Catalog Content

The Rancho Santiago Community College District and Santiago Canyon College have made every reasonable effort to determine that everything stated in this catalog is accurate. Courses and programs offered, together with other matters contained herein, are subject to change without notice by the administration of the district for reasons related to student enrollment, level of financial support, or for any other reason, at the discretion of the district and the college. The district and the college further reserve the right to add, amend, or repeal any of their rules, regulations, policies, and procedures.

Rancho Santiago Community College District: Santiago Canyon College

Rancho Santiago Community College District serves residents of Anaheim Hills, Orange, Santa Ana, Villa Park, and a portion of Garden Grove.

Accredited by the Western Association of Schools and Colleges

Santiago Canyon College is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, (10 Commercial Boulevard, Suite 204, Novato, CA 94949, 415-506-0234), an institutional accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation and the U.S. Department of Education.

District Information

DISTRICT FACILITIES

Santiago Canyon College is situated on 82 acres at 8045 E.Chapman Avenue in Orange. It opened its first phase of classrooms in fall 1985 under the name of the Orange Campus of Rancho Santiago College. The Child Development Center opened in fall 1991 to provide childcare services. Santa Ana College is located on approximately 65 acres at 1530 W. 17th Street in Santa Ana. The college was first
opened in 1915 as an extension of Santa Ana High School and has been located at its present site, in the heart of Santa Ana, since 1947. The Orange and Centennial Education Centers each house adult continuing education programs, which provide high school diplomas, English as a Second Language, and courses that contribute to career advancement. Online education offerings also bring the classroom to you.

**DISTRICT MISSION**

The mission of the Rancho Santiago Community College District is to provide quality educational programs and services that address the needs of our diverse students and communities.

**DISTRICT OPPORTUNITY**

The Rancho Santiago Community College District provides opportunities for the pursuit of excellence through educational programs and services for local residents. The purpose of these programs and services is to enhance the quality of human life by providing public access to a college education. A significant number of classes are scheduled off-campus each semester in order to enhance accessibility to students. The map indicates the locations of the major instructional sites within the district.

About SCC

MESSAGE FROM PRESIDENT

Welcome to the Fall 2021 semester. You have made a wise choice in selecting Santiago Canyon College (SCC) to pursue your academic and/or training goals. Whether you are working towards an associate degree, transfer to a four-year school, update your existing technical skills, earn a certificate for a new career, or earn a high school diploma or equivalency certificate, SCC has what you seek and more.

SCC is proud to provide a safe and inclusive environment that promotes respect and dignity, identifies and eliminates barriers to learning, and creates equitable outcomes for all students. By enrolling at SCC, you become part of a campus enriched by students with unique ideas, values, beliefs, experiences, and identities that strengthen our college community.

While SCC remains committed to combating the spread of COVID-19, we are also equally committed to increasing the number of in-person, on-campus classes and services. At SCC, we believe that what happens here matters and that every course, every lecture, every encounter, and every achievement will prepare you to succeed in your future endeavors.

Jose F. Vargas
Interim President

SANTIAGO CANYON COLLEGE MISSION STATEMENT

Santiago Canyon College is an innovative learning community dedicated to intellectual and personal growth. Our purpose is to foster student success and to help students achieve these core outcomes: to learn, to act, to communicate and to think critically. We are committed to maintaining standards of excellence and providing accessible, transferable, and engaging education to a diverse community.

INSTITUTIONAL STUDENT LEARNING OUTCOMES
To achieve our mission, SCC has identified Institutional Learning Outcomes with four core competencies: Learn, Communicate, Act, and Think. Students will be able to

Learn—About Self and Others, Academic and Professional Issues

- Take responsibility for one’s own learning and wellbeing.
- Learn about one’s chosen academic major, while creating connections across disciplines.
- Learn about professional conduct, including workplace and community ethics, conflict management, and teamwork.

Communicate—With Clarity and Accuracy and in Diverse Environments

- Communicate ideas in a clear and articulate manner.
- Communicate accurately to diverse audiences.
- Communicate in various formats using diverse technologies.

Act—With Awareness of Self and the Local and Global Community of Persons

- Act to maintain one’s dignity and self-respect.
- Act as a responsible community member who treats others with respect, civility, empathy, honesty, and dignity.
- Act to increase the wellbeing of the global community by maintaining cultural literacy, lifelong learning, ethical consideration of each other, and the environment we all share.

Think—Critically, Creatively, and Reflectively

- Critically analyze, evaluate, organize and use quantitative and qualitative data to solve problems and develop logical models, hypotheses and beliefs.
- Creatively use concepts to making learning relevant.
- Reflectively assess one’s values, assumptions, and attitudes.

Accreditation

Santiago Canyon College is accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of Schools and Colleges (WASC), which is an institutional accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation and the U.S. Department of Education.

ACCJC defines accreditation as "...the process for evaluating and assuring the quality of education used by the American higher education community. It is a uniquely American quality assurance process through which institutions collectively set standards for good practice, conduct peer-based evaluations of institutions on a regular basis, confer accredited status on institutions, and make the results of accreditation review of institutions known to the public. Through accreditation, the higher education community shoulders the responsibility for monitoring the quality of the programs and services of member institutions."

Self Study Report and Visit

At its January 2006 meeting, WASC acted to synchronize the comprehensive visits of Santa Ana College and Santiago Canyon College in accordance with the Commission’s practice of scheduling simultaneous visits to colleges in multi-college districts. As a result, Santiago Canyon College completed an abbreviated Self Study Report and was visited by ACCJC representatives in the fall of 2008. Santiago Canyon College then developed a Follow-Up Report at the request of the Commission which was submitted in October 2009. At its January 6-8, 2010 meeting, ACCJC accepted the Follow-Up Report and reaffirmed Santiago Canyon College’s accreditation. A second Follow-Up Report was submitted in October 2010, and was accepted by ACCJC in January 2011.

Subsequently, Santiago Canyon College completed a Midterm Report which was submitted to the Commission in October 2011. The purpose was to assure that the recommendations made by the 2008 evaluation team had been addressed by the institution and that the college had also provided an update on the self-identified plans for improvement which were included in the institutional Self Evaluation. The attached letter from the Commission confirms that SCC sustained the changes implemented to meet the recommendations of the 2008 comprehensive evaluation team and Follow-Up Report.
Beginning in the spring of 2013, Santiago Canyon College began the development of its next self evaluation report in preparation for an accreditation team visit in October of 2014. In January of 2015, the ACCJC again reaffirmed the accreditation status of Santiago Canyon College along with its sister institution, Santa Ana College.

**Child Development Center Program Accreditation**

The SCC CDC has earned accreditation from the National Association of Young Children - the nation's leading organization of early childhood professionals. NAEYC Accreditation lets families in our community know that children in our program are getting the best care and early learning experiences.

Nondiscrimination Policy

The Rancho Santiago Community College District is committed to equal opportunity in educational programs, employment, and all access to institutional programs and activities. The District, and each individual who represents the District, shall provide access to its services, classes, and programs without regard to national origin, religion, age, gender, gender identity, gender expression, race or ethnicity, color, medical condition, genetic information, ancestry, sexual orientation, marital status, physical or mental disability, pregnancy, or military and veteran status, or because he or she is perceived to have one or more of the foregoing characteristics, or based on association with a person or group with one or more of these actual or perceived characteristics. The Chancellor shall establish administrative procedures that ensure all members of the college community can present complaints regarding alleged violations of this policy and have their complaints heard in accordance with the Title 5 and Title IX regulations and those of other agencies that administer state and federal laws regarding nondiscrimination. No District funds shall ever be used for membership, or for any participation involving financial payment or contribution on behalf of the District or any individual employed by or associated with it, to any private organization whose membership practices are discriminatory on the basis of national origin, religion, age, gender, gender identity, gender expression, race, color, medical condition, genetic information, ancestry, sexual orientation, marital status, physical or mental disability, pregnancy, or military and veteran status, or because he or she is perceived to have one or more of the foregoing characteristics, or because of his or her association with a person or group with one or more of these actual or perceived characteristics. Inquiries regarding compliance and/or grievance procedures may be directed to District’s Title IX Coordinator and/or Section 504/ ADA Coordinator. RSCCD Section 504/ADA Coordinator: Tracie Green, 2323 N. Broadway, Santa Ana, CA 92706, 714-480-7489. RSCCD Title IX Coordinator: Jennifer De La Rosa, 2323 N. Broadway, Santa Ana, CA 92706, 714-480-7404. SCC Deputy Title IX Coordinator: Deisy Covarrubias, 8045 E. Chapman Avenue, Orange, Ca. 92869, 714-628-4933

POLITICA DE NO DISCRIMINACION EL DISTRITO

El Distrito está comprometido a ofrecer la igualdad en oportunidades para programas educativos, empleos, y a todo acceso a los programas institucionales y actividades. El Distrito, y cada persona que representa al Distrito, debe proveer acceso a sus servicios, clases y programas sin importar el lugar de nacimiento, religión, edad, sexo, identidad de género, expresión del género, raza o etnicidad, color, condición médica, información de genética, descendencia familiar, orientación sexual, estado civil, incapacidad física o mental, embarazo, categoría militar o de veterano, o por creer que él o ella tiene una o más de las características mencionadas, o en base a estar relacionado con una persona o grupo que se cree tenga algunas de estas características. El Canciller debe establecer procedimientos administrativos para asegurarse que todos los miembros de la comunidad del colegio puedan presentar quejas sobre supuestas violaciones a esta política y que sus quejas sean escuchadas de acuerdo a los reglamentos señalados en el Título 5 y Título IX y por
aquellos de otras agencias que administran las leyes estatales y federales sobre la no discriminación. Ningún fondo del Distrito debe ser utilizado para la membresía, o para la participación incluyendo pagos financieros o contribuciones hechas a organizaciones privadas de parte del Distrito o de cualquier individuo empleado por el Distrito o con asociación, cuyas prácticas de membresía son discriminatorias en base a lugar de nacimiento, religión, edad, sexo, identidad de género, expresión del género, raza, color, condición médica, información de genética, descendencia familiar, orientación sexual, estado civil, incapacidad física o mental, embarazo, categoría militar o de veterano, o por creer que él o ella tiene una o más de las características mencionadas, o en base a estar relacionado con una persona o grupo que se cree tenga algunas de estas características. Las consultas relacionadas con los procedimientos de cumplimiento y/o queja pueden dirigirse al Coordinador del Título IX del Distrito y/o al Coordinador de la Sección 504/ADA. RSCCD Sección 504/ADA Coordinadora: Tracie Green, 2323 N. Broadway, Santa Ana, CA 92706, 714-480-7489. RSCCD Título IX Coordinador: Jennifer De La Rosa, 2323 N. Broadway, Santa Ana, CA 92706, 714-480-7404. SCC Sub-Título IX Coordinador: Deisy Covarrubias, 8045 E. Chapman Avenue, Orange, Ca. 92869, 714-628-4933

Interim Dean of Instruction & Student Services
B.A., German Literature, California State University, Fullerton
M.S., Education – TESOL, California State University, Fullerton

Gates, Alana (2019)
Assistant Professor of Real Estate
A.S., Real Estate, Irvine Valley College
B.A., Business Administration, California State University Fullerton

Gause, Tiffany (2013)
Associate Professor of Sociology
M.A., B.A., Sociology, California State University, Fullerton

Gonzalez, Sara D. (2019)
Professor of English
B.A., English Literature, California State University, San Bernardino
M.A., English Literature, California State University, Long Beach

Govea-Von Velasco, Melissa (2016)
Associate Professor of Gender, Sexuality, and Women's Studies
B.A., Sociology, Chapman University
M.A., Sociology, California State University, Fullerton
Graham, Song (2015)
Associate Professor of Counseling
B.A., Psychology, University of California, Irvine
M.S., Counseling, California State University, Long Beach

Granitto, James V. (2006)
Professor of Philosophy
B.A., Philosophy, University of California, Irvine
M.A., Philosophy, California State University, Long Beach

Guevara, Angela (2016)
Associate Professor of Adults with Disabilities
B.S., Criminal Justice Administration, University of Phoenix
M.S., Special Education – Mild to Moderate, National University

Gutierrez, Erika J. (2016)
Associate Professor of Ethnic Studies and Sociology
B.A., Ethnic Studies and Sociology, University of California, San Diego
M.A., Sociology, University of California, Riverside

Hall, Kathy (2016)
Associate Professor of English
B.A., English, Pepperdine University
M.A., Literature in English, California State University Northridge

Hauscarriague, Anne (2001)
Professor of Mathematics
B.S., Biology/Mathematics, St. Mary's College of California
M.A.T., Secondary Mathematics, Kent State University
Ph.D., Math Education, Claremont Graduate University

Hedenberg, Lacy (2015)
Associate Professor of Counseling
B.S., Human Services, California State University, Fullerton
M.S., Counseling, California State University, Fullerton

Henry, Amanda (2019)
Assistant Professor of Chemistry
B.S., Chemistry, Central Washington University
M.S., Organic Chemistry and Chemical Engineering, Western Washington University

Hernandez, Rosalba (2016)
Associate Professor of Counseling
B.A., Psychology, University of California, Irvine
M.S., Psychology, California State University, Long Beach

Ho, Nick (2019)
Assistant Professor of Counseling
B.A., Statistics, University of California, Berkeley
M.S., Educational Counseling, National University

Professor of History
B.A., University of California, Irvine
M.A., Ph.D., University of California, Riverside

James, Scott (2014)
Associate Professor/Distance Education Coordinator
A.A., Liberal Arts, Santiago Canyon College
B.S., Technical Management, Embry-Riddle Aeronautical University
M.A., Educational Technology, Pepperdine University

Jones, Vanessa (2013)
Associate Professor of Mathematics
B.S., Pure Mathematics, California State Polytechnic University, Pomona
M.S., Mathematics, California State Polytechnic University, Pomona

Johnson, Kimberly (2015)
Associate Professor of Biology
B.S., Marine Biology, California State University, Long Beach
M.S., Biology, California State University, Long Beach

Jordan, Loretta (1997)
Interim Dean of Enrollment and Support Services
B.A., History, University of California, Los Angeles
M.A., Educational Management, University of LaVerne
M.A., Clinical Psychology, Chicago School of Professional Psychology
Psy.D., Chicago School of Professional Psychology

Kramer, Jessica (2016)
Associate Professor of Mathematics
A.A., Liberal Arts, Santiago Canyon College
B.S., Biology, University of California, Irvine
M.A., Mathematics, California State University, Fullerton

Professor of English
B.A., English, University of California, Los Angeles
M.A., English, California State University, Fullerton

Kubicka-Miller, Jared (2006)
Professor of Communication
B.A., M.A., California State University, Long Beach

Professor of Communication
B.S., Northern Arizona University
M.A., California State University, Long Beach

Lamourelle, Regina (2000)
Professor of Human Development
B.A., University of California, Santa Barbara
M.S., Ed.D., Nova Southeastern University, Florida

Lennertz, William (1991)
Professor of English
B.A., California State University, Long Beach
M.F.A., George Mason University

Lui, Anson M.W. (2011)
Professor of Biology
B.S., M.S., California Polytechnic State University, San Luis Obispo
Malone, Charlie (2014)
Associate Professor of American Sign Language
B.A., Economics, California State University, Northridge
M.A., Special Education, California State University, Northridge
Professional Clear Level II Education Specialist Credential, California State University, Northridge

Martin, DeAnna (2015)
Associate Professor of Accounting
B.A., M.B.A., California State University, Long Beach
C.P.A., State of California

Martin, Linda (2015)
Associate Professor of Library & Information Studies
A.A., Cypress College
B.S., California State University, Dominguez Hills
M.L.S., University of California, Los Angeles

Martino, Danielle L. (2006)
Professor of Astronomy
B.S., California State University, Fullerton
M.S., San Diego State University

Medina, Guillermo (2019)
Assistant Professor of Kinesiology/Head Men’s Soccer Coach
B.A., Interdisciplinary Studies, National University
M.E., Cross-Cultural Teaching, National University
M.S., Physical Education, Azusa Pacific University

Mettler, Mary (2007)
Professor of Disabled Students Programs and Services
B.S., Communication Disorders, Boston University
M.S., Speech-Language Pathology, Boston University
Psy.D., M.A., Clinical Psychology, Pepperdine University

Miller, Robert (2011)
Associate Professor of Art
B.F.A., Art, Columbia College, Chicago
M.F.A., Art, California State University, Fullerton
Murphy, Ryan (2017)
Associate Professor, English
B.A., English Literature, California State University, San Bernardino
M.A., English Composition, California State University, San Bernardino
Ph.D., English Literature, Claremont Graduate University

Nguyen, Steven (2017)
Associate Professor of Chemistry
B.S., Biochemistry & Cell Biology, University of California, San Diego
M.S., Chemistry, University of California, San Diego
Ph.D., Chemistry, University of California, San Diego

Nguyen, Tuyen (2015)
Assistant Dean, Admissions/Records
A.A., Liberal Arts, Santiago Canyon College
B.A., Management, California State Polytechnic University, Pomona
M.A., Management, University of Redlands

Oase, Daniel (2016)
Associate Professor of Career Education
B.A., Psychology, University of California, Berkeley
M.B.A., University of California, Irvine

Pecenkovic, Nidzara (2015)
Associate Professor of English
M.A., English, Chapman University
M.F.A., Creative Writing, Chapman University

Petrocelli, Rachel (2016)
Associate Professor of History
B.S., French, Georgetown University
M.A., History, Stanford University
Ph.D., History, Stanford University

Pham, Elaine (2016)
Associate Professor of High School Subjects and Adult Basic Education
A.A., Mathematics, Orange Coast College
B.A., Mathematics, University of California, Santa Barbara
M.A., Social and Cultural Analysis of Education, California State University, Long Beach

Pimentel, Marcelo (2000)
Professor of Philosophy
B.A., California State University, Fullerton
M.A., University of Nevada, Reno

Quimzon, Eden (2006)
Interim Executive Director of Adult Education Block Grant
B.A., Liberal Arts, California State University, Long Beach
M.A., Reading and Literacy, Walden University

Professor of History and Political Science
B.A., California State University, Fullerton
M.A., History, California State University, Fullerton
M.A., Political Science, California State University, Long Beach
Ed.D., University of Southern California

Reed, Stephen (2007)
Professor of History
B.A., History and Spanish, University of California, Riverside
M.A., B.A., History, University of California, Riverside
M.A., History, University of Notre Dame

Roe, Maureen (2000)
Professor of English
B.A., English and Philosophy, Chapman University
M.A., English Literature, Chapman University
M.Ed., Curriculum and Instruction, American Intercontinental University

Rutan, Craig (2005)
Professor of Physics and Engineering
M.S., Physics, University of California, Irvine
M.S., B.S., Electrical Engineering, University of California, Irvine

Sakamoto, Scott (2001)
Professor of Mathematics
B.S., University of California, Santa Barbara
M.A., M.S., Ph.D., University of Arizona M.A., English, California State University, Fullerton

Salazar de la Torre, Rosa (1996)
Professor of Counseling
B.S., California State Polytechnic University, San Luis Obispo
M.A., California State University, Dominguez Hills

Salcido, Andy (1998)
Professor of Business, Computer Information Systems & Marketing
B.S., Computer Information Systems, Chapman University
M.B.A., Business Administration, Chapman University

Salcido, Denise (2016)
Associate Professor of High School Subjects and Adult Basic Education
B.A., Organizational Communication, Pepperdine University
B.A., Speech Communication, Pepperdine University
M.S., Human Resources Management, Chapman University

Sanchez, Sandra (2017)
Associate Professor, Biology
B.S., Biology, Cal State Fullerton, Fullerton
M.S., Biology, Cal State Fullerton, Fullerton

Satele, Arleen (2014)
Vice President of Administrative Services
B.A., Business Administration, California State University of San Bernardino
M.A., Public Administration, California State University of San Bernardino
Ed.D, Leadership and Change, Fielding Graduate University

Shields, Jolene (2008)
Professor of High School Subjects & Adult Basic Education
B.A., Spanish, University of California, Irvine
M.S., Educational and Instructional Technology, National University

Shekarabi, Nooshan (2005)
Professor of Political Science
B.A., M.A., Political Science, California State University, Fullerton

Shirah, Melissa (2016)
Associate Professor of Accounting
B.S., Accounting, San Diego State University,
M.S., Accounting, California State University, Fullerton
C.P.A., State of California

Siddiqui, Shereen (2016)
Associate Professor of Gender, Sexuality, and Women's Studies
B.A., Women's Studies, University of Missouri-Columbia
B.A., Sociology, University of Missouri-Columbia
M.A., Sociology, University of Missouri-St. Louis
Ph.D., Comparative Studies, Florida Atlantic University

Smith, Mark (2007)
Professor of Biology
B.A., Zoology, California State University, Stanislaus
M.A., Ecology and Evolution, California State University, Sonoma

Sproat, Barbara (2001)
Professor of Library & Information Studies
B.A., University of Minnesota, Duluth
M.L.S., University of Minnesota, Minneapolis
M.A., Children's Literature, Hollins University

Stringer, Martin (2008)
Interim Vice President of Academic Affairs
B.Ed., University of London
M.Ed., Azusa Pacific University

Swift, Cynthia J. (2006)
Professor of Physics
A.S., Physics, Cypress College
B.S., Physics, University of California, Irvine
M.S., Physics, California State University, Long Beach

Taber, Alexander G. (1999)
Professor of Economics
B.A., Economics, University of California, Santa Barbara
Ph.D., M.A., Economics, University of Chicago

Taylor, Mike (2004)
Professor of Biology
A.A., Orange Coast College
B.S., Zoology, California State University, Long Beach
M.S., Biology, California State University, Long Beach

Torneo, Nicole (2015)
Associate Professor of Chemistry
B.A., Economics, California State University, Fullerton
B.S., Chemistry, California State University, Fullerton
M.S., Chemistry, University of California, Berkeley

Tragarz, Roberta (2000)
Professor of English
B.A., English Literature, California State University, Long Beach
M.A., English Literature, University of California, Irvine

Tran, Sheena (2006)
Assistant Dean of Financial Aid, Scholarships & Veterans
B.S., Accounting & Finance, Cal State San Bernardino
M.S., Business Administration, University of Redlands
CPA, Certified Public Accountant, California Board of Accountancy

Umali Kopp, Christine E. (2007)
Professor of Psychology
B.A., University of California, Los Angeles
M.A., California School of Professional Psychology
Psy.D., Alliant International University

Valdos, Yanina (2017)
Associate Professor, Anthropology-Physical
B.A., Anthropology, concentration in Archeology, UC San Diego
M.A., Anthropology, Tulane University
Van Dyke-Kao, Rita (2019)  
Assistant Professor/Coordinator of ESL  
B.A., English, Trinity Western University  
M.A., Teaching English to Speakers of Other Languages (TESOL), Azusa Pacific University

Vargas, Jose F. (2004)  
Interim President  
A.A.S., ITT Technical Institute  
A.A., East Los Angeles College  
B.S., Business Administration, California State University, Dominguez Hills  
M.A., Education Administration, California State University, Dominguez Hills

Voelcker, Aaron (2012)  
Dean of Institutional Effectiveness, Library & Learning Support Services  
A.S., Math and Science, College of the Canyons  
B.A., Psychology, University of California, Irvine  
M.S., Administration, California State University, Bakersfield

Vu, Binh (2011)  
Associate Professor of Music  
B.A., M.M., California State University, Northridge  
D.M.A., Claremont Graduate University

Vu, Vivien (2015)  
Associate Professor of Counseling and Disabled Students Programs and Services  
B.S., Human Services, California State University, Fullerton  
M.S., California State University, Long Beach

Wada, Jeffrey (2011)  
Associate Professor of Chemistry  
B.S., M.S., University of California, Irvine

Wagner, Joyce (1999)  
Professor of Mathematics  
B.A., Mathematics, California State University, San Bernardino  
M.A., Ph.D., Mathematics, University of California, Los Angeles

Woodhead, Ian (2001)
Professor of Kinesiology

BSc (Hons), Psychology, Portsmouth Polytechnic (England)

Single Subject Teaching Credential, Mathematics, California State University, Long Beach

M.Ed., Education (Physical Education), Azusa Pacific University

Wright, K. Laney (2002)

Professor of Mathematics

B.A., Mathematics, Murray State University

M.A., Mathematics Education, California State University, Fullerton

Ph.D., Mathematics Education, Claremont Graduate University

COVID-19: A Message from Admissions and Records

Admissions & Records Online Resources

Amid ongoing concern about the coronavirus (COVID-19), Admissions and Records' top priority is the health, safety, and well-being of our students and staff. We are committed to being responsive and flexible to your needs. Here are a few ways we are here to serve you during this time.

**WebAdvisor:** We strongly encourage you to access your WebAdvisor account through [www.sccollege.edu/webadvisor](http://www.sccollege.edu/webadvisor) to make changes to your class schedule, and pay for classes. It is typically easier and faster to manage your student account online.

**In-Person:** Our office is closed until further notice.

**Phone:** You may reach us at (714) 628-4901 Monday - Thursday 8:00AM - 1:00PM and 2:00PM - 4:00PM. If you would like to reach us via phone after 4:00PM, send us an email or chat request and we will call you back.

**Online Chat:** We are available to assist you via the Cranium Cafe online chat service from 4:00PM - 5:30PM Monday - Thursday and 8:00AM - 12:00PM on Fridays. Hours are subject to change.

**Email:** We can answer your questions and accept petitions or forms via email at admissions@sccollege.edu. Please make sure your email includes a brief explanation of what you need as well as your name and student ID number. Petitions and forms must be filled out completely and signed before we are able to accept and process. Petitions and forms can be found at [https://www.sccollege.edu/StudentServices/Admissions/Pages/Forms.aspx](https://www.sccollege.edu/StudentServices/Admissions/Pages/Forms.aspx)

**Transcripts:** You can order your transcripts online at [www.sccollege.edu/transcripts](http://www.sccollege.edu/transcripts).

Please accept our thanks in advance for your cooperation and understanding as we all work together during this time.

If you need to scan a document, download the free mobile app CamScanner at camscanner.com This powerful app can convert and auto-adjust any picture that you take from your phone into a PDF file.
Full-Time – Part-Time Definition

Full-time students (Fall and Spring semesters) = 12 or more units
Part-time students (Fall and Spring semesters) = Less than 12 units
Full-time students (Summer) = 6 units
Part-time students (Summer) = Less than 6 units

Admission Requirements

Who May Attend

High school graduate

OR

Person in possession of a California high school proficiency certificate or GED

OR

Person 18 years of age or older who can profit from instruction,

OR

High school student taking dual enrollment course(s).

OR

International Students with a valid Visa.

How and When To Apply

New students and students returning after an absence of two consecutive full semesters (fall, spring) must file an application for admission to the college.

File transcripts of high school(s) and colleges attended with the Admissions and Records Office if pursuing a degree at Santiago Canyon College or receiving financial assistance.

Application dates:

Fall semester: beginning April 1

Intersession: beginning November 1
Applying to the College

New or Former Students

New or former students need to apply. A new student is a student who has never attended Santiago Canyon College or Santa Ana College. A former student is a student who attended SCC or SAC, did not enroll for two consecutive full semesters, and now wishes to return. All applications are completed on the [www.sccollege.edu](http://www.sccollege.edu) website. Applications are processed within 1-3 business days. An email will be sent with a student’s WebAdvisor Login and other student information. The WebAdvisor Login and Student ID Number for former students will always remain the same. Once you have been assigned a WebAdvisor Login, you may then go online, change your password, and view your registration appointment date and time.

Continuing Students

A continuing student is a student who has not missed two consecutive full semesters. The student may check online for his/her registration date and time and may register online at that time or any time until the Friday before the term begins. Students are encouraged to meet with a counselor each semester in order to review their academic progress before completing registration.

How To Prepare for Proper Course Placement, Registration and Educational Planning (Student Equity And Achievement Program)

The Student Equity and Achievement Program (SEAP) provides students with access to core programs and services designed to help them achieve their academic and personal goals in a timely manner.

New student orientation and advisement are available to all new students. Upon completion of the orientation, students can meet with a counselor to receive assistance in developing a first-semester education plan. The plan includes mathematics, English, or American College English/English as a Second Language (ACE/ESL) course placement recommendations and courses aligned with students’ educational goals. All students must complete their Comprehensive Education Plan (semester-by-semester plan) by the third semester but no later than completing 15 degree-applicable units. A comprehensive student education plan will detail all of the coursework required to reach a desired educational goal. Students may accomplish this requirement by enrolling in a counseling course or scheduling an appointment with a counselor. A request to be exempt from completing these services is available on the Admissions & Records website. Exemption approval requires that students provide sufficient justification for their request.

Assessment/AB705

Santiago Canyon College has reformed how placement in mathematics, English, and English as a Second Language (ESL) courses is determined. Signed into law by Governor Brown on October 13, 2017, all California Community Colleges were tasked with implementing Assembly Bill 705. This bill requires that students have access to transfer-level coursework in mathematics, English, and ESL courses. Students planning to enroll in mathematics, English, and/or reading courses do not need to take a placement test. Placement into these courses is provided as follows:

Recommendation Based on High School Performance Information

Students receive course recommendations for mathematics, English, and reading based on self-reported high school non-weighted grade point average (GPA), high school coursework completion, and earned grades.

Guided Placement Course Recommendation

The Guided Placement tool is for students who do not have access to their high school transcript or did not attend high school in the United States. This placement tool provides students with the ability to reflect on mathematics, English or ESL, and reading skills.
Assessment and Course Placement for American College English/ English as a Second Language (ACE/ESL)

Students interested in enrolling in the ACE/ESL program need to complete the ACE/ESL Guided Placement for course placement recommendations. For more information visit the Assessment Services Website at sccollege.edu/testing.

Assessment for Chemistry Placement

Assessment for Chemistry placement is available for students planning to enroll in SCC’s Chemistry 200A (General Chemistry A). An assessment appointment can be made by calling 714-628-4800. For English, mathematics, and/or chemistry, some requisites are being modified for courses that need to comply with AB 705. Requisites include prerequisites, co-requisites, and recommended preparation or advisories. Please contact the Counseling Center for questions about courses with requisites that indicate an English or mathematics course as they may now include a different course from the placement profile.

Disability-Related Accommodations

Students who require disability-related accommodations must request them at least two weeks prior to taking the Chemistry 200A assessment. To arrange for accommodations for assessment, contact Disabled Students Programs and Services (DSPS) at 714-628-4860 to schedule an evaluation of needs.

AB 1805 Accessing Placement Data

Santiago Canyon College strives to provide the best possible course placement recommendations for each student. Placement Data is available on the SCC website under the “Assessment Services” page. SCC’s disclosure of these results allows prospective students and the public to view the number of students assessed and placed into transfer-level mathematics, English, and ACE/ESL courses.

Coursework from Other Colleges

Students who have attended another regionally accredited college and have completed courses that meet the prerequisite for SCC Courses can submit transcripts to clear prerequisites by one of the following methods:

- Bring transcripts to the Counseling Center (SCC, Room D-106) for verification and prerequisite clearance.
- Submit an online prerequisite clearance request form with supporting documentation at sccollege.edu/counseling and select “Course Prerequisite Clearance.”

Right to Challenge

Students who want to challenge their course placement recommendation/s need to submit a Requisite Challenge Form to the appropriate department two weeks prior to the start of the semester. Additional information about this process is available on the SCC website under “Assessment Services.”

Student Photo Identification Card

A student is eligible for a photo identification card after paying for classes. Photo I.D. is located in the Cashier’s Office in E-102. This card facilitates student use of the Library, Student Health and Wellness Services, computer laboratories, the Admissions Office, and a variety of college services.

Residency

All students are classified as either a resident of the State of California or non-resident when applying for admission. “Residents” are students who have residence in the state for more than one year before the initiation of a semester or term (EC 68017), based on the “Residency Determination Date” which is the day immediately preceding the opening of instruction (applies to U.S. citizens, permanent residents, and persons holding certain visas that allow for residency). “Non-residents” are students who have not established residence in the State of California for one year as of the residency determination date.

- Persons who are 18 years of age or older (adults) establish residency in accordance with EC 68017 above. Adult residency begins after the 18th birthday.
- Persons who are under 18 years of age (minors) establish residence in accordance with above “resident” definition and the following:
a. Married minors may establish their own residence.

b. The residence of the parent with whom an unmarried minor child maintains a place of abode is the residence of the unmarried minor child. When the minor lives with neither parent, residence is that of the parent with whom the minor last resided. The minor may establish residence when both parents are deceased and a legal guardian has not been appointed.

c. The residency of unmarried minors who have a parent living cannot be changed by their own acts, appointment of legal guardians, or relinquishment of a parent's right of control (EC 68062).

3. Exceptions apply under certain conditions to active members of the military.

4. Specific residency problems will be answered by the Admissions and Records Office.

5. Non-Citizen Students: Students with a "permanent resident" visa, refugee status, or amnesty approval may establish residency in accordance with above discussion. All visas must be examined by the college to determine residency status.

International Student Admissions

SCC is a SEVP approved institution to host international students who enter the country on F-1 student visas. Foreign students should contact the International Student Office or visit www.sccollege.edu/international for application forms and instructions. Application deadline: Fall: July 1, spring January 4, and summer May 1. A $25 application fee is required along with the application form. For more information, call (714) 628-5050.

Admission Policy of International Students on F-1 Visa Status:

The international student must submit a complete, official academic transcript of all high school and previous college work attempted. Transcripts must be officially translated into English, bear the school seal, and be signed by the registrar or another appropriate official. Applicants are considered for admission only if their course grades are above average (C+ or higher). International students must have sufficient knowledge of English to enable them to profit from instruction at the college level. Adequacy of English proficiency is determined by a satisfactory score of TOEFL iBT 61, TOEFL PBT 500+, IELTS 5.0+ or iTEP 3.5+. International students must be at least 18 years of age unless they are graduates of an accredited United States high school.

Students on the F-1 Visa must present evidence that they have financial resources to defray costs during the period of attendance at the college. The annual tuition for a student enrolled in 12 units each semester is $8,304. $325 non-resident tuition per unit + $46 enrollment fees per unit = $371 per unit for international students. The health insurance premium is $1,671 per year. For living expenses and other costs, such as books, visit the college website at www.sccollege.edu/international. All tuition, fees, and expenses are subject to change with new state legislation.

International student applicants must be in good physical health as certified by a licensed physician on the form provided by the college. Measles and poliomyelitis immunization must be completed. The physical examination by a physician must include a chest x-ray report and indicate that students have no contagious disease.

Proof of health insurance is required prior to registration. The college accepts no responsibility for medical expenses incurred by international students.

Santiago Canyon College does not provide housing for students; however, our offices offer information resources to help students find housing options. Students can participate in a homestay program arranged through private companies. SCC does not monitor or administer these programs. For housing, information visit www.sccollege.edu/international.

Fees and Expenses/ Drop for Non-Payment

Drop for Non-payment Policy: Enrollment fees must be paid in full within 3 days of registration (including weekends and holidays) or all classes may be dropped and released to other students. The day you register is counted as day.

1. All students are required to pay enrollment fees of $46 per unit within 3 days of registration.
If classes are not paid within that time, the student may be dropped from all classes and will have to re-register.

In addition to the 3-day non-payment drop policy, there is a final outstanding balance drop date. All fees must be paid in full by the Friday before the start of the term. The college reserves the right to postpone or suspend nonpayment drops. No balance will be carried over into the start of the semester. It is the student’s responsibility to drop by the refund deadline to avoid any fees for enrolled classes.

