quality instructional programs, student support services and library and learning support services that facilitate and demonstrate the achievement of stated learning outcomes. The institution provides an environment that supports learning, enhances student understanding and appreciation of diversity, and encourages personal and civic responsibility as well as intellectual, aesthetic, and personal developments for all of its students.

II.A INSTRUCTIONAL PROGRAMS

The institution offers high-quality instructional programs in recognized and emerging fields of study that culminate in identified student outcomes leading to degrees, certificates, employment, or transfer to other higher education institutions or programs consistent with its mission. Instructional programs are systematically assessed in order to assure currency, improve teaching and learning strategies, and achieve stated student learning outcomes. The provisions of this standard are broadly applicable to all instructional activities offered in the name of the institution.

II.A.1(c)

The institution identifies student learning outcomes for courses, programs, certificates, and degrees; assesses student achievement of those outcomes; and uses assessment results to make improvements.

Planning Agenda

SCC will implement the Title III five-year plan by meeting the timelines established in the 5-year Student Learning Outcomes (SLO) plan. This will ensure the systematic implementation of appropriate SLOs and assessment into all programs and courses. Following the steps outlined in the five-year plan, SCC expects to have SLOs, including the assessment component, implemented in all course outlines and programs by 2010.

Progress towards Planning Agenda

The college continues to make progress towards this planning agenda. The Title III grant has served as a guide towards the implementation of a systematic and thorough process. The grant has provided guidance in three areas:

1) Coordination of the implementation process.
2) Training of faculty in the development of SLOs.
3) The identification and adoption of appropriate assessment models.

First, in an effort to coordinate and facilitate the development of SLOs at the program and course level, the Title III grant required the appointment of a faculty SLO facilitator to oversee the SLO implementation. Under the auspices of the Curriculum and Instruction Council, the SLO facilitator established a faculty advisory committee, the Student Learning Outcomes Resource Committee (SLORC) (was re-named the Student Learning Outcomes and Assessment Review Committee (SLOARC) in 2008), to provide information and input in all aspects of the implementation process.

Second, the Title III grant required the development of training materials and workshops to increase faculty knowledge of SLOs and assessment measures. Workshops and individual consultations conducted by the SLO facilitator have assisted in this effort.

In addition, the grant requires the establishment of a “training the trainers” model to ensure the sustainability of SLO implementation once the grant has ended. Finally, the Title III grant required the collection of relevant course level data, a review of various assessment models, and the selection of appropriate models for SCC.

The established timeline and the steps outlined in the five-year SLO plan have assisted in the development of program and course level SLOs. Academic departments
that have established SLOs are beginning to develop assessment methods to measure student progress towards achieving outcomes. To assist in this process the SLOARC has invited faculty to join them in discussions about SLOs and assessment plans for SLOs at department and course level.

II.A.2

The institution assures the quality and improvement of all instructional courses and programs offered in the name of the institution, including collegiate, developmental, and pre-collegiate courses and programs, continuing and community education, study abroad, short-term training courses and programs, programs for international students, and contract or other special programs, regardless of type of credit awarded, delivery mode, or location.

II.A.2(a)

The institution uses established procedures to design, identify learning outcomes for, approve, administer, deliver, and evaluate courses and programs. The institution recognizes the central role of its faculty for establishing quality and improving instructional courses and programs.

Planning Agenda

SCC will follow its five-year SLO plan, which establishes student learning outcomes throughout the curriculum. (II.A-22). The SCC Curriculum Council and Student Learning Outcome Committee will design a course outline that reflects written student learning outcomes in all courses.

Progress Toward Planning Agenda

The college has met this planning agenda. In spring 2007, the Student Learning Outcomes Resource Committee (changed to the Student Learning Outcomes and Assessment Review Committee in 2008) and the SCC Curriculum Council began the process of designing a course outline that reflected student learning outcomes for all courses.

At the onset of this process, the SLO Committee reviewed sample course outlines from other colleges and gathered input from the SCC Curriculum Council. The result was the development of a student learning outcomes matrix. This matrix requires faculty to identify course student learning outcomes and to indicate the relevance of those student learning outcomes to the general education outcomes established by SCC in 2004. The SCC Curriculum Council approved the new course outline, which includes the SLO matrix.

Beginning fall 2007, and each year thereafter, all new courses, revised courses, and courses due for quadrennial review will use the new course outline.

II. A.2(b)

The institution relies on faculty expertise and the assistance of advisory committees when appropriate to identify competency levels and measurable student learning outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution regularly assesses student progress towards achieving those outcomes.

Planning Agenda

SCC has a five-year plan to establish student learning outcomes and assessment methods for all degree and certificate programs, including vocational/occupational programs. (II A-22)

Progress Toward Planning Agenda

The college continues to address this planning agenda. The establishment of general education, program, and course SLOs has made it possible for the college to embark on the next phase of its five-year, Title III, SLO plan. This phase addresses the establishment of assessment methods to measure student progress towards achieving course, program, and general education outcomes.

The Student Learning Outcomes and Assessment Review Committee (SLOARC) and several departments have begun to address assessment methods for degree
and certificate programs. Individual departments have undertaken the task of piloting various assessment strategies and methods.

The SLO Facilitator and members of the SLOARC committee have participated in regional and statewide assessment workshops and training. Collegewide efforts in this area have included an all-day workshop on assessment methodologies presented by a well-known statewide expert in student learning outcomes and assessment. Additionally, SLOARC has held several workshops on assessment for faculty per the Title III SLO plan.

This training has served as the impetus for collegewide efforts to implement assessment methods at the course and program level.

II.A.2(c)

High-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all programs.

Planning Agenda

SCC will complete its five-year SLO plan to establish student learning outcomes at the program and course level and will relate the assessment component to the synthesis of learning for students in all programs. (II. A-22).

Progress Toward Planning Agenda

The college continues to address this planning agenda. The college has completed its program student learning outcomes. Within the next four years, through its curriculum review process, all courses will have course level student learning outcomes.

Assessment methods are being reviewed and faculty have been trained on assessment methodology. Individual departments have begun to review assessment measures, and to pilot and implement those measures.

The course approval process requires the identification of course student learning outcomes and their relevance to general education outcomes.

Additionally, it requires faculty to address standards of achievement by including a description of how student learning will be assessed.

The Educational Master Plan committee is meeting with the Student Learning Outcomes and Assessment Review Committee to develop technology assisted integration that ensures and reinforces the integral relationship between course and program SLOs and the Educational Master Plan and the Department Program Portfolios (DPPs), (formerly the Discipline, Department and Program (DPP) portfolios.)

II.A 2(d)

The institution uses delivery modes and teaching methodologies that reflect the diverse needs and learning styles of its students.

Planning Agenda

Recognizing the growing importance technology has in education, the SCC Technology committee will examine the potential for expanding on-line education and seek ways in which technology in the classroom can provide more diverse, effective teaching modalities to enhance instruction and provide for different student learning styles.

Progress Toward Planning Agenda

This planning agenda is met; however, the efforts to continue expanding on-line education and technology in the classroom are ongoing. The technology committee is a pro-active committee that supports and promotes technology training to full and part time faculty. In spring 2008, the committee sponsored “Technology Series,” a three-day training series. The trainings were well attended and included these topics: Power Point Workshop, Podcasting Presentations with Narration, Datatel is Coming, Blackboard for Onsite Classes, How to Design and Publish your Web Page, and Classroom Presentations with Projection Systems.
The committee takes pride in researching state-of-the-art technology that would be advantageous yet reasonable to bring to the classroom. They arrange for various vendors to demonstrate various technologies and the demonstrations are open to all faculty and administrators. A quarterly “Technology Newsletter” is distributed to all faculty, staff, and the Board of Trustees. The Chief Instructional Officer is a member of the Technology Committee and provides input and support in bringing appropriate technology to the classroom including distance education. The college values what technology can bring and the impact it will have in the future of education.

The distance education offerings are increasing at a reasonable pace. Currently, two full-time faculty are released from their teaching responsibilities to coordinate the Distance Learning offerings at SCC. They provide the support and training for faculty on technology and instructional methodologies associated with online education. The request for a full-time Distance Learning Education Coordinator/Specialist will be placed on the faculty request for the 2009-2010 academic year as the number one priority for the college.

II.A.2(e)

The institution evaluates all courses and programs through an on-going systematic review of their relevance, appropriateness, achievement of learning outcomes, currency, and future needs and plans.

Planning Agenda

The student learning outcomes of the program review model will be enhanced to focus more on the achievement of SLOs.

Progress Toward Planning Agenda

The Curriculum and Instruction Council has revised the program review model to ensure that the achievement of student learning outcomes is an integral part of the process. Outcomes Assessment, which includes a series of standards that serve to guide the faculty in their evaluation, is a major component of the model.

In order to determine the standard of excellence in the Outcomes Assessment component, faculty must engage in a review of documented support evidence. This review includes:

1) An assessment of student learning needs and styles.
2) A review of student learning outcomes for each course.
3) An analysis of the assessment of those outcomes.
4) The interpretation of data to determine the extent of student learning.
5) The degree to which the course level SLOs support general education student learning outcomes.

Based on the interpretation, analysis and evaluation of the documented evidence, faculty assign a rating to each standard in the component. An action plan must be developed for each sub standard rating. Faculty members are required to address how their findings will inform their Educational Master Plan.

By spring 2008, ten departments will have utilized the revised model to complete program reviews. By spring 2009, all departments will be using the new model in their program review process.

II.A.2(f)

The institution engages in ongoing, systematic evaluation and integrated planning to assure currency and measure achievement of its stated student learning outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution systematically strives to improve those outcomes and makes the results available to appropriate constituencies.

Planning Agenda

SCC will establish SLOs at the course and program level in the next five years in order to assess student learning based on identified, measurable outcomes. Those assessments will be used to improve student learning outcomes.
Progress Toward Planning Agenda

The college continues to make progress towards this planning agenda. The five-year SLO plan funded by the five-year Title III grant (2005 to 2010) is being followed successfully. At the time of this writing, the college is in the third year of this process. Program level outcomes have been completed as reflected in the 2007-2012 Educational Master Plan. General Education Outcomes were completed in year one. The college is now in the process of completing student learning outcomes at the course level and plans to complete that process by the end of fall semester 2010.

The development of general education, program, and course level SLOs made it possible for the college to begin its dialogue regarding assessment measures. In 2006, the Student Learning Outcomes Resources Committee (now the Student Learning Outcomes and Assessment Review Committee (SLOARC) began its review of assessment models and tools. District assessment experts were included in the discussions and review process.

To ensure that assessment is addressed, the revised curriculum outline includes a student learning outcomes matrix and requires faculty to identify how student learning will be assessed. The revised program review provides faculty with the opportunity to evaluate to what degree SLOs are systematically assessed by specific and measurable performance criteria and how these SLOs result in improvement and change.

The resources provided by the Title III grant made it possible in fall 2007 to hire a statewide SLO consultant who provided all day training on various assessment models to faculty and administrators representing all academic departments. As a result, several academic departments are developing and piloting a number of assessment tools.

Members of the Student Learning Outcomes and Assessment Review Committee are central to the support of SLOs and assessment. Title III funding provides the resources necessary to accomplish the SLO five-year plan. We are already planning the components of a proposal for a Title V grant that would continue to fund our efforts in SLOs and assessment.

