## Media Services

---

*AUO 1 – Maintain and provide an appropriate number of mediated classrooms in order to facilitate learning.*

- a. Measurement Description:  
Keep a log of the number of mediated classrooms.
  - i. Criteria for Success: At least 90% of our classrooms are mediated; having a projection system, computer and an A/V control system.
  - ii. Criteria for Success Achievement:     Met    Not Met
- b. Analysis of Findings: All of our newer facilities have been mediated including the Science Center and Humanities Building. The major concern are the A/V systems in some of older building A, B, D, E and U Buildings. Most of those projectors were purchased 8–10 years ago and given that the manufacturer, Sharp, has discontinued manufacturing projectors, we need replace those projectors.
- c. Plan of Action (if criteria not met): Prepare a plan to change out the old project over 3–5 years and request funding through P.I.E. and the Budget Committee.
- d. Additional Resources Required, if any: We need approximately \$20,000 for each of the next three years to replace the old Sharp projectors. This total to \$60,000 for the total replacement project.