2. A health fee of $19 per semester ($16 for summer session) is charged to all students whether or not they choose to use health services. Health Fee Exemptions (Education Code 76355): (1) Any student who depends exclusively upon prayer for healing in accordance with the teachings of a bona fide religious sect, denomination, or organization, provided that the student presents documentary evidence of an affiliation with such a bona fide religious sect, denomination, or organization. (2) Any student enrolled in an approved Apprenticeship Program. A request for an exemption may be filed at the Admissions & Records Office.

3. Parking permits are $20 for students with fee waivers and $30 for all other students during the fall and spring semesters and $10 during summer session. No permit is required for intersession. Permits may be purchased online through WebAdvisor or by using the link found on the Safety & Security websites. A permit is required to park on campus at SAC and SCC. Only one permit is necessary for students who attend both colleges. Motorcycles are exempt in designated parking areas.

4. A Student Life and Leadership fee of $10 (fall and spring semesters) or $5.00 (summer session) is payable at registration for classes. The fee includes a free Photo ID for college services: (1) Library, Student and Instructional Services; and (2) $10 for college activities. Photo ID and term validation is available at Santiago Canyon College. These services and fees are optional.

5. The Santiago Canyon College Student Representation Fee of $1 is charged per semester. The $1 mandatory fee (Education Code 76060.5) is used by the Associated Student Government to represent the view of students with governmental agencies.

6. Transportation Fee: All students pay a mandatory fee each fall and spring semester. This fee provides unlimited access to all fixed route buses operated by the Orange County Transit Authority (OCTA). The fee per semester is $5.00 for full-time students (enrolled in 12 or more units) and $4.30 for part-time students (enrolled in less than 12 units). Bus access will be available seven days per week for school, work, or any other destinations. In the Partnership agreement between OCTA and RSCCD, 100% of the fee proceeds are remitted to OCTA. No dollars are kept for RSCCD usage or profit for administering this program for our students.

Non-Resident Tuition

Non-resident Tuition: $300 per unit in addition to the per enrollment fee for out-of-state residents and for students who are a citizen of a foreign country. Refer residency questions to the Admissions and Records Office.

Visa, MasterCard, Discover and American Express are accepted for all fees.

All tuition, fees, and expenses are subject to change with new state legislation.

Open Educational Resources (OER)

Open Educational Resources (OER) Open Educational Resources refer to free or low cost class materials, such as a textbook or online resource. Classes listed with an OER symbol use a free textbook unless otherwise noted in the class schedule. Classes using Lumen Learning OER will charge a materials fee for a standard textbook and online resources.

Refund of Tuition and Enrollment Fees

Students are eligible for full refunds of fees provided they have officially dropped from classes prior to the refund deadline or their classes have been cancelled by the college. There is no refund for classes added after the refund deadline date. (See current WebAdvisor schedule for refund deadline).
Refunds are based upon the date the student withdraws from the course online.

No refund will be processed until assurance has been given that any check in payment for tuition has been cleared.

Enrollment Fee refunds are granted in accordance with established provisions of the community college education code. Contact the Cashier’s Office or refer to the current class schedule for details of the refund policy and procedures.

There is no refund for variable units not completed.

**Preferred Name**

In support of Santiago Canyon College’s commitment to providing an equitable and safe environment for students whose legal name does not reflect their gender identity and/or gender expression, SCC now accepts requests from students to use a preferred first name on class rosters whenever possible.

Students who wish to designate a preferred name should fill out the Preferred Name Change Form available in the Admissions and Records Office or online. It is important to understand that Designating a preferred name for use at SCC does NOT constitute a legal name change. A student’s legal name will continue to be used on certain college documents, such as transcripts. Initially, preferred names will only be used on class rosters and waiting lists for use by instructors and departments.

Students may designate a preferred first name. Their legal last name will remain unchanged and will be included with their preferred name. Preferred names are limited to alphabetical characters, a hyphen (-) and a space. Generally, students can set a preferred name to any name, but the college reserves the right to delete a preferred name if it is used inappropriately, such as misrepresentation or fraud; such usage will also subject the student to disciplinary action in accordance with college policy.

**RSCCD Rates of Student Right-To-Know Act**

The rates below are placed here in accordance with the federally mandated Student Right-To-Know Act.

Of the degree, certificate or transfer-seeking first-time, full-time freshmen who entered RSCCD colleges in Fall 2014, the “completion rate” represents those students who earned an Associate’s Degree, Certificate of Achievement, or 60 UC/CSU transferable credits within three years.

**2014 COHORT COMPLETION RATE**

- **STATE** - 29%
- **SAC** - 23%
- **SCC** - 35%

The “transfer rate” represents non-completer students who transferred to any other two- or four-year institution within three years.

**2014 COHORT TRANSFER RATE**

- **STATE** - 10%
- **SAC** - 10%
- **SCC** - 13%
These rates do not represent the success rates of the entire student population at RSCCD colleges nor do they account for student outcomes occurring after this three-year tracking period.

In compliance with the Student Right-to-Know and Campus Security Act of 1990 (Public Law 101-542), it is the policy of our college district to make available its completion and transfer rates to all current and prospective students. Beginning in Fall 2013, a cohort of all certificate-, degree-, and transfer-seeking first-time, full-time students were tracked over a six-year period. Their completion and transfer rates are listed above. These rates do not represent the success rates of the entire student population at the College nor do they account for student outcomes occurring after this six-year tracking period.

Based upon the cohort defined above, a Completer is a student who attained a certificate or degree or became ‘transfer prepared’ during a six-year period, from Fall 2013 to Spring 2019. Students who have completed 60 transferable units with a GPA of 2.0 or better are considered ‘transfer prepared’. Students who transferred to another post-secondary institution, prior to attaining a degree, certificate, or becoming ‘transfer prepared’ during an eleven-semester period, from Spring 2014 to Spring 2019, are transfer students.

Please note, this data is accurate as of the publication date.

Registered Sex Offender Information
Current information concerning registered sex offenders can be obtained by going to: www.meganslaw.com

“Sex offenders are required to register with the police in the jurisdiction in which they reside and if attending institutions of higher learning in a different jurisdiction, they must register with local police for that area. Sex offenders who may be required to register should do so at the Orange Police Department if attending Santiago Canyon College.

Right To File a Complaint Regarding the Student Success and Support Program (SSSP)
Any student who feels that she/he has experienced discrimination in any SSSP core service (assessment, orientation, or counseling/advisement) may file a complaint with the Dean of Counseling and Student Support Services by calling (714) 628-4775.

Right To Review and Challenge Records
The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 30 days of the day the college receives a request for access.

Students should submit to the Assistant Dean of Admissions, written requests that identify the record(s) they wish to inspect. The College official will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes is inaccurate.

Students may ask the college to amend a record that they believe is inaccurate. They should write the college official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate.

If the college decides not to amend the record as requested by the student, the college will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by the college in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees or a member of an official committee.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Upon request, the college discloses education records without consent to officials of another school in which a student seeks or intends to enroll. [NOTE: FERPA requires an institution to make a reasonable attempt to notify the student of the records request unless the institution states in its annual notification that it intends to forward records on request.]

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Santiago Canyon College to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office

U.S. Department of Education

400 Maryland Avenue, SW,

Washington, DC 20202-5901

Schedule of Classes

A schedule of classes is prepared each semester and is available online. It includes general information, courses offered, hours, rooms, and instructor names.

Textbooks and Supplies

Textbooks, supplies, and athletic equipment must be purchased by the student. Special fees required for certain courses are indicated in the class schedule.

Solomon Amendment For Military Recruiters

The Solomon Amendment is a federal law that allows personally identifiable student information to be released to recruiters that would have been denied them under FERPA. This law mandates that institutions receiving federal financial aid must fulfill military recruitment requests for access to campus and lists of students. If Santiago Canyon College fails to comply with these requests from military recruiters, the college will lose federal financial aid funding.

Transcripts

Students may obtain an official transcript of records by submitting a request online or in person at the Admissions and Records Office at Santiago Canyon College. The first two counter transcripts will be issued without charge; thereafter, a $3 charge will be assessed for each additional mailed transcript. Express transcripts and all online transcripts are $8. Fed Ex Next Day Delivery* is available for an additional fee of $18 per delivery address. All official transcripts are copies of the student's permanent record in the Office of Admissions and Records at either college. Only records prepared and issued directly from that office will be considered official or certified for accuracy. Transcripts from other institutions are property of the college and will not be released.

Admissions and Records do not hold transcripts for final grades. It is the student's responsibility to verify that all grades have been posted via WebAdvisor before requesting transcripts.
International Transcripts – Evaluation Practices

Santiago Canyon College may grant credit for college coursework completed outside of the United States. Students must submit their records to a Santiago Canyon College recognized evaluating agency, in order to obtain an equivalency/evaluation report (go to www.naces.org for approved listings of evaluating agencies). Once the Admissions Office at Santiago Canyon College receives the equivalency/evaluation report, an official evaluation will be conducted to determine course applicability.

The following guidelines apply to coursework completed outside of the United States.

There is no transfer credit limit a student may be granted for coursework completed outside of the United States. However, Santiago Canyon College may only grant credit for lower-division classes.

College credit may only be granted toward Santiago Canyon College’s local associate degrees (AA or AS) and certificate programs. Credit will not be granted toward Associate Degrees for Transfer (AA-T or AS-T).

Coursework may not be used to fulfill the following General Education Requirements: English Composition, American Institutions, Reading, and Oral Communication.

Courses intended to fulfill major requirements must be submitted to the major department for approval.

Coursework may not be used to fulfill General Education Certification requirements for CSU-GE or IGETC (with the exception of Area 6 – Language Other Than English).

Santiago Canyon College may not determine course transferability to other colleges and universities.

Students who have completed coursework outside of the United States are encouraged to meet with a counselor to determine a course and program’s applicability.

Withholding of Student Records Reference(s) BP 5035:

Title 5, Section 59410 Students or former students who have been provided with written notice that they have failed to pay a proper financial obligation shall have grades, transcripts, diplomas, and registration privileges withheld. Revised: July 21, 2014 (Previously BP5555).

Academic Freedom

The teacher should be free to think and to express ideas, free to select and employ materials and methods of instruction, free from undue pressures of authority, and free to act within his/her professional group. Such freedom should be used judiciously and prudently to the end that it promotes the free exercise of intelligence and student learning. Academic freedom is not an absolute. It must be exercised within the law and the basic ethical responsibilities of the teaching profession. Those responsibilities include:

- An understanding of our democratic tradition and its methods.
- A concern for the welfare, growth, maturity, and development of students.
- The method of scholarship.
- Application of good taste and judgment in selecting and employing materials and methods of instruction.

(BP4201 Faculty)
Academic Honesty

Introduction

Students at Santiago Canyon College are expected to be honest and forthright in their academic endeavors. To falsify the results of one's research, to steal the words or ideas of another, or to cheat on an examination corrupts the essential process by which knowledge is advanced. Academic dishonesty is seen as an intentional act of fraud, in which a student seeks to claim credit for the work or efforts of another without authorization or uses unauthorized materials or fabricated information in any academic exercise. We, as an institution, also consider academic dishonesty to include forgery of academic documents, intentionally impeding or damaging the academic work of others, assisting other students in acts of dishonesty or coercing students into acts of dishonesty.

Procedures

In cases where a violation of academic honesty is discovered, the faculty member is encouraged to file an "Academic Honesty Incident Report" form and distribute the form as specified.

There are two categories of sanctions: Limited and College-wide. Limited sanctions include an academic action such as assigning a lower grade or a grade of "F or zero" for the test or project. College-wide sanctions include any sanction that will affect a student's standing with the college-at-large, up to and including suspension or expulsion from the college.

In matters relating to academic honesty violations, the primary responsibility for employing the Limited Sanctions rests with the instructor and the academic division where the violation allegedly occurred. The Associate Dean of Student Development will assist in all College-wide disciplinary sanctions at Santiago Canyon College.

Academic Honors

Academic Honors at Graduation

Academic honors are awarded to students who do outstanding coursework leading to graduation from Santiago Canyon College. The graduate must have completed at least 30 units of coursework within the Rancho Santiago Community College District of which 18 units or more must be letter grades of "C" or better.

Rancho Santiago Community College District coursework and all transfer work will be computed in the Honors designated GPA. Graduation honors are awarded as follows:

President's Scholar. See Honors Program and Honors Courses

With Highest Honors. The highest honors designation is placed on the transcript and diploma of the graduate who has achieved an overall grade point average (GPA) of 4.0. Students with Academic Renewal Without Course Repetition are not eligible for Academic Honors With High Honors.

With High Honors. The high honors designation is placed on the transcript and diploma of the graduate who has achieved an overall grade point average (GPA) of 3.8. Students with Academic Renewal Without Course Repetition are not eligible for Academic Honors With High Honors.

With Honors. The honors designation is placed on the transcript and diploma of the graduate who has achieved an overall grade point average (GPA) of 3.5. Students with Academic Renewal Without Course Repetition are not eligible for Academic Honors With High Honors.
Departmental Honors. Honors are awarded to students who do outstanding work in their majors. Eligibility is determined by inclusion in the academic honors categories listed above.

Academic Renewal

Inasmuch as past performance does not always reflect accurately a student's actual ability, Santiago Canyon College has established a policy of academic renewal. Students may petition to have their academic record reviewed for academic renewal of substandard academic performance.

Academic Renewal With Course Repetition

Only units taken at Santiago Canyon College and/or Santa Ana College may be considered for Academic Renewal With Course Repetition, not units taken at any other institutions.

A student who earned a D, F, or NP grade may repeat the course once up to two times to improve the grade of the substandard work. Once a grade of D, F, or NP has been recorded, subsequent withdrawals (notations of W) will count toward the two allowable repeats. No more than two substandard grades for the same course may be alleviated and excluded from the Grade Point Average.

A student may not repeat a course to change a grade of C or better. Courses repeated under this provision will be indicated as repeated on the student's academic transcript.

Course repetition at Santiago Canyon College does not guarantee that other institutions will approve such an action. This determination will be made by the respective transfer institution.

For courses designated as non-repeatable (Title 5, §55041), only the first two substandard grades may be excluded in computing the student's grade-point average (Title 5, §55042(c)).

The petition is submitted to the Admissions and Records Office of the student's home campus (SCC or SAC). Please consult with a college counselor about any questions regarding Academic Renewal eligibility.

Rancho Santiago Community College District

ADMINISTRATIVE REGULATION

Chapter 4

Academic Affairs

AR 4240 Academic Renewal

Reference(s): Title 5 Section 55046

Academic Renewal Without Course Repetition

• To be eligible, the student must have completed at least 15 units with a 3.0 GPA or 24 units with a 2.0 GPA or higher in sessions subsequent to the substandard work being petition. All lower-division units from all colleges attended will be counted from the semester immediately following the substandard work.

• The substandard academic renewal work will not count toward graduation or certification, and the permanent academic record shall be annotated in such a manner that all work remains legible. Up to 30 units combined of below “C” work from the Colleges may be disregarded in the computation of the grade point average. The student may choose the 30 units of substandard grades to disregard.

• After an associate degree or general education certification is posted, academic renewal without course repetition is not accepted.

• Academic Renewal Without Course Repetition is solely the policy of the Rancho Santiago Community College District and may not necessarily be followed by other institutions.
• Academic Renewal Without Course Repetition may be granted multiple times by Santa Ana College and/or Santiago Canyon College but is limited to a total of 30 units.

• As a result of AB705, a student may seek grade alleviation without course repetition when the substandard work occurred in an English or Mathematics course that is part of a remedial (pre-transfer level) sequence OR in an ACE or EMLS course that is part of the sequence leading to transfer-level English (CSU GE Area A2 or IGETC GE area 1A) once the student has successfully passed the transfer-level course, regardless of the student’s overall academic record since the semester in which the “D”, “F”, or “NP” was earned.

A student seeking alleviation under this scenario will be eligible for alleviation subject to these limitations: If a student received a grade of “C” or better or “P” in a transfer-level English course (CSU GE Area A2 or IGETC GE area 1A APPROVED course), the highest grade earned shall be used when computing the student’s cumulative grade point average. Grades earned in courses in a remedial English sequence pre-requisite to a transfer-level course may only be alleviated once the student earns a satisfactory grade (‘C” or better or “P”) in the transfer-level course. Neither the student’s academic record since earning the “D”, “F”, or “NP” grade nor the time elapsed since earning the “D”, “F”, or “NP” is relevant to this scenario. The units alleviated in this scenario shall not be counted as part of the maximum 30 units of substandard work allowed under the first provision of AR 4240.

A student seeking alleviation under this scenario will be eligible for alleviation subject to these limitations: If a student received a grade of “C” or better or “P” in a transfer-level Mathematics or Quantitative Reasoning course (CSU GE Area B4 or IGETC GE 2A approved course), the highest grade earned shall be used when computing the student’s cumulative grade point average. Grades earned in courses in a remedial Math sequence pre-requisite to a transfer-level Mathematics or Quantitative Reasoning course may only be alleviated once the student earns a satisfactory grade (‘C” or better or “P”) in the transfer-level course. Neither the student’s academic record since earning the “D”, “F”, or “NP” grade nor the time elapsed since earning the “D”, “F”, or “NP” is relevant to this scenario. The units alleviated in this scenario shall not be counted as part of the maximum 30 units of substandard work allowed under the first provision of AR 4240.

A student seeking alleviation under this scenario will be eligible for alleviation subject to these limitations: If a student received a grade of “C” or better or “P” in a transfer-level English course (CSU GE Area A2 or IGETC GE area 1A APPROVED course), the highest grade earned shall be used when computing the student’s cumulative grade point average. Grades earned in the ACE or EMLS sequence pre-requisite to the transfer-level English course (CSU GE Area A2 or IGETC GE area 1A APPROVED course) may only be alleviated once the student earns a satisfactory grade (‘C” or better or “P”) in the transfer-level course. Neither the student’s academic record since earning the “D”, “F”, or “NP” grade nor the time elapsed since earning the “D”, “F”, or “NP” is relevant to this scenario. The units alleviated in this scenario shall not be counted as part of the maximum 30 units of substandard work allowed under the first provision of AR 4240.

When Academic Renewal Without Course Repetition occurs under this section, the student’s permanent academic record shall be annotated in such a manner that all work remains legible, ensuring a true and complete academic history. This petition is submitted to Admissions and Records.

RSCCD Academic Renewal Without Course Repetition is established pursuant to Title 5 section § 55046.

Academic and Progress Probation/Dismissal

A student’s academic standing and progress is calculated at the end of the fall and spring semesters (calculations are not done after the summer session or intersession), based only on the SCC/SAC units and cumulative (RSCCD Total) grade point average (GPA). Academic and Progress Probation calculations begin after a student has attempted 12 units or more at SCC/SAC. Students are placed on Academic Probation when their RSCCD Total GPA for all SCC/SAC coursework falls below 2.0. Students are placed on Progress Probation when the percentage of coursework at SCC/SAC has an entry of “W”, “I”, “NP”, and “NC” which reaches or exceeds fifty percent (50%) of the coursework attempted.
A1 - Academic Probation (First Time)
Students placed on academic probation for the first time (first semester under a RSCCD Total GPA of 2.0) are required to attend a counseling intervention workshop. An e-mail notification is sent to the student and a registration hold is placed on the student record until the completion of the workshop.

A2 - Academic Probation (Second Time)
Students who have two consecutive semesters with a RSCCD Total GPA below 2.0 will lose priority registration for the next registration opportunity. Their registration date will be after all new applicants.

AD - Academic Dismissal
Students who have three consecutive semesters with a RSCCD Total GPA of below 2.0 at the end of the spring semester are dismissed. Students who are dismissed have a hold placed on their records and an e-mail is sent notifying them of their status. Students cannot register for classes at SCC or SAC for one full semester. When students returns after “sitting out” one semester, they will return on academic probation and will continue to lose registration priority until their RSCCD Total GPA is at or above a 2.0.

Students who have three consecutive semesters with a RSCCD Total GPA of below 2.0 at the end of the spring semester are dismissed. Students who are dismissed have a hold placed on their records and an e-mail is sent notifying them of their status. Students cannot register for classes at SCC or SAC for one full semester. When students returns after “sitting out” one semester, they will return on academic probation and will continue to lose registration priority until their RSCCD Total GPA is at or above a 2.0.

Students who have three consecutive semesters with a RSCCD Total GPA of 2.0 at the end of the fall semester are “subject to dismissal” and a hold is placed on their student record. Since they have already registered for the spring semester they are given a grace period to improve their RSCCD Total GPA. If the RSCCD Total GPA remains below a 2.0 at the end of the spring semester, they will be academically dismissed and will not be able to register for classes at SCC or SAC for one full semester. When they return after “sitting out” one semester, they will return on academic probation and will continue to lose registration priority until their RSCCD Total GPA is at or above a 2.0.

Progress Probation and Dismissal

P1 - Academic Probation (First Time)
Students placed on Progress Probation for the first time (first semester where the total of W, NP, or I grades is 50% or more of all grades earned) will be notified and provided intervention services.

P2 - Academic Probation (Second Time)
Students who have two consecutive semesters of progress probation will lose priority registration for the next registration opportunity. Their registration date will be after all new applicants.

PD - Progress Dismissal
Students who have three consecutive semesters with less than 50% of their coursework earning a grade at the end of the spring semester are dismissed. Students who are dismissed have a hold placed on their records and an e-mail is sent notifying them of their status. A student cannot register for classes at SCC or SAC for one full semester. When the student returns after “sitting out” one semester, the student will return on progress probation and will continue to lose registration priority.
Students who have three consecutive semesters with less than 50% of their coursework completed with a grade at the end of the spring semester are dismissed. Students who are dismissed have a hold placed on their records and an email is sent notifying them of their status. A student cannot register for classes at SCC or SAC for one full semester. When the student returns after "sitting out" one semester, the student will return on progress probation and will continue to lose registration priority.

Students who have three consecutive semesters with less than 50% of their coursework completed with a grade at the end of the fall semester are "subject to dismissal" and a hold is placed on their student record. Since the student has already registered for the spring semester, they are given a grace period to improve their course completion rate. If the percentage of completed coursework remains below 50% at the end of the spring semester, they will be dismissed and will not be able to register for classes at SCC or SAC for one full semester. When the student returns after "sitting out" one semester, the student will return on progress probation and will continue to lose registration priority.

Important Note: Registration priority shall be lost at the first registration opportunity after a student is placed on academic or progress probation or any combination thereof for two consecutive terms.

Attendance & Drops
Drop for Non-payment Policy

Enrollment fees must be paid in full within 3 days of registration (including weekends and holidays) or all classes may be dropped and released to other students. The day you register is counted as day 1 of the 3 days.

Students are expected to attend all sessions of the classes in which they are enrolled. Students should report absences due to illness to the instructor prior to missing class.

A student may be dropped for not attending the first class meeting or for excessive absences when the total hours of absence exceed 10% of the total scheduled hours of the class.

Under extenuating circumstances, a student may be reinstated by the instructor. A student may also be dropped by the instructor when not appearing at the first class meeting.

It is the student's responsibility to withdraw officially from a course. Students are responsible for any and all charges incurred resulting from a failure to withdraw from classes within the refund period.

Post-9/11 GI Bill® and VR&E Beneficiaries (Chapter 33 and Chapter 31 beneficiaries)

The Veterans Benefits and Transition Act of 2018 (Public Law 115-407) allows students that will be utilizing Ch. 33 or Ch. 31 VA benefits to attend a course of education or training for up to 90 days from the date the beneficiary provides a certificate of eligibility (COE), or valid authorization from VOC Rehab counselor. Students must submit all required certification request forms directly to the Veterans Resource Center (VRC) for processing. Submission of forms will allow students to attend the course until the VA provides payment to the institution without penalty or requiring to borrow additional funds to cover mandatory tuition and fees due to late payments from the VA. Any student that does not have 100% entitlement for Ch. 33 VA benefits, will be responsible for any remaining balance after the VA submits payments directly to the school. For further information, please contact the VSO directly.

Online Drop Policy
Students are expected to complete regular and substantive coursework in online classes. In distance education context, coursework will be used to determine student attendance. Simply logging into an online class is not sufficient to demonstrate academic attendance by the student. Examples of coursework for online classes might include, but are not limited to, class discussions, completed assignments, completed quizzes or exams, group work, etc. Students who fail to submit substantive coursework by the due date may be dropped from the class. Completing an assignment on the first day of the class may also be required in order to avoid being dropped from the class. Please refer to the class syllabus and the class section information, found in the class schedule, for the specific attendance (regular and substantive coursework) requirements.

**Auditing**

Santiago Canyon College does not permit auditing of classes.

**Basic Skills Course Limit**

Students are limited to 30 units of basic skills coursework. Basic skills courses include non degree, basic skill classes in Mathematics, English, English as a Second Language (ESL), and Reading. Students who reach 30 units of remedial coursework are prevented from further registration. The student must complete a petition form and meet with a counselor who advises the student on a comprehensive student education plan or refers the students to continuing education.

A waiver is required beyond 30 units. Students must show a “C” or better or a 2.0 GPA in basic skills courses to qualify for a waiver. Waiver forms are available in the Admissions and Records Office and the Counseling Office.

**Dual Enrollment**

The steps listed below allow high school students to use college credit coursework to meet high school graduation requirements.

- Download at www.sccollege.edu/dualenrollment a Special Admit Form and obtain approval from your high school to enroll at Santiago Canyon College. Only approved signatures from your high school will be accepted. Signatures that do not match what Santiago Canyon College has on file will not be accepted. For a list of approved signatures from your high school, please contact the Admissions and Records Office.
- All college class prerequisites must be met.
- Math and English placement testing are not required. High school performance and/or Guided Self-Placement will be used to provide the student with course recommendations.
- Any student who is not yet 15 years of age or below 9th grade must have approval from the Santiago Canyon College Division Dean.
- Any Special Admit student below the 9th grade as well as any Special Admit student who registers as a full-time student will be charged the regular community college enrollment fees.
- Santiago Canyon College will charge enrollment fees to nonresident students who hold an F1/F2 visa. F1/F2 students are not exempted from enrollment fees.
- Special Admit students by law do not have priority registration.

**Career Technical Education (CTE) Transitions**

D. Perkins Career and Technical Education Improvement Act of 2006 (Perkins IV) and it provides students an opportunity to earn college credit in an identified career pathway while still in high school. CTE Transitions focuses on helping Career Technical Education students’ transition from high school to community college and on to the world of work. There is no cost to students participating in the CTE Transitions program. For more information on which courses articulate with the local Central Orange County Career Technical Education Partnership (CTEp), please contact the CTE Transitions Coordinator at (714) 628-4889, or visit www.sccollege.edu/transitions

**Classification of Students**

- **Career Advanced Placement** - one who is concurrently enrolled in high school
- **Freshman** - one who has completed 0-29 units
- **Sophomore** - one who has completed 30 or more units
- **Graduate** - one who has received an associate degree

**Course Repeatability and Repetition**

https://sccollege.elumenapp.com/catalog/all-pages/4a0d0669-c6e1-4cbc-bed7-d32fa6eb18
State regulations (Title 5, sections 55040-55045) restrict the number of times a student may enroll in a course within a community college district. The number of times a student may enroll in a course is based on whether the course is designated "repeatable" or "non-repeatable." Any student registering to repeat a course not identified as repeatable or repeating a course more often than permitted may be dropped from the course.

Courses may be repeated only under the following circumstances:

Substandard Work for Non-Repeatable Courses

A student has up to three enrollments in the same course (SCC and SAC combined) to receive a satisfactory grade. After three enrollments, the student can no longer register for the course within this college district. After two enrollments, the student loses the ability to register for the class online. A repeat form must be completed in Admissions and reviewed by an Admissions Office administrator. The last grade earned will count in the GPA calculation. Courses repeated under the provisions of this section will be indicated as repeated on the permanent academic record of the student. A student may not repeat a course to change a grade of C or above.

Significant Lapse of Time

Students may re-enroll in a course where the student has received a satisfactory grade of “C” (or Pass) or better in their last enrollment and there has been a significant lapse of time since completion of the course. California Code of Regulations defines a "significant lapse of time" as three (3) calendar years and an institution of higher education to which the student wishes to transfer has established a recency requirement that the student cannot satisfy without repeating the course (Title 5, §55043). Students must submit a petition to the Admissions and Records office to re-enroll in the course. Grades awarded for courses repeated under this provision shall replace the original grade. Only one repetition may be used for significant lapse of time (W grade counts towards repetition).

Repeatable Courses

Repeatable Courses: As of January 2013, only three types of courses are repeatable under state regulations:

Courses for which additional enrollments are necessary to meet the major requirements of California State University or University of California for completion of a bachelor’s degree. Such courses may allow for additional enrollments to allow the student to meet the lower division component of these major requirements. The number of maximum enrollments may not exceed four and might be fewer if the transfer institution requires fewer than four enrollments or if the course is related in content to other courses offered at the college.

Intercollegiate athletics. These courses include those in which student athletes are enrolled to participate in an organized competitive sport sponsored by the district or a conditioning course which supports the organized competitive sport. Student athletes are limited to no more than 350 contact hours within a fiscal year (July 1-June 30); they are permitted a maximum of 175 hours in courses dedicated to the sport and 175 hours in courses focusing on skill development and conditioning.

Intercollegiate academic or vocational competition. Such courses must be designed specifically for students to participate in non-athletic competitive events, the competitions must be between students from different colleges, the competition must be sanctioned by a formal collegiate or industry governing body, and participation in the event must be directly related to the course content. Students enrolled in these courses are required to participate in the academic or vocational competition.

Repeatable courses are identified in the catalog’s course descriptions. A student may not re-enroll in a course to replace a grade of a course identified as repeatable in the college catalog. All grades earned within the repeatability sequence will count as completed courses regardless of grade earned.

Legally Mandated Training
Students may re-enroll in a course if the repetition is a requirement for continued paid or volunteer employment. Students must complete a petition and submit appropriate documentation to the Admissions and Records Office as evidence that a student is legally mandated to re-enroll in the course. All grades issued under this provision will count towards the students GPA.

**Significant Change in Industry or Licensure Standards**

Students may be permitted to repeat a previously completed course if there has been a significant change in industry or licensure standards since the student last took the course such that the student could not obtain or maintain his or her employment or license without retaking the course and the student is required to repeat the course for employment or licensure. Students must complete a petition and submit appropriate documentation to the Admissions and Records Office.

**Active Participatory Courses**

Active participatory courses in physical education, visual arts, or performing arts (including but not limited to Art, Dance, Kinesiology, Music, and Theatre) that are related in content to one or more other courses have additional restriction on repeatability and repetition. Courses are defined as being related in content when they have “similar primary educational activities in which skill levels or variations are separated into distinct courses with different student learning outcomes for each level or variation.” Students are limited to four semester enrollments in courses that are related in content; this limitation applies even if an active participatory course is designated as repeatable. Students may repeat active participatory courses in which a substandard grade or W was received, however all enrollments count toward the four enrollment maximum.

**Honors Courses**

A student who has completed a Santiago Canyon College Honors course and who has received a substandard grade may re-enroll in the course without the Honors notation attached to the course number. If a student participating in the Santiago Canyon College Honors program chooses to re-enroll in the non-Honors version of the course, there will be consequences relating to participation in the Honors program. Please refer to the Honors Program and Honors Courses section of the catalog.

**Computer & Network Use**

The Rancho Santiago Community College District owns and operates a variety of information resources, including hardware, software, and Internet access. These information resources are provided solely for the use of RSCCD students, faculty, and staff (and employees rather than faculty/staff?) in support of the education, research, academic development, and public service programs of RSCCD.

RSCCD information resources provide access to information content and communication worldwide. Access to, and use of, these information resources is a privilege, which is to be used responsibly. RSCCD information resources users must respect the rights of other users, respect the integrity of the information resources, and observe all relevant RSCCD Board Policies, Administrative Regulations, and federal, state, and local laws. All students, faculty, and staff are responsible for seeing that these RSCCD information resources are used in an appropriate, effective, efficient, ethical, and lawful manner, including but not limited to the illegal downloading and/or unauthorized distribution of copyrighted material, including peer-to-peer file sharing. Violations of Federal copyright laws may subject the violator to civil and criminal penalties as well as disciplinary action.

Administrative regulations establish rules and prohibitions that define acceptable use of RSCCD resources. Unacceptable use is prohibited and is grounds for loss of use of information resources, as well as discipline or legal actions as provided for under RSCCD Board Policy and federal, state, and local laws.
During the application process, students at Santiago Canyon College will provide an email account. This email address may be updated in WebAdvisor as desired by the student. The College will email students to share college information and as a means of communication regarding college business.

Credit for Prior Learning and Credit by Examination (CBE)

Eligible Courses

Arts, Humanities, and Social Sciences/Library: None
Counseling and Student Support Services: None
Mathematics and Sciences: MATH 080, 086, 140, 160, 170, 180, 219; PHYS 150AC, 150BC

Rancho Santiago Community College District
ADMINISTRATIVE REGULATION
Chapter 4
Academic Affairs
AR 4235 Credit for Prior Learning
Reference(s): Education Code Section 66025.71, 66700, 70901, Sections 70901 and 70902
Title 5 Section 55002, 55023, 55021, 55025, 55052

Students may demonstrate proficiency in a course eligible for Credit for Prior Learning and receive college credit through the approved alternative methods for awarding credit listed below:

• Achievement of a satisfactory score on an Advanced Placement (AP) examination,
• Achievement of a satisfactory score on a high-level International Baccalaureate (IB) examination,
• Achievement of a satisfactory score on the College Level Examination Program (CLEP),
• Evaluation of Joint Service Transcripts (JST),
• Achievement of an examination administered by other agencies approved by the District,
• Evaluation of industry-recognized credential documentation,
• Evaluation of student-created portfolios, and/or
• Satisfactory completion of an institutional examination, known as Credit by Examination, administered by the college in lieu of completion of an active course listed in the current college catalog.

Determination of Eligibility for Credit for Prior Learning

• The student must be in good standing in the District.
• The student must have previously earned credit or noncredit from the District or be currently registered in the District.
• Current students must have an education plan on file.
• The course is listed in either the current Santa Ana College or Santiago Canyon College Catalog.
• The student is not currently enrolled in the course to be challenged.
• Credit by Examination: The student is registered in the District and not currently enrolled in nor received credit for a more advanced course in a sequence in the same subject (may be waived by department).
Credits acquired by examination are not applicable to meeting of such unit load requirements as Selective Service deferment, Veterans, or Social Security benefits.

Credits acquired by examination shall not be counted in determining the 12 semester hours of credit in residence required for an Associate degree.

Prior Learning Assessment Grading Policy

- Grading shall be according to the regular grading system in accordance with Administrative Regulation (AR) 4230 Grading and Academic Record Symbols.
- Students shall be offered a “Pass/No Pass” option, in accordance with Administrative Regulation (AR) 4232 Pass/No Pass Grading Option if that option is ordinarily available for the course.
- Students shall be given the opportunity to accept, decline, or appeal the grade assigned by the faculty, and in cases of Credit by Examination, pursuant to AR 4230 Grading and Academic Record Symbols and AR 4231 Grade Changes.

Transcription of Credit for Prior Learning

- The student’s academic record shall be clearly annotated to reflect that credit was earned by assessment of prior learning.