II.A.2(g)

If an institution uses departmental course and/or program examinations it validates their effectiveness in measuring student learning and minimizes test biases.

Planning Agenda

As SLOs for math courses and programs are completed, the department will develop assessment criteria to measure the effectiveness of student learning.

Progress Toward Planning Agenda

The Mathematics Department began a department-wide assessment of courses in the spring 2007. Course coordinators chose one or more of the SLOs from respective courses and determined how they could be assessed across all sections of the course. Assessment is now a standing agenda item at monthly meetings of the department.

Most of the coordinators used a departmental final already in place or asked instructors to add questions to the finals in the courses where there are no departmental exams. One instructor created an attitudinal survey that students took online. Coordinators collected data and drew conclusions based on their findings. All of these results were presented at department meetings, and are on the department website under the heading “SLOs and Assessments.” The process was repeated at the end of the Fall 2007 semester.

Findings from spring 2007 and fall 2007 indicated areas where students were being most successful, areas where students were not being as successful, and some SLOs that needed improvement. Some SLOs were rewritten as well as some of the department’s final exams. Findings from spring and fall 2007 can be found on the department website.

A subcommittee, funded by a grant in spring 2007, worked to determine how to
implement study skills in the classroom as well as different assessment techniques. At the joint SCC/SAC department meeting in August 2007, there was a presentation on Angelo/Cross assessment techniques. As a follow-up to the workshop, several faculty members are piloting portfolios and will present their findings to the department.

The department will continue to collect information, both on student learning and on the effectiveness of different assessment techniques.

II.A.2(h)

The institution awards credit based on student achievement of the course’s stated learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education.

Planning Agenda

SCC will follow its five-year SLO plan, supported by Title III funding, to establish SLOs within all courses.

Progress Toward Planning Agenda

The college continues to address this planning agenda. With the adoption of the five-year Title III plan in 2005, the college began on a plan to train faculty in the development of student learning outcomes at the course level. This was accomplished through:

1. Collegewide workshops that served as an introduction and orientation for all faculty, full and part time
2. Focused workshops aimed at addressing discipline specific student learning outcomes.
3. One on one peer mentoring.

The Student Learning Outcomes facilitator, with the assistance of the Student Learning Outcomes and Assessment Review Committee (SLOARC), provided the expertise and guidance for their efforts. The outcome of these various training opportunities has led to the establishment of SLOs at the course level.

To ensure that each SCC course contains SLOs, a revised course outline was developed that includes a student learning outcomes matrix. This matrix requires the identification of SLOs for the course, and establishes their relationship to the general education SLOs. By the end of fall 2010 all course outlines will include student learning outcomes. The Student Learning Outcomes and Assessment Review Committee is currently working on assisting with this process.

II.A.2(i)

The institution awards degrees and certificates based on student achievement of a program’s stated learning outcomes.

Planning Agenda

SCC will follow its adopted five-year plan to establish SLOs at the program level and will then award degrees and certificates based on student achievement of a program’s stated learning outcomes.

Progress Toward Planning Agenda

The college continues to make progress on this planning agenda. Program outcomes were developed for the 2007-2010 Educational Master Plan for each discipline, department, and program. The SLOs at the course level provide a building block for student achievement toward the global program outcome and have relevance to one or more of the general education outcomes.

The faculty is now starting the process of developing assessment methods and instruments to measure student achievement. When this phase is completed, there will be concrete evidence of successful student achievement of the SLO outcomes.

Future plans may include the development of a “mapping” tool to visualize the relationship of Student Learning Outcomes at the course, certificate, and program level to include general education.

II.A.3

The institution requires of all academic and vocational degree programs a component
of general education based on a carefully considered philosophy that is clearly stated in the catalog. The institution, relying on the expertise of faculty, determines the appropriateness of each course for inclusion in the general education curriculum by examining the stated learning outcomes for the course.

General education has comprehensive learning outcomes for the students to complete, including the following:

II.A.(a)
An understanding of the basic content and methodology of the major areas of knowledge; areas include the humanities and fine arts, the natural sciences and the social sciences.

Planning Agenda
SCC will follow its adopted five-year plan to establish SLOs at the program and course level. When this is accomplished, the general education SLOs and the individual course and program SLOs will be fully integrated and compatible.

Progress Toward Planning Agenda
The college has made progress toward achieving this planning agenda.

Student Learning Outcomes workshops and training has provided faculty with the expertise to develop program level SLOs, which are part of each department’s and program’s educational master plan. The program SLOs can be found in the SCC Educational Master Plan document.

A central tenet in the development of program and course SLOs was the understanding that these SLOs supported and promoted student achievement and success within the general education curriculum. The Outcomes Assessment Component in the revised Program Review model requires an analysis and evaluation of the how course and program SLOs contribute to general education learning goals and outcomes.

Each course level SLO relates to one or more of the SCC general education outcomes. To ensure that the courses collectively support the general education outcomes, a master spreadsheet is maintained. This spreadsheet, the general education matrix, allows the college to show the relationship between course level and general education outcomes. At the end of the five year period, SCC will have a matrix that relates course level outcomes to general education outcomes.

II.A.3(b)
A capability to be a productive individual and life long learner; skills included oral and written communication, information competency, computer literacy, scientific and quantitative reasoning, critical analysis/logical thinking, and the ability to acquire knowledge through a variety of means.

Planning Agenda
SCC will continue to enhance the alignment among its general education outcomes in Plan A (SCC catalog) and general education courses.

Progress Toward Planning Agenda
The college continues to address this planning agenda. The development of the course outline SLO matrix has made it possible for the college to align the general education outcomes in Plan A and general education courses. Through the process of identifying the student learning outcomes at the course level and the ability to identify the relevance of these outcomes to the general education outcomes, the college will have the capability of ensuring that the general education curriculum has comprehensive learning outcomes for the students to complete.

To ensure that all students who receive an AA degree from SCC are meeting the general education learning outcomes, courses that relate to each of the general education outcomes are offered regularly to ensure successful student mastery of all four of the general education learning outcomes.

The SLO general education matrix will provide that information and guide
the college in the alignment of general education courses in Plan A to the SCC general education outcomes.

II.A.3(c)

A recognition of what it means to be an ethical human being and effective citizen: qualities include an appreciation of ethical principles; civility and interpersonal skills; respect for cultural diversity; historical and aesthetic sensitivity; and the willingness to assume civic, political, an social responsibilities locally, nationally, and globally.

Planning Agenda

To help students develop an increased awareness of “understanding and awareness of environmental issues” as well as “understand the way science develops and to analyze scientific data,” the college will ensure that these outcomes are addressed in appropriate courses.

Progress Toward Planning Agenda

This planning agenda has been met. The science faculty has addressed this planning agenda as they update course content to include student learning outcomes.

Astronomy promotes awareness, scientific knowledge and critical thinking of current environmental concerns by including learning related to the greenhouse effect, plate tectonics, and the solar system.

Chemistry has developed SLOs that ensure students are able to read, analyze and interpret data to draw valid scientific conclusions and communicate those conclusions in a clear and articulate manner and address environmental issues in the proper handling and disposal of chemicals.

The Physical Sciences included learning related to the process of nuclear fusion, the pros and cons and the impact on the environment. They also include the operation of electrical power plants and the effect they have on the environment. Energy efficiency is a major topic of discussion as is the alternative use of fuel sources and how these topics relate to the environment.

Geology analyzes the effects of global warming and its effect on the environment and also stresses learning about the earth’s water sources and the impact of those resources on the environment.

Lastly, Biology, especially Biology 212, Ecology includes learning related to the effect animals and humans have on the environment.

As science courses are reviewed and student learning outcomes are developed, a connection to environmental issues will be emphasized.

II.A.4

All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core.

Planning Agenda

SCC will continue to increase the number of degrees and certificates which students can earn at SCC.

Progress Toward Planning Agenda

SCC developed a new Elementary Education AA degree that was approved by the Board of Trustees and the State Chancellors office. It will be offered for the first time in the fall of 2008.

Ten certificates were approved during the period of catalog year 2005-2006 to the catalog year 2008-2009.

As the college continues to grow, additional degrees and certificates will be added. The needs of the community are consistently monitored as well as labor market needs to ensure that degrees and certificates offered are relevant.

II.A.5

Students completing vocational and occupational certificates and degrees demonstrate technical and professional competencies that meet employment and other applicable standards and are prepared for external licensure and certification.

Planning Agenda

SCC’s vocational and occupational programs will continue to work with advisory groups and the district’s research department to analyze employment needs, and will adjust its course and program offerings as appropriate.

Progress towards Planning Agenda

The college meets this planning agenda through various avenues and systems.

- Every two years, vocational programs examine labor market trends and enrollment trends to ensure that the programs offered meet student expectations and labor market needs.
- The vocational and occupational programs at SCC review their curriculum on an annual basis and adjust the curriculum as needed to stay current with the training and skills required by employers who hire SCC students.
- SCC has a strong advisory component for all vocational and occupational programs offered. There is an annual Technical Advisory Committee meeting where the members of all committees meet in their respective groups. The Chancellor, college president, members of the Board of Trustees, faculty, and student representatives also are included in this annual event.
- Many of the Advisory groups also meet several additional times each year; this is especially true for the growing programs, such as Water Utility Sciences, and Survey and Mapping.

II.A.6

The institution assures that students and prospective students receive clear and accurate information about educational courses and programs and transfer policies. The institution describes its degrees and certificates in terms of their purpose, content, course requirements, and expected student learning outcomes. In every class section students receive a course syllabus that specifies learning objectives consistent with those in the institution’s officially approved course outline.

II.A.6(a)

The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.

II.A.6(a)

Planning Agenda

The SCC Student Services Council will review, assess, and possibly revise the Transfer Planning Guide, and will analyze whether to incorporate this information as a section in the catalog. Requests will be made to include the cost of publishing extra copies of the Transfer Planning Guide to ensure that all prospective transfer students receive a copy. (II.A-46)

Progress Toward Planning Agenda

In conjunction with the articulation officer, counselors, and Transfer Center staff, student program leaders conducted a thorough review and assessment of the methods used by SCC to provide students
with access to comprehensive transfer planning. The review included a discussion of information to be included in the college catalog as well as the past practice of publishing an annual Transfer Planning Guide.

The following methods were adopted as the most effective means of disseminating accurate and up-to-date UC, CSU, and independent colleges course articulation, university program information, and transfer admission practices to SCC prospective transfer students:

1) Publish general education plans for CSU (Plan B) and UC (Plan C) in the college catalog
2) Publish the UC/SCC Transfer Course Agreement in the college catalog
3) Publish general transfer information and California Articulation Number (CAN) information in the college catalog
4) Provide Articulation Transfer Guides for specific majors and universities in the Transfer Center and on the Transfer/Articulation website
5) Provide helpful, easy-access web links to UC, CSU, and independent colleges on the Transfer/Articulation website
6) Widely disseminate UC and CSU transfer educational planning packets at all Transfer Center workshops and events, career planning classes, Parent Night events, new student orientations, and to counselors for their use with students during academic counseling sessions
7) Publish transfer information in the Transfer News newsletter

II. B STUDENT SUPPORT SERVICES

The institution recruits and admits diverse students who are able to benefit from its programs, consistent with its mission. Student support services address the identified needs of students and enhance a supportive learning environment. The entire student pathway through the institutional experience is characterized by a concern for student access, progress, learning, and success. The institution systematically assesses student support services using student learning outcomes, faculty and staff input, and other appropriate measures in order to improve the effectiveness of these services.

