## Online Training

ASCIP offers a comprehensive Learning Management System (LMS) for online training which includes advanced tracking and management capabilities allowing members to assign training to employees and track their completion. Training can be assigned to particular groups of employees to help you comply with various training requirements, whether it be "Sexual Harassment Prevention" for your management team or "Accident Prevention" for all employees. Once assigned the training, LMS will do the rest – notification of required completion date, send reminder notices, then notify the administrator of completion.

This enhanced training system is being offered as one more benefit to ASCIP's Property & Liability and Workers' Compensation program members at no additional cost, and can be accessed 24 hours a day, 7 days a week.

We will be happy to visit your site to provide a hands-on demonstration on the capabilities of the LMS and its ease of use. We believe the LMS will prove to be invaluable to your organization and employees due to its potential to educate employees on injury prevention, protection of assets and to help you comply with your numerous training needs.

Please contact us right away to sign up for this service, or to ask any questions. Your ASCIP LMS contacts are Martha Espinoza and Kim Kennedy at 562-404-8029 or [training\\_info@ascip.org](mailto:training_info@ascip.org). We look forward to hearing from you!