Advanced Placement Credit

Students requesting Credit for Prior Learning using Advance Placement shall receive credit for completing a satisfactory score on a District approved Advanced Placement (AP) examination under the following circumstances:

- Achievement of a score of 3, 4, or 5 on an Advanced Placement Examination administered by the College Board. Advanced Placement official score reports must be on file in the Admissions and Records Office.
- The student achieved a minimum acceptable score on the AP examination as outlined by Santa Ana College or Santiago Canyon College Advanced Placement policies.

International Baccalaureate

Students requesting Credit for Prior Learning using International Baccalaureate shall receive credit for completing a satisfactory score on a District approved high-level International Baccalaureate (IB) examination under the following circumstances:

- Official IB transcripts must be on file in the Admissions and Records Office.
- The student achieved a minimum acceptable score on the IB examination as outlined by Santa Ana College or Santiago Canyon College International Baccalaureate policies.

College Level Examination Program

Students requesting Credit for Prior Learning using the College Level Examination Program shall receive credit for completing a satisfactory score on a District-approved College Level Examination Program (CLEP) under the following circumstances:

- Official CLEP transcripts must be on file in the Admissions and Records Office.
- The student achieved a minimum acceptable score on the CLEP examination as outlined by Santa Ana College or Santiago Canyon College College Level
Credit for Military Service/Training

Students interested in Credit for Prior Learning using Joint Service Transcripts shall receive credit as recommended by the American Council on Education (ACE) Directory and approved by the appropriate discipline faculty of the college under the following circumstances:

• The student shall complete the Credit for Prior Learning assessment form available in the Counseling or Admissions and Records Office.

• Official transcripts must be on file in the Admissions and Records Office. These may include Joint Services Transcript (JST), Sailor/Marine American Council on Education Registry.

Transcript (SMART), Army and American Council on Education Registry Transcript Service (AARTS), Community College of the Air Force (CCAF), Coast Guard Institute (CGI), DANTES/USAFI, Defense Language Institute Foreign Language Transcripts (DLIFLC), Defense Manpower Data Center (DMDC), DLPT Examinee Results, DA Form 330 Language Proficiency Questionnaire, or verified copies of DD214 or DD295 military records.

• Credit course equivalency shall be determined by the faculty of the appropriate discipline.

Industry Recognized Credentials

Students interested in Credit for Prior Learning using industry-recognized credential(s) shall receive credit as recommended by the appropriate department chair or faculty designee:

The student shall complete the Credit for Prior Learning assessment form available in the Counseling or Admissions and Records Office.

Enrollment services shall grant credit for industry-recognized credential(s) that have already been evaluated and approved by the appropriate department chair or faculty designee.

If an industry-recognized credential(s) has not yet been evaluated and approved by the appropriate faculty:

The student meets with the department chair or faculty designee to receive further instructions for industry-recognized credential(s) assessment.

The student submits all industry-recognized credential documents to the department chair or faculty designee for assessment of prior learning.

If the department chair or faculty designee determines the industry certification adequately measures mastery of parts or all of the course content as set forth in the Course Outline of Record, the appropriate faculty may recommend additional aforementioned alternative assessment methods or sign the form with the recorded grade, attach the industry-recognized credential(s), and forward appropriate forms and documentation to the Admissions and Records Office to be kept on file and recorded on the student transcript.

Student-Created Portfolio Assessment

Students interested in Credit for Prior Learning using a student-created portfolio shall receive credit as recommended by the appropriate department chair or faculty designee under the following circumstances:

• A department-approved portfolio assessment rubric for the course is on file.

• The student shall complete the Credit for Prior Learning assessment form available in the Counseling or Admissions and Records Office.

• The student meets with the department chair or faculty designee to receive further instructions for student-created portfolio assessment.

• The student submits all portfolio documents to the department chair or faculty designee for assessment of prior learning.
• If the department chair or faculty designee determines the student-created portfolio adequately measures mastery of parts or all of the course content as set forth in the Course Outline of Record, the appropriate faculty may recommend additional aforementioned alternative assessment methods or sign the form with the appropriate grade and forward appropriate forms and documentation to the Admissions and Records Office to be kept on file and recorded on the student transcript.

Credit by Examination (CBE) from Within the District

The District will award college course credit for successful completion of a District examination administered by the appropriate departmental faculty under the following circumstances:

Achievement of a grade that qualifies for CBE through completion of articulated high school or adult education courses. Students who wish to earn course credit through CBE through using completion of articulated high school or adult education courses must complete the required petition at either Santa Ana College or Santiago Canyon College (High School/ROP Completion of Articulation Course/Career Transitions Articulated Pathways) and be currently enrolled in at least one credit class at the time of petition.

Credit by satisfactory completion of an examination administered by the department involved in lieu of completion of a course listed in the Santa Ana College or Santiago Canyon College Catalog.

The Department Chair or faculty designee shall determine whether or not a student requesting CBE is sufficiently well prepared to warrant being given this opportunity. This determination is based upon a review of previous coursework and/or experience. Students wishing to earn course credit through CBE are encouraged to informally discuss the matter with the department chair or faculty designee and instructor prior to initiating the formal process. All steps must be completed in the order listed or the form for Credit by Examination shall not be processed. The form for CBE must be completed prior to the end of the current semester or session.

The District Credit by Examination (CBE) Process:

In order to permit students to demonstrate that they have met the objectives of a course through experience in the workplace, foreign language proficiency, or some other process outside the conventional academic setting, students may earn credit by receiving a passing grade on an examination administered by the appropriate instructional department/program. The completion of CBE may require the demonstration of other skills or the completion of assignments in addition to an examination.

Students interested in Credit for Prior Learning using CBE shall receive credit as recommended by the appropriate department chair or faculty designee under the following circumstances:

The Credit by Examination (CBE) Procedures

Student shall complete the Credit for Prior Learning assessment form along with any documentation of prior learning. The required form shall be available in the Counseling or Admissions and Records Office.

Student meets with the department chair or faculty designee for further instructions for CBE. The dean and department chair or faculty designee will determine whether a departmental or a standardized examination is to be administered and when and where it shall be.

If the department chair or faculty designee determine the CBE assessment measures mastery of all of the course content as set forth in the Course Outline of Record (COR), the appropriate faculty member shall sign the form with the recorded grade and forward appropriate forms and documentation to the Admissions and Records Office to be kept on file and recorded on the student transcript. If a faculty member determines that the assessment measures mastery of only parts of the COR, the faculty member may recommend additional aforementioned alternative assessment methods. Completed exam materials must remain on file with the department/program for three years.

High School or Adult Education to College Articulation - Credit by Examination (CBE) Procedures

Students shall complete the appropriate petition at Santa Ana College or Santiago Canyon College (High School/ROP Completion of Articulation Course/Career Transitions Articulated Pathways). The petition shall be forwarded to the appropriate Division/Department for approval.
In order for a student to receive CBE, the student must apply online to one of the colleges in RSCCD and register in at least one college credit class at the time of the petition. Timeline for credit to be claimed by the student is based on the existence of a signed articulation agreement for the year the student took the course. A recency requirement may be applicable based on industry standards. A letter grade will be assigned, and the course will be identified as CBE on the transcript in accordance with the official final grade received for the full term of the course being petitioned for college credit. Once assigned, a grade is not reversible. The letter grade will be posted on the transcript in the semester the petition was approved. Students who are unsuccessful in obtaining a grade of B or better for the full term of the course will not be allowed to petition for credit and no record of the attempt for CBE will appear on a student's transcript. The enrollment fee for CBE will not be charged for credit awarded under this provision.

Responsible Manager: Office of Academic Affairs

Adopted: September 17, 2018
Revised: December 7, 2020

Drug Free Environment and Drug Prevention Program

The district shall be free from all drugs and from the unlawful possession, use or distribution of illicit drugs and alcohol by students and employees. The unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in all facilities under the control and use of the district. Any student or employee who violates this policy will be subject to disciplinary action, which may include referral to an appropriate rehabilitation program, the Employee Assistance Program, suspension, demotion, expulsion or dismissal.

The RSCCD Chancellor shall assure that the district distributes information annually to students and employees as required by the Drug-Free Schools and Communities Act Amendments of 1989 and in compliance with other requirements of the Act. Please refer to Board Policy (BP 3550) for specific information or contact the Student Health and Wellness Services at (714) 628-4773.

Email

During the application process, students at Santiago Canyon College will provide an email account. This email address may be updated in WebAdvisor as desired by the student. The College will email students to share college information and as a means of communication regarding college business.

Enrollment Priority

The state of California has adopted a law under Title 5 Regulation 5B108, establishing enrollment priorities for students attending California Community Colleges. Districts shall provide highest and equal priority to students eligible for registration priority who are:

A member of the armed forces or a veteran pursuant to Education Code section 66025.8,
A foster youth or former foster youth pursuant to Education Code section 66025.9,
Determined to be eligible for Disabled Student Program and Services as set forth in Education Code section 66025.91,
Receiving services through the Extended Opportunity Programs and Services as set forth in Education Code section 66025.91, or
Receiving aid from the California Work Opportunity and Responsibility to Kids Program as set forth in Education Code section 66025.92

Registration times will be assigned each term to students in the following order:
Title 5 mandated groups (see above)
Continuing students by units completed at R.S.C.C.D.
New/returning students
Loss of Priority students and those who have completed 100 or more degree applicable units at R.S.C.C.D.
Career Advance Placement (CAP) Program Check the current class schedule for enrollment priority dates and times.
Loss of Enrollment Priority

Continuing students at Santiago Canyon College will lose their enrollment priority for the following reasons:

- The student has attempted 12 units and their RSCCD cumulative GPA has fallen below 2.0 for two consecutive semesters and is on academic probation
- The student has attempted 12 units and the percentage of all coursework at SCC/SAC has an entry of “W”, “I”, “NP”, and “NC” which reaches or exceeds fifty percent (50%). § 55031
- The student has earned 100 or more degree-applicable units from Santiago Canyon and Santa Ana Colleges

Students who have SCC as their home campus can submit a petition for appeal to the Admissions Office at SCC. Students who are not in good academic standing can appeal for one of the following reasons:

- there were extenuating circumstances (verified cases of accident, illness) and can provide documentation;
- the student can demonstrate SIGNIFICANT academic improvement in a subsequent term.

Students who have earned 100 or more degree-applicable units can appeal if they have declared a high unit major and are currently working toward a degree. Forms for these appeals can be obtained in Admissions and Records or downloaded from the college website.

Experimental Courses

The college may offer Experimental courses, N98 (non-degree applicable), 098 (non-transfer), or 198 (transfer) under any discipline listed in the announcement of courses. Experimental courses are specialized courses on topics related to the immediate and changing needs of students. A student who received a satisfactory grade in an Experimental course may not re-enroll in a course with the same discipline name and number, even though the topics may be different.

Family Education Rights and Privacy Act (FERPA)

As required under the provisions of the Family Education Rights and Privacy Act of 1974, Santiago Canyon College will make public without student consent only certain directory information. This consists of the following: a student’s name; city of residence; major field; participation in officially recognized activities and sports; weight, height and age if a member of an athletic team; dates of attendance; degree and awards received; and the most recent previous educational institution or agency attended by the student.

A student initially agrees or denies a FERPA release at the point of application. However, a student may come to Admissions at any time to opt out of the FERPA disclosure or agree to the release of directory information. Admissions Forms: “FERPA Consent to Release” or “FERPA Consent NOT to Release” directory information.

All student expulsions will be noted on the official college transcript.

The Family Education Rights and Privacy Act of 1974 provides colleges the right to consent to disclose personally identifiable information contained in the student’s education records to third party vendors who are identified as School Officials and who have legitimate educational interests. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his/her professional responsibility.

A school official is a person employed by the College in an administrative, supervisory, academic or research, or support staff position (including district safety personnel and health staff); a person or company with whom the College has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees or a member of an official college committee.
Santiago Canyon College contracts with the following School Officials:

- Auditors (Vicenti-Lloyd-Stutzman)
- Barbering/Cosmetology
- Unilateral Training Committee
- California/Nevada Training Trust
- CCCApply (Unicom)
- Credentials (Online transcript request)
- Ellucian Colleague
- ECS Imaging (optical imaging)
- Electrical Training Trust
- Image Now (optical imaging)
- Medpro and Quest (Health Center)
- Metropolitan Water District of Southern California
- National Student Clearinghouse
- Operating Engineers Training Trust SARS (Counseling center)
- Santa Ana Beauty Academy
- Southern California Surveyors
- Southwest Carpenters Training Fund
- Xerox

**Free Expression**

Santiago Canyon College supports liberal policies regarding free speech for individual students, college staff, nonofficial college groups, and visiting speakers. Please refer to Board Policy (BP 3900) for specific information.

**Grades & GPA**

Grades are based upon the quality of work completed, that is, upon actual accomplishment in courses offered for credit. Credit by examination, Class In Progress (CIP), Incomplete (I), Pass/No Pass (P or NP), Reports Delayed (RD), and Withdrawals (W, EW, or MW) are not figured into Grade Point Averages (GPA). The grade point average is computed by dividing all other units attempted into all grade points received. The meaning of each Grade and its value in Grade Points is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent 4 per unit earned</td>
</tr>
<tr>
<td>B</td>
<td>Good 3 per unit earned</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory 2 per unit earned</td>
</tr>
<tr>
<td>*D</td>
<td>Passing, Less than satisfactory 1 per unit earned</td>
</tr>
<tr>
<td>*F</td>
<td>Failing 0 per unit attempted</td>
</tr>
<tr>
<td>P</td>
<td>Pass 0 per unit earned</td>
</tr>
<tr>
<td>NP</td>
<td>No Pass 0 per unit attempted</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawal 0 (no units earned)</td>
</tr>
<tr>
<td>EW</td>
<td>Excused Withdrawal 0 (no units earned)</td>
</tr>
<tr>
<td>MW</td>
<td>Military Withdrawal 0 (no units earned)</td>
</tr>
<tr>
<td>UF</td>
<td>Unauthorized Withdrawal 0 (no units earned)</td>
</tr>
<tr>
<td>WF</td>
<td>Withdrawal, Failing 0 (no units earned)</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete 0 (no units earned)</td>
</tr>
<tr>
<td>CIP</td>
<td>Class In progress 0 (no units earned)</td>
</tr>
<tr>
<td>RD</td>
<td>Report delayed 0 (no units earned)</td>
</tr>
</tbody>
</table>
Incomplete Work

When a student has attended regularly but because of illness or other unavoidable circumstances is unable to complete coursework or take the final examination, a grade of “I” may be assigned. If an “I” is issued, the instructor completes the Incomplete Grade Form which includes the condition(s) for removal of the “I”, and the grade to be assigned if the condition(s) are not completed. A student may not re-register in the same class if an Incomplete grade is pending. The work thus missed must be made

up no later than one year following the end of the term in which it was assigned. A student may petition the instructor for a time extension due to unusual circumstances. It is the student’s responsibility to contact the instructor in such cases.

A final grade will be assigned when the work stipulated has been completed and evaluated according to the conditions set forth by the instructor or when the time limit for completing the work has passed. If condition(s) are not met after one year, the incomplete grade will be changed to an “F” grade or the grade specified by the instructor on the Incomplete Grade Form.

Pass/No Pass

Pass/No Pass encourages students to explore academic areas outside a major field.

Courses in the student’s major field may not be taken under the Pass/No Pass policy except for major courses for an Associate Degrees for Transfer (ADT), courses for which Pass/No Pass is the only grading option, and units earned through Credit by Examination (CBE) or assessment.

Every university has a limitation on the number of courses/units that can be taken for Pass/No Pass and applied to graduation and may require General Education taken Pass/No Pass to be retaken for a letter grade. Universities sometimes prefer that students have letter grades in English, mathematics, speech, and critical thinking courses. Courses that meet major requirements must be taken for a letter grade. Also, Pass/No Pass grades could have a negative effect on scholarships and international students. In addition, students who plan to pursue graduate or professional studies later are advised to be selective in opting for courses on a Pass/No Pass basis.

Except as in item number one above, a maximum of 6 Pass/No Pass units may be carried during any one semester.

A maximum of 14 Pass/No Pass units is allowed for any degree program. This does not include units taken under credit by examination or assessment, or units earned in courses for which Pass/No Pass is the only grading option.

Pass/No Pass petitions are available at the Admissions and Records Offices. The Pass/No Pass petition must be signed by a counselor and be submitted between the first and fifth week of the fall and spring terms (for full semester classes) or thirty percent (30%) of the class meeting dates (for short term classes), whichever is less.

Pass/No Pass status cannot be changed back to a letter grade after the deadline has passed.

Rancho Santiago Community College District

ADMINISTRATIVE REGULATION

Chapter 4

Academic Affairs

AR 4232 Pass/No Pass

Reference(s): Title 5 Section 55022

Courses may be offered in either or both of the following categories:

Courses in which all students are evaluated on a “pass-no pass” basis.
Courses in which each student may elect on registration, or within the first 30% of the class's scheduled duration, to take the course on a "pass-no pass" basis.

A student electing to be evaluated on the "pass-no pass" basis will receive both course credit and unit credit upon satisfactory completion of the course. In computing a student's grade-point average, grades of "pass-no pass" are omitted.

A pass grade is granted for performance that is equivalent to the letter grade of "C" or better. A student who fails to perform satisfactorily will be assigned a "no pass" grade.

The student is held responsible for all assignments and examinations required in the course.

The standards of evaluation are identical for all students in the course.

The following guidelines apply to courses taken for pass-no pass as designated by each College Catalog:

Courses in the student's major field may not be taken under the Pass/No Pass policy except as designated.
Honors courses cannot be taken for Pass/No Pass.
Courses that meet major requirements must be taken for a letter grade. Also, Pass/No Pass grades could have a negative effect on scholarships and international students. In addition, students who plan to pursue graduate or professional studies later are advised to be selective in opting for courses on a Pass/No Pass basis.
A maximum of 6 Pass/No Pass units may be carried during any one semester.
A maximum of 12 Pass/No Pass units is allowed for any degree program. This does not include units taken under credit by examination or assessment.
Pass/No Pass petitions are available at the Admissions and Records Offices. The Pass/No Pass petition must be signed by a counselor and be submitted between the first and fifth week of the fall and spring terms (for full semester classes) or by the first thirty percent (30%) of the class meeting dates (for short term classes), whichever is less.
Pass/No Pass status cannot be changed back to a letter grade after the deadline has passed.
Pass indicates a "C" or better.
Pass/No Pass grades are accepted for certification in all areas. However, letter grades may be recommended or required for specific courses in a given major. Each CSU campus may also limit the total number of units graded Pass.
For a certificate, a Pass/No Pass course is acceptable if it is required for the certificate and (a) offered on a Pass/No Pass basis only or (b) if the Pass/No Pass is earned on the basis of credit by examination.
For Associate Degrees, units earned at a regionally accredited college or university on a Pass/No Pass basis will be counted toward the degree requirements of the college, to a maximum of 15 units.
Every university has a limitation on the number of courses/units that can be taken for Pass/No Pass and applied to graduation and may require General Education taken Pass/No Pass to be retaken for a letter grade.

Adopted: September 17, 2018

Grade Grievances

Procedures for Student Grievances Regarding Grades

Education Code 76224 states:

(a) When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student's grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetency, shall be final.

Procedure
Students may request a grade change no later than one year following the awarding of the original grade. Student shall meet with the instructor to discuss the grade. If the issue is not resolved and the student believes that the grade is based on mistake, fraud, bad faith, or incompetency (EC 76224), he/she may appeal in writing to the Division Dean. Forms for the written appeal may be found in Division offices or by searching the Santiago Canyon College website. The student may be requested to set up an appointment with the Division Dean to discuss the written grievance. The Division Dean will review the allegations and consult with the instructor. The Division Dean will review the issue and will notify the student and instructor in writing of his/her decision. The decision of the Division Dean is final.

Grade Notification

Grades are available on WebAdvisor upon grade submission by the instructor. Log into WebAdvisor and select grades under Academic Profile.

Discrimination Complaints

Rancho Santiago Community College District does not discriminate on the basis of national origin, religion, age, gender, gender identity, gender expression, race or ethnicity, color, medical condition, genetic information, ancestry, sexual orientation, marital status, physical or mental disability, pregnancy, or military and veteran status, or because he or she is perceived to have one or more of the foregoing characteristics, or based on association with a person or group with one or more of these actual or perceived characteristics.

Students may file a discrimination complaint when they believe they have been deprived of a right granted to students by the Board of Trustees in any of the policies or regulations of the Rancho Santiago Community College District. The purpose of these complaint procedures is to resolve differences as fairly and expeditiously as possible while preserving the right of students and staff members. Students should contact the Vice Chancellor, Human Resources if they want to file a discrimination complaint or discuss their concerns of alleged discrimination. The procedures for filing and investigation of a discrimination complaint can be found at: rsccd.edu/Trustees/Pages/policies-and-regulations.aspx#chapter1

Students can either file a discrimination complaint with the Vice Chancellor, Human Resources who can be contacted at

2323 N Broadway, Suite 407-2
Santa Ana, CA 92706
Telephone Number (714) 480-7489

Alternatively, the student can file a formal complaint with the State Chancellor’s Office Web site at extranet.cccco.edu/Divisions/Legal/Discrimination

General Grievances

Most complaint or grievance matters should be resolved at the department/division dean level. If a complaint does not fall into one of the previously mentioned, please see the dean that supervises the department.

Procedure

1. Students shall first confer with the person who took the action or made the ruling to which they object no later than ten (10) days following the event which prompted the grievance.
   a. The Associate Dean of Student Development will assist the student in arranging an appointment between the student and staff member.

If the difference is not satisfactorily resolved, the student shall confer with the person's supervisor.
a. The Associate Dean of Student Development will assist the student in arranging an appointment between the student and the staff member’s supervisor.

If the grievance is still unresolved, the student may file a written statement setting forth the nature of the grievance on the prescribed form with the Vice President of Student Services, no later than ten (10) days after conferring with the person’s supervisor.

The grievance form shall be completed in full and shall include a full description of the grievance, times, dates and pertinent facts and the remedy sought by the student.

a. A Student Grievance Staff Response form will be sent to both the staff member and a supervisor for completion.

The Vice President of Student Services shall select a Student Grievance Panel. The administrator involved then shall forward the completed forms to the panel chair for review and recommendation. The panel shall have the power to make an appropriate investigation of the grievance and shall state the findings and make a recommendation.

If the grievance is sustained by the panel, it will recommend appropriate action for relief of the grievance and communicate this in writing to the person(s) to whom the grievance was directed. If the findings of the panel do not sustain the grievance, the panel shall communicate this finding in writing to the student who filed the grievance. The ruling of the Student Grievance Panel is final.

**Student Grievance Panel Structure**

- one non-voting chair (except in situations of a tie vote)
- one student representative
- one classified representative
- one faculty representative
- one administrative representative

**Other Possibilities for Complaints/Grievances**

Information on student grievance procedures is available at Santiago Canyon College. Grievances should be filed with the Associate Dean of Student Development, in room A-201. Complaint and/or grievance issues that are not resolved at the campus level may be presented to the agencies provided below.

If your complaint is associated with the institution’s compliance with academic program quality and accrediting standards, contact the [Accrediting Commission for Community and Junior Colleges (ACCJC)](https://www.accjc.org/).

If your complaint does not concern California Community College’s (CCC) compliance with academic program quality and accrediting standards, complete the [CCC Chancellor’s Office Web form](https://www.sccnet.edu/ccc-oia/).

If your complaint involves unlawful discrimination, contact the [Chancellor’s Office Web site](https://www.sccnet.edu/).

**Independent Study**

Independent study allows students to pursue projects under faculty advisement and supervision. The projects may be directed field experience, research, or development of skills and competencies. Transfer credit is indicated as Independent Study 199.

Independent study projects are normally for one unit of credit and require a minimum of 48 hours of directed work per unit of credit. Within the 48-hour minimum the instructor meets with each student on a weekly basis for at least one hour or a minimum of 16 hours for each one-unit project. The proposed project must be approved by the supervising instructor and the dean, with notification to the Vice President of Academic Affairs. Independent study is offered on a Pass/No Pass basis.

Independent study projects are normally undertaken in the department or division of the student’s academic major. Exceptions to this rule must be approved by both the division dean of the student’s academic major and the division dean to whom the student is applying for an exception.

To be eligible for independent study, a student must be concurrently enrolled in at least one other class at either Santiago Canyon College or Santa Ana College and must show evidence of competence in the academic major and in the area of proposed independent study.
Lost and Found

In the event of losing an item on campus, please contact Safety and Security either in person in U-88 or by telephone at (714) 628-4730. An officer will review the lost and found register to see if your item has been found. If so, you may claim your item with approved identification. In the event the item has not been found, the officer will record a description of the item and your contact information in order to contact you if the item is found. All lost items will be stored until the fourth week of the following semester. Any unclaimed items will be donated to a local thrift store.

Parking

Campus Parking Information

RSCCD requires parking permits for student and staff lots at Santiago Canyon College during the fall and spring semesters and summer session. Parking permits are not required during intersession. Parking permits must be displayed on the first day of the semester/session. There is no grace period. Students are strongly encouraged to purchase their parking permits via the online WebAdvisor system when they register for classes. Parking permits may also be purchased using the link on the Safety & Security website. Day permits may be purchased through dispensers located in parking lots 1, 2, 3, 4, 5, 6 and 7. The purchase of your permit helps fund parking services and vehicle security when parked on campus.

Disabled Student Parking

Several areas on campus are designated for disabled student parking. Vehicles in these areas are NOT required to display a current SCC parking permit, or daily permit, but must display one of the following: District-issued disabled permit, State placard, or special State license plate. District permits are available in the Disabled Students Programs and Services, E-105.

Citation Information

Vehicles that do not display either a current parking permit or a daily parking permit will be issued a citation. Other citations will be issued if students park their vehicles in reserved parking. Disabled parking spaces are strictly enforced with citations of $350 being issued to vehicles that violate the regulations. More information on parking citations and enforcement can be found on the SCC website at www.sccollege.edu/parking. A listing of all campus parking and traffic regulations can be found at www.sccollege.edu/Departments/Security/Pages/parking-regulations.aspx

Refund of Parking Fee

Students who withdraw from full-semester classes through the first two weeks of instruction may request a refund of their parking permit.

Students must return the parking permit in its original condition to receive a refund. No refund will be allowed after the second week of instruction. No refund will be allowed if the parking permit is lost or stolen. Receipts must be presented.

Students who lose or have their parking permit stolen must purchase a new permit at full price.

Parking Lot Disclaimer

Rancho Santiago Community College District is not responsible for damages to, loss of, or thefts from vehicles parked on campus, except as defined under the applicable Government Codes of California, including [810-966.6].

Santa Ana, CA 92706

Prerequisites, Corequisites, and Advisory
Santiago Canyon College has adopted a policy on course prerequisites, corequisites, and advisories in order to provide for the establishing, reviewing, and challenging of prerequisites, corequisites, advisory, and certain limitations on enrollment in a manner consistent with law and good practice. The policy, which is specified for implementation as an administrative regulation, is established pursuant to regulations contained in section 55003 of Chapter 6 of Title 5 of California Code of Regulations. The RSCCD Board of Trustees recognizes that if these prerequisites, corequisites and limitations are established unnecessarily or inappropriately they constitute unjustifiable obstacles to student access and success and, therefore, the board adopts this policy which calls for caution and careful scrutiny in establishing them. Nonetheless, the board also recognizes that it is as important to have prerequisites in place where they are a vital factor in maintaining academic standards and in assuring the health and safety of students as it is to avoid establishing prerequisites where they are not needed. For these reasons, the board has sought to establish a policy that fosters the appropriate balance between these two concerns.

Important Definitions
It is very important to understand the definitions of the terms Prerequisites, Corequisites, and Advisory. Note that prerequisites and corequisites may be challenged. See Prerequisite Challenge Policy, for more information.

Prerequisite indicates a condition of enrollment that a student is required to meet in order to demonstrate current readiness for enrollment in a course or educational program. A prerequisite represents a set of skills or a body of knowledge that a student must possess prior to enrollment and without which the student is highly unlikely to succeed in the course or program. Students will not be permitted to enroll in such courses and programs without the appropriate prerequisite. All prerequisite courses must be completed with a letter grade of “C” or better.

Corequisite indicates a condition of enrollment consisting of a course that a student is required to simultaneously take in order to enroll in another course. A corequisite represents a set of skills or a body of knowledge that a student must acquire through concurrent enrollment in another course and without which the student is highly unlikely to succeed. Students must concurrently enroll in the corequisite course.

Advisory indicates that while a course is not required prior to enrollment, it is highly advised in order to strengthen the likelihood of success in subsequent courses.

Prerequisite Policy
Prerequisite means the preparation or previous course work considered necessary for success in the course. The College requires students to complete prerequisites as pre-enrollment preparation. Prerequisites which are listed in the College Catalog include:

- Courses for which specific prerequisites have been established,
- Sequential course work in a degree- applicable program, and
- Courses in which an equivalent prerequisite exists at a four-year transfer college or university.
Questions about prerequisites are best resolved with a counselor or instructor prior to the first day of class.

**Prerequisite Challenge Process**

A prerequisite challenge requires written documentation, explanation of alternative course work, and/or background or abilities which adequately prepare the student for the course. A Prerequisite Challenge Form can be obtained from the appropriate instructional office. Prerequisites may be challenged for one or more of the following reasons:

- The college has not developed the prerequisite according to its established procedures or has not developed the prerequisite in accord with existing statutes.
- The prerequisite is discriminatory or is being applied in a discriminatory fashion.
- The college has not made the prerequisite course reasonably available.
- The student has documented knowledge and abilities equivalent to those specified in the prerequisite course.

The challenge will be reviewed by a committee consisting of the dean, or designee, department chair, or designee, and one department or division representative or designee.

If space is available in a course when a student files a challenge to the prerequisite or corequisite, the district shall reserve a seat for the student and resolve the challenge in a timely manner. If no space is available in the course when a challenge is filed, the challenge shall be resolved prior to the beginning of registration for the next term and, if the challenge is upheld, the student shall be permitted to enroll if space is available when the student registers for that subsequent term.

**NOTE:** Students who are challenging a course which is a requirement for a degree or certificate may wish to use the Credit by Examination process to receive credit for the challenged course.

*Specific regulations and procedures relating to course prerequisites, corequisites, and advisories are on file in the office of the Vice President of Academic Affairs at Santiago Canyon College.*

**Student Right to Appeal**

A student has the right to appeal an exception to a current Santiago Canyon College academic policy, including academic probation and progress probation, to be made on their behalf. The student must complete and submit a petition. Petitions are obtained and submitted to the Admissions Office. Students must provide valid justification and documentation to support their request. The Exceptions to Academic Regulations Committee will review and make decisions on all requests. Students will be informed of the outcome in a timely manner. Petitions are obtained and submitted to the Admissions Office.

**Publicity**

All announcements, publicity and advertisements posted on college facilities must be approved by the Administrative Services Office in A-204.

**Sequential Courses**

Courses arranged in order of a sequence (i.e. beginning, intermediate and advanced) must be taken chronologically. Students may not enroll in a lower level course after passing a higher level version of the same course. (e.g. enrolling in Basic Aerobics after passing Intermediate Aerobics).

**Sexual Assault and Other Assaults on Campus (Title IX)**

**Sexual Misconduct, Intimate Partner Violence, and Stalking**
Any sexual misconduct or physical abuse, including, but not limited to, rape, as defined by California law, whether committed by an employee, student, or member of the public, that occurs on or off district property, is a violation of district policies and procedures and is subject to all applicable punishment, including criminal procedures, civil litigation, and employee or student discipline procedures. Students, faculty, and staff who report sexual misconduct, dating or domestic violence (intimate partner violence), and stalking shall be treated with dignity and provided comprehensive assistance.

The District has established administrative procedures that ensure that students, faculty, and staff who are victims of sexual and other forms of misconduct receive appropriate information and treatment and that educational information about preventing sexual violence is provided and publicized as required by law (please see Administrative Regulation 3540 for complete procedures). The use of alcohol or drugs never makes the Complainant at fault for reports of misconduct, intimate partner violence, or stalking; therefore, Complainants should not be deterred from reporting incidents out of a concern that they might be disciplined for related violations of drug or alcohol policies. Except in extreme circumstances, Complainants shall not be subject to discipline for related violations of the Standards of Student Conduct.

Santiago Canyon College has the resources to assist and refer students who experienced sexual misconduct, dating or domestic violence, and stalking. Immediate care and confidential counseling can be provided by the Student Health and Wellness Services, in Building T-102 or call (714) 432-6858. When the Student Health and Wellness Services is closed, contact Campus Safety and Security (not a confidential resource) directly in U-90 or call (714) 628-4730. If you have questions regarding an allegation, specific behavior, or if you would like to discuss a concern with an administrator, please contact the Title IX Coordinator at (714) 480-7404. Additional off-campus resources can be found below.

Harassment and Discrimination

Board Policy 3430 (BP 3430) prohibits all forms of harassment that are contrary to basic standards of conduct between individuals and are prohibited by state and federal law, as well as this policy, and will not be tolerated. Administrative Regulation 3435 details the procedures for the resolution of such complaints (https://www.rsccd.edu/Trustees/Pages/policies-and-regulations.aspx). This policy is widely published and publicized to all employees and students, including incoming employees and students. The District is committed
to providing an academic and work environment that respects the dignity of individuals and groups. The District shall be free of sexual harassment and all forms of sexual intimidation and exploitation, including acts of sexual misconduct, dating or domestic violence, and stalking. The District shall also be free of other unlawful harassment or discrimination, including that which is based on any of the following statuses: race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, or sexual orientation of any person, or military and veteran status, or because he or she is perceived to have one or more of the foregoing characteristics. The Title IX Coordinator is responsible for resolving reports of sexual misconduct, sex or gender-based discrimination or harassment, dating or domestic violence, and stalking. To report an incident or file a complaint, please contact the following individuals:

Jennifer de la Rosa
Title IX Coordinator
Rancho Santiago Community College District
2323 N. Broadway, Santa Ana, California 92706
Email: De_La_Rosa_Jennifer@sccollege.edu
Phone: 714-480-7404
Web: www.rsccd.edu/titleix

Deisy Covarrubias Deputy
Title IX Coordinator
Santiago Canyon College
8045 E. Chapman Ave., Orange, CA 92869
Email: covarrubias_deisy@sccollege.edu
Phone: 714-628-4933

Any individual can submit a report by using the following link: www.rsccd.edu/incidentreportingform
Applicable regulations, resources, and additional information can be found at www.rsccd.edu/titleix or www.rsccd.edu/civilrights

The District seeks to foster an environment in which all employees and students feel free to report incidents of harassment without fear of retaliation or reprisal. Retaliation for exercising one’s right of protection from discrimination and/or harassment or for participating in the investigation of a complaint is prohibited by law and this policy, and will not be tolerated. All allegations of retaliation will be swiftly and thoroughly investigated. If the District determines that discrimination, harassment, or retaliation has occurred, it will take all reasonable steps within its power to stop such conduct. Students or employees who engage in discrimination, harassment, or retaliation are subject to disciplinary action, up to and including termination or expulsion.

Duty to Report

Except for psychologists in the College’s Student Health Center, any District employee who knows of or has reason to know of sexual misconduct, dating or domestic violence, and stalking shall promptly inform the Title IX Coordinator. These employees are considered responsible employees under Title IX and are required to disclose all information, including the names of the parties, even where the person has requested that their name remain confidential. Supervisors are mandated to report all incidents of harassment and retaliation that come to their attention.