II.B.1
The institution assures the quality of student support services and demonstrates that these services, regardless of location or means of delivery, support student learning and enhance achievement of the mission of the institution.

Planning Agenda

The student services departments/programs of SCC will continue to participate in college-wide activities to ensure that the programs and services they offer contribute to students’ ability to successfully reach their educational goals.

Progress Toward Planning Agenda

In a spirit of collegiality, all student services departments and programs communicate and work closely with each other and with college-wide activities in order to maximize available resources, achieve the common goal of student success, and to maintain visibility in the campus community. The following serve as examples of how this is achieved:

- The division of Student Services holds regular monthly meetings for its program leaders; these on-going meetings serve as a means to disseminate critical information, identify issues and problem solving, provide opportunities to think creatively, as well as a way for program leaders to connect interpersonally with each other.
- In order to increase inter-departmental communication and to highlight our on-going accomplishments, a weekly Student Services report is prepared with entries from all units & departments. This report is widely distributed to staff electronically as well as to the campus PIO (public information officer) who utilizes the information to highlight the
The president's weekly “What's New at SCC” electronic email that is sent to all faculty and staff.

- The Dean of Counseling & Student Support Services (which includes Educational Opportunity Program Services (EOPS/CARE as well as CalWorks) is the college's matriculation officer and reports directly to the Vice President of Student Services and has an indirect reporting relationship to the Vice President of Academic Affairs. These reporting relationships ensure that she is an integral part of the Student Services leadership team as well as of the Instructional Deans Council, and it allows for continuous communication and coordination between student services and instruction.

- Counseling, EOPS, Disabled Students Program Services (DSPS) and Health Center faculty are active in faculty governance and provide leadership in various college councils, committees, including the Academic Senate. This faculty serves as ambassadors of their respective programs to their instructional colleagues.

- Student Services faculty and staff are actively engaged through one of the college's shared governance committees. The Student Success Committee, which recommends, coordinates, and initiates strategies to enhance student success at SCC. The committee is co-chaired by the Vice President of Student Services and is comprised of 10 faculty, 3 administrators, 2 staff and 1 student. The faculty composition specifically identifies one faculty from each of the following areas: EOPS, DSPS, Counseling, and Continuing Education (non-credit).

Student services interact and communicate with instruction, institutional research, and management information systems in order to meet student and program needs and to facilitate operational effectiveness.

Student services have an especially close working relationship with instruction; this relationship is characterized by a mutual understanding that instruction and student services partner in order to positively impact student success. The Vice Presidents of these divisions work hand-in-hand to address issues, plan future initiatives, and to coordinate daily operational concerns. Student services faculty are actively engaged in key faculty leadership roles, including but not limited to shared governance committees and councils, in the Curriculum & Instruction Council and as senators in the academic senate.

The college works closely with institutional research to conduct and coordinate all research functions for the college and the district; monitor and report state performance measures; design, conduct, and publish regular statistical studies (such as enrollment trends, graduates and persistence reports, student satisfaction surveys) to assist in college program planning and development; designs, conducts, and publishes “special” studies to meet departmental, institutional, and state and federally mandated requirements.

Student services, and categorical program leaders in particular, are systematically involved in the development of the student information data sets that are aggregated and submitted to the State Chancellor’s Office through MIS. From the initial data input at the program level, leaders remain involved in data editing until a preview report is run in advance of the MIS submission by the district’s Information Technology Department. The draft report is then transmitted to categorical program managers for audit and error checking and reconciliation prior to sending the report to the system office.

Finally, student services departments and programs are integrated through the college’s Educational Master Plan (EMP). The EMP includes the college-wide vision, mission statement and goals as well as measurable objectives, and serves as the center of planning and resource allocation for the college. Each discipline, department, and program (DDP) (now called the Department Planning Portfolio) (DPP) has a section in the EMP that reflects their respective vision, mission statement, goals, objectives and expected future needs, such
as staff, equipment, and/or facilities, based on anticipated growth. The EMP, which is updated annually, serves as a measuring tool to determine the degree to which college and DPP goals and measurable objectives have been accomplished. Every student services department and program utilizes its DPP for effective planning and assessment. The DPPs are directly linked to resource, personnel and space allocation, as well as all other strategic planning.

II.B.2(d)

The institution provides a catalog for its constituents with precise, accurate and current information concerning general information, requirements, major policies affecting students and locations or publications where other policies may be found.

Planning Agenda

The catalog will be reviewed annually by the Catalog Task Force to ensure that it meets the needs and expectations of students and provides accurate and appropriate information, academic program requirements, and major policies affecting students.

Progress Toward Planning Agenda

This planning agenda is met. The Catalog Task Force of the college ensures that students receive accurate information, understand academic program requirements, and are aware of major policies that may affect them. To maximize accuracy and timely production of the catalog, the Catalog Task Force was expanded in fall 2007 to include the following representation:

- Dean, Counseling & Student Support Services
- Co-Chairs, Curriculum & Instruction Council
- Support Services Assistant
- Dean, Instruction and Student Services, Orange Education Center
- Articulation Officer
- DSPS Dept. Chair/Program Facilitator
- Registrar
- Graduation Specialist
- Administrative Secretary, Admissions & Records
- SCC Public Information Officer
- Desktop Publishing Technician

Each member of the task force assumes responsibility for sections of the catalog in which they possess expertise or are assigned to obtain accurate, up-to-date information.

II.B.3

The institution researches and identifies the learning support needs of its student population and provides appropriate services and programs to address those needs.

II.B.3(a)

The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of services location or delivery method.

Planning Agenda

SCC will continue to expand and improve its student services to support the needs of current and future students by carefully analyzing and evaluating students’ responses to the various types of student satisfaction surveys conducted by the district’s research department and various student service departments.

Future plans include analysis and expansion of intercollegiate athletics to include additional sport teams for men and women.

With the hiring of the articulation officer and the acquisition of additional staff and space for the Transfer Center and the Pathways to Teaching program, expanded transfer services will be possible. Current plans include the development of course curriculum for future teachers, and the possibility of an associate degree in education is being studied.
The outreach department is currently making plans to expand its activities beyond high school and community outreach by working collaboratively with SCC’s career education division to develop relationships with businesses and industries.

Progress Toward Planning Agenda

A monthly program leaders meeting is one way that Student Services Program Leaders have intentionally reviewed and discussed the impact of various research reports, particularly those developed through the RSCCD Research Department. This allows for ongoing discussion on the implications of research and to develop appropriate responses as needed. In the spring 2007, a research briefs item was placed in the agenda template for the monthly meetings. While a research item has not been discussed at every monthly meeting, the agendas confirm the following topics discussed:

1) RSCCD Transfer to Universities 2002-03 through 2006-07 (March 10, 2008 meeting).
2) ASG fall 2007 Student Survey (February 11, 2008 meeting)
3) Pathways of Student Persistence & Performance at SCC (November 19, 2007 meeting).
5) SCC Early Decision Cohort Report (March 7 and February 7 meetings).

The Student Success Committee, whose mission is to recommend, coordinate, and initiate strategies which enhance student success at SCC, is a shared governance committee co-chaired by the Vice President of Student Services; it is comprised of 10 faculty, 3 administrators, 2 staff and 1 student. During the 2005-06 year, this committee researched the student success literature on retention interventions and models of good practice. This group ultimately found four emerging themes in the literature: Supplemental Instruction; Learning Communities; Intrusive Support; and Orientation Programs and used these themes to analyze SCC efforts in each of these four areas. This produced engaging dialogue and recommendations, several of which have been implemented (i.e., in the spring 2007 several supplemental instruction student success mini-grants were funded; staff development presentations during flex week; spring 2007 On-Course 2-day workshop for 50 faculty during flex week).

At the present time, Santiago Canyon College has nine intercollegiate athletic teams (four men and five women). In 2006, a Women’s Softball Team was added to our athletic programs. A new softball diamond will be completed in early 2008 and a new gymnasium and swimming complex will be finished in approximately 2010. This will allow us to add competitive athletic programs and develop Exercise Science curriculum.

Santiago Canyon College has had great success in intercollegiate athletics, winning its first California Community College State Championship in 2006 (Women’s Soccer).

With additional staff and space, the Transfer Center has expanded transfer services and programs available to students. The Transfer Center increased access and services to evening students, and together with Student Life/ASB, CSU Fullerton, and UC Irvine, Transfer Leadership Summits were held. Workshop offerings were expanded in the number and scope of topic, increased numbers of university representatives came to SCC to meet with students, and Pre-Med and Pre-Pharmacy workshops were offered for the first time.

To meet the lower division transfer preparation needs of future teachers, an associate degree in elementary education was developed, and approved by the RSCCD Board of Trustees and the State Chancellor’s Office. This new degree will be offered to students beginning in fall 2008. A special education paraprofessional certificate was also developed to train paraprofessionals to work with persons with disabilities and to serve as major preparation for transfer to CSU Fullerton’s Human Services major. Pathways to Teaching program staff also
instituted the Annual Future Teacher’s Conference for SCC students and local high school seniors interested in pursuing a teaching career.

Articulation efforts were greatly expanded with the addition of a full-time articulation officer. The articulation officer submitted new and existing courses to university partners resulting in enhanced lower-division transfer preparation available to SCC students. Additionally, the articulation officer assisted faculty by providing information about course proposals, acceptances, and updates relating to CSU, UC, and independent colleges curriculum requirements and transfer policies.

Santiago Canyon College was awarded a one-year teacher preparation pipeline grant for the 2007-2008 academic year. This grant, which was also funded for the 08-09 academic year, is designed to address California’s teacher shortage in math, science, and career technical education. The college focused on career technical education; in particular, the surveying and mapping profession. The grant, which the college named CTE Teach, provided opportunities to partner with business and industry. Partners provided input ensuring industry standards were met for new or revised survey/mapping courses or coursework. Retention activities with industry partners included “mentor mixer events,” job shadowing, and internship possibilities.

Finally, the High School and Community Outreach Department has expanded its focus to include an Early Outreach initiative and a Business and Industry Outreach component. The goal of the Early Outreach Initiative is to expand the pool of college ready students by increasing college awareness and preparedness. Initially, three middle schools with a large number of underrepresented, low income and/or potential first generation college students were identified for participation. The focus for 2007-08 year was to focus on building partnerships with the three selected middle schools in the Orange Unified School District: Portola, Yorba & McPherson. Services provided to date include Student and Parent Workshops covering a broad range of topics such as; Higher Education, Parental Involvement & Student Success, Financial Aid Awareness and Goal Setting. In addition, Informational Tables have been provided at middle school “Back to School Nights.”

