We'll look at how this research-based framework supports community college students at all levels and in all disciplines to develop positive literacy identities and engage with challenging academic texts in meaningful ways. Together, we will use some of the reading apprenticeship strategies to see how they can help students draw out ideas from their class reading materials, improve comprehension, and establish connections between their course content and aspects of their lives.

1:30-3:30 p.m.

Flipping the Classroom, Part I (with Scott James in B-208) Technology has made it possible (and easy) to flip your classroom by assigning your lecture as homework, and what used to be homework becomes dynamic classroom learning activities. Let's discuss it.