The Title IX Coordinator will determine whether confidentiality is appropriate given the circumstances of each such incident as the District must then take appropriate steps to eliminate any gender discrimination/ harassment/misconduct, prevent its recurrence, and remedy its effects. The District is required by the federal Clery Act to report certain types of crimes (including certain sex offenses) in
statistical reports. However, while the District will report the type of incident in the annual crime statistics report known as the Annual Security Report, victim names/identities will not be revealed.

BP 3430 applies to all aspects of the academic environment, including but not limited to classroom conditions, grades, academic standing, employment opportunities, scholarships, recommendations, disciplinary actions, and participation in any community college activity. In addition, this policy applies to all terms and conditions of employment, including but not limited to hiring, placement, promotion, disciplinary action, layoff, recall, transfer, leave of absence, training opportunities, and compensation.

**Supportive Measures**

The District will offer and implement appropriate and reasonable supportive measures to the Parties upon notice of alleged sexual harassment and/or retaliation. Supportive measures are non-disciplinary, non-punitive individualized services, offered as appropriate, as reasonably available, and without fee or charge to the Parties, which are intended to restore or preserve equal access to the District's education program or activity, to protect the safety of all Parties or the District's educational environment, and/or deter sexual harassment and/or retaliation.

The Title IX Coordinator will promptly make supportive measures available to the Parties upon receiving notice or a complaint and will coordinate the effective implementation of such measures. At the time that supportive measures are offered, the District will inform the Complainant, in writing, that they may file a formal complaint with the District either at that time or in the future if they have not done so already.

The District will maintain the privacy of the supportive measures, provided that privacy does not impair the District's ability to provide the supportive measures. The District will act to ensure as minimal an academic/occupational impact on the Parties as possible. The District will implement measures in a way that does not unreasonably burden the other party. Supportive measures may include but are not limited to:

- Counseling and referral to medical and/ or other healthcare services
- Referral to the Employee Assistance Program
- Referral to community-based service providers
- Student financial aid counseling
- Altered work arrangements for employees or student-employees
- Safety planning
- Campus safety escorts
- Implementing mutual contact limitations (no contact orders) between the Parties
- Academic support, extensions of deadlines, or other course or program-related adjustments
- Trespass orders
- Class or work schedule modifications, withdrawals, or leaves of absence
- Increased security and monitoring of certain areas of the campus
- Any other actions deemed appropriate by the Title IX Coordinator

Violations of no contact orders will be referred to the appropriate student or employee conduct processes for enforcement.

**Definitions**

The District has adopted the following definitions so as to address the unique environment of an academic community.
**Affirmative Consent** means an affirmative, conscious, and voluntary agreement to engage in sexual activity. It is the responsibility of each person involved in sexual activity to ensure that they have the affirmative consent of the other or others to engage in the sexual activity. Lack of protest or resistance does not mean consent, nor does silence mean consent. Affirmative consent must be ongoing throughout a sexual activity and can be revoked at any time. The existence of a dating relationship between the persons involved, or the fact of past sexual relations between them, should never by itself be assumed to be an indicator of consent. In California, a minor (meaning a person under the age of 18) cannot consent to sexual activity. It shall not be a valid response to alleged lack of affirmative consent that the Respondent believed that the Complainant consented to the sexual activity under either of the following circumstances: The Respondent's belief in affirmative consent arose from the intoxication or recklessness of the Complainant. Any allegation that alcohol or other drugs were involved in an incident will be reviewed. The Respondent did not take reasonable steps, in the circumstances known to the Respondent at the time, to ascertain whether the complainant affirmatively consented. It shall not be a valid response that the Respondent believed that the Complainant affirmatively consented to the sexual activity if the Respondent knew or reasonably should have known that the Complainant was unable to consent to the sexual activity under any of the following circumstances: The Complainant was asleep or unconscious. The Complainant was incapacitated due to the influence of drugs, alcohol, or medication so that the Complainant could not understand the fact, nature, or extent of the sexual activity. The Complainant was unable to communicate due to a mental or physical condition.

**Complainant** means an individual who is alleged to be the victim of conduct that could constitute Sexual Harassment, as defined herein, whether the notice/complaint is presented by the individual or someone on the individual’s behalf, such as a report by one who learned of the conduct in his or her official capacity as a faculty member or administrator.

**District** means the Rancho Santiago Community College District, including the colleges it operates, Santa Ana College and Santiago Canyon College, and centers.

**Education program or activity** means locations, events, or circumstances where the District exercises substantial control over both the Respondent and the context in which the Prohibited Conduct occurs and also includes any building owned or controlled by a student organization that is officially recognized by the District.

**Formal Complaint** means a document submitted or signed by a Complainant or signed by the Title IX Coordinator alleging Prohibited Conduct against a Respondent and requesting that the District investigate the allegation.

**Formal Grievance Process** means the process for adjudicating Formal Complaints of Prohibited Conduct through investigation, live hearing, determination of responsibility, and appeals.

**Hearing Decision-maker** refers to those who have decision-making and sanctioning authority within the District's Formal Grievance process.

**Investigator** means the person tasked by the District with investigating a Complaint. All Investigators shall receive annual training regarding such issues as the laws governing Title IX and VAWA/Campus Save Act; as well as other related state and federal laws prohibiting discrimination, harassment, and retaliation based on gender or sex, including sex discrimination, sexual harassment, sexual misconduct, dating, and domestic violence, and stalking; complainant, respondent, employee, and witness privacy rights; and the Family Educational Rights and Privacy Act of 1974 (FERPA).

**Notice** means that an employee, student, or third-party informs the Title IX Coordinator or other Official with Authority of the alleged occurrence of harassing, discriminatory, and/or retaliatory conduct.

**Official with Authority (OWA)** means an employee of the District explicitly vested with the responsibility to implement corrective measures for sexual harassment and/or retaliation on behalf of the District.
Parties include the Complainant(s) and Respondent(s), collectively.

Prohibited Conduct means any sexual misconduct, gender or sex-based discrimination or harassment, dating violence, domestic violence, stalking, and retaliation.

Remedies are actions taken to address safety, prevent recurrence of Prohibited Conduct, and restore equal access to the District’s educational program.

Resolution Process refers broadly to the process for addressing Formal Complaints either by informal resolution or through a Formal Grievance Process that includes investigation, live hearing, and appeal. Respondent means an individual who has been reported to be the perpetrator of Prohibited Conduct, as defined herein.

Sanction means a consequence imposed by the District on a Respondent who is found to have engaged in Prohibited Conduct under this interim administrative regulation.

Sexual Harassment means conduct on the basis of sex that satisfies one or more of the following

A. Quid Pro Quo Sexual Harassment: When an employee of the District conditions (implicitly or explicitly) the provision of aid, benefit, or service of the District on an individual’s participation in unwelcome sexual conduct; or

B. Hostile Environment Sexual Harassment: Unwelcome conduct determined by a reasonable person standing in the shoes of the Complainant to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the District’s education program or activity; or

C. Sexual assault, dating violence, domestic violence, or stalking, as defined herein.

1. Sexual assault means any sexual act (forcible or non-forcible), directed against another person, without the consent of the victim, including instances where the victim if incapable of giving consent. Sexual acts include the following:

(a) Rape, which is defined as the penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the Complainant.

(b) Sodomy, which is defined as oral or anal sexual intercourse with another person, forcibly committed and/or against that person’s will (non-consensually), or not forcibly or against the person’s will in instances in which the Complainant is incapable of giving consent because of age or because of temporary or permanent mental or physical incapacity.

(c) Sexual Assault with an Object, which is defined as the use of an object or instrument to penetrate, however slightly, the genital or anal opening of the body of another person, forcibly and/or against that person’s will (non-consensually), or not forcibly or against the person’s will in instances in which the Complainant is incapable of giving consent because of age or because of temporary or permanent mental or physical incapacity.

(d) Fondling, which is defined as the touching of the private parts of another person for the purposes of sexual gratification, without the consent of the victim, including instances where the victim is incapable of giving consent because of age or because of temporary or permanent mental or physical incapacity.

(e) Incest, which is defined as sexual intercourse between persons who are related to each other within the degrees wherein marriage is prohibited by law.

(f) Statutory Rape, which is defined as sexual intercourse with a person who is under the statutory age of consent.

2. Dating violence means violence committed, on the basis of sex, by a person who is or has been in a social relationship of a romantic or intimate nature with the Complainant. The existence of such a relationship shall be determined based on a consideration of the following factors: the length of the relationship, the type of relationship and the frequency of interaction between the persons involved in the relationship. For the purposes of this definition, dating violence includes, but is not limited to, sexual or physical abuse or the threat of such abuse. Dating violence does not include acts covered under the definition of domestic violence.
3. **Domestic violence** means conduct, on the basis of sex, that includes the requisite components of a felony or misdemeanor crimes of violence committed by (a) a current or former spouse or intimate partner of the victim; (b) a person with whom the victim shares a child in common; (c) a person who is cohabitating with or has cohabitated with the victim as a spouse; (d) a person similarly situated to a spouse of the victim under California law; or (e) any other person against an adult or youth victim who is protected from that person's acts under California law.

4. **Stalking** means a course of conduct directed at a specific person on the basis of sex that would cause a reasonable person to fear for the person's safety or the safety of others, or to suffer substantial emotional distress. For the purposes of this definition: (a) A course of conduct is two or more acts, including, but not limited to, acts in which the Respondent directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveils, threatens, or communicates to or about a person, or interferes with a person's property; (b) Reasonable person means a reasonable person under similar circumstances and with similar identities to the Complainant, and (c) Substantial emotional distress means significant mental suffering or anguish that may but does not necessarily require medical or other professional treatment or counseling.

Student/Students means as any individual who has accepted an offer of admission, or who is registered or enrolled for credit or noncredit-bearing coursework, and who maintains an ongoing relationship with the District.

Third-Party means a person other than the Complainant and the Respondent.

Any individual can submit a report by using the following link:

[www.rsccd.edu/report](http://www.rsccd.edu/report)

Applicable regulations, resources, and additional information can be found at [www.rsccd.edu/titleix](http://www.rsccd.edu/titleix) or [www.rsccd.edu/civilrights](http://www.rsccd.edu/civilrights)

Student/Students means any individual who has accepted an offer of admission, or who is registered or enrolled for credit or noncredit-bearing coursework, and who maintains an ongoing relationship with the District.

Third-Party means a person other than the Complainant and the Respondent.

**Hearing** The District will designate a single Decisionmaker (hearing officer) or a three-member Decision-maker panel, at the discretion of the Title IX Coordinator. With a panel, one of the three members will be appointed as Chair by the Title IX Coordinator. For purposes of this regulation, the term Hearing Chair is used to refer to the single Decision-maker or the Chair of the three-person Decision-maker panel. The Decision-maker(s) must not have had any previous involvement in the matter, and therefore, cannot be the Title IX Coordinator or investigator(s) in the case.

**Roles and Responsibilities** The Title IX Coordinator or designee shall be responsible for managing the hearing process and the necessary logistics (scheduling, notifying witnesses, providing the Parties and Decision-maker(s) with appropriate documentation and evidence, coordinating the location of the hearing, and any other support that is necessary for the hearing to run smoothly), provided their previous role(s) in the matter do not create a conflict of interest. Otherwise, a designee may fulfill this role.

The Decision-maker(s) is responsible for conducting an impartial live hearing and issuing a written determination regarding the responsibility to the Parties without bias or conflict of interest. The Parties' Advisor of choice may be but is not required to be, an attorney. The Parties' Advisors may be present for meetings and proceedings throughout the grievance process, subject to equal restrictions on Advisors' participation, in the District's discretion. If the party does not have an Advisor at the hearing, the District must provide an Advisor of the District's choice, without fee or charge, solely for the purpose of conducting cross-examination.
Location Live hearings may be conducted with all Parties physically present in the same geographic location or, at the District’s discretion, any or all parties, witnesses, and other participants may appear at the live hearing virtually. The District must create an audio or audiovisual recording, or transcript, of any live hearing. At the request of either party, the District must also provide for the entire live hearing (including cross-examination) to occur with the Parties located in separate rooms with technology enabling the Parties to see and hear each other.

Notice of Hearing The Title IX Coordinator will send notice of the hearing to the Parties no less than ten (10) business days prior to the hearing unless the Parties agree to an expedited schedule. Once mailed, emailed, and/or received in-person, notice will be presumptively delivered. The notice will contain:

• A description of the alleged violation(s), a list of all policies allegedly violated, a description of the applicable procedures, and a statement of the potential sanctions/ responsive actions that could result.

• The time, date, and location of the hearing and a reminder that attendance is mandatory, superseding all other campus activities.

• Any technology that will be used to facilitate the hearing.

• Information about the option for the live hearing to occur with the Parties located in separate rooms using technology that enables the Decision-maker(s) and Parties to see and hear a party or witness answering questions. Such a request must be raised with the Title IX Coordinator at least five (5) business days prior to the hearing.

• A list of all those who will attend the hearing, along with an invitation to object to any Decision-maker on the basis of demonstrated bias. This must be raised with the Title IX Coordinator at least two (2) business days prior to the hearing.

• Information on how the hearing will be recorded and on access to the recording for the Parties after the hearing.

• A statement that if any party or witness does not appear at the scheduled hearing, the hearing may be held in their absence, and the party’s or witness’s testimony and any statements given prior to the hearing will not be considered by the Decisionmaker(s). For compelling reasons, the Hearing Chair may reschedule the hearing.

• Notification that the Parties may have the assistance of an Advisor of their choosing at the hearing and will be required to have one present for any questions they may desire to ask. The party must notify the Title IX Coordinator if they do not have an Advisor, and the District will appoint one. Each party must have an Advisor present. There are no exceptions.

• A copy of all the materials provided to the Decision-maker(s) about the matter, unless they have been provided already.

• An invitation to contact the Title IX Coordinator to arrange any disability accommodations, language assistance, and/or interpretation services that may be needed at the hearing, at least seven (7) business days prior to the hearing.

• A statement that Parties cannot bring mobile phones/devices into the hearing.

Hearings for possible violations that occur near or after the end of an academic term (assuming the Respondent is still subject to this Policy) and are unable to be resolved prior to the end of term will typically be held immediately after the end of the term or during the summer, as needed, to meet the resolution timeline followed by the District and remain within the 60-90 business day goal for resolution. In these cases, if the Respondent is a graduating student, a hold may be placed on graduation and/or official transcripts until the matter is fully resolved (including any appeal). A student facing charges under this Policy is not in good standing to graduate. If a party or Parties prefer not to attend or cannot attend the hearing in person, the party should request alternative arrangements from the Title IX Coordinator at least five (5) business days prior to the hearing. Similarly, any witness who cannot attend in person should let the Title IX Coordinator or the Chair know at least five (5) business days prior to the hearing so that appropriate arrangements can be made.

Remedies and Sanctions Should a violation of the interim administrative regulation be substantiated, the District will effectively implement remedies for the Complainant, designed to restore or preserve the Complainant’s equal educational access, such as long-term supportive measures, and may impose disciplinary sanctions on the Respondent in conformity with all relevant statutes, regulations, and District personnel policies and regulations, including the provisions of any applicable collective bargaining agreement. Factors considered when determining a sanction/ recommendation may include, but are not limited to: • The nature, severity of, and circumstances surrounding the violation(s)

• The Respondent’s disciplinary history

• Previous allegations or allegations involving similar conduct

• The need for sanctions/responsive actions to bring an end to the Prohibited Conduct
• The need for sanctions/responsive actions to prevent the future recurrence of the Prohibited Conduct
• The need to remedy the effects of the Prohibited Conduct on the Complainant and the community
• The impact on the Parties
• Any other information deemed relevant by the Decision-maker(s)

Student Sanctions  In cases involving Respondents who are students, the hearing process detailed herein shall serve as the due process hearing outlined in Section IV of Board Policy 5500. The following are the usual sanctions that may be imposed upon students or organizations singly or in combination:

• Warning: A verbal statement that the conduct was unacceptable and that further violation of any District policy, procedure, or directive will result in more severe sanctions/responsive actions.

• Reprimand: A written statement, included in the student’s disciplinary file that the conduct was unacceptable and that further misconduct will result in more severe sanctions /responsive actions.

• Required Counseling: A mandate to meet with and engage in either District-sponsored or external counseling to better comprehend the misconduct and its effects.

• Probation: Authorization for the Respondent to return to classes, but with an understanding of expected appropriate future behavior and terms that may include denial of specified social privileges, exclusion from co-curricular activities, exclusion from designated areas of campus, no-contact orders, and/or other measures deemed appropriate. Any violations of the Standards of Student Conduct during this probationary period will result in further, more serious disciplinary action against the Respondent.

• Suspension: Termination of student status for a definite period of time not to exceed two academic years.

• Expulsion: Permanent termination of student status and revocation of rights to be on campus for any reason or to attend District-sponsored events.

• Withholding Diploma: The District may withhold a student’s diploma for a specified period of time and/or deny a student participation in commencement activities if the student has an allegation pending or as a sanction if the student is found responsible for an alleged violation.

• Revocation of Degree: The District reserves the right to revoke a degree previously awarded from the District for serious violations committed by a student prior to graduation.

• Student Organizational Sanctions: Deactivation, loss of recognition, loss of some or all privileges for a specified period of time.

• Other Actions: In addition to or in place of the above sanctions, the District may assign any other sanctions as deemed appropriate.

Employee Sanctions

Responsive actions for an employee who is found to have engaged in Prohibited Conduct, as defined herein include:

• Warning – Verbal or Written
• Performance Improvement Plan
• Enhanced supervision, observation, or review
• Required Counseling
• Required Training or Education
• Demotion
• Transfer
• Reassignment
• Assignment to a new supervisor
• Restriction of stipends, research, and/or professional development resources
• Suspension with pay
• Suspension without pay

• Termination

• Other Actions: In addition to or in place of the above sanctions/responsive actions, the District may assign any other responsive actions as deemed appropriate.

Additional information and resources can be found at:

https://www.rsccd.edu/Departments/TitleIX/Pages/default.aspx

Sexual Harassment Complaints (Title IX)

Board Policy 3430 (BP3430) Prohibition of Harassment prohibits all forms of harassment are contrary to basic standards of conduct between individuals and are prohibited by state and federal law, as well as this policy, and will not be tolerated. The District is committed to providing an academic and work environment that respects the dignity of individuals and groups. The District shall be free of sexual harassment and all forms of sexual intimidation and exploitation including acts of sexual violence. Sexual violence includes dating violence, domestic violence and stalking. The District shall also be free of other unlawful harassment, including that which is based on any of the following statuses: race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, or sexual orientation of any person, or military and veteran status, or because he or she is perceived to have one or more of the foregoing characteristics.

The District seeks to foster an environment in which all employees and students feel free to report incidents of harassment without fear of retaliation or reprisal. Students can file a Title IX complaints, which includes harassment or sexual violence with the Vice Chancellor, Human Resources who can be contacted at

2323 N Broadway, Suite 407-2, Santa Ana, CA 92706
Telephone Number 714-480-7489

The procedures for filing and investigation of a discrimination complaint can be found at: www.rsccd.edu/Trustees/Pages/AR-3435.aspx

The District also strictly prohibits retaliation against any individual for filing a complaint of harassment or sexual violence or for participating in such an investigation. Such conduct is illegal and constitutes a violation of this policy. All allegations of retaliation will be swiftly and thoroughly investigated. If the District determines that retaliation has occurred, it will take all reasonable steps within its power to stop such conduct. Individuals who engage in retaliatory conduct are subject to disciplinary action, up to and including termination or expulsion.

Any student or employee who believes that he or she has been harassed or retaliated against in violation of this policy should immediately report such incidents by following the procedures described in AP 3435. Supervisors are mandated to report all incidents of harassment and retaliation that come to their attention.

This policy applies to all aspects of the academic environment, including but not limited to classroom conditions, grades, academic standing, employment opportunities, scholarships, recommendations, disciplinary actions, and participation in any community college activity. In addition, this policy applies to all terms and conditions of employment, including but not limited to hiring, placement, promotion, disciplinary action, layoff, recall, transfer, leave of absence, training opportunities and compensation.
To this end the Chancellor shall ensure that the institution undertakes education and training activities to counter discrimination and to prevent, minimize and/or eliminate any hostile environment that impairs access to equal education opportunity or impacts the terms and conditions of employment.

The Chancellor shall establish procedures that define harassment on campus. The Chancellor shall further establish procedures for employees, students, and other members of the campus community that provide for the investigation and resolution of complaints regarding harassment and discrimination, and procedures for students to resolve complaints of harassment and discrimination. All participants are protected from retaliatory acts by the District, its employees, students, and agents.

This policy and related written procedures (including the procedure for making complaints) shall be widely published and publicized to administrators, faculty, staff, and students, particularly when they are new to the institution. They shall be available for students and employees in all administrative offices.

Employees who violate the policy and procedures may be subject to disciplinary action up to and including termination. Students who violate this policy and related procedures may be subject to disciplinary measures up to and including expulsion.

**Smoking and Tobacco Use**

Smoking is prohibited in all campus areas including all District owned, rented, or leased properties and vehicles, except in designated parking lot areas and within 20 feet of entrances, exits, and operable windows.

Smoking is defined as the use of products containing tobacco and/or nicotine, including but not limited to smokeless tobacco, clove cigarettes, or any other smoking products, and any and all electronic or “e-cigarettes”, which are unapproved nicotine delivery devices, unregulated by the FDA.

Public performances in which smoking is an integral and necessary part of the production are excluded from these regulations.

These regulations apply to employees, students, visitors, and all other persons who use District-owned or rented/leased facilities and vehicles. Failure to comply with these regulations may result in disciplinary action.

It is the responsibility of every District employee to comply with these regulations and report violations to District Safety.

These regulations do not supersede more restrictive policies which may be in force under State and Federal regulations.

**(AR-3570)**

**Standards of Student Conduct**

Guidelines for Student Conduct are set forth in the California Education Code, California Administrative Code, Title V, policies of the Board of Trustees, and all civil and criminal codes. Students enrolling in district educational programs assume an obligation to obey state law and district rules and regulations governing the conduct of students.

Students who enroll in those instructional programs in which the college has affiliations with various outside associations must comply with the college’s policies and procedures and also with the outside associations’ policies and procedures. This includes but is not limited to students enrolled in the programs of Cosmetology, Fire Academies, Criminal Justice Academies and Nursing.

**Guidelines for Student Conduct**
The following represent violations for disciplinary action, up to but not limited to expulsion, that may be taken:

A. Dishonesty, cheating, plagiarism, lying, or knowingly furnishing false information to the district or college officials performing their duties.

B. Forgery, alteration, or misuse of district documents, records, or identification.

C. Willful misconduct that results in damage to any real or personal property owned by the district or district employees (damage includes, but not limited to vandalism, such as cutting, defacing, breaking, etc.).

D. Obstruction or disruption of pedestrian or vehicular traffic or of teaching, research, administration, or of other district activities on or off District premises. This includes obstruction or disruption of administration, disciplinary procedures or authorized college activities.

E. Assault, battery, or any threat of force or violence upon a student, college personnel, or campus visitor; willful misconduct which results in injury or death to a student, college personnel, or campus visitor. This includes fighting on district property or at a district sponsored event, on or off district premises.

F. Detention of any person on district-owned or controlled property or at district-sponsored or supervised functions or other conduct which threatens or endangers the health or safety of another.

G. Theft of any property of the district which includes property of a member of the district community or a campus visitor.

H. Unauthorized entry into or unauthorized use of district property, supplies, equipment, and/or facilities.

I. Misrepresentation of oneself or of an organization to be an agent of the district.

J. Sexual assault or physical abuse, including rape, forced sodomy, forced oral copulation, rape by a foreign object, sexual battery, or threat or assault, or any conduct that threatens the health and safety of the alleged victim, which includes students, college personnel, or campus visitors.

K. Use, possession, distribution, or being under the influence of alcoholic beverage on district property or at any district sponsored event.

L. Use, possession, distribution, or being under the influence of narcotics, other hallucinogenic drugs or substances, or any poison classified as such by Schedule “D” in Section 4160 of the Business and Professions Code on District property or at any District-sponsored event except as expressly permitted by law.

M. Expression which is libelous, slanderous, obscene or which incites students so as to create a clear and present danger of commission of unlawful acts on district premises, or violation of district regulations, or the substantial disruption of the orderly operation of the college.

N. Engaging in lewd, indecent, or obscene behavior on district property or at any district-sponsored function.
O. Possession or use while on the district premises, or a district-sponsored function, of any firearm, knife, explosive, or other dangerous object, including but not limited to any facsimile firearm, knife or explosive. Exceptions include those participating in a criminal justice educational program who are authorized such possession or those who are enrolled in a course which authorizes such possession.

P. Unauthorized preparation, giving, selling, transfer, distribution, or publication, for any commercial purpose, of any contemporaneous recording of an academic presentation in a classroom or equivalent site of instruction, including but not limited to handwritten or typewritten class notes, except as permitted by any district policy or administrative regulation.

Q. Engaging in harassing or discriminatory behavior based on race, sex (i.e., gender), religion, age, national origin, disability, sexual orientation or any other status protected by law.

R. Continuous disruptive behavior or willful disobedience, habitual profanity or vulgarity, open and persistent abuse of college personnel, or open and persistent defiance of the authority of college personnel, which includes physical as well as verbal abuse, including the use of racial epithets and hate speech.

S. Disruptive written or verbal communication, vulgarity, open and persistent abuse of other students which include verbal abuse, racial epithets and hate speech. Engaging in intimidating conduct or bullying against another student through words or actions, including direct physical contact; verbal assaults, such as teasing or name-calling; social isolation or manipulation; and cyberbullying.

T. Willful or persistent smoking in any area where smoking has been prohibited by law or by regulation of the Board of Trustees;

U. Violation of the Computer Usage Policy is applicable to students using computer classrooms, computer labs, the wireless network or other locations on and off district property. A violation is considered any of the following:

(a) Accessing with or without permission or causing to be accessed without authorization, altering, damaging, deleting, hacking, destroying, or otherwise using any data, computer, computer system, computer software and programs, or computer network belonging to or used by the college or any member of the District.

(b) Accessing with or without permission, taking, copying, or making use of any data from a computer, computer system, or computer network, or taking or copying any supporting documentation, whether existing or residing internal or external to a computer, computer system, or computer network belonging to or used by the college or District.

(c) Using or causing to be used, computer services without permission

(d) Disrupting or causing the disruption of computer services or denying or causing the denial of computer services to an authorized user of a computer, computer system, or computer network belonging to or used by the college or District.

(e) Introducing any computer contaminant or virus into any computer, computer system, or computer network belonging to the college or District.

(f) Sending any message using any computer system or network without authorization or sending any message in the name of another person or entity.

(g) Using any account or password without authorization.
(h) Allowing or causing an account number or password to be used by any other person without authorization.

(i) Accessing or causing to be accessed, downloading or causing to be downloaded, pornographic or obscene materials except when accessing such material which is part of the instructional process or assignment for a class in which the student is currently enrolled.

(j) Use of systems or networks for personal commercial purposes.

(k) "Cyberstalking", which is to be understood as any use of the college or district computer system, computer network, or computer programs to stalk another person via excessive messages or inquiries, inappropriate or threatening messages, racially motivated communications, photos or other means of communication.

V. Any act constituting good cause for suspension or expulsion, or violation of district policies or campus regulations.

Disciplinary Action

Violations to any tenets within the standards of student conduct are subject to the following disciplinary actions: warning, reprimand, probation, restitution, removal, suspension or expulsion. Disciplinary actions may be imposed singly or in combination.

Standards of Conduct for Computer Classrooms and Computer Labs

In accordance with Board Policy (BP 3720) and Administrative Regulation (AR 3720) and to extend the life of hardware, comply with copyright laws, and adhere to appropriate computer network conduct and usage, the following standards of conduct are required of all students using computer classrooms, computer labs, and the wireless network.

Failure to comply with the following standards can result in the suspension of a student’s privileges and possibly other sanctions such as removal from class, suspension, expulsion or other disciplinary actions.

The primary use of computer systems/resources is for academic/educational purposes. The following are NOT allowed:

- Using the Internet to access sexually explicit and/or pornography websites.
- Sending and receiving any messages that are threatening, racist or inflammatory, abusive towards a specific gender or culture, obscene, or use inappropriate language.
- Using the network for personal or commercial advertising or political activity.
- Using computers or the wireless network to play individual games, multiple-user games, or gambling.
- Using the computers for illegal purposes.

The SCC Library, computer labs, computer classrooms, and science labs may have additional restrictions to those listed above. It is the student's responsibility to be aware of these additional guidelines.

Study Load

In order to meet the graduation requirements in four semesters, students should carry an average of 15 units each semester. Students will ordinarily not be allowed to register for more than 18 units.
When individual circumstances may require additional unit demand, an overload program in excess of 18 units may be approved for students who have maintained a 3.0 GPA. Approval for such overloads may be secured from the counseling department.

A summer session load should not exceed the equivalent of one unit per week or approximately nine units for an 8-week session. If over 9 units for summer or over 6 units for intersession, an overload petition must be approved using the same criteria as above.

### Transfer Credit

Santiago Canyon College grants credit for coursework completed at regionally accredited institutions of higher education. Official transcripts are required and must be submitted to the Admissions and Records Office. Official transcripts submitted for evaluation must be printed/dated within the last 6 months. Any coursework marked as “in-progress” will need to have additional transcripts submitted once grades have been posted.

Transfer coursework may be used to meet a major requirement by approval. To seek approval, a Petition to Substitute a Major Requirement must be submitted along with supporting documentation. Petition can be obtained in the Admissions and Records Office or online.

Transfer coursework may also be used to meet CSU or IGETC Certification. If coursework was completed at an institution outside of the California Community College system, it must be approved through the Course Pass Along process.

Transfer coursework may also be used to meet SCC General Education. Course must be listed in the college catalog, in the same academic year for which the course was taken, at the transfer institution. Upper-division courses may be used so long as it meets the lower-division requirements; however, a student is strongly encouraged to meet with a SCC counselor to discuss unintended consequences.

### Unit of Credit

Santiago Canyon College is on a semester system and awards college credit in semester units.

One unit of credit (or credit hour) of college credit represents 54 hours of student time in lecture, study, or laboratory work. For a 16 week semester, this is generally three hours of work per week per unit. For example, semester-long lecture classes are generally one-hour per week in class and two-hours per week outside preparation. Semester-long laboratory classes are generally three hours per week in the laboratory with minimal outside preparation.

When converting units from quarter to semester, the ratio is one quarter unit equals two thirds of a semester unit.

### Withdrawal From Class

Students who cannot continue in a course have an obligation to withdraw officially. Students are encouraged to consult with instructors concerning class withdrawals.

Students may officially withdraw on the web through the last day of the 12th week of instruction (or 75 percent of the class meetings, whichever is less and receive a transcript symbol of “W”. All instructor-initiated “EA’s” (excessive absence drops) through the 12th week or 75 percent of class meetings, whichever is less, will be assigned a “W”.
The academic record of a student who remains in a class beyond the time allowed by district policy must reflect a symbol other than a “W”, except under extenuating circumstances.

A student who has a withdrawal (grade of “W”) in the same course two or more times loses the privilege of online registration for that course and must receive the approval of the Associate Dean of Admissions or the Registrar to enroll in the same course.

(See also Course Repeatability and Repetition.)

**Extenuating Circumstances**

**Excused Withdrawal (EW)**

A student may petition for an Excused Withdrawal due to extenuating circumstances (reasons beyond the student’s control). Extenuating circumstances are approved based upon verifiable documentation supporting the request. If approved, the petitioned classes will be designated with an “EW” (Excused Withdrawal) on the transcript. An “EW” will not be counted in progress probation or dismissal calculations nor will it be counted towards the permitted number of withdrawals or counted as an enrollment attempt.

**Military Withdrawal (MW)**

A student who is a member of an active or reserve U.S. military service and has received orders compelling a withdrawal from courses may request a military withdrawal. If approved an “MW” will appear on the transcript for each course. “MW” shall not be counted in the permitted number of withdrawals nor shall it be counted in progress and dismissal calculations.

Students should file the petitions as soon as possible. The petition must be filed no later than one year following the awarding of the original grade.

**Withholding of Student Records**

Students, or former students, who have failed to pay a proper financial obligation shall have grades, transcripts, diplomas and registration privileges withheld.

**Student and Academic Support Services and Opportunities**

**Associate Degrees, Associate Degrees for Transfer and Certificates**

Santiago Canyon College offers more than 170 majors or areas of emphasis leading to an associate degree or an associate degree for transfer. Additionally, the college offers more than 225 programs leading to a certificate of achievement, certificate of proficiency, certificate of competency, or certificate of completion.

**Bookstore**
The official Santiago Canyon College Hawk Campus Store offers a comprehensive selection of new, used, digital and rental textbooks, along with course materials, supplies and specialty items. For more information, visit the Hawk Campus Store in A-101, call (714) 628-4736 or visit www.sccollege.edu/bookstore.

**CalWORKs**

The CalWORKs program at Santiago Canyon College provides assistance to students who are receiving cash aid. CalWORKs students are provided specialized counseling and support services to help ensure their achievement of educational goals and career readiness. Services include counseling/case management, vocational training, job services, workshops, and student support services. For more information, call (714) 628-4915.

**Career Services**

Career Services assists currently enrolled students with career decision-making and employment preparation. Services include career and employment preparation workshops, guest lecturers from industry, on-campus job fairs, and numerous career and job search resources. Enrolled students and alumni have access to Santiago Canyon College's Online Job Board College Central Network at www.collegecentral.com/sccollege. For more information, visit Career Services in D-106 or call (714) 628-4805.

**College Assistance Migrant Program (CAMP)**

The College Assistance Migrant Program (CAMP) is a federally funded program that provides tailored programs and services to students from migrant and farm working backgrounds. The purpose of CAMP is to support students in making the best of their academic, career and educational goals.

After meeting eligibility requirements, CAMP students receive the following programs and services: academic and career counseling, study skills workshops, book vouchers, bus passes, internships, financial aid application support, laptop borrowing privileges, tutoring, peer mentoring, seminars and workshops for CAMP parents and families, family cultural activities and participation in the CAMP Planning Summer Bridge Program.

To learn more about CAMP contact us at (714) 628-5034, come by our office in A-212 or visit our website at www.sccollege.edu/camp.

**Child Development Center**

Santiago Canyon College operates the Child Development Center, which functions as the lab school for the Child Development and Education Department. The lab school provides practicum experience and hands-on learning to students seeking a career in early care and education of young children or a related field. Additionally, the Child Development Center provides comprehensive quality services to meet students' childcare needs. Services are available for children that are between two and five years of age. Fees are based on the California Department of Education, Early Education and Support Division's sliding fee scale, which are based on family income. Students eligible for the CalWORKs program may also be eligible to receive free childcare services. Limited full cost childcare spaces are also available for college faculty, staff, and community members that do not meet the sliding fee scale income criteria. For more information and hours of operation phone (714) 628-4890.

**Community Services**

Community Services is a fee-based program that provides classes to the general public for educational, cultural, social and recreational purposes. Classes are not for credit, usually shorter in duration than credit classes, and do not require lengthy preparation or rigorous testing. Participants can choose from a variety of classes that include Creative Arts, Business and Careers, Computer Training, Dance, Health and Fitness, Language, Financial Management, Music, Real Estate, Special Interest and Travel Tours. In addition, academic and recreational College for Kids classes are offered each semester.

For more information call the Community Service office at (714) 628-4960.