The Business and Industry component’s goal is to market existing Santiago Canyon College programs and services to city and county agencies, large businesses, and smaller businesses that may have an interest in utilizing the curriculum offered at SCC. This has been done by hosting informational tables at local business expositions and developing a business contact database that includes nearly 100 area contacts. Future growth for the Business and Industry Outreach component is planned through the development of a stronger partnership with SCC's Career Education division. The High School & Community Outreach department has met with the Dean of Career Education to identify long and short-term areas for growth. The long-term goal is to assist Career Education with the marketing and promotion of all 12 of its Career Education programs. The short-term goal is to focus on the Public Works & Water Utility Science programs and join the Consortium of Southern California Colleges and Universities, an organization that focuses on promoting Higher Education to Adult Students.

II.B.3(b)

The institution provides an environment that encourages personal and civic responsibility, as well as intellectual, aesthetic, and personal development for all of its students.

Planning Agenda

The college will strengthen its Cross Culture Resource center through the addition of additional staffing and funds as resources permit. Other areas targeted for further development in the next few years are: student leadership training, service learning opportunities, and health education events.
Progress Toward Planning Agenda

The Cross Culture Resource Center, which did not have a designated space, budget or permanent personnel and needed a long-term development plan, was put on hiatus during the 2005-06 year.

Planning consultations during the 2006-07 year led to a revision of the Center, which was renamed the Multicultural & Leadership Resource Library (MLRL). It is housed within the Office of Student Life & Leadership, with the following program goals:

1. To provide multicultural & leadership resources and programming to the SCC community.
2. To promote intercultural understanding and dialogue within the SCC community.
3. To educate the SCC community on multicultural and leadership issues.

When the Office of Student Life & Leadership moved to its newly acquired space in the Administration Building, a designated conference room was dedicated for the MLRL and books, audio and video resources of the former Cross Culture Resource Center were housed in the MLRL. Additionally resources have been provided to continue the acquisition of these resources and the Office of Student Life & Leadership was provided a modest programming budget of $5,000 in 2007-08 to promote multicultural programs and activities. Additionally, a part-time, 19 hour/week permanent Student Services Specialist position was moved to the Office of Student Life & Leadership. This position works with the development of the MLRL in addition to duties and responsibilities with the AmeriCorps program. This blended position is the beginning of a long-term goal of acquiring a full-time staff member in the MLRL.

A five-year plan was developed with the long-term goal of transitioning the MLRL from a resource library to a stand alone Center. Plans include:

- Identifying funding to secure a full-time staff member dedicated to multicultural and leadership activities.
- Maintaining updated inventory with topic specific resources for student and staff use.
- Creating and developing diverse components within the library to expand its reach within the campus community such as the “Safe Zone” for Lesbian, Gay, Bisexual and Transgender (LGBT) students.
- Pursuing and applying for grants to secure funding as an effort to ensure substantive programming.

In the fall of 2006, SCC in conjunction with Cal State Fullerton, developed and implemented a Student Leadership Institute (SLI). This non-degree certificate provides interactive workshops that develop leadership skills and provide critical training. Workshops are offered on developing the necessary skills for effective leadership and overall character development. Students who complete 10 workshops (total of 14 hours) receive a Leadership Certificate from Cal State Fullerton and are recognized at culminating ceremonies both at SCC and at Cal State Fullerton.

Other areas of student leadership training include annual retreats for student officers of theAssociated Student Government (ASG), as well as student leaders for the Inter-Club Council (ICC). Additionally, a handbook for advisors and student leaders was developed in the fall 2007 to provide a resource tool with critical information.

In the fall 2006, SCC secured two grants from the California Community College Foundation to implement two AmeriCorps programs: Foster Youth Mentoring Project (SCC students mentor foster youth) and Teacher Reading & Math Partnership Program (SCC students tutor underachieving elementary students in math and reading at Fletcher, Olive and Riverdale Elementary Schools). Through these two civic engagement opportunities, SCC students are actively involved in community service opportunities.

Additionally, Student Services is seeking to identify and apply for grants resources to implement Service Learning programming.
Students often rely on their peers as a trusted source of information and learn about taking risks in areas such as substance abuse, alcohol or smoking from uninformed peers, or other unreliable sources on personal information. Beginning in spring 2007, SCC implemented a Peer Health Education program in which trained Peer Educators serve as informed resources to empower students to assist one another in health enhancing ways. In spring 2007, 16 students took part of SCC's Peer Health training and certification program.

The 12-hour, four week curriculum developed by the nationally recognized Bacchus Network will be taught in the fall of each year. The training helps students learn about issues of confidentiality, role-modeling, listening skills, body language as well as service referrals for campus based medical professionals and licensed clinical psychologists. Once the core curriculum is completed students go on to test for certification as Peer Health Educators. Students then work with the Health Educator staff to create on campus events highlighting health awareness and risk prevention.

II.B.3(c)

The institution designs, maintains, and evaluates counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function.

Planning Agenda

The counseling department has requested additional full-time contract counseling faculty and additional funding for hourly (part-time) counseling through its discipline, department, and program document, (now called the Department Planning Portfolio (DPP), a component of the Educational Master Plan (EMP) (II. B-29)

Progress Toward Planning Agenda

Progress has been made in securing additional full-time contract counseling faculty and additional funding for hourly (part-time) counseling to meet the needs of students. In fall 2006, a new EOPS/CARE counselor was hired and one EOPS counselor was reassigned to general counseling; this brought the full-time contract counseling faculty to ten (eight generalist counselors, one EOPS counselor, and one counselor for EOPS/CARE program facilitation).

Through numerous resources, funds for part-time hourly counseling increased as follows:

1) A 53% increase in District general funds from fall 2004 to fall 2007 enabled SCC to retain currently employed part-time counselors despite increased hourly counseling rate costs.

2) Matriculation provides significant funds to provide orientation, advisement, and follow-up counseling services to students.

3) The Title III grant provides funds for a 19 hour/week counselor to work with students in the Academic Success Center for five years.

4) An increase in the hourly counseling budget for CalWORKs enables SCC to provide year-round counseling for students.

6) The new College Assistance Migrant Program (CAMP) grant allocates funds for five years for a 15 hour/week counselor beginning spring 2008.

7) Basic Skills Initiative funding provided substantial support for hourly counseling for 2007-2008.

II.B.3(d)

The institution designs and maintains appropriate programs, practices, and services that support and enhance understanding and appreciation of diversity.

Planning Agenda

The lack of student involvement in many
of the college’s special programs and service and enrichment activities will be re-evaluated and addressed by student services and instruction personnel.

Progress Toward Planning Agenda

In fall 2006, Student Services Program leaders reviewed the SCC Student Satisfaction Study, published in June 2005 by the RSCCD Research Department. One item of particular concern was “number of hours on campus other than attending class.” The survey indicated that other than attending class, respondents spent very little time on campus, which is a student success factor often listed in retention literature.

The survey indicated that only 9% of the respondents spent 10 or more hours a week on campus participating in non-classroom activities, such as student government, student clubs, library use, and athletics, and 47% spent no time. The department recognized that the lack of facilities such as a student center and gymnasium limited the physical environment that encourages students to stay on campus outside of class.

The opening of a 40,000 square foot Library in Fall 2006 had a significant increase in student usage. When compared with Spring 2006, the number of visitors to the Library in Spring 2007 increased by 178%, the EBSCO database usage increased by 68%, the circulation of materials increased by 91.22%, the number of Library Instruction classes increased by 9.52%, and the number of students who attended classes increased by 22.98%. It is thought that as the campus continues to “build-out” students will find incentives to stay on campus beyond classes.

Despite the physical limitations of the campus at this time, over the past two years, Student Services has developed several new initiatives and ways to be responsive to student needs, with the goal of increasing student involvement and engagement in the life of the campus. The following is a brief description of some of these new initiatives:

In August, 2006 College Life 101, a student-life orientation, was introduced to incoming new students. Introducing the importance of campus and student life to incoming students is critical and this half-day program was developed with the following learning outcomes:

- Students will learn about campus services.
- Students will better integrate into the social and academic life of the campus via interactive campus tour and the student club/organization fair.
- Students will interact and meet other students to begin to form connections with each other and their orientation student leaders.
- Students will be introduced to co-curricular opportunities.

This program (now renamed Discover SCC) serves to provide students with an opportunity to learn about campus and student life that complements their initial formal matriculation orientation, academic advisement, and registration program offered by counselors. It has been highly successful and yielded approximately 200 student participants in the 2006 program and 250 in the 2007 program. An evening parent component was provided and was well attended (100 in 2006 and 120 in 2007). Trained HAWK Orientation Leaders facilitate small group interactions (icebreakers, reflection time, and campus tours; participants attend several workshops and enjoy a lunch at the end of the half-day program.

Additionally, Discover SCC provides current students with involvement opportunities through the Student Orientation Leader component. Twenty-Five student leaders have been trained as Discover SCC Orientation Leaders. As demand increases, future growth plans for this program includes additional Discover SCC program dates and increasing the content of the program.

It should be noted in the spring 2006 Student Activities Office was renamed the Office of Student Life & Leadership. The name change was more than symbolic and exemplifies an intentional shift in creating and implementing more comprehensive student development
activities. It is believed that Student Life opens and welcomes all students regardless of their interest in student government, clubs and organizations, leadership, co-curricular programs, and campus based activities. Additionally, a full-time student program specialist position was shifted to this unit to further enhance leadership development programs (there are now 2.5 FTE funded positions in this unit). The Office of Student Life & Leadership also introduced a marketing tag line: GET INVOLVED! GET CONNECTED! This slogan has been introduced in all literature, email correspondence, and is the theme that guides and educates the sponsored programs. There are approximately 20 banners with this message located throughout the campus on light poles to serve as a constant reminder to students, faculty, and staff of the importance of campus involvement and student engagement.

The Office of Student Life & Leadership has been intentional in developing a series of programs and partnerships with other campus departments in order to continuously provide educational programming for students. The diversity series for fall 2007 included Día de los Muertos, Latino Heritage Month, Coming Out Day, and Native American Heritage Month celebrations. Partnerships with the Health & Wellness Center include Breast Cancer Awareness Day, Great American Smokeout, Red Ribbon Week, and Safe Holiday Break. Other partnerships include Athletics (several soccer tailgate BBQs) Transfer Center (Transfer Leadership Summits: Cal State Fullerton, Spring 2007 and UC Irvine, Fall 2007) HS & Community Outreach (Partners for Success Mentoring Program) and with the Career Center (My Major-My Career Fair).

It should also be noted that there has been an increase in faculty driven co-curricular programs and in bringing on-campus speakers all of which contribute to enrichment activities. Examples include: Ramada Festival, Día de los Muertos (Day of the Dead), Poetry Forum, Evening with Forensics, Latin American Film Festival, Math Day, International Day, Women and Islam, to name a few. Additionally, at the request of faculty, $10,000 was set aside to provide resources for a speakers fund, which allows for modest honorariums.

In January of 2006, the Health and Wellness Center received a grant contract for High Risk Alcohol Prevention in the Community College Population. One of the program outcomes included a baseline college assessment using a nationally normed tool from The American College Health Association. The National College Health Assessment (NCHA) was conducted on a random sample of 491 students in March of 2006. Specific data sets from the survey were used to drive a campus-wide normative campaign around alcohol use behaviors. Photographs, using actual students, depicted candid images for utilization of designated drivers, and other protective mechanisms such as eating before consuming alcohol and keeping track of how many drinks were consumed. Each image was captioned with “DID YOU KNOW?” followed by the NCHA normative information; 81% of SCC students who chose to drink, eat before and while they use alcohol, 73% of SCC students use a designed driver when they go out, and most SCC Students keep track of the number of drinks they consume when they go out. Outcome measures are currently being reviewed to determine campaign effectiveness.

