GENERAL PURPOSE

To install, maintain, repair, fabricate and modify pipelines, valves, hydrants, air-vacs, vaults, double detector check assemblies, backflow devices, meter assemblies, fire lines and services of water transmission and distribution facilities. Provide miscellaneous support to other Operations and Maintenance crews. May be required to participate in the District standby program and scheduled or unscheduled overtime.

DISTINGUISHING CHARACTERISTICS

The Water Maintenance Technician II and III positions are distinguished from each other by the following:

Water Maintenance Technician III:
- In the absence of the Water Maintenance Supervisor, responsible for supervising the crew, preparing work schedules, daily/weekly logs, and administrative responsibility for the work order system.
- Primary heavy equipment operator for: backhoe, skidloader, dozer, crane, mini excavator, rented large excavators and other equipment.
- Perform pipefitting and welding to transmission and distribution facilities.
- Provide training for the Water Maintenance Technicians I and II.

Water Maintenance Technician II:
- Secondary heavy equipment operator for: backhoe, skidloader, dozer, crane, mini excavator, and other equipment.
- Assist Water Maintenance Technician III and/or Water Maintenance Supervisor with pipefitting and welding to transmission and distribution facilities.

ESSENTIAL DUTIES AND RESPONSIBILITIES

The following is a non-exclusive list of essential duties and responsibilities. The duties listed below are intended only as illustrations of the various types of work that may be performed. The omission of specific duties does not exclude them from the position if the work is similar or related as determined by the incumbent’s supervisor.

Perform pre-trip safety inspection on vehicles and equipment to be used daily. Ensure parts and materials are available and stocked on the crew truck.

Maintain and stock crew truck.

Routinely required to work in the streets and provide own traffic control, according to District safety standards.

Identify utility markings at job site to determine location for excavation.

Assume role of District representative to communicate with customers affected by scheduled work.

Rev. 7/06
Shutdown water service at repair site, and install appropriate shoring as needed.

Perform appropriate installation, repair, modification, or fabrication of water transmission and/or distribution pipelines per District specifications.