**Continuing Education Program**

Santiago Canyon College Continuing Education Division provides noncredit courses and programs. Beyond providing the means for an adult to take classes for a high school diploma, Continuing Education delivers pre-collegiate education in the areas of basic academic skills and English as a Second Language, citizenship, and short-term career technical programs. It also serves the needs of the disabled and adults with special needs, health and safety and older adults. A full range of personal, career and academic counseling services is available to students enrolled in continuing education classes. Classes are located at a number of educational centers throughout the
Cooperative Work Experience Education
The Cooperative Work Experience Education program represents a joint educational venture between the student, the employer, and the college. The purpose of these courses is to provide eligible students with supervised on-the-job training as an integral part of the total college education program. This is accomplished through new learning experiences in an occupational setting. Students may earn up to four units per semester and a maximum total of 16 units in Cooperative Work Experience courses. Students must petition each time they wish to re-enroll. Further information will be found in the academic program of the catalog.

Counseling Services
Counseling services, (714) 628-4800, are provided by counseling faculty to assist students with successful completion of academic, career, and personal goals. Counseling services are organized under these major areas:

Academic Counseling
Counselors can help students select a program of study in relation to their educational objective to include associate degree, university transfer, and/or certificates, offer assistance in exploring life goals, and assist students with the development of a comprehensive student education plan. A comprehensive student education plan is a road map to help you reach your educational goal. The customized plan will list the required courses that you will need and helps plan out when to take the courses. Your education plan is designed and tailored to your specific needs, interests and goals.

Career Planning
Counselors can assist students in the development of their career goals and provide information that will indicate the best preparation for reaching these goals. Students are encouraged to enroll in CNSL 116, a three-unit CSU/UC transferable Career/Life Planning & Personal Exploration course for optimal exposure to the world of work and career opportunities.

Assessment, Orientation, Advisement, and Follow-Up
The Seymour-Campbell Student Success Act of 2012 requires new students to participate in assessment, orientation, and advisement as part of the Student Success and Support Program (SSSP). Through orientation and advisement, counseling faculty assist students with understanding placement test (assessment) results in math, reading and English or American College English, and how these courses fit into the development of their education plan. Counselors also provide academic and progress-probation intervention workshops for students not meeting required academic standards.

Personal Counseling
Counselors are available to students who need assistance with problems which may be affecting their academic progress. The emphasis is on short-term counseling focused around problem areas or concerns. When appropriate, students may be referred to other campus services for additional assistance.

Disabled Students Programs and Services (DSPS)
DSPS provides instructional support services and academic accommodations to students with verifiable disabilities attending SCC. Program services are designed to ensure that students have an equal opportunity to participate in, and benefit from, all college programs, services, and activities. Students are responsible for requesting DSPS accommodations as early in the semester as possible or at least two weeks before they are needed. To have accommodations authorized, students must provide DSPS with disability verification and meet with a DSPS certificated professional for an evaluation of needs. The academic accommodations authorized for students are
determined individually based on identified disability-related educational needs. Assessment for Learning Disabilities (LD) eligibility is available at no cost to students experiencing academic difficulties that interfere with their educational progress. Students can schedule an appointment by coming to the DSPS Office in E-105, by phoning (714) 628-4860 or by emailing DSPS@sccollege.edu.

Distance Education

Distance Education courses are formal credit courses that use one or more technologies to deliver instruction to students who are separated from the instructor. Online courses are 100% online and hybrid courses have regularly scheduled on campus class meetings. All Distance Education courses at Santiago Canyon College ensure that there is regular and effective contact from the instructor to the student, from the student to the instructor, and from student to student. A variety of technologies and media are used for communication, assignments, and assessments. At a minimum, Distance Education students must have regular access to a computer with high speed internet access, word processing and presentation software, multimedia software (such as QuickTime or Windows Media Player), and any software or hardware listed in the course requirements in the class description.

Please check our Distance Education department website, at www.sccollege.edu/DistanceLearning, for resources and to check to ensure that Distance Education courses are right for you.

Extended Opportunity Programs and Services (EOPS)

Extended Opportunity Program and Services (EOPS) is a state-funded program that provides specialized assistance to students who need additional support due to financial and educational challenges. EOPS provides comprehensive academic, career, and personal counseling. Additional services include summer success program, book services, priority registration, university transfer assistance, financial aid application assistance, and additional resources as needed.

EOPS also offers CARE (Cooperative Agencies Resources for Education) to EOPS single parents receiving cash aid with children under the age of fourteen. CARE services are in addition to EOPS and may include additional book services, transportation assistance, and group support activities.

For more information regarding eligibility call (714) 628-4915

Financial Aid Services

Financial aid is available to qualified students to help meet the cost of tuition, books, supplies, and other educational materials. Students may also be eligible to have their enrollment fee waived. Financial aid staff are available to answer questions and help students through the financial aid process. You may contact us in-person in room E-104 or by phone (714) 628-4876 for more information. General information such as answers to frequently asked questions and hours of operation can be accessed online.

First Year Support Center

The First Year Support Center (FYSC) is dedicated to supporting new and continuing students in their academic and social transition at Santiago Canyon College. The center strives to provide college skill sets and awareness of campus resources, and to be able to integrate students into the college campus and community. Students will be provided with the following types of assistance: applying to the college, registration of classes, filling out financial aid documentation, student portal assistance, student success workshops, Dreamer resources, etc. For more information, visit the FYSC in E-307 or call (714) 628-5085.

Guardian Scholars

The SCC Guardian Scholars Program serves ambitious, college bound students who are current and former foster youth pursing a path within higher education. SCC Guardian Scholars' mission is to support the well-being and empowerment of students on their educational journeys to earning a Career Technical Certificate, Associate's Degree, and/or transfer to a university. We strive to provide a support system and network that is vitally needed for foster youth to ensure a positive college life, both inside and outside of the classroom.

Upon meeting eligibility requirements, Guardian Scholars receive the following support services: Priority registration, one-on-one academic advising, new-student orientation, financial aid, assistance finding on-campus jobs, bus passes, school supplies, textbook assistance, special activities, luncheons, mentoring, friendship and support.

82/2244
To learn more about Guardian Scholars, contact us at (714) 628-4709, come by our office in A-206, or visit our website at Guardian Scholars.

**Hawk's Nest Food Pantry**

The Hawk's Nest Food Pantry supports all credit and noncredit SCC students' academic potential, creativity, as well as their personal and professional growth by providing free and nutritious food for students and their families. Students are welcome to shop for free. The food pantry provides non-perishables and perishables, such as fresh produce. To find out when the food pantry is open, please visit: www.sccollege/foodpantry

Requirements to use the food pantry:

- Have a student ID number
- If possible, please bring a re-usable bag

**High School and Community Outreach**

The High School and Community Outreach Department provides detailed information regarding academic programs and student services that are offered at Santiago Canyon College to the local community. The Outreach Department services include: onsite placement testing, weekly high school visits, priority registration through the Early Welcome program, on-campus academic planning/registration sessions, and general oversight of the Summer Advantage program for graduating seniors from local high schools for each fall semester. For more information, call (714) 628-4808 or visit www.sccollege.edu/outreach.

**Honors Program and Honors Courses**

The SCC Honors Program is dedicated to providing an enriched learning environment for high academic achievers so that they may fulfill themselves personally and acquire the skills and knowledge necessary to succeed at the Associate degree or Baccalaureate degree level. The Honors Program encourages critical thinking, sound decision-making, cultural awareness, and effective communication skills through instructional modes that foster independence and responsibility.

Requirements to enroll in an Honors class

Regularly admitted students who meet the course prerequisites may take an Honors class. Enrollment in an Honors class does not require membership in the Honors Program. Students must be free of active disciplinary action reports.

First-time freshmen need to bring a high school transcript to the Counseling Department to receive a signed prerequisite clearance form prior to enrolling in an Honors class. Students who completed college work while in high school need to use the college GPA and units. Continuing College students need a minimum 3.0 cumulative GPA from all institutions attended. Transfer students will need college transcripts from all previous institutions as well as a signed prerequisite clearance form.

Career Advanced Placement (CAP) students must have a minimum 3.0 GPA in any college coursework and have a minimum 3.0 GPA in high school.

Requirements to join the Honors Program

Submit an Honors Program application and requested documentation to Admissions and Records during the fall or spring semester. Students must be free of active disciplinary action reports.

Applications are not accepted from students who are not currently enrolled. Application, procedures, and deadlines are available on the Honors Program website: www.sccollege.edu/honors.

Freshmen:
First-time freshmen who graduated from high school with a minimum 3.0 GPA may join the program during their first semester at SCC. High School Proficiency cannot be used. Official high school transcripts are required.

Qualification for English 101 as indicated by the SCC English placement test or a score of 3 or higher on the AP English test.

May not be involved in or found at fault in any disciplinary action as outlined in the SCC catalog.

Meet with Honors Program Counselor once per semester for Comprehensive Educational Plan prior to Pre-Selection of Honors courses.

**Continuing College students:**

Students need a cumulative 3.0 GPA or higher in 6 or more units from all colleges attended.

Qualification for ENGL 101 as indicated by the SCC English placement test or a score of 3 or higher on the AP English test.

Have no grade lower than a “C” in any college-level Honors class.

Meet with Honors Program Counselor once per semester for Comprehensive Educational Plan prior to Pre-Selection of Honors courses.

May not be involved in or found at fault in any disciplinary action as outlined in the SCC catalog.

Career Advanced Placement (CAP) students: Current high school CAP students are not eligible to join the Honors Program. GPA in college units completed while in high school could affect future ability to enroll in honors classes and the Honors Program.

**Requirements to continue in the Honors Program**

Maintain a cumulative 3.0 GPA or higher.

Earn grades of "C" or above in all Honors classes.

Earn grades of "C" or above in all college-level classes while in the program.

Meet with Honors Program Counselor once per semester for Comprehensive Educational Plan prior to Pre-Selection of Honors courses.

Complete English 101 during the first year in the Honors Program unless ENGL 101 has already been satisfied. (ENGL 101H is recommended)

Remain free of any disciplinary action as outlined in the SCC catalog.

Requirements to complete the Honors Program

Submit the Honors Program Completion Petition to Admissions and Records (E-100). The petition and deadlines are available on the Honors Program website: www.sccollege.edu/honors.

Maintain a cumulative 3.0 GPA in all college units, including remedial and honors coursework.

Complete Honors Program unit and residency requirements:

Complete a minimum of 30 college units at Santiago Canyon College

Complete a minimum of 15 honors units with a minimum of 1 course from each category listed below within the Rancho Santiago Community College District.

12 of the 15 units must be completed at Santiago Canyon College. 3 units may be completed at Santa Ana College

12 of the 15 units must be completed after acceptance to the program

A single course may not meet more than one Honors Educational Category. In addition to the Honors Educational Category requirements (1-3), additional Honors units will be needed to fulfill the 15 unit requirement.
Honors Educational Category 1: English, Communication, Arts and Humanities

Honors Educational Category 2: Mathematics, Physical and Biological Sciences

Honors Educational Category 3: Social and Behavioral Sciences

See Honors Program website or Honors Program Counselor for course offerings.

Earn grades of "C" or above in all college units, including remedial and honors coursework, while in the program. Honors courses must be taken for letter grade (P/NP grades are excluded).

Disqualification from the Honors Program

Students with a cumulative GPA below a 3.0 or who receive a "D" or "F" in an Honors class will be disqualified from the program.

Students whose cumulative GPA falls below 3.0 anytime during their enrollment at SCC, or who receive a "D" or "F" in an Honors class will be disqualified from the Honors Program for the duration of their enrollment at SCC. Students may appeal disqualification from the Honors Program to the Honors Program Committee. Contact the Honors Program Counselor.

Students who earn a "D" or "F" in an Honors class may repeat the non-Honors version, but they will not be allowed to complete the Honors program.

President's Scholar

The President's Scholar designation is placed on the transcript and diploma of the graduate who has achieved a cumulative grade point average of 3.5 and completed the Honors Program. All letter grades must be "C" or better. Students with Academic Renewal Without Course Repetition are not eligible for President's Scholar. Students may not receive the President's Scholar designation if an associate degree from Santiago Canyon College has already been granted. Students participating in graduation ceremonies will be presented with a medallion.

Completion of the Honors Program

The designation Honors Program Completion is placed on the transcript of students who complete all Honors Program requirements. It is also placed on the diploma of students who earn an associate degree.

Language Lab

Santiago Canyon College offers a state of the art language lab for students enrolled in Spanish, Italian, French and American Sign Language courses. Our main objective in the Language Lab is to provide students with a variety of Directed Learning Activities to supplement and complement classroom instruction and enhance their language learning experience. In addition, we provide a comfortable learning environment where students are able to access other resources such as interactive computer programs, audio, and video materials carefully arranged and selected for students' specific level to assist them in the development of their listening, speaking, reading and writing proficiency skills.

Library
The Santiago Canyon College Library collection contains over 50,000 books in print format and over 15,000 electronic books as well as DVDs and music CDs. Full-text journal, magazine, and newspaper articles are available through online databases. Remote access to most library resources is available through the Library website.

In addition, the Santiago Canyon College Library offers student computer work stations, laptop computers, a wireless network, group study rooms and an instruction lab. There are black/white and color copiers and printers, scanners, and a Self-Check-Out Center.

The Student Innovation Zone (SIZ) provides students with the opportunity to be creative in their academic work with PC, Apple computers and multimedia editing software.

Research assistance is available in-person and online.

The Library can be reached at (714) 628-5001 or online at www.sccollege.edu/library.

Math Success Center
The Math Study Hall (a.k.a. MaSH), located in U-80, is a service offered by SCC that provides students a chance to supplement learning done in the classroom. Math faculty, Instructional Assistants and tutors are on duty to assist students with questions or concerns from their math class. Additionally, computers are available for students to access mathematical software or do work for an online math class. For further information including services or hours of operation, please visit www.sccollege.edu/Departments/Mathematics

Online Student Services
The SCC Student Services website, www.sccollege.edu/StudentServices, is designed to inform and assist students with counseling information, sample placement tests, and eAdvising. Students can also request transcripts, apply for financial aid, find scholarships, pay fees, purchase a parking pass, download forms for most programs and services, view transfer workshops and presentations, research careers and find jobs and internships.

Pathways to Teaching Program
The Pathways to Teaching Program is designed to encourage and support students to pursue an education leading to the teaching profession. Services include academic counseling and transfer assistance, specialized workshops and events, appointments with university representatives, teacher preparation resource information, internships, volunteer opportunities and the SCC TEACH! student organization. For more information about the Pathways to Teaching Program, drop by on the Third floor of E building or call (714) 628-4928.

Public Affairs
Information and publicity regarding college programs and activities is disseminated to the news media and the community through the Rancho Santiago Community College District Public Affairs office.

Science Teaching and Resource Center
The Science Teaching and Resource Center (STAR Center) is designed to help students in all science classes (Astronomy, Biology, Chemistry, Geology and Physics) to succeed. The curriculum for the center includes: Question and Answer sessions, Directed Learning Activities (DLA) and Student-led study groups. All services provided through the STAR Center are geared towards engaging science students and enhancing their success.

Scheduling Options and Definitions
Santiago Canyon College schedules two 16-week semesters (fall and spring) with a summer session, and may offer a spring intersession schedule. Courses may be offered through different modalities such as traditional face-to-face or online. For more information about online learning or classes, see Distance Education page 26.

Term = a period of a time within an academic year when courses are scheduled (fall, spring, summer, spring intersession)
Semester = 16 weeks, scheduled every fall and spring

Summer Session = typically offered within a 4, 6 or 8 week period, can be scheduled after spring but before fall

Spring Intersession = typically offered in 4 weeks, can be scheduled after fall but before spring

In an effort to work with student schedules, Santiago Canyon College offers a variety of scheduling options during the fall and spring semesters:

Short Term = less than 16 weeks, can be 8 weeks, 10 weeks or 12 weeks

Early Start / Late Start = 8 weeks, spans either the first 8-weeks or second 8-weeks

Weekend = offered Fridays, Saturdays, and/ or Sunday

Student Health and Wellness Services
Currently enrolled credit students who have paid their health fees are eligible for Student Health and Wellness Services (SHWS). Walk-in health services are routinely provided by registered nurses. Services of physicians and psychologists are available by appointment only. All services are provided without charge, except nominal fees for medications, laboratory tests and some medical procedures when supplies are used.

Emphasis is on health maintenance and wellness promotion. On-site health services include the diagnosis and treatment of acute short-term illnesses, pregnancy testing and Family PACT services, which include FREE hormone based contraception, emergency contraception, cervical cancer screening, STI testing, and condoms. In addition, SHWS offers first aid care, short-term mental health counseling, health maintenance and wellness promotion literature, as well as blood pressure screening, cholesterol monitoring, tobacco cessation counseling, tuberculin skin testing, community referrals, emergency care and accident insurance coverage for course-related injuries. Refer to the class schedule for Student Health and Wellness Service hours, or call (714) 628-4773.

Student Support Services – TRIO
Student Support Services – TRIO (SSS-TRIO) is a federally funded program that supports underserved first generation, low-income, neurodiverse students who test into developmental Math & English achieve their educational goals. The purpose of SSS-TRIO is to provide support and resources to enable students to overcome challenges and make use of their inherent talents and abilities to succeed in college and in life.

SSS-TRIO provides personalized academic and personal growth coaching, one-on-one tutoring, holistic counseling, book loan services, calculator & laptop loan services, priority registration, Summer Bridge, placement test preparation, student success workshops, campus referral services, supplies, and additional resources for students.

To learn more about SSS-TRIO, please contact us at (714) 628-5033, visit us at A-104, or go to our website.

Supplemental Instruction
Supplemental Instruction (SI) is an academic support program that targets historically difficult courses. SI offers regularly scheduled, out-of-class review sessions to all students enrolled in a targeted math or science course. SI study sessions are informal seminars in which students work practice problems, review notes, discuss readings, develop organizational tools, and prepare for examinations. Students learn how to integrate course content with reasoning and study skills. Students attend SI sessions on a voluntary basis and no effort is
made to segregate students based upon academic ability. Since SI is introduced on the first day of classes and is open to all students in the class, SI is not viewed as remedial. To learn more about the SI program, and to see a list of courses offering SI, visit our website at www.sccollege.edu/SI.

Transfer Success Center
The Transfer Success Center provides resources and services to assist students in researching, planning, and completing their transfer to a four-year college or university. The Transfer Success Center coordinates various events throughout the year, including tours of universities, university representative advising appointments, transfer fairs, and a variety of workshops to help students with each step in the transfer process. In addition, the Transfer Success Center provides many useful resources such as; assistance with applications, personal statement assistance, updates via social media and e-mail, computers for use in research and completing applications, a comprehensive website, and expert advice from trained specialists and counselors. For more information, stop by D-104-N, call (714) 628-4865, visit www.sccollege.edu/transfer, and follow us @SCCTransfer on Facebook, Twitter, and Instagram.

Transportation
Some classes may be conducted off campus. Unless students are specifically advised otherwise, students are responsible for arranging for their own transportation to and from the class site. Although the district may assist in coordinating the transportation and/or recommending travel times, routes or caravanning, be advised that the district assumes no liability or responsibility for the transportation, and any person driving a personal vehicle is NOT an agent of the district.

Tutoring Services
Tutorial services designed to maximize student learning potential are offered in person and online. Walk-in, individual, and small group tutoring in multiple subject areas is available for SCC students in the First Year Support Center, room E-303, and in the TRiO Instructional Support Center, room B-210. For online tutoring, visit www.sccollege.edu/StudentServices/TutorCenter

Upward Bound Math and Science
The Upward Bound Math and Science (UBMS) program aims to strengthen the math and science skills of participating high school students. UBMS’ purpose is to help students recognize and develop their potential to excel in math and science, encourage them to pursue postsecondary degrees in math and science, and ultimately careers in the math and science profession. Santiago Canyon College’s UBMS program serves students enrolled at El Modena High School and Orange High School. For more information, please contact us at (714) 628-5012, visit us at A-206, or go to our website at:

www.sccollege.edu/Departments/upwardboundms

Veterans Resource Center
Students interested in seeking Veterans Service Office (VSO) at Santiago Canyon College (SCC) should go to the Veterans Resource Center (VRC) in room A-210.

Veterans Services assists qualified veterans with support services such as, access to VA Educational Benefits, priority registration, educational counseling, and psychological services. The VSO also provides support to the success of students with disabilities by providing resources and information that promote access, equal opportunity and empowerment. A knowledgeable office staff specializing in veterans’ affairs is prepared to assist students at SCC at (714) 628-4793. Rancho Santiago Community College District is approved by the California Bureau for Private Postsecondary training of veterans and eligible persons. Educational opportunities are available for college credit which include associate degrees, transfer degree programs, and certificates.

Eligibility

Veterans who qualify to receive benefits under the Montgomery Bill-Active Duty (Ch. 30), Montgomery Bill-Selected Active Reserve (Ch. 1606), and eligible persons under the Survivors and Dependents Educational Assistance Program (Ch. 35) are encouraged to take advantage of their educational entitlement.
Veterans with a minimum of 90 days aggregate active service on or after 9/10/01 may be eligible for the post 9/11 GI Bill® (Ch. 33). This program includes basic housing allowance (BAH), book stipend, and tuition/fees.

Veterans with a service-connected disability may be eligible for vocational rehabilitation (Ch. 31) benefits. This program provides eligible veterans with a monthly allowance as well as payment for tuition, most fees, and necessary books and supplies. For further information, applicants should seek further information regarding eligibility from the VA Regional Office, Los Angeles, 1-800-827-1000 or 1-888-442-4551 or by contacting the local Orange County Veterans Service Office, Santa Ana, (714) 480-6555.

**Applying for Benefits**

Each veteran and eligible person who are seeking to apply for VA benefits, must apply for these benefits by visiting the Veterans Benefits Administration website at: www.benefits.va.gov. In addition, any person who wishes to attend a college in the Rancho Santiago Community College District must follow the admissions procedures. See index for details on enrollment. A copy of discharge paper-DD214 is required of all new veterans and a copy of DD2384 of new Chapter 1606/1607 reservists who are using their educational benefits for the first time.

**Post-911 GI Bill® and VR&E Beneficiaries (Chapter 33 and Chapter 31 beneficiaries)**

The Veterans Benefits and Transition Act of 2018 (Public Law 115-407) allows students that will be utilizing Ch. 33 or Ch. 31 VA benefits to attend a course of education or training for up to 90 days from the date the beneficiary provides a certificate of eligibility (COE) or valid authorization from VOC Rehab counselor. The school will not prevent enrollment, assess a late penalty fee, require students to secure alternative or additional funding or deny access to any resources available to other students who have satisfied their tuition and fee bills to the institution. Students must submit all required certification request forms directly to the Veterans Resource Center (VRC) for processing, including any additional information needed to properly certify the enrollment as described in the school's institutional policies. Submission of forms will allow students to attend the course until the VA provides payment to the institution without penalty or requiring to borrow additional funds to cover mandatory tuition and fees due to late payments from the VA. Any student that does not have 100% entitlement for Ch. 33 VA benefits, will be responsible for any remaining balance after the VA submits payments directly to the school. For further information, please contact the VRC directly.

**Transcripts and Program Approval**

VA regulations stipulate that prior credit must be evaluated. With this in mind, the VSO requests that all official transcripts be on file with the Admissions Office by the end of the first term of attendance. This will avoid any delays in payments and/or overpayments if applicable.

Students utilizing VA Educational Benefits at SCC must select a major and each course approved prior to registering for each term. The VA requires that the VSO monitor progress towards a specific degree plan; therefore for VA certification purposes, students must enroll in courses that are part of their current educational plan specifically required for that major.

College counselors are available to provide comprehensive counseling services for day and evening students; call (71) 628-4800 to schedule an appointment with Santiago Canyon College Counseling Department. If you have attended previous school(s), official transcripts must be on file before a college program can be evaluated thoroughly by the counselors.

**Military Credit**

SCC will only evaluate credit from regionally accredited institutions. Three units for health education and one unit for kinesiology may be granted on the basis of military service. When a veteran petitions for graduation and needs these units for graduation purposes, Veterans should seek confirmation directly with the Graduation Office.
General Information

The VA will pay education benefits for eligible veterans and dependents of veterans. The payment will depend on a number of factors including but not limited to: benefit type, benefit eligibility percent, number of active certified units, training type, etc. See the VSO for more information.

Veterans and their eligible dependents or spouses must maintain good academic standings and progress with the college as outlined in the school catalog (see Academic and Progress Probation/Dismissal). Students who fail to make academic progress will be placed on Academic Probation and/or Course Completion Probation accordingly. Students who are on probation for two consecutive terms after failing to demonstrate academic progress may lose priority registration and CCPG eligibility. Students who are on Academic and/or Progress Dismissal from the college cannot be certified for VA Educational Benefits. For further detailed information, please see the College Policies and Procedures section.

Writing Center

The primary purpose of the Santiago Canyon College Writing Center is to make our students better writers by helping them develop their skills, their confidence, and their voice. Students enrolled in our foundational/basic skills courses, English N60 and 061, visit the center once a week to practice and fortify the concepts they are learning in the classroom. Professors and Writing Center faculty work closely to coordinate their efforts and provide students with extended support for success. Students taking composition and literature may use the Writing Center’s resources by enrolling in a 0.2 unit Writing Center course, English N91, which allows them to work with English faculty to improve their essays and strengthen their research skills. Finally, the Writing Center serves all disciplines by inviting students who are writing essays for classes such as philosophy, psychology, history, and child development to enroll in an Extended Strategies course, ENGL N92, for assistance from English professors. In addition to these services, the Writing Center hosts a series of 45-minute campus workshops each semester to help students brush up on their punctuation, grammar, and research techniques as well as strengthen their ability to approach reading assignments in content-area courses.

The SCC Writing Center is a beautiful, spacious student facility located on the second floor of the Humanities Building. It is made up of two large classrooms/work areas, two break-out/ conference rooms, and a comfortable lobby. In addition to several round tables, the center contains 56 student computers and 2 printers. For more information, visit:

http://www.sccollege.edu/Departments/EnglishDepartment/Pages/writingCenter.aspx.

Staffed by English faculty, the Writing Center provides free, walk-in services for students seeking help with a variety of writing assignments, including essays for any class, college application personal statements, resume construction and development, and research strategies and documentation. The Writing Center also offers weekly workshops to review tricky grammar and punctuation rules as well as reading comprehension techniques for approaching difficult academic texts. Located in H-240, the center is typically open Monday-Thursday, 7:00 AM-6:00 PM. For more information, call (714) 628-4701.

Student Life

Alumni Network Associated Student Government (ASG) Cafeteria/Student Lounge Forensics Intercollegiate Athletics Model United Nations SCC Athletic Achievements Student Clubs and Organizations Student Life and Leadership

Student Activities

Alumni Network Associated Student Government (ASG) Cafeteria/Student Lounge Student Clubs and Organizations Student Life and Leadership

Alumni Network

A robust alumni network is a vital link to SCC's past and an important factor in building the reputation and financial health of the college. The network is also a resource for SCC alumni seeking to build their professional networks, becoming involved on campus, or just having fun and reconnecting with fellow Hawks.

The SCC Alumni Network was founded to promote and facilitate a lifelong relationship between SCC and its former students and to encourage ongoing support for the college. Alumni are former students who have graduated, transferred or received a degree or certificate. Students who have completed significant coursework at SCC may also be considered alumni.
The list of benefits of being an SCC alumnus continues to grow. For more information, email alumni@sccollege.edu.

**Associated Student Government (ASG)**

The Associated Student Government was established to provide students with government and leadership experience. Opportunities are available to become involved in campus and statewide committees and councils as student representatives. In ASG, students learn firsthand about group dynamics and decision making, program planning, and running effective meetings. Additionally, there are many student clubs and organizations to join. For more information please visit www.sccollege.edu or call (714) 628-4913.

**Student Clubs and Organizations**

The Inter-Club Council (ICC) represents all active student clubs and organizations on campus to promote leadership development, networking, communication skills and campus life. For a list of current student clubs and organizations, please visit studentlife. To form a new student club, please call (714) 628-4917.

**Student Life and Leadership**

The office of Student Life and Leadership promotes and supports students' co-curricular interests and provides excellent opportunities through the Student Leadership Institute (SU), the Associated Student Government (ASG), Inter-Club Council and student organizations. The office also provides a variety of services to students, faculty, and staff through assistance with student-focused event planning. For more Information, please call (714) 628-4912 or visit A-206.

**Cafeteria/Student Lounge**

The T-Buildings house the Associated Student Government room, Student Lounge, food services at the Hungry Hawk Cafe, and the Student Health and Wellness Services. To reserve rooms for use, call the Santiago Canyon College facilities office at (714) 628-4719.

**Academic Competitions**

Forensics, Intercollegiate Athletics, Model United Nations, SCC Athletic Achievements

**Forensics**

Forensics is more commonly known as competitive speech and debate. The SCC Forensics team was one of the first signature programs to be offered when the college was first accredited. Members of the team travel to local tournaments on select weekends and perform persuasive speeches, debates, impromptus, poetry, drama, and many more. This co-curricular activity provides students with an excellent opportunity to stand out on transfer and job applications. Forensics teaches skills that are useful in any industry, but are particularly well-suited for students that are seeking careers in broadcasting, law, politics, and public relations. The team is open to all students, and students with no prior experience compete against other beginners at their first tournaments. For more information, contact Jared Kubica-Miller at miller_jared@sccollege.edu

**Model United Nations**

The award winning Santiago Canyon College Model United Nations (MUN) Team offers students the opportunity to simulate the policies and processes of the United Nations and its various agencies, including non-governmental and inter-governmental organizations. Students participating in MUN enroll in Political Science 150 or 250 where they prepare for individual and team MUN events. Through these classes, students learn about the role of the United Nations in world politics by conducting research, writing resolutions, and developing skills in diplomacy, public speaking, bargaining and negotiations. Students participating in MUN are required to attend intercollegiate United Nations conferences and competitions. For more information, contact Professor Rabii-Rakin at (714) 628-4940.

**Intercollegiate Athletics**

Santiago Canyon College, home of the Hawks, is proud of its athletic teams and their rich athletic history. The college has fielded teams since 1999 and now offers competitive opportunities for student athletes in seven sports: men's and women's cross country, men's and women's soccer, softball, and men's and women's volleyball.
The Hawks compete in the highly competitive Orange Empire Conference (OEC) under the auspices of the California Community College Athletics Association. SCC’s outstanding coaching and teaching staff, combined with an excellent system of academic assistance, has helped eligible students transfer to four-year colleges and universities.

2012 saw the opening of the new athletics and aquatics complex at Santiago Canyon College. The facility includes a fully equipped fitness center, strength lab, aerobics studio, men’s and women’s locker rooms, athletic training facilities, three indoor courts, a swimming pool and administrative offices.

All prospective student-athletes with questions about eligibility should contact the Director of Athletics at (714) 628-4816.

**SCC Athletic Achievements**

**Cross-Country**
- Top-10 National Rank (Team): 2003 Men’s Cross Country (#8)
- Top-10 State Rank (Team): 2003 Men’s Cross Country (#3)

**Men’s Basketball**
- Southern California Regional Finalist 2018

**Men’s Golf**
- State Finals Team 2014, 2011 (4th)
- Men’s Individual State Golf Champion - Connor Covington 2010
- Orange Empire Conference Champions 2006

**Women’s Golf**
- Orange Empire Conference Champions 2009, 2007

**Women’s Soccer**
- National Champions 2009

**Women’s Softball**
- State Champions 2016
- State Finalists 2014
- Orange Empire Conference Champions 2014

**Track and Field**
- Top-10 State Rank (Team)
- 2007 Women’s Track & Field (#9)
- National Community College Record
Financial Aid

Financial Aid is intended to help students who might not otherwise be able to attend college. Although the primary responsibility for meeting college costs rests with the student and his or her family, it is recognized that many families have limited resources and are unable to meet the cost of a college education. Federal and state financial aid programs have been established to provide assistance to students with documented financial need.

The application process for financial aid begins with the completion of the Free Application for Federal Student Aid (FAFSA) which is available in October for the following academic year. In order to qualify for financial aid a student must be enrolled in an eligible program of study leading to completion of an AA/AS degree, transfer requirements, or a certificate program; maintain satisfactory academic progress; for most programs, have demonstrated financial need; be a U.S. citizen or eligible non-citizen; certify compliance with selective service registration requirements; not be in default on any student loan, or owe a refund on any grant made under any Title IV program; have a social security number; and have a high school diploma, or GED. Effective July 1, 2012, we are no longer offering the Ability to Benefit test. Students without a High School diploma or GED who passed the Ability to Benefit test or completed 6 college credits towards a degree or a certificate prior to July 1, 2012 are still eligible to continue receiving aid in future years.

For additional information and a Free Application for Federal Student Aid (FAFSA), stop by the Financial Aid Office, located in room E-104, or call (714) 628-4876. You may also apply online at www.FAFSA.ed.gov.

Withdrawals and Repayment of Financial Aid Funds

Federal aid recipients who withdraw or are dropped from all classes by the instructors are subject to regulations regarding the Return of Title IV funds. Students who withdraw or are dropped from all classes prior to completing more than 60% of the enrollment period are subject to these rules. Based on the date of the complete withdrawal or drop, the Financial Aid Office will determine the amount, if any, of “unearned” federal financial aid received by the student.

If the student received more financial aid than the amount earned, the student will be billed for the overpayment. Financial aid recipients are advised to

- avoid total withdrawal from all classes,
- successfully complete at least 6 units during the semester,
- if completely withdrawn, repay any “unearned” financial aid as soon as possible.

Failure to do any of the above may result in the loss of financial aid eligibility.

Financial Aid Programs

Federal PELL Grant

This grant is a federally funded program designed to be the foundation of financial aid for undergraduates who demonstrate need. The amount of the PELL Grant is based on the cost of attendance, minus the expected calculated family contribution and the student’s enrollment status at the time of payment. Award amounts vary according to eligibility and enrollment. Please check with the Financial Aid Office or visit the website for the maximum and minimum PELL award amounts. PELL Grants are limited to 12 full-time equivalent semesters.

FSEOG and FWS Programs
These programs below have limited funds and are generally awarded only to those eligible students who meet the Priority Deadline and to those students with the least amount of estimated family contribution (EFC).

**Federal Supplemental Educational Opportunity Grant (FSEOG)**

This federally funded grant is available to undergraduate students who demonstrate exceptional financial need. The awarding of FSEOG funds must be given to maximum PELL Grant recipients.

**Federal Work-Study (FWS)**

This federally funded program provides employment opportunities to students with financial need. Students awarded FWS receive an allocation of funds earned through part-time jobs on and off campus. FWS provides an excellent learning process through on-the-job training.

**William D. Ford Federal Direct Loan Programs**

**Subsidized Direct Loan**

The federal government pays the interest on this need-based student loan. No payments are required while the student remains actively enrolled in at least six units and at the end of enrollment. The maximum annual loan amounts are $3,500 for freshmen and $4,500 for sophomores.

**Unsubsidized Direct Loan**

There is no income criteria on this non-need based federal student loan for students who are enrolled in at least six units. Interest begins accruing immediately. Interest payments may be made or payments can be deferred. Maximum annual loan amounts are $3,500 for freshmen and $4,500 for sophomores.

**Additional Unsubsidized Direct Loan**

This additional $6,000 loan is available to independent students: $2,000 is available to dependent students who meet the qualification requirements and have room in their cost of attendance.