In addition to establishing a sustainable Peer Health Education Program (refer to Planning Agenda II.B.3 b) alcohol risk prevention curriculum infusion was offered by faculty in more than 20 course sections utilizing SCC’s National College Health Assessment data, District Policy revision for Drug Free Schools and Campus’s Act, District Policy revision for management of Sexual Assault, and a new community advocacy contract for survivors of sexual assault. More than 400 students attended a Guest Lecture and interactive jury exercise on “Drunk Sex or Date Rape?”

In the Office of College Advancement, an Alumni Association Program is being developed and promoted to former students. The purpose of this program is...
to promote Santiago Canyon College (SCC) as a lifelong learning establishment, and provide alumni with an opportunity to re-connect with the college. The Alumni program will consist of communication with former students to invite them to specific campus events, and to create mentoring and networking opportunities. As the program continues to be developed, the Office of College Advancement plans to partner with faculty and staff to develop membership benefits and communication strategies.

Overall, an increase in student usage in special programs and services has been observed. For example, the Health & Wellness Center reported a 12% increase in student usage from 2005 to 2006. Student participation in DSPS has increased by 50% over the past five years, and the number of Early Decision students seeking program services increased by 100% from 2005 to 2006.

Finally, the Financial Aid Office has been aggressive in developing an “in-reach” outreach program that aims at educating SCC students about financial aid opportunities. In the 2006-2007 Financial Aid conducted 60 campus-based activities that served 1,786 students. The activities included 29 classroom presentations, 7 transfer student workshops, 14 new student and parent orientations done in collaboration with the Community Outreach Department, Orange Continuing Education Center, and the Transfer Center, two information tables, a Financial Aid Awareness Day, and two FAFSA application workshops for CalWorks/Adult reentry and AmeriCorp/Foster Youth.

Financial Aid Awareness Day is a one-day campus event that provides refreshments as an incentive to current students to stop at one of the booths for information on how to apply for state and federal programs. These in-reach activities were designed to raise student awareness of the federal and state aid programs available to assist with the cost of higher education. As a result, there have been increases in the number of students who apply, complete their files, and who are awarded. The following table shows the number for 2006-07 compared with the previous year and the representative increase:

<table>
<thead>
<tr>
<th>Academic Year</th>
<th>Financial Aid Awarded</th>

II.B.3(e)
The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

Planning Agenda

In the summer and fall 2005, SCC will be revising and updating its current Matriculation Plan, which requires the evaluation and testing and course placement practices to ensure that its placement practices are as effective as possible.

Progress Toward Planning Agenda

In fall 2005, the college Matriculation Plan task force consisting of faculty, staff, student, and administrative representatives, completed a detailed review and revision of the college’s Matriculation Plan. All components of the plan, including testing and course placement practices, were reviewed and updated to ensure compliance with Title 5.

As a follow-up inquiry regarding the effective use of multiple measures in course placement practices, the RSCCD Research Department conducted a validation study of multiple measures used to place students into math and English; it was published in fall 2006. In addition to these activities, SCC also reviewed testing and course placement practices by completing a Self-Evaluation of SCC Categorical Programs (Matriculation, DSPS, EOPS/CARE, and CalWORKs) as required by the State Chancellor’s Office in spring 2007.

II.B.4

The institution evaluates student support services to assure their adequacy in meeting identified student needs. Evaluation of these services provides evidence that they contribute to the achievement of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

Planning Agenda

SCC student services departments and programs will continue to engage in ongoing review of its programs and services to evaluate their impact on students. As appropriate, these reviews will be analyzed to determine their impact on student learning and will help determine where additional improvements and/or changes are needed.

Progress Toward Planning Agenda

Student Learning Outcomes

In spring 2006, the Division of Student Services began to establish and implement a comprehensive timeline and framework for the establishment of student learning outcomes (SLOs) within every department and program. When fully implemented, this framework will systematically utilize SLOs in guiding, assessing, and improving all student services.

Progress to date includes:

1) Several strategy planning retreats with program leaders (January, 2006 and July 2006).

2) A seminar for student services faculty & staff on “Starting the Student Learning Outcomes Dialogue” (April 2006).

3) Development of a timeframe and timelines (July 2006).

4) Development of a template for reporting & summarizing SLOs, including how each will be measured (November 2006).

5) Identification of 1-2 SLOs for every student services department-unit (December 2006).

6) An all day in-service for student services faculty & staff on “Completing our SLO Framework through Assessment” (January 2007).

Implementation of assessment plans and SLO measurement commenced in June 2007 and will occur on an on-going basis. This systematic assessment cycle ensures that the department:

1) Implements its identified learning outcomes and identify methods to gather data.
2) Interprets the results or evidence of assessment
3) Evaluates program goals, activities, and outcomes on an on-going basis to ensure that decisions for program improvement, planning, budgeting, etc. be shaped by the results of assessment.

Refer to response to Recommendation 2 for more detailed information.

Program Review
To assist in the evaluation of the services and programs of student services, program reviews are scheduled on a three-year cycle that has been developed and implemented since the last accreditation visit. As of fall 2006 all student services areas have completed a program review; however as noted in the last accreditation visit, the level and complexity of analysis was uneven and should include more interpretation of data.

Student Services Program Leaders at their summer 2007 retreat, reevaluated the student services program review process. This resulted in a revised template that will be include the following six sections:

- Signature Page
- Program Description (vision, mission, overview of services-functions, and a funding source statement)
- Organizational Chart
- Student Learning Outcomes (SLO statement, methods, implementation of assessment process, results, decisions and recommendations)
- Program Accomplishments (qualitative & quantitative data; survey-evaluation results; other relevant data to assess program effectiveness)
- Analysis (evaluation of strengths and weaknesses, challenges and opportunities, recommendations for areas of concern; discussion of future direction including facilities and technology).

Finally, it was decided that rather than having a rotating program review cycle with various due dates, all student services departments and programs will in the future submit a program review at the same time, namely, June 30, 2009 and subsequently every three years.

Categorical Programs Self-Evaluation
In February 2007, SCC completed its Categorical Programs Self-Evaluation and submitted the report to the State Chancellor’s Office. This integrated self-evaluation was developed based on guidelines prepared by the Accrediting Commission for Community and Junior Colleges-Western Association of Schools and Colleges. This comprehensive evaluation addressed the following areas:

1) Collegewide Student Services Integration and Coordination
2) Program Specific Data and Outcomes
   - Access: demographic data
   - Progress: success rates, academic progress, dismissal, and persistence
   - Success: degrees, certificates, transfers, educational goals
3) Student Learning Outcomes
4) Effective Practices and Opportunities for Improvement
5) Implementation and Technical Assistance

II. C LIBRARY AND LEARNING SUPPORT SERVICES
Library and other learning support services for students are sufficient to support the institution’s instructional programs and intellectual, aesthetic, and cultural activities in whatever format and wherever they are offered. Such services include library services and collections, tutoring, learning centers, computer laboratories, and learning technology development and training. The institution provides access and training to students so that library and other learning support services may be used effectively and efficiently. The institution systematically assesses these services using student learning outcomes, faculty input, and other appropriate
measures in order to improve the effectiveness of the services.

II.C.1
The institution supports the quality of its instructional programs by providing library and other learning support services that are sufficient in quantity, currency, depth, and variety to facilitate educational offerings, regardless of location or means of delivery.

II.C.1(a)
Relying on appropriate expertise of faculty, including librarians and other learning support services professionals, the institution selects and maintains educational equipment and materials to support learning and enhance the achievement of the mission of the institution.

Planning Agenda
Planning for the educational equipment and materials for the new library is an on-going staff project, and SCC is strategically positioned to offer state-of-the-art technology to its students, staff and faculty. Staff is evaluating radio frequency identification technology (RFID) to improve materials management and security, and evaluating various “smartboard” technologies for the bibliographic instruction classroom and the technology training classroom.

Best Books for College Libraries (five volumes) has been purchased and the library faculty members plan to use it as a major tool to evaluate and build the library collection. In conjunction with the district’s Information Technology Services (ITS) personnel, a proposal for a wireless network throughout the college to facilitate use of personal laptops and wireless devices is being developed.

Finally, librarians are committed to attending at least one professional conference during the next academic year to continue to explore new technologies that support student learning.

Progress Toward Planning Agenda
Since its dedication in 2006, numerous technologies have been implemented and/or installed to support library services, program and operations in consultation from Information Technology Services (ITS). These technologies include:

- Radio frequency identification technology (RFID) for materials management and security
- Inventory scanners for collection management
- SynchronEyes classroom management software for library instruction lab
- Sympodium SmartBoard monitor for library instruction lab
- Document camera/projector for library instruction lab
- “Clickers” (student response program and devices) for library instruction lab
- Tablet notebook PC for library instruction; staff training and staff operations
- Remote access proxy server to support off-campus access to library electronic resources
- Plasma television with “Captivate Indoor Media” software
- 22 laptops for wireless in-library use by students
- Camcorder and digital camera for student use
- Digital scanners for student use
- Two color printers for student use
- Color copier for student use
- Fax machine for student use
- Self-check out station
- Student Innovation Zone (multimedia lab within library dedicated to student experimentation), which includes: nine high performance computers (PCs and Power Macs) with the following specialized software: Adobe Acrobat, Adobe Creative Suite 2 (Photoshop, Illustrator, InDesign, GoLive),
Apple Aperture, Apple Final Cut Pro, Macromedia Captivate, and Studio 8 with Flash

- A SmartBoard has been installed in the Faculty Development Center, which serves as a faculty and staff technology training lab and is equipped with 7 PCs and one Mac
- Student “GoPrint” printer retrieval computer stations upgraded to touch screen monitors

Best Books for College Library (a bibliography of core titles for academic libraries) is being used in conjunction with other collection guides, current subject bibliographies and review media, as major collection development tools by the librarians for evaluating, developing, and building the library’s collections.

A wireless network has been installed in the library to support the use of personal laptop computers and other wireless devices.

In total, Librarians have attended more than 16 professional conferences and workshops, such as the following professional conferences/workshops to explore new technologies that support student learning:

- “SCC All Technology Day,” Faculty Development Committee, Santiago Canyon College; Jan. 29, 2005 [L. Cucovatz, L. Dressler, L. Freidenrich, Alice Ho, and B. Sproat]
- “Symposium ‘Smartboard’ Training,” August 2006 [all full- and part-time librarians]
- “Title Source 3 Online Selection and Acquisitions,” February 2007 [all full- and part-time librarians]

II.C.1(b)

The institution provides ongoing instruction for users of library and other learning support services so that students are able to develop skills in information competency.

Planning Agenda

When the new dean is hired, policies, procedures and programs will be reviewed in order to assess whether additional services need to be offered to students, staff, and faculty. Additionally, library faculty will begin to develop specific student learning outcomes designed for structured library bibliographic instruction sessions.

Progress Toward Planning Agenda

An Interim Associate Dean for the library was hired for the period March 2006 through August 17, 2007. The College restructured its academic divisions, effective Fall 2007, and placed the library in the new division of Library, Fine & Performing Arts, and Communication (LFPAC).

A new Dean was hired in August 2007 to oversee the LFPAC division.

Library policies and procedures developed or revised Spring 2006 through Spring 2007: (Note; All of the following policies and procedures are available under name listed unless otherwise stated)

- Cell Phone Policy
- Circulation Procedures: Library Fax Services (See: Library Procedures: Fax Services)
- Circulation Procedures: Library Date, Damages and Lost Fees (SEE: Library Late, Damages, and Lost Fees)
- Circulation Procedures: Laptops
- Circulation Procedures: Reciprocal Borrowing Privileges for SCC Students at CSUF and CSULB
- Computer Card (See: SCC Community Card)
- Computer Use Policy
- Conference Room User Policy
- Display Policy (See: Library Policy: Displays & Exhibits)
- Food and Drink Policy
• High School Students: Library Use Policy and Rules
• Plasma Screen Policy (SEE: Library Policy – Plasma Screen)
• Publicity Posting & Solicitation Policy (SEE: Library Policy – Publicity Posting & Solicitation)
• Radio Frequency Identification (RFID) Policy
• Reimbursement Policy/Procedures
• Rules of the Library

The following library programs and services were reviewed with the changes listed:

• For-credit instructional courses were re-established, i.e., Library and Information Studies 100 (Library Research Fundamentals) and Library and Information Studies 103 (Information Retrieval on the Internet) and will be offered online.

• Student Innovation Zone: Students were surveyed to gather their input for this technology zone used to support student learning and experimenting with technology. The results of the survey were used in determining the final configuration of equipment and software for this service (see “Student Survey—Student Innovation Zone” [SIZ]).

Student Learning Outcomes have been developed for the Library’s non-credit instruction sessions. At a reference consultation or a group bibliographic instruction (BI) session, students will do one or more of the following:

1. Identify various types and formats of potential sources of information.
2. Use the library catalog to determine the availability of information in the library.
3. Use library periodicals databases to determine the availability of article information in the library.
4. Retrieve information online and in person.
5. Find documentation style information.
6. Identify parts of a bibliographic citation.

II.C.1(c)

The institution provides students and personnel responsible for learning programs and services adequate access to the library and other learning support services, regardless of their location or means of delivery.

Planning Agenda

The significant increase in bibliographic instruction sessions highlights the need for additional librarians as well as for extended coverage at the reference desk during evening hours when a bibliographic instruction session has been scheduled. The hiring of an additional librarian in fall 2005 will be a key factor in initiating dialogue about innovative scheduling that will best benefit students. In addition, librarians need to continue to use the library’s DPP as a vehicle for charting and documenting the need for additional librarians.

In an on-going attempt to improve services and provide adequate resources in a fluctuating economic climate, librarians will continue to explore grant opportunities. This will entail research on grant writing, attendance at grant writing seminars, and mentoring by other faculty members.

In order to better inform the campus community about the scope of library services and library resources, librarians will develop a template for use in bibliographic instruction. Such a template will ensure consistency in the delivery of instruction and will be developed collaboratively with faculty from other departments.

Progress Toward Planning Agenda

SCC has hired three additional librarians to resolve projected shortages in staffing. A technical services/reference librarian was hired in fall 2005 (the position was charted in 2003/2004 Library Department Developmental Plan [DPP]). A public services/reference librarian was hired in fall 2006. An instructional/reference librarian was hired in fall 2007 to lead development of library for-credit instruction courses (the position was charted in 2005/2006 Library DPP to develop the re-establishment of the credit instruction program.
Librarians have continued to seek grants to improve services and continue to provide adequate resources for the library seminar. Consistency in the delivery of Bibliographic Instruction (BI) sessions has been addressed through the development and implementation of student learning outcomes since fall 2006.

II.C.1(d)

The institution provides effective maintenance and security for its library and other learning services.

Planning Agenda

The increase in the number of computers and users in the new facility will necessitate enhanced security measures to protect the privacy of the user and to protect the library from inappropriate use of the computers. Options being considered by the library include installing a system requiring students to swipe an identification card to activate computer access.

Progress Toward Planning Agenda

To enhance security to protect users’ privacy and to protect the library from inappropriate use of computers, the following security measures have been adopted:

- VNC student computer observation and remote control program has been installed
- VeriSign Secured SSL Certificate software was installed on the remote access proxy server to secure private information
- A positive attendance login program (including encryption program to secure private information) has been implemented to verify student identity and to quantify student usage of library computers. (SEE: Positive Attendance)

II.C.1(e)

When the institution relies on collaboration with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution’s intended purposes, are easily accessible, and utilized. The performance of these services is evaluated on a regular basis. The institution takes responsibility for and assures the reliability of all services provided either directly or through contractual agreement.

Planning Agenda

The SCC library will maintain appropriate contracts and remain aware of possible new technologies that will require additional contracted services.

Progress Toward Planning Agenda

The SCC library is maintaining the following contracts to provide operational support:

- OCLC Bibliographic utility for cataloging resource sharing
- Baker & Taylor Title Source 3 online selection and ordering service
- Voyager [library integrated system] maintenance and technical support
- Synchronize classroom management upgrade

The SCC library has the following student-related library services support contracts:

- Annual hosting fee for Gale Virtual Reference Center [200+ online reference books]
- “Go Print” maintenance contract for the copy card dispenser and print retrieval software upgrades
- Multi-year leasing contract for new student copier that supports expanded functions/features requested by students
- Renewal of reciprocal borrowing agreement with California State University, Fullerton Library (SEE: California State University Reciprocal Borrowing Agreement)
- Preliminary discussions with Chapman University Library on the feasibility of establishing reciprocal borrowing privileges for students/faculty at each institution
Through regular attendance at library conferences and meetings with vendors, the library remains aware of potential benefits of new technologies that may require additional contracted services.

• Positive Attendance

Evidence for II.C.1(e)
• California State University Fullerton Reciprocal Borrowing Agreement
STANDARD III: RESOURCES

The institution effectively uses its human, physical, technology and financial resources to achieve its broad, educational purposes, including stated learning outcomes, and to improve institutional effectiveness.

III.A. HUMAN RESOURCES

The institution employs qualified personnel to support student learning programs and services wherever offered and by whatever means delivered, and to improve institutional effectiveness. Personnel are treated equitably, are evaluated regularly and systematically, and are provided opportunities for professional development. Consistent with its mission, the institution demonstrates its commitment to the significant educational role played by persons of diverse backgrounds by making positive efforts to encourage such diversity. Human resource planning is integrated with institutional planning.

III.A.1

The institution assures the integrity and quality of its programs and services by employing personnel who are qualified by appropriate education, training, and experience to provide and support these programs and services.

III.A.1(b)

The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.

Planning Agenda

A workshop on the purpose and proper implementation of evaluations will be held to ensure that all supervisors adhere to the completion of evaluations according to timelines established through Board policy, administrative regulations, and the contracts of various employee groups.

Progress Toward Planning Agenda

This planning agenda has been met. In cooperation with District Human Resources, mandatory workshops were held. All supervisors and administrators were trained on the purpose and proper implementation of the evaluation process for classified, classified supervisors, administrators, part time faculty, tenured faculty, and probationary faculty. These workshops gave a thorough review of the evaluation process of each group of employees, the forms used, timelines, and other criteria important to the process.

The District Human Resources Department will provide this training approximately every two years to ensure consistency of the process over time.

III.A.1(c)

Faculty and others directly responsible for student progress toward achieving stated student learning outcomes have, as a component of their evaluation, effectiveness in producing those learning outcomes.

Planning Agenda

SCC will continue to address SLO topics and the role faculty, staff, and administration play in incorporating student learning outcomes into the evaluation process.
Progress Toward Planning Agenda

Significant progress has been made on this planning agenda.

Both the program review process, especially section VI A and B, and the college’s adherence to the SLO and Assessment five-year plan keep faculty and key staff involved in the monitoring and achievement of student learning outcomes. These processes ensure that departments and the college constituencies, in general, take responsibility for monitoring SLOs and achieving them.

At the individual level, progress has been made to include these important criteria in the evaluation process. Beginning fall semester 2008, faculty, supervisors, and administrators will include in their self-evaluation section of the evaluation process a description of their participation in the improvement of student learning. This information will be related to student learning outcomes, assessment, and subsequent evaluation.

The District will work with the classified association to include appropriate criteria related to their responsibility if they are directly involved in monitoring and achieving SLOs.

III.A.2

The institution maintains a sufficient number of qualified faculty, with full-time responsibility to the institution. The institution has a sufficient number of staff and administrators with appropriate preparation and experience to provide the administrative services necessary to support the institution’s mission and purpose.

Planning Agenda

Based on current and anticipated future needs of both credit and non-credit divisions of the institution, SCC will review the needs of its growing and changing student population annually to provide appropriate hiring recommendations to the district. Emphasis will be placed on ensuring that the non-credit division has adequate full-time faculty.

Progress Toward Planning Agenda

Since the self-study visit in fall of 2005, the noncredit division has acquired three full-time faculty members, an assistant professor in counseling and assistant professor in English as a second language (ESL) and an ABE faculty member. SCC continues to annually review its growing and changing student population in making hiring recommendations to the District. However, there is still a need to place additional emphasis on ensuring that the noncredit division has adequate full-time faculty.

In the credit division, thirty full-time faculty has been hired since 2005. Three new faculty have been hired to begin the 2008-2009 academic year.

III.A.4

The institution demonstrates through policies and practices an appropriate understanding of concern for issues of equity and diversity.

III.A.4(b)

The institution regularly assesses its record in employment equity and diversity consistent with its mission.

Planning Agenda

The district’s Human Resource Department will assess the college’s personnel to ensure employment equity and diversity consistent with the district mission. SCC will continue to promote diversity of faculty and staff according to its student population.

Progress Toward Planning Agenda

The district maintains records that reflect the demographics of the employee populations. SCC’s faculty, staff, and administrators are diverse in ethnicity and increasingly representative of the student population they serve. SCC promotes diversity of faculty, staff, and administrators through its hiring practices.

To ensure that employee diversity is representative of the student population, the district’s Human Resource Department posts faculty and administrative positions

All positions are posted in the following publications: LA Times, OC Register, Career Builder, Monster Board, Registry, and HigherEdJobs.com.

III.A.5

The institution provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on identified teaching and learning needs.

III.A.5(a)

The institution plans professional development activities to meet the needs of its personnel.

Planning Agenda

The college will offer appropriate staff development activities for classified and academic staff that will ensure they are kept informed of up-to-date policies and procedures, as well as workshops and seminars that improve the work environment, support the college mission and goals, improve the skills of employees, and continues the dialogue regarding the infusion of student learning outcomes.

Progress Toward Planning Agenda

Staff development is a priority in maintaining an informed and motivated staff. The college and the District continue to provide staff development for the classified and academic staff related to the mission of the college and the support of student learning.

During the past two years, there have been two District-wide, all-employee events during spring flex. The spring 2006 event focused on future technology and the community colleges. The spring 2007 all-employee event featured the topic of change. It engaged staff in a visioning process that identified key areas for change and the ways in which successful change occurs. Both well-received events brought more than 1,000 full-time employees of the District together.