**Parent Loans for Undergraduate Students (PLUS)**

This loan is for parents who borrow on behalf of dependent students. The parents’ credit will be checked by the Department of Education. Repayment of principal and interest begins immediately. The amount borrowed cannot exceed the cost of attendance, minus any other financial aid and resources received by the student.

**Chafee Grant**
This grant program is available to former foster youth. Awards are $5,000 per year. Apply using the FAFSA and the separate Chafee Grant Application.

California State Programs

California College Promise Grant (CCPG)

A State program for California residents to waive the enrollment fees at community colleges. There are several ways to qualify for a CCPG: The student demonstrates financial need according to federal methodology based on completion of the Free Application for Federal Student Aid (FAFSA);

OR

The student or the student's family is receiving CalWORKs, formerly TANF/AFDC, or Supplemental Security Income (SSI), or General Assistance/General Relief, or the student is a disabled veteran or a dependent of a deceased or disabled veteran as certified by the California Department of Veterans Affairs, or the student is a recipient or the child of a recipient of the Congressional Medal of Honor, or the student is a dependent of a victim of the 9/11/01 terrorist attack, or the student is a dependent of deceased law enforcement/fire suppression personnel killed in the line of duty.

OR

The student meets specific income criteria based on family size as set by the State of California.

Dream Act/AB 540 Eligibility

Several types of state and institutional aid are available to AB 540 students as a result of the California Dream Act such as CCPG Fee Waiver or Cal Grant. Please go to www.sccollege.edu and read more about it under financial aid.

Cal Grants

Cal Grant Programs are available to California Residents who qualify. United States citizens, permanent residents or eligible non-citizens may apply for Cal Grants via the Federal Application for Student Aid (FAFSA). AB 540 students may apply via the California Dream Act Application. The deadline to apply is March 2nd each year for all California College Students (maximum opportunity). If you miss the March 2nd deadline AND you plan to attend a community college in the fall, you have until September 2nd (limited number of grants available). Be aware there is also a GPA requirement. The college electronically transmits GPA verifications for certain students. For detailed information go to www.csac.ca.gov

Cal Grant A
Cal Grant A assists low and middle income students with tuition costs at four-year institutions. Eligibility is based on academic achievement and financial need.

If you qualify for a Cal Grant A and plan to attend a public community college, the Student Aid Commission will put the student’s tuition/fee award on reserve for 2 years until the student transfers to a four-year college, provided that the student continues to qualify financially by demonstrating financial aid need.

**Cal Grant B**

Cal Grant B provides assistance in meeting living expenses (i.e. books and supplies, housing costs and transportation). The maximum award is $1,672. Eligibility is based on demonstration of substantial financial need and enrollment status. Cal Grant B also funds tuition costs for sophomores at the same rate as Cal Grant A. Students must be actively enrolled in 6 units.

**Cal Grant C**

Cal Grant C assists vocational students with tuition and training costs in a program of at least 4 months long. Awards range up to $1,094 for related training costs such as special clothing, tools, equipment, and books and supplies. The Cal Grant C program is for non-transfer majors.

**Full Time Student Success Grant (FTSSG)**

The Full Time Student Success Grant (FTSSG) is a new need based grant that is paid in conjunction with any full time Cal B disbursement up to $500 per semester. This grant is only for community colleges and is not transferable.

**Bureau of Indian Affairs Grant (BIA)**

The Bureau of Indian Affairs provides grants to assist eligible American Indian students in meeting educational costs. To be eligible, the applicant must be at least one-fourth American Indian, Eskimo, or Aleut heritage, as certified by a Tribal Agency served by the Bureau of Indian Affairs; be enrolled as a full-time student (12 or more units), and be eligible for financial aid at Santiago Canyon College.

**Scholarship Program Office**

Many community benefactors, including SCC Foundation, SCC faculty and staff, and outside organizations, establish scholarships at Santiago Canyon College to recognize academic achievement and offer needed financial support.

Eligibility varies according to the individual scholarship. There are scholarships available to students taking classes at Santiago Canyon College, those transferring to four-year colleges, and those entering college for the first time upon graduation from high school.

Listings and requirements for the various SCC student scholarships are provided online each spring. A comprehensive online application is available for students to review.

Applications must be submitted for screening in March, and student recipients will be recognized at a ceremony in May.
For information regarding scholarships that are available for high school seniors, contact the Scholarship Office or the High School and Community Outreach Office.

For applications or more information, please contact the Scholarship Office at 714-628-4793, visit the Scholarship Office located in room A-210 or online

**Honors and Awards**

Phi Theta Kappa. Phi Theta Kappa is an international honors society that recognizes academic excellence and achievement of students enrolled in two-year colleges. The society offers a myriad of opportunities for scholarship, intellectual enrichment, personal development and academic recognition.

The Beta Eta Rho Chapter of Phi Theta Kappa was organized at Santiago Canyon College in 1998.

Membership in Phi Theta Kappa is extended each semester by the local chapter to students who have completed a minimum of 12 degree units with a minimum of grade point average of 3.0. Members receive special recognition when they graduate.

Psi Beta. Psi Beta is the national honor society in psychology for community and junior colleges. The mission of Psi Beta is professional development of psychology students through promotion and recognition of excellence in scholarship, leadership, research, and community service.

Membership in Psi Beta is extended each semester by the local chapter to students who have completed one psychology course and 12 semester hours of total college credit and have an overall GPA of 3.25 with at least a “B” average in psychology courses.

Members receive special recognition upon graduation.

Sigma Chi Eta. The purposes of Sigma Chi Eta are (a) to recognize, foster, and reward outstanding scholastic achievement in communication studies; (b) to stimulate interest in the field of communication; (c) to provide an opportunity to discuss and exchange ideas in the field of communication; (d) to establish and maintain closer relationships and mutual understanding between speech communication studies faculty and students;

(e) to explore options for community college students who will transfer to a four-year college or university or enter the world of work. The Omicron Chapter at SCC was founded in 2004. Students who qualify may apply for membership by contacting the advisor, Dr. Melinda Womack. In order to become a member of a Sigma Chi Eta chapter, the student must:

- have completed at least 12 semester hours
- have completed at least three communication courses or 9 semester hours (or at least 12 quarter credit hours) of communication study;
- have a cumulative GPA of at least 3.0;
- have a communication studies GPA of at least 3.25;
- be in good standing at the college;
- display commitment to the field of communication.

**Foundation**

The Santiago Canyon College Foundation is a 501(c)(3) non-profit organization dedicated exclusively to helping Santiago Canyon College gain the financial resources it needs to ensure that every qualified student, regardless of economic background, has access to an affordable yet high-quality college education. The SCC Foundation raises money for academic
scholarships and provides supplemental dollars for student support programs such as the Hawks Nest Food Pantry and Veterans Resource Center (VRC). To enhance the quality of our students’ overall experience at SCC, the Foundation also supports enrichment programs such as Forensic Debate Team and campus events, including the annual Performing Arts Showcase.

There is no better value in higher education than community college - nor a more cost-effective way to make sure that every person in our community has a viable path to becoming or remaining a productive citizen.

Your donation to the foundation - in any amount - makes a real difference in the lives of our students. To find out more, please e-mail foundation@sccollege.edu or call (714) 628-4790.

**On-Campus Job Placement Office**

The On-Campus Job Placement Office operates under the umbrella of the Student Support Services, aiding students in advancing their leadership skills by placing them in on-campus student work programs. Student employment can assist with education cost and also develop desirable work attitudes and habits while working in a professional environment. Upon determining eligibility, students are matched with departments based on their educational goals. This work experience is intended to compliment the educational process and to enhance future employment.

For more information, call the On-Campus Job Placement Office at (714) 628-4867 or visit us in E-104 or go online at www.sccollege.edu/jobplacement

**Student Consumer Information—Right-To-Know Disclosure Information**

Federal regulations require all campuses to provide specified information to prospective and current students, staff and the general public. Listed below are those items that must be available for review per federal regulation.

The federal Higher Education Act, the federal Equity in Athletics Disclosure Act (EADA), and regulatory guidance provided in the Code of Federal Regulations (CFR) require direct individual notices of prescribed information to certain target audiences including prospective students; currently enrolled students; current employees; parents, coaches and counselors of prospective student athletes; and the general public. Disclosures are to include crime/security statistics, student completion/graduation rates, FERPA privacy/security rights, financial aid program information, and gender-specific information on athletic participation and financial support.

Please go to www.sccollege.edu and click on ‘About SCC’ to review all the current Student Consumer Information including Gainful Employment disclosures.

**Educational Options**

**Associate Degrees**

The Associate Degree is a certification of the student’s satisfactory completion of a program of study with a specific major or area of specialization. The Associate Degree is normally completed in two years, compared with the Baccalaureate Degree, which is normally completed in four years. Associate Degrees are commonly conferred by community colleges and are referenced as “local degrees”. They are usually of two types, the Associate of Arts and the Associate of Science. The distinction between the Associate of Arts and the Associate of Science degrees lies in the majors. If the major is in the fields of engineering, physical or biology science, or occupational curricula, the degree conferred is usually the Associate of Science. Otherwise, the Associate of Arts degree is conferred.

Ordinarily, Associate Degrees have one of two major purposes. Either the program of study prepares the individual for transfer to a four-year college or university or the program of study is intended to prepare the student for immediate employment.
Associate Degrees for Transfer

The Student Transfer Achievement Reform Act (Senate Bill 1440, now codified in California Education Code sections 66746-66749) guarantees admission to a California State University (CSU) campus for any community college student who completes an "associate degree for transfer," an established variation of the associate degrees traditionally offered at a California community college. The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor's degree in a similar major at a CSU campus. Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system, but not to a particular campus or major. In order to earn one of these degrees, students must complete a minimum of 60 required semester units of CSU-transferable course work with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the AA-T or AS-T will be required to complete no more than 60 units after transfer to earn a bachelor's degree (unless the major is a designated "high-unit" major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to a university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements.

Certificate of Achievement Programs

A Certificate of Achievement (18 or more units or state approved under 18 units) is a verification of achievement in a particular academic or occupational area, and it will be included on the official transcript. Certificate of Achievement programs normally include only those courses which have a direct bearing upon specialized occupational competency since the certificate has the sole objective of immediate employment in a specialized area. For this reason there is no general education requirement in a certificate program. To qualify for a certificate of Achievement, a candidate must meet the following requirements:

Courses: Courses are designated for the specific certificate.
Grades: At least a C grade in each course required for the certificate, unless otherwise specified. Credit by Examination may also be used to gain credit for required courses.
Pass/No Pass: A Pass/No Pass course is acceptable toward the certificate if it is required for the certificate and (a) offered on a Pass/No Pass basis only or (b) if the Pass/No Pass is earned on the basis of credit by examination.
Residency: Twelve units completed at Santiago Canyon College. (Six of the twelve units required for the certificate must be earned at Santiago Canyon College.)
Petition: A petition for Certificate of Achievement must be filed by the student by deadline (see Instructional Calendar) with the Admissions and Records Office at Santiago Canyon College.

Certificate of Proficiency Programs

A Certificate of Proficiency is under 18 units and/or is not a State-approved program. This type of certificate is verification of completion in a particular subject matter. A Certificate of Proficiency will NOT be included on the official or unofficial transcript. Certificate programs include only those courses which focus on vocational skills. The sole objective is employment in a specialized area and for this reason there are no general education requirements for a Certificate of Proficiency.

Santiago Canyon College Certificate of Proficiency programs are described in the catalog section on SCC Academic Programs. To qualify for a Certificate of Proficiency, a candidate must meet the following requirements:

Courses: Courses are designated for the specific certificate.
Grades: At least a C grade in each course required for the certificate, unless otherwise specified. Credit by Examination may also be used to gain credit for required courses.
Pass/No Pass: A Pass/No Pass course is acceptable toward the certificate if it is required for the certificate and (a) offered on a Pass/No Pass basis only or (b) if the Pass/No Pass is earned on the basis of credit by examination.
Residency: At least 20% of the total units required for the certificate must be earned at Santiago Canyon College.
Petition: A petition for Certificate of Proficiency must be filed by the student by deadline (see Instructional Calendar) with the Admissions and Records Office at Santiago Canyon College.
Multiple Associate Degrees and Certificates

A student may earn multiple Associate Degrees and Certificates from Santiago Canyon College.

For additional degrees and certificates, any course used to meet the prescribed graduation requirements may count toward more than one degree and certificate.
Courses used to meet the proficiency requirements and general education requirements for the first degree may be used to fulfill these requirements for additional degrees,
Courses used for one major may be used to meet requirements for additional majors.
If a break in enrollment occurs, a student must comply with the proficiency, general education, and major requirements in effect at the time the student resumes attendance or those in effect in subsequent years of the student’s enrollment.
Each additional degree and Certificate of Achievement will be posted to the student's academic record and the student will receive diplomas for each degree and Certificate of Achievement earned.

Educational Plans

Plan A - Santiago Canyon College General Education Requirements
Plan B - CSU General Education Breadth Requirements (CSU GE) Plan
Plan C - Intersegmental General Education Transfer Curriculum (IGETC)

Plan A - Santiago Canyon College General Education Requirements

General Education requirements at Santiago Canyon College reflect the conviction that those who receive degrees must possess in common certain basic principles, concepts, and methodologies, both unique to and shared by various disciplines. General Education prepares the college student to comprehend and contribute to the modern world, to understand our regional, national, and international cultural diversity as well as our shared cultural heritage, to reinforce an awareness of self as well as others, and to instill an ongoing intellectual curiosity and commitment to learning.

The subject matter of General Education courses is designed to be general, broad, and introductory rather than specialized, narrow, or advanced. General Education courses form a pattern of learning experiences designed to provide educational opportunities that lead to the following outcomes for students:

Learn: About Self and Others, Academic and Professional Issues

Take responsibility for one’s own learning and wellbeing.
Learn about one’s chosen academic major, while creating connections across disciplines.
Learn about professional conduct, including workplace and community ethics, conflict management, and teamwork.

Communicate: With Clarity and Accuracy and in Diverse Environments

Communicate ideas in a clear and articulate manner.
Communicate accurately to diverse audiences.
Communicate in various formats using diverse technologies.

Act: With Awareness of Self and the Local and Global Community of Persons

Act to maintain one’s dignity and self-respect.
Act as a responsible community member who treats others with respect, civility, empathy, honesty, and dignity.
Act to increase the wellbeing of the global community by maintaining cultural literacy, lifelong learning, ethical consideration of each other, and the environment we all share.

Think: Critically, Creatively, and Reflectively

Critically analyze, evaluate, organize and use quantitative and qualitative data to solve problems and develop logical models, hypotheses and beliefs.
Creatively use concepts to making learning relevant.
Reflectively assess one's values, assumptions, and attitudes.

*Courses may be listed in more than one area, but will not be certified in more than one area.*

### A. Natural Sciences (3 units are required)

Courses in the natural sciences examine the physical universe, its life forms, and its natural phenomena. They assist in developing an appreciation and understanding of the scientific method and encourage an understanding of the relationships between science and other human activities. This category includes introductory or integrative courses in astronomy, biology, chemistry, earth sciences, general physical science, geology, physics, physical geography, physical anthropology, and other disciplines.

- **Anthropology 101, 101L**
- **Astronomy 100L, 102, 103, 112**
- **Biology 109/109H, 109L/109HL, 115, 139, 149, 190, 190L, 211, 229, 239, 259**
- **Chemistry 100, 200A, 200AH**
- **Earth Sciences 100, 100L, 111, 120, 121, 130, 160, 200**
- **Geography 101/101H, 101L, 130, 130H**
- **Physical Science 100**
- **Physics 100, 150A, 250A**
- **Psychology 200**
- **Water Utility Science 107**

### B. Social and Behavioral Sciences (6 units are required)

Courses in the social and behavioral sciences focus on people as members of society. They assist in developing an awareness of the methods of inquiry used by the social and behavioral sciences. Critical thinking is stimulated about the ways people act and have acted in response to their societies, and appreciation is developed of how societies and social groups operate. This category includes introductory or integrative survey courses in cultural anthropology, economics, history, political science, psychology, sociology, cultural geography, and related disciplines.

Select one course from B1. American Institutions and one course from B2. Social Science Elective.

#### B1 American Institutions

- **History 118, 120/120H, 121/121H, 122, 126**
- **Political Science 101*/101H**

#### B2 Social Science Elective

- **Anthropology 100*/100H**
- **Child Development 107*, 110**
- **Criminal Justice 101**
- **Economics 101, 102**
- **Education 101**
Geography 100*/100H*, 102*/102H*
History 101/101H, 102/102H, 126*, 240
Political Science 101*/101H*, 110, 230
Psychology 100/100H, 160*, 190
Sociology 100/100H, 120, 150, 220*

C. Humanities (3 units are required)

Courses in humanities study the cultural activities and artistic expressions of human beings. They assist in developing an awareness of the ways in which people throughout the ages and in different cultures have responded to themselves and the world around them in artistic and cultural creation, and in developing aesthetic understanding and an ability to make value judgments. This category includes introductory or integrative courses in the arts, foreign languages, literature, philosophy, and religion.

Arts and Humanities:

Anthropology 104
Art 100/100H, 101/101H, 102/102H, 110
Cinema Studies 103, 104, 105, 107, 108
Dance 100
History 132*, 142*
Music 101/101H, 102, 104
Philosophy 106/106H, 102, 108
Theatre Arts 100

Foreign Language:

American Sign Language 110, 111, 116, 210
Chinese 101, 102
French 101, 102, 194, 201, 202
Italian 101, 102, 194, 195, 201, 202

Literature:

D. Cultural Breadth (3 units are required)

Courses meeting the cultural breadth requirement represent both global and national perspectives and recognize the value of systemic historical and cross-cultural examinations of race, ethnicity, gender, and global issues.

Courses meeting this requirement can be identified in two areas.

D1. Ethnic Studies/Gender, Sexuality, and Women’s Studies
Courses meeting the Ethnic Studies/Women’s studies requirement focus on the cultural perspectives of the African American, the Asian American, the Chicano/Latino, and the Native American and women in the United States. They assist students to deal constructively with issues of difficult differences and to develop respect for and become aware of the views, interactions, and contributions of these ethnic groups and women to U.S. society and culture. This category is interdisciplinary and includes introductory courses that incorporate the voices of these historically excluded groups.

Ethnic Studies 101, 110, 120, 130, 140
Gender, Sexuality, and Women’s Studies 101, 102

D2. International Perspective.

Courses in International Perspective include an emphasis on global perspectives in a cultural context. All courses need to address not just specific aspects of culture but also a component addressing the basic concepts of culture including how culture influences the environment, behavior, structure, and function of society. These courses also include a multi-country perspective.

American Sign Language 116
Anthropology 100*/100H*, 104
Child Development 221
Communication 120/120H, 225/225H
English 246, 271*, 272*, 278
Geography 100*/100H*, 102*/102H*
History 124, 127, 132*, 142*, 152, 162
Kinesiology 109, 110
Music 102, 103
Philosophy 112
Psychology 170, 180
Sociology 286

E. Language and Rationality (6 units are required)

Courses in language and rationality develop the principles and applications of language toward logical thought, clear and precise expression, and critical evaluation of communication in whatever symbol system the student uses.

Select one course from E1. English Composition (with a grade of “C” or better) and one course from E2. Communication and Analytical Thinking (includes mathematics, logic, statistics, computer languages and programming, and related disciplines.)

E1 English Composition

English 100, 101/101H with a grade of “C” or better.

E2 Communication/Analytical Thinking

Communication 101, 110*, 111**
Computer Science 100, 105, 129, 154
English 102**/102H**, 103**/103H**

Philosophy 110**, 111**

Reading 102**, 150**, 151**

Sociology 125**/125H**

**Meets a required Proficiency

F. Lifelong Understanding and Self-Development (3 units are required)

The courses in this category are designed to equip human beings for lifelong understanding and development of themselves as integrated physiological and psychological entities. In a social context, students will benefit from a study about themselves and how they function at different stages of life. Instruction is intended to include consideration of such matters as human behavior, sexuality, nutrition, health, stress, key relationships of humankind to the social and physical environment, and implications of death and dying. Physical activity courses could be included, provided that they include some components of the above-listed topics.

Select one course from SECTION F1 and one course from SECTION F2.

No more than one unit may be counted from F2.

**F1. Business 130**

Child Development 107

Counseling 101, 113, 116, 118

Interdisciplinary Studies 155

Kinesiology 100, 101, 102, 104, 110, 111

Information Studies 100

Nutrition & Food 115, 120

Philosophy 111

Psychology 160*, 230

Sociology 130, 220*

**F2. Kinesiology 119–283 (excluding Kinesiology 274 and 284)

G. Required Proficiencies

Courses taken to meet these proficiencies must be completed with a grade of “C” or better.

**G1. Mathematics**

1. Completion of Mathematics 080, 085, 086, or any other 3 unit mathematics course numbered above the level of 080 OR

2. Placement into Math 140, 150, 171, or 180 without a recommended support course based on Santiago Canyon College’s qualifying profile by the Math placement process.

3. Completion of Algebra II in high school with a grade of “C” or better.

**G2. Reading**
1. Completion of Reading 102, 150, or 151 with a grade of “C” or better; OR
2. Completion of English 102/102H, English 103/103H, Philosophy 110, or Philosophy 111 with a grade of “C” or better.

G3. Oral Communication

Completion of 3 units with a grade of “C” or better from one of the following: Communication 100/100H, 101, 110, 111, 134

NOTE: Schedules for proficiency examinations are announced each semester in the Schedule of Classes. Applicants must be currently enrolled or completing graduation requirements in order to take the proficiency examinations.

International coursework may not be used to fulfill the following general education requirements:

B1: American Institutions
E1: English Composition
G2: Reading Proficiency
G3: Oral Communication Proficiency

General Education Requirements

Students must complete 24 units of general education to receive an Associate of Arts degree from Santiago Canyon College. This must include a minimum of one course in General Education Areas A-F. Students completing the Liberal Arts or any other major may use a course to satisfy both a major requirement and a general education category requirement (A-F). Non-degree-applicable courses may not be used for graduation requirements.

Completion of the California State University general education requirements, CSU-GE/Plan B, or the University of California Intersegmental General Education Transfer Curriculum/Plan C will also fulfill the general education requirements for a Santiago Canyon College Associate Degree. Students may also satisfy the Plan A General Education requirements by submitting an official transcript of a Bachelor’s degree from a regionally accredited institution, or submitting transcripts that show completion of an Associate’s degree from an accredited California institution within 10 years of completing all major requirements at Santiago Canyon College.

Official transcripts from all colleges and universities attended must be submitted to SCC Admission and Records Office (E-101).

Associate Degree Requirements

Students must complete a minimum of 60 units with an overall grade point average of 2.0. At least 12 units must be earned at Santiago Canyon College and at least 6 units must be completed in courses required for the student’s designated major. Students must complete courses for the major (a minimum of 18 units) with a letter grade of “C” or better. A limit of 15 units taken on a pass/no pass basis will be applied toward the degree.

Required Proficiencies: Mathematics, Reading, Oral Communication

May be used to satisfy a General Education requirement; Must be completed with a letter grade of “C” or better.
Mathematics (graduation petition code G-1)

1. Completion of Math 080, 085, 086 or any 3-unit math course numbered above the level of 080 OR

2. Placement into Math 140, 150, 171, or 180 without a recommended support course based on Santiago Canyon College’s qualifying profile by the Math placement process OR

3. Completion of Algebra II in high school with a grade of “C” or better.

Reading: Critical Analysis (graduation petition code G-2)

1. Completion of READ 102, READ 150, or READ 151 with a grade of “C” or better; OR

2. Completion of ENGL 102/102H, ENGL 103/103H, PHIL 110, or PHIL 111 with a grade of “C” or better.

Oral Communication (graduation petition code G-3)

Completion of 3 units with a letter grade of “C” or better in one of the following: COMM 100, 100H, 101, 110, 111, or 134

Catalog Rights

Students who attend Santiago Canyon College at least one semester per year (fall, spring, summer) continuously may choose catalog rights pertaining to graduation, major, and general education requirements for the first year of attendance or any subsequent year of attendance. If there is a gap in continuous attendance, students must use the catalog requirements for the year of readmission or for a year of subsequent continuous enrollment.

Petition for Graduation

Petitions must be filed in the Office of Admission and Records at Santiago Canyon College when a student has completed 30 units one semester before the expected graduation date, or by the semester deadline listed in the class schedule or found on the Admissions page at www.sccollege.edu

What if I have a mixture of quarter and semester unit courses, how is this calculated for CSU or IGETC certification?

It will be calculated to the student’s advantage per Area, using either semester or quarter units. To convert semester units to quarter units, multiply the semester by 1.5. To convert quarter units to semester units, divide the quarter units by 1.5.

Plan B - CSU General Education Breadth Requirements (CSU GE)

General Education Breadth Requirement Courses For The California State University (CSU)

Students planning to graduate from one of the 23 campuses of the California State University must complete 48-semester units in general education breadth courses. Upon request, Santiago Canyon College will verify the completion (certify) of up to 39 units of lower-division general education requirements. Nine-semester units of general education units must be completed at the upper-division level after transfer. Students are strongly encouraged to meet with a Santiago Canyon College counselor when planning to transfer to a CSU campus.

IMPORTANT NOTE: The list of certifiable courses is subject to change year by year, but students are assured that courses taken to meet General Education-Breadth requirements will be honored if they are approved for the academic year in which they are taken. Courses on this list are approved beginning Fall 2021 and are valid through Summer 2022.
*Courses marked with an asterisk may be listed in more than one area but will not be certified in more than one area.

Areas B1, B2, B3: Underlined courses include a laboratory section.

(F' YR) - This identifier indicates the semester and year the course was approved in a general education area.

A. Communication in the English Language and Critical Thinking (minimum 9 units)

The 9 units selected from this area must include at least one course from A1, A2, and A3. Each course must be completed with a grade of "C" or better (C minus is not acceptable).

A1: Oral Communication

Communication 100/100H, 101, 110, 111*

A2: Written Communication

English 100, 101/101H

A3: Critical Thinking

Communication 111*

English 102*/102H*, 103/103H

Philosophy 110, 111

Reading 150, 151

B. The Physical Universe and Its Life Forms (minimum 9 units)

Complete ONE course from Area B1 and ONE course from Area B2.

One course MUST have a corresponding lab from Area B3.

Complete ONE Math course from Area B4 with a grade of "C" or better (C minus is not acceptable).

B1: Physical Sciences

Astronomy 102, 103, 112

Chemistry 100, 200A, 200AH

Earth Sciences 100, 111, 120, 121, 130, 160, 200

Geography 101/101H, 130, 130H

Physical Science 100

Physics 100, 150A, 150B, 250A, 250B, 250C

B2: Life Science

Anthropology 101

Biology 109/109H, 115, 139, 149, 190, 211, 221, 229, 231, 239, 249, 259, 290

Psychology 200
B3: Laboratory Activity

Anthropology 101L
Astronomy 100L
Biology 109L, 109HL, 115, 139, 149, 190L (F'17), 211, 212, 229, 231, 239, 259, 290
Chemistry 100, 200A, 200AH
Earth Sciences 100L, 111, 121
Geography 101L
Physical Science 100
Physics 100, 150A, 150B, 250A, 250B, 250C

B4: Mathematics/Quantitative Reasoning

Sociology 125/125H

C. Arts, Literature, Philosophy, and Foreign Language (minimum 9 units)

This area must include one course from C1, one course from C2, and a third course from either area.

C1: Arts (Art, Dance, Music, Theatre)

Art 100/100H, 101/101H, 102/102H
Cinema Studies 103, 104
Dance 100
English 233A*, 233B*
Music 101/101H, 102, 103, 104
Theatre Arts 100

C2: Humanities

American Sign Language 110, 111, 116, 210
Chinese 101, 102
English 102*/102H*, 231, 232, 233A*, 233B*, 241, 242, 243, 246, 270, 271, 272, 278*
French 101, 102, 194, 201, 202
History 101*/101H*, 102*/102H*, 132*, 152, 162
Italian 101, 102, 194, 195, 201, 202

**Both SPAN 101A and 101B must be completed to meet the C2 requirement.

NOTE: The UNITED STATES HISTORY, CONSTITUTION, AND AMERICAN IDEALS CSU graduation requirement may be met by completing
Political Science 101/101H and one U.S. History course from the following: History 118, 120/120H, 121/121H, 122, 124, 127.

*These history courses may also be used to meet 6 of the 9 units required for Area D.*

**D. Social, Political, and Economic Institutions and Behavior; Historical Background (minimum 9 units)**

**New and returning** students BEGINNING SCC Fall 2021 or later – MUST take 6-semester units from any discipline.

Students staring SCC BEFORE Fall 2021 and have maintained continuous enrollment – MUST take 9-semester units from at least 2 different disciplines.

Courses must be selected from at least 2 different disciplines.

- Anthropology 100/100H, 103, 104
- Child Development 107*, 110
- Cinema Studies 105
- Communication 120/120H, 225/225H
- Counseling 150, 152*
- Criminal Justice 101
- Economics 101, 102
- Education 101
- Ethnic Studies 101*, 110*, 120*, 130*, 140*
- Gender, Sexuality, and Women's Studies 101, 102, 103
- Geography 100/100H, 102/102H, 140
- Interdisciplinary Studies 155*
- Kinesiology 109
- Political Science 101/101H, 110, 150, 200/200H, 201, 220, 221, 222, 230
- Psychology 100/100H, 157*, 160*, 170, 180, 190*, 200, 220, 230*, 240, 250
- Sociology 100/100H, 115, 116, 120, 130*, 150, 220, 240/240H, 286

+No credit for HIST 122 if taken after HIST 120/120H or 121/121H.

**E. Lifelong Understanding and Self-Development (minimum 3 units)**

Only one unit from E2 can be used to satisfy Area E.

**E1 Lifelong Understanding**

- Child Development 107*
- Counseling 101, 113 (F’19), 116, 152*
- Interdisciplinary Studies 155*
- Kinesiology 100, 101, 102, 104, 110, 111
Nutrition and Food 115
Psychology 157*, 160*, 190*, 230*
Sociology 130*

**E2: Self-Development**
Kinesiology 119-283

**F. Ethnic Studies** (minimum 3 units)

**New and returning** students BEGINNING SCC Fall 2021 or later – MUST complete Area F.

Students starting **SCC BEFORE Fall 2021** and have maintained continuous enrollment - do not need to complete Area F. Instead, students MUST complete Area D.

Ethnic Studies 101*, 110*, 120*, 130*, 140*

**U.S. History, Constitution and American Ideals – (CSU Graduation Requirement)**

All California State Universities have a graduation requirement in U.S. History, Constitution, and American Ideals. Although this is not a transfer requirement it is recommended students take it prior to transfer to a CSU. Courses used to meet this requirement may also be used to meet 6 of the 9 units required in Area D and may be found in Areas D6 or D8 in bold.

**US-1: HISTORICAL DEVELOPMENT OF AMERICAN INSTITUTION AND IDEALS**

History 118, 120, 120H, 121, 121H, 122, 124, 127

**US-2: U.S. CONSTITUTION & GOVERNMENT**

Political Science 101, 101H

**US-3: CALIFORNIA STATE & LOCAL GOVERNMENT**

Political Science 101, 101H

**CERTIFICATION REQUIREMENTS**

No more than 30-semester units may be certified for areas B through D combined.

Pass/No Pass grades are accepted for certification in all areas. However, letter grades may be recommended or required for specific courses in a given major. Each CSU campus may also limit the total number of units graded Pass.

Grades of “C-” earned in Areas A1, A2, A3, and B4 can be used for certification. However, if the course double-counts to meet a major requirement, a “C” or better grade is recommended for certification.

A single course may not meet more than one general education requirement.

Certification of coursework from other colleges will only be granted to students who have completed a minimum of 12 units at Santiago Canyon College.

Courses taken at other California Community Colleges will be applied to the subject areas in which they were listed by the institution where the course was completed.

Courses taken at other regionally accredited institutions (which do not maintain a CSU certification list) may be approved for certification via a “Pass Along Petition” and after a review by the Santiago Canyon College Articulation Officer. Courses completed at foreign institutions are not acceptable for certification. Pass Along Petitions are available from the Santiago Canyon College Counseling Department and must be accompanied by the appropriate documentation.

Requests for certification should be made during the semester prior to the last term of attendance. Please consult the class schedule or the Admissions website at [www.sccollege.edu](http://www.sccollege.edu) or the Santiago Canyon College Counseling Department for deadline.
information.

Students following the Associate in Science Biology for Transfer (11856) only need to complete the following CSU General Education Breadth requirements:

Area A – One course from areas A1, A2, and A3.
Area B – One course from areas B1, B2, B3, and B4
Area C – One course in areas C1 and C2
Area D – Two courses from two different disciplines in area D
Area E – One course from area E

Plan C - Intersegmental General Education Transfer Curriculum (IGETC)

Completion and certification of all the requirements in the Intersegmental General Education Transfer Curriculum (IGETC) will permit a student to transfer from Santiago Canyon College to a campus in either the CALIFORNIA STATE UNIVERSITY or the UNIVERSITY OF CALIFORNIA system without the need, after a transfer, to take additional lower-division, general education courses to satisfy campus general education requirements. Completion of IGETC does not guarantee admission to a UC campus. Students are strongly encouraged to meet with a Santiago Canyon College counselor when planning to transfer to a UC campus.

IMPORTANT NOTE: The list of certifiable courses will be subject to change year by year, but students are assured that courses taken to meet IGETC requirements will be honored if they are approved for the academic year in which they are taken. Courses on this list are approved beginning Fall 2021 and are valid through Summer 2022.

* Courses with an asterisk indicate that transfer credit may be limited by either UC or CSU or both. Courses with an asterisk may be counted in one area only. Please consult with a counselor for additional information.

**Courses with two asterisks indicate that an official High School transcript must be on file in the admissions office.

Areas 5A, 5B, 5C: Underlined courses have laboratory activity.

(F’ YR) - This identifier indicates the semester and year the course was approved in a general education area.

AREA 1—ENGLISH COMMUNICATION

C.S.U.: 3 courses required, one from each group.
U.C.: 2 courses required, one each from Group A and B.

Group A: English Composition

1 course required, minimum 3-semester units.

English 100, 101*/101H*

Group B: Critical Thinking/Composition

1 course required, minimum 3-semester units.
English 102*/102H*, 103*/103H*
Philosophy 110*
Reading 151

**Group C: Oral Communication - Required for CSU transfer only**

1 course required, minimum 3-semester units.

Communication 100*/100H*, 101, 110, 111

**AREA 2A—MATHEMATICAL CONCEPTS & QUANTITATIVE REASONING**

1 course required, minimum 3-semester units.

Sociology 125*/125H*

**AREA 3—ARTS & HUMANITIES**

3 courses required, minimum 9-semester units, with at least one course from Group A and one course from Group B. Select a third course from either area.

**Group A: Arts (minimum 3 units)**

Art 100*/100H*, 101*/101H*, 102*/102H*

Cinema Studies 103, 104

Dance 100

Music 101*/101H*, 102, 103, 104

Theatre Arts 100

**Group B: Humanities (minimum 3 units)**

American Sign Language 111, 116, 210

Chinese 102

English 102*/102H*, 231, 232, 233A, 233B, 241, 242, 243, 246, 270 (F'20), 271, 272, 278

French 102, 201, 202

History 101*/101H*, 102*/102H*, 132

Italian 102, 201, 202

Philosophy 106*/106H*, 108, 112, 115, 118, 120

Spanish 102, 111, 195A, 195B, 201, 202

**AREA 4—SOCIAL & BEHAVIORAL SCIENCES**

3 courses required, minimum 9 semester units from at least 2 disciplines or an interdisciplinary sequence.