District Human Resources continues to provide numerous workshops on a broad variety of topics, including identifying and dealing with sexual harassment and other employee issues, such as progressive discipline, excessive illness, or absenteeism. Workshops for managers on new policies and procedures are held in a timely manner.

The college faculty has been involved in two major workshops on SLOs and Assessment followed by individual and small group training. Faculty also found a two consecutive day workshop, titled, “On Course,” beneficial in improving teaching in the classroom.

The college supports an aggressive flex calendar with workshops on a variety of topics designed to improve pedagogy and student learning, including Blackboard training for distance education or classroom enhancement, a technology series, Library services workshops, and learning communities.

The classified staff has many opportunities to improve their skills appropriate to their responsibilities. They plan an annual classified staff development workshop with varied appropriate topics, including institutional orientations, time management, and staying healthy on the job. Classified staff also participates in the college-wide annual convocation where topics such as disaster preparation have been presented.

III.B Physical Resources

Physical resources, which include facilities, equipment, land, and other assets, support student learning programs and services and improve institutional effectiveness. Physical resource planning is integrated with institutional planning.
III.B.1
The institution provides safe and sufficient physical resources that support and assure the integrity and quality of its programs and services, regardless of location or means of delivery.

III.B.1(a)
The institution plans, builds, maintains, and upgrades or replaces its physical resources in a manner that assures effective utilization and the continuing quality necessary to support its programs and services.

Planning Agenda
To follow the facilities plans of the district and SCC to continue to build-out the SCC campus to meet student and staff requirements as the enrollment increases.

Progress Toward Planning Agenda
The college, with support from the District, has proceeded to implement the overall facilities master plan by earmarking the projects that are to be completed with the remaining balance of Measure E funds. This includes the construction of the Science Building, Maintenance and Operations Building, Humanities Building, Gymnasium, and some additional parking.

Construction of the science building has commenced with completion targeted for summer of 2009. The Maintenance and Operations Building and some additional parking should also be completed by the summer of 2009. The gymnasium plans have been submitted to the Department of State Architect (DSA) for review; it is anticipated that these plans may receive approval by the end of 2008.

The original facilities master plan included a humanities and social science building. However, after meeting with the departments, it was evident that all of the needs could not be funded with the remaining Measure E funds. Consequently, Social Science and Mathematics and Astronomy, who were not accommodated in the new science building, must wait for a new structure(s), which will require new funding sources.

Floor plans for the Humanities Building have been developed and reviewed by the departments and the Facilities Committee. The architect is targeting to have plans ready for submission to DSA by the fall of 2008.

A final planning proposal (FPP) for the performing arts complex was submitted to the State Chancellor’s office, but was not accepted for the 2009-2010 fiscal year. Communication with the State Chancellor’s office is underway to identify what might be modified to make the plans for this building more competitive.

An initial planning proposal (PP) was submitted for the Student Services building; SCC was advised to now submit a FPP.

All the plans have been discussed and reviewed by the SCC Facilities Committee with their recommendations confirmed by College Council.

III.B.1(b)
The institution assures that the physical resources at all locations where it offers courses, programs and services, are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.

Planning Agenda
The college president and vice president of administrative services will continue to request additional funds to support the new facilities and expected enrollment growth. This effort needs to be supported by all SCC constituencies, especially the college representatives on the Budget Allocation and Review Committee (BAPR).

The district and SCC administrators need to continue their efforts with the City of Orange and Orange County Transit Authority (OCTA) to provide a sidewalk to the Orange Education Center (OEC) and bus service on Batavia Street. The goal is to have a sidewalk constructed on Batavia Street by the end of the 2005 calendar year. Initial contacts with OCTA have been made and additional efforts will be made throughout the year until a satisfactory public transportation solution is reached.
Progress Toward Planning Agenda

The need for additional funding for facilities was raised with the district. The Board of Trustees approved placing another bond measure on the ballot in 2006; unfortunately, this bond measure did not pass.

The district has also been a strong advocate in our building process; they have requested that SCC’s projects be included in the state five-year capital outlay program. At the present time, however, the college is at a stage where an additional construction project in the immediate future would be most difficult to handle because of parking, access, and safety issues. With the expected delay in funding, the college and the district will continue to pursue funding alternatives, including another bond measure.

The sidewalk from OEC to Katella Avenue was completed on March 3, 2007. A formal written request was submitted to OCTA for bus transportation. The reply from OCTA stated “technical issues with delays in schedules and distances to current bus stops”, and they denied the request. Mayor Carolyn Cavecche of the City of Orange has pledged to look into the matter as the large number of students who use public transportation continue to request a bus stop at the center.

III.B.2

To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilizations and other relevant data into account.

III.B.2(a)

Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

Planning Agenda

The college will continue to seek supplemental funding to ensure that all new buildings have the equipment and supplies needed.

Progress towards Planning Agenda

The vice president of the continuing education division (Orange Education Center) is currently in the process of completing the necessary application to convert the Orange Education Center to a California Postsecondary Education Commission-authorized education center. Once approved, based on the OEC generating more than 1,000 FTES per year, the District will be eligible for $1,000,000 per year from the State Chancellor’s Office on an ongoing basis.

This will help ensure that the OEC and other district buildings have the necessary equipment and supplies to maintain facilities at optimum level.

III.B.2.(b)

Physical resource planning is integrated with institutional planning. The institution systematically assesses the effective use of physical resources and uses the results of the evaluation as the basis for improvement.

Planning Agenda

The SCC Facilities Committee has initiated the process of looking at short and long term plans for the ancillary services. The committee has also initiated the development of interim plans for space as it becomes available when constituencies move out of their existing facilities into a new building. It is the goal to have the plans completed and submitted to the College Council by the fall of 2005.

Working in cooperation with the district and the SCC master plan architect, the Facilities Committee will explore additional parking during the major construction period of the next five to ten years.
Progress Toward Planning Agenda

The general principle of considering both short and long term needs and consequences is always considered by the Facilities Committee when recommending plans to College Council. As new facilities are being constructed on the SCC campus, the committee continually develops broad ideas for short and long term plans. These plans include how to reconfigure buildings as various departments move into the new buildings. Changing conditions, however, often made it necessary to revise those temporary plans to meet immediate needs.

The best example of this occurred when the Library was completed in the spring of 2006. In the summer of 2006, the relocation of portable buildings was required to begin preparation of the site for the new science building; this project entailed the relocation of 23 portable buildings that housed classrooms, administrative offices, division offices, a biology lab, and fitness center. Relocation of the portable buildings, however, had to be delayed until the end of the 2006 spring semester and the buildings had to be operational by the start of the fall Semester. The total available time was approximately 75 days to complete the relocation of approximately 75 faculty and staff.

To meet this time frame, the Facilities Committee developed a plan that called for the Library staff to relocate and vacate their existing space earlier than planned, convert some of the vacated space for turnaround space during the relocation of the portables, and develop some of the space to permanent space for work groups to allow some of the portables to be easily converted into classrooms. In general, this complex project was completed as scheduled and costing less than originally anticipated. More importantly, the groups that are in the vacated library space are those that will remain in the space for some time so there is no need to allocate additional relocation expenses for the immediate future.

The continuing education center (OEC) has instituted a facilities workgroup that conducts short-term and long-term facility improvements planning for the center. A member of the OEC facilities workgroup also serves as a member of the SCC facilities committee and acts as a liaison between the two groups.

Since the accreditation visit, the District entered escrow to purchase the land adjacent on the north side to the OEC to meet the need for additional parking. Unfortunately, the purchase could not be completed because of legal issues with the title, which was handwritten in the 1800s. The additional land would have resulted in over 200 additional parking spaces for OEC.

The need for additional parking at the SCC main campus has been an on-going process and concern; the college has experienced more parking problems every semester, especially as the new buildings have been completed. The major roadblock to developing an area for temporary parking is having access from the parking area to the campus that meets ADA requirements.

Additionally, residents in the area have complained about students and staff parking in the neighborhoods. The college will continue to explore alternate ways to provide an additional parking area that complies with all regulations.

One possible solution will be to have an off-site parking location with shuttle service; this concept is currently being investigated.

III.C TECHNOLOGY RESOURCES

Technology resources are used to support student learning programs and services and to improve institutional effectiveness. Technology planning is integrated with institutional planning.

III.C.1

The institution assures that any technology support it provides is designed to meet the needs of learning, teaching, college-wide communications, research, and operational systems.

III.C.1(b)

The institution provides quality training in the effective application of its information technology to students and personnel.
Planning Agenda

The college is working on a plan to determine the best use of the remaining TTIP training dollars. This is to be completed in the fall of 2005. Additional training sessions to assist instructors with advanced technology are planned.

Furthermore, many SCC students are using the Web more frequently for their information and services requests. Therefore, the Web Task Force will continue to meet with faculty and staff to discuss the enlargement and enhancement of web usage.

Progress Toward Planning Agenda

The college has completed its plan for expending the remaining TTIP training funding. This plan identified a need for expertise in the development and maintenance of the SCC web site, along with a need for ongoing expert training. The normal district position request/approval cycle did not allow the college to hire a web master quickly enough to meet the urgency of these needs, so a consultant was engaged to assist the Web Task Force. The use of TTIP funding in this way has greatly improved the web site, has provided consistency of information, and has allowed the college to monitor its web pages for currency.

The college will again request a full-time classified staff position to serve as the web master in the next district position request/approval cycle.

At the same time, the college identified a critical need for an expert in Distance Education, and requested a full-time faculty position to serve as a Distance Education Coordinator/Specialist. That position was not approved for the 2008-2009 academic year. All constituents agree that this position shall remain a high priority. Knowing that this position may come in the 2009-2010 academic year, the college is holding some TTIP money until the new coordinator is hired. It is anticipated that training needs beyond that which is currently being done will be needed and TTIP monies will provide the necessary funding. Lastly, as appropriate, TTIP monies have continued to provide technology training for faculty and staff.

III.C.1(c)

The institution systematically plans, acquires, maintains, upgrades or replaces technology infrastructure and equipment to meet institutional needs.

Planning Agenda III.C.1(c)

The director of academic support will create a plan identifying specific hardware that needs to be replaced, with a timeframe that will ensure the college is keeping its infrastructure maintained and current. The plan will include upgrading or replacement of administrative computers, classroom computers, academic file servers, and network equipment. It will also include a proposed budget amount for yearly planning purposes.

The college will continue to seek alternative funding sources to assist SCC complete its plans for upgrading or replacing current technology.

Progress Toward Planning Agenda

This planning agenda has been met. The director of academic support along with the Technology Committee completed a five-year technology plan. The plan goes beyond the criteria of this planning agenda. Every year the collegewide needs and the budget necessary to maintain and stay current with the technology infrastructure, hardware and software is updated.

One of the most beneficial aspects of the ongoing five-year technology plan is the ability to foresee the needs and link the technology plan to available resources. At this time, SCC has been able to meet the annual needs identified using multiple sources of funding. The college considers keeping technology infrastructure and equipment to include hardware and software a priority in the support of student learning.

The five-year technology plan is valued by the college and serves as a primary planning document within the Educational Master Plan 2007-2012.
III.C.1(d)
The distribution and utilization of technology resources support the development, maintenance, and enhancement of its program and services.

Planning Agenda III.C.1 (d)
The college will continue to use FCCC for its software licenses and purchases when possible, but because FCCC doesn’t offer all the products the college needs, other sources must be used as well.

Information Technology Services (ITS) will continue to provide SCC with the standard Microsoft products, but will allow other licenses that are useful to SCC.

The district will continue to monitor the technology of SCC.

Progress Toward the Planning Agenda
Since this planning agenda was written, the district has formed a District Technology Advisory Committee (TAG). This has provided a venue to directly discuss college needs with District ITS. The director of academic support for SCC is also valuable in his liaison role between the district ITS and the college. To date, SCC has been able to justify and obtain approval for software licenses or hardware needs requested. The college recognizes the supportive role District ITS plays as they strive to meet SCC’s needs.

The director of academic support signs off on all technology requests to ensure compatibility with current infrastructure and other criteria. This process also serves to coordinate technology requests, which yields more cost effective purchases in many instances.

The district is currently in the process of moving from an antiquated student information system to a new one, Datatel. This is a challenge, but a welcome challenge recognizing the limited lifetime of the present system. All college personnel at SCC are poised to do their part in providing a successful transition to Datatel.

III.C.2
Technology planning is integrated with institutional planning. The institution systematically assesses the effective use of technology resources and uses the results of evaluation as the basis for improvement.

Planning Agenda
The college has requested that the director of academic support create a plan that identifies all computing systems and the timeframe for replacement or enhancement. This will help the college keep its computers maintained and current while providing the necessary budget amount for yearly planning. As part of the plan, there will be a section to assess the effective use of current technology resources. This section will be used as a basis for improved use of technology resources.

Furthermore, as new buildings are being designed, the technology infrastructure will be part of the design.

Progress Toward Planning Agenda
The new Technology plan includes a section that assesses the effective use of current technology resources. This section is used as a basis for improved use of technology resources. This is a need addressed throughout the technology plan.

Additionally, via the technology plan, the college has identified the life cycle of equipment related to its usefulness and effective use. There is also a sub-section on equipment use. The amount of usage on a specific machine, combined with the life cycle provides guidance as to effective use of computers.

The technology plan contains data on wireless availability for the main campus and the Orange Education Center. Included in this section is a list of wireless antennas by building and floors within each building.

The Forecast Charts identify when outdated hardware is scheduled to be replaced. Included is an estimated replacement cost that provides a total cost of equipment replacement by the year. This can be updated every year as the data is stored.
with individual databases for easy retrieval and reporting.

III.D FINANCIAL RESOURCES

Financial resources are sufficient to support student learning programs and services and to improve institutional effectiveness. The distribution of resources supports the development, maintenance, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. Financial resource planning is integrated with institutional planning.

III.D.1

The institution relies upon its mission and goals as the foundation for financial planning.

III.D.1(b)

Institutional planning reflects realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

Planning Agenda

SCC will continue to seek outside sources to assist SCC develop additional financial resources to meet its expenditure requirements, especially in regard to equipping and furnishing new facilities.

Progress Toward Planning Agenda

During the 2006/2007 fiscal year, the continuing education division (OEC) applied for and received approval for 14 career and college preparation certificate programs under S.B. 361. This resulted in an additional $466 per unit of FTES for all courses that are part of any of the certificate programs.

Currently, OEC is in the process of capturing the necessary data for MIS reporting of noncredit students eligible for VTEA funding. This process should result in a considerable increase in the allocation of VTEA funds to the District.

In addition, the vice president of OEC is currently completing the necessary application to convert OEC to a California Postsecondary Education Commission-authorized education center. Once approved, and based on the OEC generating more than 1,000 FTES per year, the District will be eligible for $1,000,000 per year from the State Chancellor’s Office on an ongoing basis. This will help ensure the OEC and other district buildings have the necessary equipment and supplies to maintain facilities at an optimum level.

Finally, the college has solicited the help of the SCC Foundation to assist in fundraising for a facilities project. The determination of what project would most likely be attractive to prospective donors in now underway.

III.D.1(d)

The institution clearly defines and follows its guidelines and processes for financial planning and budget development with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

Planning Agenda

CPAC (now College Council) is the forum where constituents are involved in the major recommendations that are forwarded to the college president. Consequently, it is the responsibility of College Council representatives to ensure that all divisions are in alignment with the EMP or be aware of any deviation from the EMP that is being proposed because of lack of funds. If necessary, College Council needs to request additional funding from the district to help it meet the DPP (now DPP) expectations outlined in the EMP.

SCC representatives on BAPR must continue to pursue answers to the budget concerns and questions raised by SCC’s constituents. The BAPR representatives will strive to improve the budget process to ensure that SCC can continue to offer high quality educational programs.
The college will conduct open forums on budget concerns to ensure that there is widespread opportunity for discussion, input, and understanding of the budget. Every effort will be made to further solidify cooperative and consolidated effort to meet financial goals and targets.

**Progress Toward Planning Agenda**

There are three representatives from OEC who serve on the college council, the vice president, a faculty representative, and a classified representative. Since the accreditation visit, OEC has not had a need to request additional funding from the College Council.

The OEC vice president serves as an alternate on BAPR and has regularly attended meetings. Although not having a vote (unless a SCC voting member is absent), the vice president does have a voice and communicates any continuing education needs that arise to the committee.

The college did conduct two open forums on budgets during flex week of 2006; however, the attendance was so low, it was not scheduled for subsequent semesters. The low attendance is attributed to the fact that the college has obtained enough general funds, supplemented by new grants, to meet most of the needs of the departments.

The college has scheduled open forums for 2008 to explain the impact of the state budget reductions to the college budget and plans for the future.

**Planning Agenda**

SCC representatives on BPARC must continue to pursue answers to budget concerns and questions raised by SCC’s constituents. The BAPR representatives will strive to improve the budget process to ensure that SCC can continue to offer high quality education programs.

**Progress Toward Planning Agenda**

Both the vice president of student services and vice president of administrative services serve on the Budget Allocation and Planning Review Committee (BAPR) workgroup, a standing district committee that examines specific budget issues directed by the BAPR and makes recommendations on budget policies and procedures to the BAPR.

Representatives have been involved with specific issues such as expenses associated with parking lot maintenance, software licenses and fees, and fixed costs; all of these items have an impact on the college’s discretionary budget. Although there are times when the consensus has not been to the benefit of SCC, the college’s representatives do have a voice and are treated equally despite the difference is size when compared to Santa Ana College.

**III.D.2(g)**

The institution regularly evaluates its financial management processes, and the results of the evaluation are used to improve financial management systems.

**Planning Agenda**

An end to the state budget crisis does not appear imminent. Therefore, the college and district must continue to look for alternative ways of operating more efficiently as well as pursue alternative sources of revenue, including partnerships and additional grants. Efforts have been taken in this area, but need to be enhanced and sustained for the next few years.

**III.D.2(c)**

The institution has sufficient cash flow and reserves to maintain stability, strategies for appropriate risk management, and realistic plans to meet financial emergencies and unforeseen occurrences.
Progress Toward Planning Agenda

The OEC vice president and the vice president of administrative services have been appointed by SCC’s president to serve on a district budget subcommittee to develop a formula to appropriately fund part-time instruction based on FTES goals. The purpose is to increase efficiency and accountability on the use of general funds designated for instruction.

III.D.3

The institution systematically assesses the effective use of financial resources and uses the results of the evaluation as the basis for improvement.

Planning Agenda

To alleviate any mistrust on how funds are expended, College Council will continue to allocate a portion of each meeting specifically to review the college budget and ensure consensus on how funds are allocated and spent within the college. This will also help ensure budget planning is consistent in alignment with the EMP.

Progress Toward Planning Agenda

At each College Council meeting, time is allotted to review the college budget. All constituencies from both credit and continuing educations divisions are represented on the College Council. This has proven to be an effective way to discuss the college budget and ensure consensus.

STANDARD IV: LEADERSHIP AND GOVERNANCE

STANDARD IV LEADERSHIP AND GOVERNANCE

The institution recognizes and utilizes the contributions of leadership throughout the organization for continuous improvement of the institution. Governance roles are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging designated responsibilities of the governing board and the chief administrator.

IV.A DECISION-MAKING ROLES AND PROCESSES

The institution recognizes that ethical and effective leadership throughout the organization enables the institution to identify institutional values, set and achieve goals, learn, and improve.

IV.A.1

Institutional leaders create an environment for empowerment, innovation, and institutional excellence. They encourage staff, faculty, administrators, and students, no matter what their official titles, to take initiative in improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective discussion, planning, and implementation.

Planning Agenda

With the exception of how information is transmitted to SCC constituencies from the Board of Trustees meeting, there is no need to change the current format of participation and decision making processes. The president will develop a system for enhancing his weekly reports to the college to include important Board information and decisions.

Progress Toward Planning Agenda

This planning agenda has been met. In addition to the electronic minutes sent to all constituencies of all Board of Trustees meetings, the Public Affairs Office, in consultation with the Office of the President, includes information in employee communications (such as the weekly “What’s New at SCC” e-mail, quarterly SCCourier newsletter, Messages from the President, etc.) about important Board decisions that impact the college community. This serves to enhance employee communication.

In addition to the college President’s regular methods of employee communication, the Office of the Chancellor has sent out a weekly e-blast to all employees since 2006. This e-mail frequently incorporates Board information and decisions of interest to all employees.

IV.B. BOARD AND ADMINISTRATIVE ORGANIZATION

In addition to the leadership of individuals and constituencies, institutions recognize the designated responsibility of the governing board for setting policies and of the chief administrator for the effective organization of the institution. Multi-college districts/systems clearly define the organizational roles of the district/system and the colleges.

IV.B.2

The president has primary responsibilities for the quality of the institution he/she leads. He/she provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

IV.B.2(d)

The president effectively controls budget and expenditures.
Planning Agenda

Collegewide budget meetings will be held twice each year to communicate expenditures and revenue information to the college constituents.

Progress Toward Planning Agenda

In addition to holding budget meetings at the beginning of a new semester, the president has also requested that the vice president of administrative services provide budget status information at College Council so that the representatives from all constituencies are kept up to date.

In addition, the president and/or the vice president of administrative services has made presentations to constituent groups such as the Academic Senate and Classified Hawks to discuss budget issues and solicit ideas.

IV.B.

In multi-college districts or systems, the district/system provides primary leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. It establishes clearly defined roles of authority and responsibility between the colleges and the district/system and acts as the liaison between the colleges and the governing board.

IV.B.3(c)

The district/system provides fair distribution of resources that are adequate to support the effective operations of the college.

Planning Agenda

SCC’s leadership team will work through Budget Allocation and Planning Review Committee (BAPR) to seek changes as to how the SCC allocations are decided to ensure that SCC has the fiscal support it needs to sustain its anticipated growth and development. As state funds allow, SCC will request a larger proportion of the district funds allocated to the individual colleges.

Progress Toward Planning Agenda

During the district Budget Allocation and Planning Review Committee (BAPR) meetings and BAPR workgroup meetings, discussions about improving the District’s budget allocation model take place on an ongoing basis.

SCC’s president, vice president of administration and vice president of student services serve as voting members of BAPR. The vice president of continuing education (OEC) serves as an alternative in the BAPR. Although he is not a voting member (unless an SCC voting member is absent), the vice president of OEC does have a voice and communicates the needs of OEC.