Anthropology 100*/100H*, 103, 104

Child Development 107*
Cinema Studies 105
Communication 225*/225H*
Criminal Justice 101
Economics 101, 102
Education 101
Ethnic Studies 101#, 110#, 120#, 130#, 140#
Gender, Sexuality, and Women’s Studies 101*, 102, 103
Geography 100*/100H*, 102*/102H*, 140
History 101*/101H*, 102*/102H*, 118, 120*/120H*, 121*/121H*, 122*, 124, 126, 127, 133, 142, 152, 162, 240
Interdisciplinary Studies 155
Kinesiology 109
Political Science 101*/101H*, 110, 150, 200, 201, 220, 221, 230
Psychology 100*/100H*, 157*, 160, 170, 180, 190, 200, 220, 230, 240, 250
Sociology 100*/100H*, 115, 116, 120, 130, 150, 220, 240*/240H*, 286

# These courses meet the CSU Ethnic Studies graduation requirement for new and returning students BEGINNING SCC fall 2021 or later. Students starting SCC BEFORE Fall 2021 and have maintained continuous enrollment, do not need to meet the CSU Ethnic Studies graduation requirement.

AREA 5—PHYSICAL & BIOLOGICAL SCIENCES

Minimum 7–9 semester units. One Physical Science course and one Biological Science course are required. One course must include a corresponding laboratory. Lab courses are underlined.

**Group A: Physical Science (minimum 3 units)**
- Astronomy 102, 103, 112
- Chemistry 100, 200A*/200AH*, 200B
- Earth Sciences 100, 111, 120, 121, 130, 160, 200
- Geography 101*/101H*, 130*/130H*
- Physical Science 100
- Physics 100, 150A*, 150B*, 250A*, 250B*, 250C*

**Group B: Biological Science (minimum 3 units)**
- Anthropology 101
- Biology 109*/109H*, 115, 139, 149, 190, 211, 221, 229, 231, 239, 249, 259, 290
- Psychology 200

**Group C: Laboratory Activity (minimum 1 unit)**
- Anthropology 101L
- Astronomy 100L
- Biology 109L/109HL, 115, 139, 149, 190L, 211, 221, 229, 231, 239, 249, 259, 290
Chemistry 100*, 200A*/200AH*, 200B
Earth Sciences 100L, 111, 121*
Geography 101L
Physical Science 100
Physics 100, 150A*, 150B*, 250A*, 250B*, 250C*

AREA 6—LANGUAGE OTHER THAN ENGLISH (LOTE) (UC ONLY)

This proficiency may be met by one of the following methods:

Satisfactory completion of two years of high school coursework in a language other than English with grades of “C-” or better**; or completion of one of the following:

American Sign Language 110, 111, 210
Chinese 101, 102
French 101, 102, 201, 202
Italian 101, 102, 201, 202
Spanish 101*/101H*, 101B, 102, 110, 111, 201, 202;

OR

Satisfactory completion, with “C” grades or better, of two years of formal schooling at the sixth-grade level or higher in an institution where the language of instruction is not English;

OR

3 or higher on College Board Advanced Placement Examination, 5 or higher on International Baccalaureate Higher Level Examination; SAT II: Subject Tests (see a counselor for required scores); grade of A, B, or C on the “O” level exam; or score of 5, 6, or 7 on the “A” level exam;

OR

Satisfactory completion of an achievement test administered by a college in a language other than English equivalent to two years of high school language; or verification of student competency equivalent to two years of high school language.

U.S. HISTORY, CONSTITUTION, AMERICAN IDEALS – CSU GRADUATION REQUIREMENT ONLY

To meet the CSU requirement, students should take

Political Science 101*/101H* AND one of the following courses: History 118, 120*/120H*, 121*/121H*, 122*, 124, 127. These courses can be used for 6 of the 9 units required in Area 4 (Social and Behavioral Sciences).
AMERICAN INSTITUTIONS REQUIREMENT (AI)
(Not part of IGETC. May be completed prior to transfer)

CSU has an American Institutions' graduation requirement that is separate from IGETC.

UC-bound students should be aware of the UC American Institutions graduation requirement at their campus of choice, requirements vary. These courses can be used to meet 6 of the 9 units required in Area 4: Social & Behavioral Sciences.

UC requires the completion of a college course or courses with a grade of “C” or better OR a one-year course in high school in U.S. History or a half-year course in U.S. History and a half-year course in American Government with grades of “C” or better (UCLA requires grades of “B”). Requirements vary by UC campus. Check with a Santiago Canyon College counselor to determine which course(s) to take.

CERTIFICATION REQUIREMENTS

1. Complete all courses used for IGETC certification with a minimum grade of C (C minus is not acceptable). A “Pass” is acceptable providing it is equivalent to a grade of C or higher.

2. Request certification from the last California community college you attend prior to transferring to CSU or UC. Requests should be made to the Office of Admissions and Records during the semester prior to the last term of attendance. Please consult the class schedule or the Santiago Canyon College Counseling Department for deadline information.

3. Prior to requesting certification, have official transcripts on file from every high school and college you have attended.

4. Courses taken at other California community colleges will be applied to the subject areas in which they are listed by the institution where the work was completed.

5. A course taken at other regionally accredited institutions (which do not maintain an IGETC certification list) may be approved for certification via a “Pass Along Petition” and after a review by the Santiago Canyon College Articulation Officer. Pass Along Petitions are available from the Santiago Canyon College Counseling Department and must be accompanied by the appropriate documentation.

6. Courses completed at foreign institutions are not acceptable except for certification of competence in a language other than English.

7. Completing IGETC prior to transfer is strongly recommended and can be advantageous in the admissions process. Partial certification is permitted if the student has completed all but two courses on the pattern. Please see a Santiago Canyon College counselor for guidelines.

8. Students completing the Associate in Science Biology for Transfer (11856) degree must follow IGETC for STEM and only need to complete the following IGETC areas to earn the degree:

Area 1 – all courses (except 1C for UC-bound students)
Area 2 – One course
Area 3 – Two courses A
Area 4 – Two courses
Area 5 – All courses
Area 6 – one course for UC-bound students -CSU students do not need to complete this section.

Associate Degree and Certificate Programs at Santiago Canyon College

ASSOCIATE DEGREE AND CERTIFICATE PROGRAMS AT SANTIAGO CANYON COLLEGE (SCC)
AA = Associate of Arts Degree

AA-T = Associate of Arts for Transfer Degree

AS = Associate of Science Degree

AS-T = Associate of Science Degree for Transfer

CA = Certificate of Achievement

CP = Certificate of Proficiency

Degrees and certificates of achievement have State-approved program control numbers and appear on student transcripts.

Certificates of proficiency are not State-approved and do not appear on student transcripts

Associate Degree Requirements

Associate Degrees

To earn an associate degree, a student must fulfill the requirements listed under I, II and III below.

I. Unit and Residency Requirements

60 UNITS of degree applicable coursework are required, with at least a 2.0 grade point average. At least 12 of the units must be earned at Santiago Canyon College and at least 6 of those units must be in courses required for the major unless students are earning an Associate Degree for Transfer (ADT).

II. General Education Requirements

The general education requirements can be met through the completion of one of the following general education plans.

Plan A: Santiago Canyon College General Education Requirements

Plan B: California State University General Education Breadth

Plan C: Intersegmental General Education Transfer Curriculum (IGETC)

The general education requirements may also be satisfied by submitting an official transcript showing completion of a bachelor’s degree from a regionally accredited institution.

Alternatively, the general education requirements may be satisfied by submitting an official transcript showing completion of an associate of arts or associate of science degree from a regionally accredited California institution within a ten-year period. All major requirements must be completed at Santiago Canyon College within ten years of the semester and year the degree was conferred at the regionally accredited California institution.

For coursework completed outside the United States, see International Transcripts section.

III. Major Requirements

Each degree specifies courses required for the major (a minimum of 18 units). Students must complete these courses with a grade of C or better. For programs of study leading to an associate degree, see SCC Academic Programs.

A course may be used to satisfy a major requirement and meet a general education category requirement. Non degree applicable courses (courses numbered N01-N99) may not be used for graduation requirements.

IMPORTANT NOTE: The list of courses will be subject to change year by year, but students are assured that courses taken to meet General Education requirements will be honored if they are approved for the academic year in which they are taken. Courses on this list are approved per academic year beginning Fall 2018 and are valid through Summer 2019.

IV. Proficiencies

The required proficiencies listed may also be used to meet General Education Requirements in areas A-F where appropriate. Courses taken to meet proficiencies must be completed with a grade of C or better.
Petition For Graduation and Catalog Rights:

Students must submit a Petition to Graduate to earn an associate degree, certificate, CSU Certification and/or IGETC Certification. Petitions for graduation should be filed in the Admissions and Records Office at Santiago Canyon College when a student has completed at least 30 units or one semester prior to the expected semester to graduate. Students who maintain continuous enrollment have the option to meet the associate degree or certificate requirements as listed in the catalog in effect at the time of first enrollment or any subsequent year.

Continuous enrollment is defined by earning a notation on a transcript (letter grade, W, NP, P or I) for at least one course during any semester, or session, within that academic year. For the purposes of the catalog, an academic year begins with the fall semester and concludes with the summer session. So long as the student remains in attendance in any one semester (fall/spring) or session (summer/intersession) per academic year, the student has the ability to elect to meet the graduation requirements in effect at the time beginning his/her continuous enrollment or in more recent catalog years.

If a student does not earn a note on their transcript during any of the semesters, or sessions, during an academic year, then the student is no longer protected by previous associate degree and/or certificate requirements and will be held to the additional requirements. The student must then reset their catalog rights clock to use the catalog at the time of readmission or subsequent enrollment.

In the event a loss of catalog rights due to extenuating circumstances, a student wishes to waive or substitute a requirement for an associate degree and/or certificate requirements, the student could complete the appropriate form and submit to the Exceptions for Academic Regulations (EAR) Committee for final determination.

Commencement

Commencement is held once a year at the end of the spring semester for those students who have completed or petitioned for a degree during the current academic year (Fall 2016, Spring 2018, or Summer 2018). A Petition to Graduate must be submitted to the Admissions and Records Office at Santiago Canyon College to participate in commencement. Exceptions may be made to accommodate students petitioning for Fall 2018.

NOTE: Official transcripts from all colleges attended must be on file.

Associate Degrees for Transfer

California Community Colleges are now offering associate degrees for transfer to the CSU. These may include Associate in Arts (AA-T) or Associate in Science (AS-T) degrees. These degrees are designed to provide a clear pathway to a CSU major and baccalaureate degree. California Community College students who are awarded an AA-T or AS-T degree are guaranteed admission with junior standing somewhere in the CSU system and given priority admission consideration to their local CSU campus or to a program that is deemed similar to their community college major. This priority does not guarantee admission to specific majors or campuses.

Students who have been awarded an AA-T or AS-T are able to complete their remaining requirements for the 120-unit baccalaureate degree within 60-semester units or 90 quarter units.

Current and prospective community college students are encouraged to meet with a counselor to review their options for transfer and to develop an educational plan that best meets their goals and needs.

To earn an associate degree for transfer, a student must fulfill the requirements listed under I, II and III below.

I. Unit and Residency Requirements 60 UNITS of CSU-transferable semester units are required, with at least a 2.0-grade point average. While a minimum of 2.0 is required for admission to the CSU, some majors may require a higher GPA. Please consult with a counselor for more information. At least 12 of the units must be degree applicable and earned at Santiago Canyon College.

II. General Education Requirements The general education requirements can be met through the completion of one of the following general education plans.

Plan B: California State University General Education Breadth
Plan C: Intersegmental General Education Transfer Curriculum (IGETC)

NOTE: Students who are following Plan C: IGETC and are planning to transfer to a CSU must complete Area 1C: Oral Communication CSU admissions requirement with a grade of “C” or better. Completion of Area 1C is not necessarily a graduation requirement for Santiago Canyon College. Please consult a college counselor to ensure all graduation requirements are being met.

III. Major Requirements Each degree specifies courses required for the major (a minimum of 18 units). Students must complete an “AA-T” or “AS-T” major as detailed in the program section of the catalog. Completion of these courses must be done with a grade of C or better or a “P” if the course is taken on a “Pass/No Pass” basis. (Title 5 § 55063). Courses in the student’s major field may not be taken under the Pass/No Pass policy except for (a) major courses for an Associate Degrees for Transfer (ADT), (b) courses for which Pass/No Pass is the only grading option, and (c) units earned through Credit by Examination (CBE) or assessment. All completed coursework must come from a regionally accredited institution, meaning that an institution must be accredited by one of the six U.S. regional accrediting associations. International coursework does not apply unless the school is regionally accredited.

Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T) Reciprocity, Course Substitution, External Exams, and Credit by Exam Policy and Procedures
Students who have taken courses from a California Community College, a regionally accredited institution, completed an external exam such as AP, CLEP (may be used on CSU GE-Plan B only), or IB or Credit by Exam may be granted credit towards an AA-T/AS-T general education and/or major requirement. Courses will be reviewed by one of the following methods:

**General Education Courses**

- General education courses taken at other California Community Colleges are granted course-to-course reciprocity providing the course in question appears on the CSU-Plan B or IGETC-Plan C at the time the student completed the course.
- Non-California Community College general education courses are reviewed by the Articulation Officer via the pass-along process in accordance with the CSU-Plan B or IGETC-Plan C standards.
- Students who completed an external examination such as AP, CLEP or IB are granted credit towards general education consistent with CSU GE and IGETC policies.
- Santiago Canyon College Credit by Exam may be granted for general education only if a course is eligible and listed in the Credit by Exam section of the SCC Catalog.

**Major Requirement Courses**

- A major requirement with a C-ID number taken at another California Community College (CCC) is granted course-to-course reciprocity and meets the same designated C-ID major requirement found in the SCC’s AA-T/AS-T.
- A major requirement completed at another California Community College that is approved as part of its AA-T or AS-T, will be applied to the corresponding Santiago Canyon College AA-T/AS-T area. Courses completed at other CCCs must be part of their AA-T/AS-T at the time the student completed the course, if a course is not part of the AA-T/AS-T then the course must be reviewed by the SCC discipline faculty in accordance with the C-ID descriptor. Courses completed at other CCCs prior to the AA-T/AS-T approval, will be “grandfathered”.
- A major requirement without a C-ID number taken at another California Community College, where an AA-T/AS-T does not exist, is reviewed by the SCC discipline faculty in accordance with the C-ID descriptor.
- A non-California Community College major requirement taken at a regionally accredited institution is reviewed by the SCC discipline faculty in accordance with the C-ID descriptor and if comparable, course-to-course substitution is granted.
- Students who completed an external examination such as AP, CLEP or IB are granted credit towards major requirements where exam-to-course comparability exists; if exam-to-course comparability does not exist, the discipline faculty reviews the external exam and determines course comparability if a course is offered (Students should be aware that external exam credit may be awarded/counted differently by the transfer institution).
- Santiago Canyon College Credit by Exam may be granted for major requirements only if a course is eligible and listed in the Credit by Exam section of the SCC Catalog.

*It is strongly recommended students make an appointment with a Santiago Canyon College counselor to discuss appropriate credit placement.*

**Associate in Arts for Transfer Degrees (A.A.-T)**

- Anthropology, AA-T
- Child and Adolescent Development, AA-T
- Communication Studies, AA-T

Transfer to Other Colleges

Transfer Success Center

The Transfer Success Center provides resources and services to assist students in researching, planning, and completing their transfer to a four-year college or university. The Transfer Success Center coordinates various events throughout the year, including tours of universities, university representative advising appointments, transfer fairs, and a variety of workshops to help students with each step in the transfer process. In addition, the Transfer Success Center provides many useful resources such as; updates via social media and e-mail, computers for use in research and completing applications, a comprehensive website, and expert advice from trained specialists and counselors. For more information, stop by D-104-N, call (714) 628-4865, visit www.sccollege.edu/transfer, and follow us @SCCTransfer on Facebook, Twitter, and Instagram.

Transferability of Courses

This section of the catalog is designed to help students plan an academic program for transfer to a four-year college or university. It includes information about the transfer process and general education requirements.

Since transfer requirements change frequently, students should meet with a counselor regularly to plan an academic program that will assure a smooth transition to the transfer institution of their choice.

Four-year colleges and universities often make changes in their requirements. The requirements listed in this section were updated at the time of publication; however, changes may have occurred after publication. Current transfer information and official articulation agreements are available in the Transfer Success Center and the Counseling Center at Santiago Canyon College. Articulation agreements are also available at www.assist.org.

There are four segments of higher education in California. They are:

- the University of California (UC) system with 10 campuses
- the California State University (CSU) system with 23 campuses
- over accredited independent colleges and universities
- the 113 California community colleges

Santiago Canyon College provides the first two years of a four-year college or university program.

Santiago Canyon College offers courses to meet general education, major or elective requirements. Students can transfer a maximum of 70 units to a UC or CSU campus.

All courses numbered 100 or above will transfer to a CALIFORNIA STATE UNIVERSITY campus. Courses that are transferable to the UNIVERSITY OF CALIFORNIA will be designated on the UC Transferable Course Agreement. Some of the courses which are transferable to the University of California have credit limitations. Check the UC Transferable Course Agreement to review these limitations. This list is available in the Counseling Center, Transfer Success Center, in this catalog, and at www.assist.org.

Independent and out-of-state colleges and universities usually accept most courses that are transferable to the University of California and many of the courses that are transferable to the California State University.

Begin a Transfer Major at Santiago Canyon College

To obtain a bachelor’s degree, students need to select a course of study in which to specialize. This course of study is called a major. Almost every major requires that certain courses be completed during the first and/ or second year of college. These are called Lower-Division Major Requirements. Many of these requirements can be completed at SCC prior to transferring. (The highly specific courses in
the major are called Upper-Division Requirements and these are completed after transfer). In developing a program for transfer, the first consideration in most cases should be given to completing the courses required in the transfer major or as preparation for the major.

Course Requirements for Transfer Students

A student can transfer from Santiago Canyon College to a four-year college or university as a junior without loss of time or credits by completing the following:

**Lower-Division Major Requirements.** Most majors at four-year colleges and universities require the completion of one or more lower-division courses as preparation for the upper-division course work in a major. Santiago Canyon College offers courses to meet the lower-division requirements for most majors at four-year colleges and universities. Information about many specific major requirements is available in the Counseling and Transfer Success Center, or at www.assist.org. Students should meet with a counselor for additional information about major programs and requirements.

**General Education Requirements.** These are the courses required of students to obtain a degree regardless of major. They are designed to provide students with the knowledge, skills, and understanding which will enable them to function as intelligent and creative members of the community. Courses in writing, critical thinking, mathematics, sciences, arts and humanities, and the social sciences are included in general education.

**Electives.** These are courses of choice taken in addition to courses for the major and general education requirements.

Students enrolled in a transfer program can complete most of their general education and lower-division major requirements before transferring. Students who are planning to transfer to a four-year college or university should meet with a Santiago Canyon College counselor in the Counseling Center to develop a Comprehensive Student Education Plan which will identify the courses needed to transfer.

Transfer students may also want to complete an associate degree. While not a requirement for transfer, the associate degree is generally recommended, and proper planning should enable students to satisfy both requirements for graduation from SCC and for transfer.

California State University

The California State University has 23 campuses located throughout the state. While each campus within the system has its own unique geographic and curricular character, all campuses offer undergraduate and graduate instruction for professional and occupational goals as well as a broad liberal education. The CSU offers more than 1,800 bachelor’s and master’s degrees in some 240 subject areas. Campuses are located at Bakersfield, Channel Islands, Chico, Dominguez Hills, East Bay, Fresno, Fullerton, Hayward, Humboldt, Long Beach, Los Angeles, Monterey Bay, Northridge, Pomona (Cal Poly), Sacramento, San Bernardino, San Diego, San Francisco, San Jose, San Luis Obispo (Cal Poly), San Marcos, Sonoma, Stanislaus, and Vallejo (California Maritime).

To obtain a bachelor’s degree from the CSU system, a student must complete a minimum of 120-semester units (180 quarter units). A maximum of 70 units of transferable credit will be accepted for courses completed at a community college.

Prospective CSU transfer students should consult a counselor regarding CSU admission, as requirements vary depending upon the student’s status at the time of high school graduation.

California State University Admissions Requirements for Transfer Students

**Upper-Division Transfer**

Students are eligible for upper-division transfer if they complete at least 60 transferable semester units (90 quarter units) and if they:

- Earn a college grade point average of 2.0 (C) or better (2.4 for non-California residents) in all transferable units attempted. Are in good standing at the last college or university attended (eligible to enroll).
- Will complete the four basic subjects in English Composition, College Mathematics, Speech Communication, and Critical Reasoning, which are part of the general education requirements. These four sections of general education must be completed with a grade of "C" or better for each course. If the CSU GE area A1, A2, A3, or B4 course double- counts for GE and a major requirement, it is recommended these courses be completed with a grade of "C" or better for certification.
- Will complete additional general education units that comprise the total CSU general education pattern of 39 units.
NOTE: Some CSU campuses may impose a higher GPA admission standard based on impacted major or impacted campus status.

Lower-Division Transfer

A student may be eligible for lower-division transfer (completion of fewer than 60 units) if the student has completed all admission requirements required for first-time freshmen. Some CSU campuses may also require completion of general education classes in Mathematics and English, with a "C" or better prior to admission. If the student did not complete all the subject requirements in high school, appropriate college courses may be used to make up the missing subjects. Many CSU campuses will not accept lower-division transfer students. Please see a Santiago Canyon College counselor for more information.

have completed “a-g” course requirements in high school;
have graduated from high school (received a high school diploma or General Educational Development, or GED, certificate);
meet the Eligibility Index required of a first-time freshman;
have achieved an overall college GPA of at least 2.00 (This GPA is calculated using all transfer units attempted. In case of high-demand majors and campuses, a GPA of 2.00 may not be sufficient to be admitted);
be in good standing at the last college or university you attended. (In simple terms, “good standing” means you are eligible to re-enroll at your last college or university); and
have completed, with a grade of C- or better, a course in GE Section A2 in written communication and a course in GE section B4 in mathematics or quantitative reasoning.

General Education Requirements for California State University

To earn a bachelor's degree from the California State University, each student must complete a program of general education. Santiago Canyon College offers general education programs which will enable students to meet the lower-division general education requirements for all CSU campuses prior to transfer. Students can complete either the CSU General Education Breadth Requirements (Plan B) or the Intersegmental General Education Transfer Curriculum (IGETC/Plan C) for CSU.

Plan B CSU General Education Breadth Requirements

It is strongly recommended students meet with a counselor to discuss CSU GE Breadth Plan B Area D and F options.

A. COMMUNICATION IN THE ENGLISH LANGUAGE AND CRITICAL THINKING – 9 units
B. THE PHYSICAL UNIVERSE AND ITS LIFE FORMS – 9 units
C. ARTS, LITERATURE, PHILOSOPHY, FOREIGN LANGUAGE – 9 units
D. SOCIAL POLITICAL AND ECONOMIC INSTITUTIONS AND BEHAVIOR; HISTORICAL BACKGROUND – 9 units
   New and returning students BEGINNING SCC Fall 2021 or later – MUST take 6-semester units from any discipline.
   Students staring SCC BEFORE Fall 2021 and have maintained continuous enrollment – MUST take 9-semester units from at least 2 different disciplines.
E. LIFELONG UNDERSTANDING AND SELF DEVELOPMENT – 3 units
F. ETHNIC STUDIES – 3 units
   New and returning students Beginning SCC Fall 2021 or later – MUST complete Area F
   Students starting SCC BEFORE Fall 2021 and have maintained continuous enrollment – do not need to complete Area F. Instead, students MUST complete Area D.

All California State Universities have a graduation requirement in U.S. History, Constitution, and American Ideals. This requirement can be satisfied before or after transfer to a CSU by taking coursework in three areas US-1, US-2, and US-3. A student must take one course from each of the three areas. A student may use the same course to satisfy more than one area (US-1, US-2, US-3) if applicable. Courses meeting this requirement may also be counted toward certification in general education.

Students who complete Plan B are eligible to receive a Certificate of Achievement in General Education (CSU).

University of California

The University of California has ten campuses located throughout the state. Each campus within the system has its own unique geographic and academic character. The University offers bachelor’s, master’s, and doctoral degrees in a variety of subject areas. Campuses of the University are located at Berkeley, Davis, Irvine, Los Angeles, Merced, Riverside, San Diego, San Francisco (Schools of Medicine, Dentistry and Pharmacy), Santa Barbara, and Santa Cruz.

To obtain a baccalaureate degree from the UC system, a student must complete a minimum of 120-semester units (180 quarter units). A maximum of 70 units of transferable credit will be accepted for courses completed at a community college.

University of California Admissions Requirements for Transfer Students

Upper-Division Transfer

The vast majority of transfer students enter the University of California at the junior level from a community college. To be eligible for admission as a junior or upper-division transfer student, a student must fulfill both of the following criteria:

1. Complete 60 semester or 90 quarter units of transferable college credit with a grade point average of at least 2.4 (2.8 for nonresidents). No more than 14-semester units (21 quarter) may be taken Pass/Not Pass, and

2. Complete the following seven-course pattern requirements and earn a grade of "C" or better in each course: or a Pass (P) grade if Pass is equivalent to a C (2.0):

   • Two transferable college courses (3 semester or 4-5 quarter units each) in English composition; and
   • One transferable college course (3 semester or 4-5 quarter units) in mathematical concepts and quantitative reasoning; and
   • Four transferable college courses (3 semester or 4-5 quarter units each) chosen from at least two of the following subject areas: - arts and humanities - social and behavioral sciences - physical and biological sciences.

Students who satisfy the Intersegmental General Education Transfer Curriculum (IGETC/Plan C) prior to transferring to UC will satisfy section 2 of the transfer admission requirements listed above.

Lower-Division Transfer

The University of California admits a limited number of transfer students before they reach junior or upper-division standing if they have met specific requirements. Lower-division transfer admission decisions vary by UC campus, and it is not a common policy for many UC campuses. If a student were to be admitted as a lower-division transfer at a UC campus the following criteria would apply: If a student was eligible for admission to the University of California when he or she graduated from high school- meaning the student fulfilled the Subject, Scholarship, and Examination Requirements, or was identified by the University of California as eligible in the local context and completed the Subject examination requirements in the senior year, the student is eligible for transfer if he or she has a C (2.0) average in transferable college work. If a student met the Scholarship Requirement in high school but did not satisfy the Subject requirement, the student must take transferable college courses in the missing subjects, earn a “C” or better in each required course and maintain an overall 2.0 GPA in all transferable coursework to be eligible to transfer.
NOTE: UC campuses may impose a higher GPA admission standard; please see a Santiago Canyon College counselor for more information.

General Education Requirements for the University of California

To earn a bachelor’s degree from the University of California, each student must complete a program of general education. To meet the general education requirements of the University, students can complete either the Intersegmental General Education Transfer Curriculum (IGETC/Plan C) or individual campus general education requirements. Santiago Canyon College strongly recommends that students follow the IGETC rather than the individual campus general education/breadth requirements because this will usually provide more flexibility when applying for transfer. However, some UC campuses may discourage or restrict the use of IGETC for particular majors, especially majors that have many lower-division requirements that can be met at the community college. Students who began at a UC campus and who intend to transfer back to the same campus cannot use IGETC. Students who enrolled at a UC campus, leave that campus and attend Santiago Canyon College, and plan on transferring to a different UC campus may use the IGETC. Students are strongly encouraged to work with a Santiago Canyon College Counselor to develop an education plan that incorporates major preparation and appropriate general education requirements.

Plan C Intersegmental General Education Transfer Curriculum (IGETC) for CSU And UC

1. ENGLISH COMMUNICATION – 9 units (CSU) ENGLISH COMMUNICATION – 6 units (UC)
2. MATHEMATICAL CONCEPTS – 3 units (CSU and UC)
3. ARTS AND HUMANITIES – 9 units (CSU and UC)
4. SOCIAL AND BEHAVIORAL SCIENCE – 9 units (CSU and UC)
5. PHYSICAL AND BIOLOGICAL SCIENCES – 7-9 units (CSU and UC)
6. LANGUAGE OTHER THAN ENGLISH – 0-5 units (UC)

IGETC includes the California State University graduation requirement in US History, Constitution, and American Ideals. Completion of Political Science 101 and an approved US History course completes 6 of the 9 units required in IGETC area 4.

CSU Ethnic Studies mandatory Ethnic Studies graduation requirement can be met by taking one of the following Ethnic Studies courses: ETHN 101, 110, 120, 130, 140 in IGETC Area 4. It is highly recommended students meet with a counselor for further information on the above CSU graduation requirements.

Students following the IGETC pattern (Plan C) are strongly advised to complete all requirements prior to transfer. Completion of the pattern allows the student to petition for IGETC certification. IGETC certification means the student has met all lower-division general education requirements.

Students who complete Plan C are eligible to receive a Certificate of Achievement in General Education (IGETC).

Certification of General Education for Transfer to UC or CSU

Upon a student’s request, Santiago Canyon College will verify the completion of lower-division general education requirements for transfer to the University of California or the California State University. Students should request IGETC/Plan C or CSU GE/Plan B certification during the semester prior to the last term of attendance. Students who transfer without certification will have to meet the general education requirements of the specific UC or CSU campus to which they are transferring. Meeting these requirements usually necessitates taking additional courses.

Students who have taken courses at other colleges can have these courses approved in the certification process. Using the Intersegmental General Education Transfer Curriculum or CSU General Education Breadth, Santiago Canyon College will certify (guarantee) courses taken at other California community colleges in the areas designated by the offering college.
Courses taken at independent or out-of-state colleges/universities that are regionally accredited (which do not maintain a CSU GE Breadth or IGETC certification list) may be approved for certification via a “Pass Along Petition” and after a review by the Santiago Canyon College Articulation Officer. Courses are passed along for IGETC or CSU GE Breadth if they are equivalent to courses on the Santiago Canyon College or another California community college’s IGETC or CSU GE Breadth pattern. Pass Along Petitions are available at the Santiago Canyon College Counseling Department and must be accompanied by the appropriate documentation. Students must make an appointment with a Santiago Canyon College counselor before submitting a Pass Along Petition.

Courses from foreign institutions cannot be used in the certification process.

Students should request IGETC certification from the last California Community College they attend prior to transferring to UC or CSU.

Students requesting CSU GE Breadth certification must complete at least 12 units at Santiago Canyon College.

**IGETC - Partial Certification**

Partial certification is permitted if a student has completed all but two (2) courses on the IGETC/Plan C pattern. Specific rules apply to how and when the remaining courses must be completed after transfer. Please see a Santiago Canyon College counselor for guidelines.

*NOTE: Transcripts from all colleges attended must be submitted to the Admission Office prior to requesting certification.*

**Independent and Out-of-State Colleges and Universities**

In addition to state-supported colleges and universities in California, there are many outstanding independent institutions in the state. There are also many colleges, both private and public, located throughout the United States to which Santiago Canyon College students can transfer. Each of these institutions has its own unique requirements for admission. In order to determine eligibility, students should visit the website of the university to view admission requirements or obtain a copy of the university catalog.

Santiago Canyon College has articulated general education requirements and major preparation courses with a number of independent institutions such as Chapman University, The University of San Diego, and the University of Southern California. Students transferring to independent or out-of-state institutions should meet with a Santiago Canyon College counselor in order to determine appropriate general education and major preparation requirements.

California’s fully accredited independent colleges and universities provide many options at the undergraduate, graduate, and professional levels for students planning to continue their education beyond the community college. For a complete listing of independent colleges and universities in California, please visit www.aiccu.edu or the Santiago Canyon College transfer website at www.sccollege.edu/transfer.

**Pass Along Policy and Procedures**

Pass Along permits a student to use courses taken at colleges or universities that are not part of the California Community College system to meet general education requirements on the CSU GE/Plan B or IGETC/Plan C education plan. All completed coursework must come from a regionally accredited institution, meaning that an institution must be accredited by one of the six U.S. regional accrediting associations. The six regional accrediting associations are:

- Middle State Commission on Higher Education (MSCHE)
- New England Association of Schools and Colleges, Commission on Institutions of Higher Education (NEASC-CHE)
- Higher Learning Commission (HLC)
- Northwest Commission on Colleges and Universities (NWCCU)
- Southern Association of Colleges and Schools, Commission on Colleges (SACSCOC)
• Accrediting Commission for Community and Junior Colleges - Western Association of Schools and Colleges (ACCJC-WASC)

• WASC Senior College and University Commission (WSCUC)

Pass Along petitions are reviewed in fall and spring only and after the second week of school. To start the Pass Along process students must:

1. Be currently enrolled and actively attending Santiago Canyon College.
2. Complete twelve units of Santiago Canyon College coursework.
3. Submit official transcripts from all institutions attended to the SCC Admissions Office in E-101. Electronic transcripts are considered official only if the electronic transcript is sent directly to the SCC Admissions Office. Electronic transcripts sent directly to the student are not considered an official transcripts. Students are advised to obtain an extra set of transcripts for their personal files.
4. Make a copy of the course description for each course the student wants a pass-along review. The course description copy must be from the catalog year the student completed the course. If a course cannot be located, the student must contact the institution for the appropriate course description. For IGETC English pass along approval of Area 1A-English Composition and/or Area 1B-Critical Thinking a course syllabus of the English course must be provided. IGETC English Pass Along Petitions are reviewed by the English Department between the first through the sixth week of the fall and spring semester only.
5. Make an appointment with an SCC Counselor. Bring copies of the course descriptions/syllabi and official transcripts to the appointment. The counselor will assist the student in filling out the "Pass Along Petition." Courses submitted for IGETC pass-along approval must be completed with a grade of “C” or better. No “C-” grade can be approved for pass along on IGETC. If the CSU GE area A1, A2, A3, or B4 course double-counts for GE and a major requirement, it is recommended these courses be completed with a grade of “C” or better for certification. No “D-” grade can be approved for pass along on CSU GE Breadth (Plan B).
6. Completed Pass Along petitions are submitted to the Articulation Officer for review and take two to three weeks to process. Students will be notified by mail once a decision is made.

Courses from international institutions cannot be considered for Pass Along.

University of California and Santiago Canyon College Transfer Course Agreement

This agreement lists approved Santiago Canyon College courses transferable for unit credit at all UC campuses and explains UC credit provisions. Additional courses for 2021–2022 may be approved after this catalog publication date. Please see an SCC counselor for more information.

Accounting 101, 102

American College English 102*, 104, 116*

*ACE 102, 104, 116 maximum credit, 8 units

**French** 101*, 102, 196, 201, 202

* FREN 101 corresponds to two years of high school study

**Gender, Sexuality, and Women's Studies** 101, 102, 103

**Geography** 100, 100H, 101, 101H, 101L, 102, 102H, 130, 130H, 140, 150, 155 (Same as SURV 155)

**History** 101, 101H, 102, 102H, 118, 120, 120H, 121, 121H, 122+, 124, 126, 127, 132, 133, 142, 152, 162, 240

+ No credit for HIST 122 if taken after HIST 120/120H or 121/121H

**Information Studies** 100, 103

**Italian** 101*, 102, 195, 201, 202

* ITAL 101 corresponds to two years of high school study

# KIN 102, 104, 110 maximum credit, one course; non-activity courses maximum credit, 8 units

* For any or all activity courses maximum credit, 4 units

+ Any or all of these courses combined maximum credit, 8 units

**Mathematics** 105, 140+, 150*, 170+, 171, 180*, 180H*, 185, 203, 219^, 219H^, 220^, 280, 287#, 290#, 295#, SOC 125^, SOC 125H^ + MATH 140 and 170 maximum credit, one course

* MATH 150, 180 and 180H maximum credit, one course

# MATH 287, 290 and 295 combined: maximum credit, 8 units

^ MATH 219, 219H, 220, SOC 125, SOC 125H combined: maximum credit, 1 course

Nutrition 115, 120

Physical Science 100

Physics 100+, 150A*, 150AC, 150B*, 150BC, 250A*, 250B*, 250C*
+ No credit for PHYS 100 if taken after PHYS 150A or 250A
* Maximum credit, one series; deduct credit for duplication of topics; PHYS 150A, 150B, or PHYS 250A, 250B, 250C

Political Science 101, 101H, 110, 150, 200, 200H, 201, 220, 221, 222, 230

Psychology 100, 100H, 157*, 160, 170, 180, 190, 200, 220, 230, 240+*, 250
* PSYC 157 and CDEV 107 maximum credit, one course
+ PSYC 240 and SOC 240 maximum credit, one course

Reading 151

Sociology 100, 100H, 115, 116/116H, 120, 125^, 125H^, 130, 150, 220, 240+, 240H, 286
+ SOC 240 and PSYC 240 maximum credit, one course
^ MATH 219, 219H, 220, SOC 125, SOC 125H combined: maximum credit, 1 course

* SPAN 101 or 101H correspond to two years of high school study
+ SPAN 101A and 101B combined are equivalent to SPAN 101. Combined correspond to two years of high school study

Surveying/Mapping Sciences 118*, 119*, 155 (Same as GEOG 155)
* SURV 118 and 119 maximum credit, one course

Water Utility Science 107

Note: Duplicate credit will not be awarded for both Honors and regular versions of a course. Credit will be awarded to the first course completed with a “C” or better

Santiago Canyon College Advanced Placement Guide and Policies
Advance Placement Examinations with a score of 3, 4, or 5 can be used to meet Santiago Canyon College Associate degree requirements, CSU admission, CSU GE certification, UC admission, and IGETC certification requirements. However AP credits cannot be used to meet Santiago Canyon College12 unit residency requirement for the Associate degree. **Students who have earned credit from an AP exam should not take a comparable college course since credit will not be granted for both.** Students using an AP exam for a requirement other than general education, such as major preparation, are strongly advised to check with a Santiago Canyon College counselor and/or the Admissions Office of their transfer campus to determine how the AP exam will be used to meet major and graduation requirements as policies may differ from SCC’s. **Students should submit official copies of Advance Placement Examination test scores to the Admissions and Record office for evaluation.**

### Santiago Canyon College College-Level Examination Program (CLEP) Placement Guide and Policies

Santiago Canyon College students who have taken CLEP examinations and have a score of 50 or higher (level II languages require a higher score) can earn credits towards Santiago Canyon College Associate degree general education requirements or electives, CSU admission, and CSU GE certification requirements. However, CLEP credits cannot be used to meet Santiago Canyon College twelve-unit residency requirement for the Associate degree. **Students who have earned credits from a CLEP exam should not take a comparable college course since credit will not be granted for both.** Students are strongly advised to check with an SCC counselor when using CLEP credit for CSU admission or for major requirements. The CSU has grandfathered in this policy the guide CLEP submissions for any year that the CLEP exams were taken. **Students should submit official copies of CLEP test scores to the Admissions and Record office for evaluation. The University of California does not accept CLEP exams to meet requirements for IGETC.**

### Santiago Canyon College International Baccalaureate (IB) Examination Guide and Policies

Santiago Canyon College students who have taken IB examinations and have a score of 5 or higher (CSU accepts a score of 4 on some exams) can earn credits towards Santiago Canyon College Associate degree general education requirements, CSU admission, CSU GE certification, UC admission, and IGETC certification requirements. However, IB credits cannot be used to meet Santiago Canyon College twelve-unit residency requirement for the Associate degree. **Students who have earned credits from a IB exam should not take a comparable college course since credit will not be granted for both.** Students are strongly advised to check with an SCC counselor when using IB credit for CSU/UC admission or for major requirements. **Students should submit official copies of IB test scores to the Admissions and Record office for evaluation.**

<td>Course Identification Numbering System (C-ID)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>---------------------------------------------</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The Course Identification Numbering System (C-ID) is a statewide numbering system independent of course numbers assigned by local California community colleges. A C-ID number next to a course signals that participating California colleges and universities have determined that courses offered by other California community colleges are comparable in content and scope to courses offered on their own campuses, regardless of their unique titles or local course numbers. Thus, if a schedule of classes or catalog lists a course bearing a C-ID number, for example, COMM 110, students at that college can be assured that it will be accepted in lieu of a course bearing the C-ID COMM 110 designation at another community college. In other words, the C-ID designation can be used to identify comparable courses at different community colleges. However, students should always go to <a href="http://www.assist.org">www.assist.org</a> to confirm how each college's course will be accepted at a particular four-year college or university for transfer credit.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The C-ID numbering system is useful for students attending more than one community college and is applied to many of the transferable courses students need as preparation for transfer. Because these course requirements may change and because courses may be modified and qualified for or deleted from the C-ID database, students should always check with a counselor to determine how C-ID designated courses fit into their educational plans for transfer.

Students may consult the ASSIST database at [www.assist.org](http://www.assist.org) for specific information on C-ID course designations. Santiago Canyon College counselors can always help students interpret or explain this information.

Programs of Study

Identifiers and Definitions

Credit

Certificates

Certificates of Proficiency (CERT)
Certificates of Achievement (CA)

A Certificate of Achievement (CA) is 16 units or more (or state-approved as low as 8 units) and is a verification of achievement in a particular academic or occupational area, and it will be included on the official transcript. Certificate of Achievement programs normally includes only those courses which have a direct bearing upon specialized occupational competency since the certificate has the sole objective of immediate employment in a specialized area. For this reason, there is no general education requirement in a certificate program.

A Certificate of Proficiency CERT) is under 16 units and/or is not a state-approved program. This type of certificate is a verification of completion in a particular subject matter. A Certificate of Proficiency will NOT be included on the official or unofficial transcript. Certificate programs include only those courses which focus on vocational skills. The sole objective is employment in a specialized area and for this reason, there are no general education requirements for a Certificate of Proficiency.

Associate Degrees

Associate Degree of Arts (AA)
Associate Degree of Science (AS)

The Associate Degree is a certification of the student’s satisfactory completion of a program of study with a specific major or area of specialization. The Associate Degree is normally completed in two years, compared with the Baccalaureate Degree, which is normally completed in four years. Associate Degrees are commonly conferred by community colleges and are referenced as “local degrees.” They are usually of two types, the Associate of Arts and the Associate of Science. The distinction between the Associate of Arts and the Associate of Science degrees lies in the majors. If the major is in the fields of engineering, physical or biology science, or occupational curricula, the degree conferred is usually the Associate of Science. Otherwise, the Associate of Arts degree is conferred. Ordinarily, Associate Degrees have one of two major purposes. Either the program of study prepares the individual for transfer to a four-year college or university or the program of study is intended to prepare the student for immediate employment.

Associate Degrees for Transfer

Associate Degree of Arts for Transfer (AA-T)
Associate Degree of Science for Transfer (AS-T)

The Student Transfer Achievement Reform Act (Senate Bill 1440, now codified in California Education Code sections 66746-66749) guarantees admission to a California State University (CSU) campus for any community college student who completes an “associate degree for transfer,” an established variation of the associate degrees traditionally offered at a California community college. The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor’s degree in a similar major at a CSU campus. Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system, but not to a particular campus or major. In order to earn one of these degrees, students must complete a minimum of 60 required semester units of CSU-transferable coursework with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the AA-T or AS-T will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated “high unit” major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to a university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements.

Noncredit

Certificates

Certificates of Completion (CC)
Certificates of Competency (COM)

Certificates of Completion are geared toward Career Development.
Short-Term Vocational
Workforce Preparation

Certificates of Competency are geared toward College Preparation.

- Adult Basic Education
- Adult Secondary Education (including High School Diploma and High School Equivalency)
- English as a Second Language

Applied, Creative & Performing Arts

Are you a creative individual? Do you enjoy visual or performing arts? Do you often express yourself through art? The majors in the Interest Area of Applied and Creative Arts help students develop their talents and skills in areas such as visual, applied and performing arts. Check out the list of majors below and explore them based on careers in the field, and degrees and courses offered.

A.A. Degree Major

Control Number:
11911

Curriculum Id:
SCC.ART.AA

The Associate of Arts degree in Art provides students with an opportunity for individual creative stimulus and development. Completion of the associate in arts degree also prepares students to transfer to a four-year institution leading to a baccalaureate degree or into a professional art school. Possible careers in fine arts are art education, interior design, gallery operation, art merchandising, studio artist, illustration, art criticism, computer graphics and animation and related fields.

Cosmetology, AS

A.S. Degree Major

Control Number:
11948

Curriculum Id:
SCC.COSM.AS

The Associate of Science degree in Cosmetology is designed to exceed minimum California Board of Barbering and Cosmetology standards. Students will experience a combination of lecture and laboratory instruction covering various topics such as hairdressing, chemical waving and straightening, haircutting and shaping, hair coloring, scalp and hair treatments, facials, manicuring, and operation of a beauty salon. Proficiencies to be developed include principles of sanitation in compliance with laws and administrative regulations. Courses are offered on an open enrollment basis and students may enroll at any time. Students are required to purchase a basic cosmetology kit.

Mission

The Santiago Canyon College Performing Arts Department is dedicated to creating a student-centered learning environment which fosters the development of students' interests, knowledge, skills and talents in the performing arts. The Performing Arts Department is committed to creating a fertile cultural and communal environment where students, people in the community, faculty and staffs can combine their artistic expressions in performance disciplines (Dance, Music and Theatre) together to synergistically create a Local-Indigenous-Artistic-Language. The Performing Arts Department is working to expand its Performance Arts programs to engage the community at large and encourage through dance, music, and theatre events the public to come onto our campus and make it a cultural center of Orange and surrounding communities.

Demonstrate knowledge of the business of gem stones.

Graphic Design, AS

A.S. Degree Major

Control Number: 11921

Curriculum Id: SCC.ARTGDA.AS

The Associate of Science degree in Graphic Design prepares students for entry into the broad field of visual communication, with an emphasis on the development of problem solving in the practical application of graphic design. These applications include design for the print media, advertising, architectural and environmental graphics, packaging, logos, corporate identity, the web and other electronic media, using both digital media tools as well as traditional hand skills. It also enables students to enter a four-year institution leading to a baccalaureate degree or into a professional art school with a graphic design emphasis.

Music*

Mission

The Santiago Canyon College Performing Arts Department is dedicated to creating a student-centered learning environment which fosters the development of students' interests, knowledge, skills and talents in the performing arts. The Performing Arts Department is committed to creating a fertile cultural and communal environment where students, people in the community, faculty and staffs can combine their artistic expressions in performance disciplines (Dance, Music and Theatre) together to synergistically create a Local-Indigenous-Artistic-Language. The Performing Arts Department is working to expand its Performance Arts programs to engage the community at large and encourage through dance, music, and theatre events the public to come onto our campus and make it a cultural center of Orange and surrounding communities.

Studio Arts, AA-T

A.A. Degree for Transfer

Control Number:
31715

Curriculum Id:
SCC.ARTST.AAT

The Associate in Arts in Studio Arts for Transfer degree provides students with an opportunity to explore studio arts both conceptually and aesthetically by utilizing critical analysis and experimental practice. Possible careers in fine arts are studio artist, art educator, art designer, gallery personnel, museum technician, illustrator, digital media artist, animator and related fields. Successful completion of the transfer degree in studio arts guarantees the student acceptance to a local California State University to pursue a baccalaureate degree in studio arts or a related field.

Behavioral & Social Sciences
Do you get intrigued by history or politics? Do you enjoy learning about different social issues? The majors in the Interest Area of Social and Behavior Sciences prepare students to study areas of human interactions. Check out the list of majors below and explore them based on careers in the field, and degrees and courses offered.

Programs

Anthropology, AA
A.A. Degree Major

Control Number:
11939

Curriculum Id:
SCC.ANTH.AA

The Associate of Arts degree in Anthropology is designed as a program of basic courses for students considering professional careers as archaeologists, ethnographers, linguists, physical anthropologists; for those preparing to become social science teachers in elementary or secondary schools; for such diverse fields as psychology, medicine, law, political science, international relations, economics, or history; and for individuals who plan public service careers in social work, health and welfare programs, and foreign service. Students should consult with faculty members for advice in selecting course offerings best suited to the individual’s particular career objectives. The associate of arts degree prepares the student to move into a curriculum at a four-year institution leading to a baccalaureate degree in these careers.

Criminal Justice*

Mission

The mission of the Criminal Justice Department is to enhance community safety by providing a distinguished criminal justice program to students pursuing occupations in the criminal justice field or seeking knowledge regarding criminal justice issues.

Department Chair

Andrew Gonis

(714) 564-6802

Gonis_Andrew@sac.edu

Course

CJ101 - Introduction to Criminal Justice

Programs

Santiago Canyon College does not currently offer a degree or certificate in this pathway.

Economics, AA

A.A. Degree Major

Control Number:

11943

Curriculum Id:

SCC.ECON.AA

The Associate of Arts degree in Economics is a program of basic courses which enable students to move into a curriculum in a four-year institution leading to a baccalaureate degree. Economics prepares the student for a number of career opportunities such as accounting and marketing in the areas of business, government and teaching.

Learning Outcomes

Describe the economic approach to analyzing and explaining human behavior, communicate using basic economic terminology, interpret relevant economic data, and follow and construct fundamental economic arguments using verbal, graphical, and basic mathematical tools.
Apply analytical reasoning and problem solving skills to formulate predictions and deduce cause-and-effect relationships in hypothetical scenarios and actual real world situations.
Identify study skills, methods, and strategies that are effective for the student's learning style and likely to be effective for the student in further study of economics and other fields.

### Economics, AA-T

A.A. Degree for Transfer

#### Control Number:

32968

#### Curriculum Id:

SCC.ECON.AAT

The Associate in Arts in Economics for Transfer degree provides students with a program of basic courses which enables students to experience a seamless transition into a curriculum at a CSU leading to a baccalaureate degree with career opportunities in economic research, consulting, accounting, and marketing in the areas of business, teaching, and public policy. Economics is the social science that
studies how individuals, businesses, and governments make choices to cope with scarcity and the incentives that influence and reconcile those choices.

Gender, Sexuality, and Women's Studies, AA
A.A. Degree Major

Control Number:
11938

Curriculum Id:
SCC.WMNS.AA

The Associate of Arts degree in Gender, Sexuality, and Women's Studies is a liberal arts major offering interdisciplinary perspectives on the importance of gender and sexualities in relation to issues such as race, class, ethnicity, nationality, religion, age, (dis)ability, labor, multiculturalism, globalization, and the environment. Utilizing a variety of theoretical and methodological approaches in their study of the intersections of gender and sexuality with multiple identities, students are empowered to make theoretically informed personal, social, cultural, and institutional changes. Completion of the associate of arts degree prepares students to move into a curriculum at a four-year institution leading to a baccalaureate degree.

Program Requirements

A.A. Degree Major

Major requirements: 15.0 Units

- GSWS101 - Introduction to Women's Studies 3.0
  AND
- GSWS102 - Women in America: Work, Family, Self 3.0
  AND
- HIST127 - Women in U.S. History 3.0
  AND
- IDS155 - Human Sexuality 3.0
  AND
- SOC220 - Introduction to Gender and Sexualities 3.0

Select three (3) to four (4) units from the following: 3.0 - 4.0 Units

- CNSL116 - Career/Life Planning and Personal Exploration 3.0
  AND
- COMM225 - Gender Communication 3.0
  OR
- COMM225H - Honors Gender Communication 3.0
  AND
- ENGL278 - Survey of Literature by Women 3.0
  AND
- KIN110 - Women's Health Issues 3.0
  AND
- LIBI103 - Advanced Internet Research 1.0
  AND
- PHIL108 - Ethics 3.0
  AND
- POLT221 - Women in American Politics 3.0
Select three (3) to four (4) units from the following:  

AND

**PSYC180 - Psychology of Gender**  
3.0

AND

**SOC130 - Relationships, Marriages, and Family Dynamics**  
3.0

**Total Units**  
18.0 - 19.0

**Learning Outcomes**

Understand the socio-historic context of gender and its intersection with sexuality, race, class, nationality, ability, and other dimensions of differences.

Articulate interdisciplinary perspectives of gender and sexuality through writing, digital, and oral presentations.

Global Studies, CA
Certificate of Achievement

Control Number:

Curriculum Id:

The certificate in Global Studies within the Department of History is intended to prepare a student in the History Department with particular insights into global perspectives and historical experiences such that the student may successfully enter a globally-oriented program of study after transfer to a four-year institution. It provides students access to a concentrated course of study that offers a full scope of knowledge from lower-division survey courses centered on global states and societies. Additionally, it offers exposure to interdisciplinary education, which is central to many programs of study at four-year institutions such as international relations and global studies. Students will complete a total of 12 units, 9 of which will be in the History Department and 3 of which will be in either the Geography Department or Political Science Department. Completion of a History Department Certificate in Global Studies can be completed over one to two years.

A.A. Degree for Transfer

Control Number:
31720

Curriculum Id:
SCC.HIST.AAT

The Associate in Arts in History for Transfer degree provides a basic program to aid a student in thinking critically about one’s self, one’s cultural heritage, social and economic processes, and national and international affairs. Successful completion of the transfer degree in History guarantees the student acceptance to the California State University system to pursue a baccalaureate degree in History or a related field to pursue careers in a variety of government agencies, nongovernmental organizations (NGO), nonprofit organizations (NPO), international government organization (IGO), libraries or museums, and research programs.

**Kinesiology - Sport Studies, AS**

A.S. Degree Major

**Control Number:**

**Curriculum Id:**
SCC.KINS.AS

The Associate in Science degree in Kinesiology - Sport Studies provides students with a qualification in Kinesiology and may also be used in transferring to a CSU or private institution for completion of a 4-year degree. Please consult a counselor regarding specific course requirements for transfer. Upon completion of the Associate in Science degree in Kinesiology - Sport Studies, students will have a general understanding of kinesthetic forms, processes, and structures as they apply to the personal expression and culture of human movement, and be able to apply fitness-based concepts.

Kinesiology - Sport Studies, CA

Certificate of Achievement

Control Number: SCC.KINS.CA

The Certificate of Achievement in Kinesiology - Sport Studies provides students with a qualification in Kinesiology and may also be used in transferring to a CSU or private institution for completion of a 4-year degree. Please consult a counselor regarding specific course requirements for transfer. Upon completion of the Certificate of Achievement of Kinesiology - Sport Studies, students will have a general understanding of kinesthetic forms, processes and structures as they apply to the personal expression and culture of human movement, and be able to apply fitness-based concepts.

Philosophy, AA-T

A.A. Degree for Transfer

Control Number:
32042

Curriculum Id:
SCC.PHILAAT

The Associate in Arts in Philosophy for Transfer degree prepares students to transfer to a four-year institution leading to a baccalaureate degree. Successful completion of the transfer degree in Philosophy guarantees the student acceptance to a California State University to pursue a baccalaureate degree. The transfer degree prepares students who plan to teach philosophy, or who plan to study theology or law, and establishes a foundation for graduate studies in the areas of liberal arts, critical theory, international relations, cognitive science and specialized historical studies.

Social Justice Studies: Chicano, AA-T

A.A. Degree for Transfer

Control Number:

37132

Curriculum Id:

SCC.SOCC.AAT

The Associate of Arts in Social Justice: Chicano Studies for Transfer degree is an interdisciplinary social science and humanities program providing students an understanding of intersectional identities, marginalized groups, social structure, critical race studies, intersectional feminist studies within Chicana/o studies through both a historic and contemporary lens. This degree will enable students to understand and critique systematic oppression within social structures affecting the Chicana/o populations. Successful completion of the transfer degree in Social Justice: Chicano Studies guarantees the student acceptance into the California State University system to pursue a baccalaureate degree in Social Justice or a related field.

Social Justice Studies: Ethnic, AA-T

A.A. Degree for Transfer

Control Number:
37162

Curriculum Id:
SCC.SOCE.AAT

The Associate of Arts in Social Justice: Ethnic Studies for Transfer degree is an interdisciplinary social science and humanities program providing students an understanding of intersectional identities, marginalized groups, social structure, critical race studies, intersectional feminist studies, and ethnic studies through both a historic and contemporary lens. This degree will enable students to understand and critique systematic oppression within social structures. Successful completion of the transfer degree in Social Justice: Ethnic Studies guarantees the student acceptance into the California State University system to pursue a baccalaureate degree in Social Justice or a related field.

### Business, Finance & Management

Have you ever considered starting your own business? Does working with financial information appeal to you? Do you have an eye for marketing? The majors in the Interest Area of Business and Management prepare students to work in fields such as Accounting, Computer Information Systems, Management, Marketing and more. Check out the list of majors below and explore them based on careers in the field, and degrees and courses offered.

### Programs

[3D Printing / Advanced Manufacturing, CC](https://sccollege.elumenapp.com/catalog/all-pages/4a0d0669-c6e1-4cbc-bed7-dd32fba6eb18)
The Certificate of Completion 3D Printing / Advanced Manufacturing is designed to teach students how to use a 3D printer and the technology behind 3D printing. Students will learn about the different plastic filaments that are used, and they will learn techniques for feeding the plastic filament into the 3D printer for optimal performance. Students will also learn about components of the printer, such
as the extruder nozzle, contact sensor, calibration techniques, software, design methods, and reducing defects. An emphasis is placed on familiarizing students with the use of 3D printing in the areas of personal applications, engineering, design and manufacturing. It will also be of interest to all students who would like to learn more about 3D printing and the future applications of this exciting technology.

Advertising, CERT

Certificate of Proficiency

Control Number:

Curriculum Id:
SCC.MKTGA.CERT

The Certificate of Proficiency in Advertising is designed to prepare students for various marketing, sales, and retail store management positions; to assist existing marketing managers and sales professionals in upgrading their skills; and to open up new career opportunities within the marketing field. Program content includes selection and buying of merchandise, advertising, sales, product distribution, customer relations, and pricing. The student will then specialize in one of the option areas: general marketing, professional selling, advertising, or retailing management. The certificate program provides practical skills for the student within specific areas of marketing.

**Business Administration, AS-T**

A.S. Degree for Transfer

**Control Number:**

31365

**Curriculum Id:**

SCC.BUS.AST
The Associate in Science in Business Administration for Transfer degree provides students with a comprehensive business education in the principles and practices of all phases of business. A student graduating with an Associate in Science degree in Business for Transfer will seamlessly transfer to a California State University (CSU) to complete a bachelor’s degree. Completion of the requirements guarantees students the ability to transfer to a CSU school. Students will be able to pursue a baccalaureate degree and prepare to pursue a career in the field of business, industry or government.

Code Enforcement and Compliance, AS
A.S. Degree Major

Control Number:
37073

Curriculum Id:
SCC.PBLCD.AS

This program is designed to provide academic and professional training for code enforcement personnel and/or individuals seeking employment in Public Sector Agencies such as Public works, Planning & Building, Community Development, and any municipal agency that provide code compliance dealing directly with the public. If approved by the State, this will be the first associate degree of its kind within the State of California.

*For Program*
The Associate of Science degree in Computer Information Systems is concerned with the development of procedures which are effective and efficient, computer languages suitable for starting these procedures, and systems for executing the procedures. This may include the ability to write programs in Visual BASIC, C++ or Java and applications such as Excel. Graduates of the program are prepared for employment as trainees in information systems, computer programming, and systems analysis. Completion of the degree provides background for curriculum at a four-year institution such as the California State University system at Fullerton or Pomona. Students intending to obtain a bachelor’s degree in Computer Information Systems should consult the major requirements for upper-division standing listed under the Business Administration major at the school of their choice.

**Computer Information Systems, CA**

Certificate of Achievement

**Control Number:**
21647

**Curriculum Id:**
SCC.CIS.CA
The Certificate of Achievement in Computer Information Systems is concerned with the development of procedures which are effective and efficient, computer languages suitable for starting these procedures, and systems for executing the procedures. This may include the ability to write programs in Visual BASIC, C++ or Java and applications such as Excel. Graduates of the program are prepared for employment as trainees in information systems, computer programming, and systems analysis. Completion of the degree provides background for curriculum at a four-year institution such as the California State University system a Fullerton or Pomona. Students intending to obtain a bachelor’s degree in Computer Information Systems should consult the major requirements for upper-division standing listed under the Business Administration major at the school of their choice.

**Digital Marketing Specialist, CC**

Certificate of Completion

**Control Number:**

36585

**Curriculum Id:**

OEC.DMS.CC
This program is designed to prepare students to determine potential sales of a product or service by researching and analyzing market conditions in local, regional, or national areas. Students will learn methods of digital marketing and distribution, such as gathering information on competitors, prices, and sales. An emphasis is placed on the use of digital marketing technology to create a marketing campaign.

Financial Advisor Preparation, CC

Certificate of Completion

Control Number:
41165

Curriculum Id:
OEC.FAP.CC

This program is designed to prepare students for entry-level employment in the financial services sector, on a pathway to potentially become financial advisors. An emphasis is placed on preparation for the Securities Industry Essentials (SIE) exam, which is the first step in the process of becoming registered to engage in securities business. Topics covered include basic securities industry information, and concepts fundamental to working in the industry, such as types of products and their risks; the structure of the securities industry markets, regulatory agencies and their functions; and prohibited practices. Students will also learn the features of digital assets, such as Bitcoin, and how they can be used in an investment plan.

Learning Outcomes

- Recall concepts fundamental to working in the securities industry, such as types of products and their risks, the structure of the securities industry markets, regulatory agencies, and prohibited practices.

First-Line Supervisor/Manager, Office & Administrative Support Workers, CC

Certificate of Completion
Control Number:
24187

Curriculum Id:
OEC.MGR.CC

The Certificate of Completion in First-Line Supervisor/Manager, Office and Administrative Support Workers is designed for both entry-level and experienced office workers looking for a promotion. Graduates will have expert office skills and in-depth software knowledge. The program provides training in office information systems and communications, work process and organizational performance improvement, business decision-making, project management, and capital and human resource management.

General Marketing, CERT
Certificate of Proficiency

Control Number:
Curriculum Id:
SCC.MKTG.CERT

The Certificate of Proficiency in General Marketing is designed to prepare students for various marketing, sales, and retail store management positions; to assist existing marketing managers and sales professionals in upgrading their skills; and to open up new career opportunities within the marketing field. Program content includes selection and buying of merchandise, advertising, sales, product distribution, customer relations, and pricing. The student will then specialize in one of the option areas: general marketing, professional selling, advertising, or retailing management. The certificate program provides practical skills for the student within specific areas of marketing.

General Office Clerk, CC

Certificate of Completion

Control Number:

24095

Curriculum Id:

OEC.GOC.CC

The Certificate of Completion in General Office Clerk is designed to give students the skills for entry-level positions in the business world. Clerk typist, credit clerk, file clerk, general clerk, receptionist, or data entry clerk positions require limited knowledge of office management systems and procedures. Clerical duties include skills in answering telephones, bookkeeping, typing or word processing, office machine operation, and filing.

Home-Based Business, CC
Certificate of Completion

Control Number:
36371

Curriculum Id:
OEC.HMBB.CC

The Certificate of Completion in Home-Based Business is designed to give students the necessary knowledge and skills to plan, develop, and operate a home-based business. The business operator utilizes the understanding of business concepts, strategies, and technology to shape ideas into opportunities supported by research, data, and business models. Effectively utilizing web and business applications is essential to sustaining the long-term growth of the business.

Web Marketing, CERT
Certificate of Proficiency

Control Number:

Curriculum Id:
SCC.MKTGW.CERT

The Certificate of Proficiency in Web Marketing is designed to prepare students for various marketing, sales, and retail store management positions; to assist existing marketing managers and sales professionals in upgrading their skills; and to open up new career opportunities within the marketing field. Program content includes selection and buying of merchandise, advertising, sales, product distribution, customer relations, and pricing. The student will then specialize in one of the option areas: general marketing, professional selling, advertising, or retailing management. The certificate program provides practical skills for the student within specific areas of marketing.

**Learning Outcomes**

Communicate effectively in conversations, oral presentations, and written work.
Certificate of Achievement

Control Number:
11905

Curriculum Id:
SCC.ASL.CA

The Certificate of Achievement in American Sign Language (ASL) is offered as preparation for developing linguistic competency in ASL and readiness for entering a formal interpreter training program. The certificate indicates skill in the use of ASL for personal communication and an introductory awareness of Sign Language interpreting and other professions working within the Deaf community.

Communication, AA

A.A. Degree Major

Control Number:
11929

Curriculum Id:
SCC.COMM.AA

The associate degree curriculum in communication provides training for communicating and dealing with people. Completion of the associate in arts degree in communication prepares students to: (1) Communicate with clarity and accuracy, and in diverse environments, (2) Act with awareness of self and both the local and global communities of persons, (3) Think critically, creatively and reflectively, and (4) Learn about self and others, academic and professional issues. The associate in arts in communication degree prepares the student to move into a curriculum at a four-year institution leading to a baccalaureate degree, and then into careers in the field of business, industry, government, social service, or education in such areas as teaching, public speaking, consulting, law, announcing, public speaking and public relations.

*For Program
The Associate in Arts in Communication Studies for Transfer degree provides training to build and maintain personal and professional relationships through effective communication. Completion of the transfer degree in Communication prepares students to: (1) Communicate with clarity and accuracy in diverse environments, (2) Act with awareness of self amongst local and global communities, (3) Think critically, creatively and reflectively, and (4) Learn about the self in professional and interpersonal relationships. Successful completion of the transfer degree in Communication guarantees the student acceptance to a local California State University to pursue a baccalaureate degree, in preparation to pursue a career in the field of business, industry, government, social service, and/or education in such areas as teaching, public speaking, consulting, law, announcing, and public relations.

A.A. Degree for Transfer

**Control Number:**

31366
Curriculum Id:
SCC.ENGL.AAT

The Associate in Arts in English for Transfer degree enables students to develop proficiency in written communication and in the understanding of human nature through the study of language and literature. Completion of the transfer degree in English prepares students to (1) communicate effectively, (2) exercise critical thinking and reasoning, (3) read and write to express creativity, and (4) explore the history of significant literary works. Successful completion of the transfer degree in English guarantees the student acceptance to a local California State University to pursue a baccalaureate degree in English or a related field.

Modern Languages, AA
A.A. Degree Major

Control Number:
11925

Curriculum Id:
SCC.MOLA.AA

The Associate of Arts degree in Modern Languages is designed to meet the needs of both the student who wishes to transfer to a four-year institution and the student who wishes to achieve basic conversational ability in the language. Completion of the associate in arts degree prepares students to transfer to a four-year institution leading to a baccalaureate degree and to possible careers requiring proficiency in multiple languages. The associate degree in modern languages requires the following: Completion of a minimum of 21 units total. Completion of a minimum of 13 units in any one language including courses numbered 201 and 202. Completion of 5 units in a second language. Completion of a minimum of 3 units of restricted electives.

Reading*

Mission

The Reading Department at Santiago Canyon College helps students develop reading fluency and strategies necessary for success in their pursuit of personal, academic and career goals. The curriculum, instructional methodologies and campus interactions support students and faculty across disciplines and programs and serve the needs of the community.

Department Chair
Amy Freese
(714) 628-4824

Spanish, AA-T

A.A. Degree for Transfer

Control Number:
32045

Curriculum Id:
SCC.SPAN.AAT

The Associate in Arts in Spanish for Transfer degree is designed for students who wish to transfer to the California State University system. Successful completion of the transfer degree in Spanish guarantees the student acceptance to the California State University campus leading to a baccalaureate degree in Spanish or similar major. The Associate in Arts in Spanish for Transfer Degree develops competence in the ability to understand, read, write and speak Spanish. In addition, it provides the foundation for student to acquire a better understanding and appreciation of the Spanish language and cultures of all Spanish speaking countries. Upon successful completion of the degree, student is also prepared to pursue a career in healthcare, law enforcement, public safety, public service, education, U.S. government, translation and/or interpreting, business, international relations, food services, teaching English in Spanish speaking countries, hospitality, travel industry, and other related fields.

Bilingual Instructional Aide: Spanish, CA

Certificate of Achievement

Control Number:
37913

Curriculum Id:
SCC.EDUCB.CA

The Certificate of Achievement in Bilingual Instructional Aide is designed to prepare a student for an entry-level position requiring bilingual ability, practical skills, and knowledge to work with teachers to support students/individuals in K-12 or adult education settings. This certificate program supports the requirements of federal legislation for Title I schools that all paraprofessionals/instructional aides be “highly qualified.” In addition, the courses introduce the student to career opportunities such as Bilingual Teacher and in other educational settings requiring bilingual abilities.

Child and Adolescent Development, AA-T

A.A. Degree for Transfer

Control Number:
35593

Curriculum Id:
SCC.CHAD.AAT

The Associate in Arts in Child and Adolescent Development for Transfer (AA-T) prepares a student to enter a California State University (CSU) as a junior to complete a baccalaureate degree in Child Development, Human Development, Child and Adolescent Studies, or Early Childhood Education. Upon completion of the AA-T in Child and Adolescent Development, students will have a general understanding of developmental theories as they pertain to the development, care, and education of young children. Students will demonstrate skill and knowledge in preparing developmentally-appropriate environments, curriculum, and assessments as they work professionally with families and team members and qualify for a Children’s Center Permit.

Early Childhood Education, AS-T

A.S. Degree for Transfer

Control Number:
35614

Curriculum Id:
SCC.ECED.AST

The Associate Degree in Science in Early Childhood Education prepares students to transfer into a baccalaureate degree program in Child Development or a related field of study. Students will gain general knowledge and experience in early childhood education topics enabling them to obtain a Child Development Center Permit and meet the standards set forth by the National Association for the Education of Young Children for appropriate teaching practices in early learning settings.

**Early Childhood Leadership and Administration, CERT**

Certificate of Proficiency

**Control Number:**

**Curriculum Id:**

SCC.CDEVECLA.CERT

The Early Childhood Administrative Certificate provides the educational coursework that prepares directors, supervisors, and managers for early childhood work settings serving children from infancy through age 8. Topics include: communication, curriculum, documentation and interpretation, culturally relevant approaches to teaching and learning that include developmentally appropriate,
respectful, supportive relationships with children and families, administration, marketing, and management issues, and self-care and work-life balance related to the operation of center-based early childhood education programs. Fieldwork or field-based assignments may be required. Updated immunizations per state regulations are required. A negative TB test result and state-mandated immunizations are required for certificate completion.

### Program Requirements

#### Certificate of Proficiency

Certificate requirements: 14.0 Units

- CDEV215 - Administration I: Programs in Early Childhood Education (DS6) 3.0
  
  AND

- CDEV216 - Administration II: Personnel and Leadership in Early Childhood Education (DS6) 3.0
  
  AND

- CDEV250 - Adult Supervision and Mentoring in Early Care and Education 2.0
Certificate requirements: 14.0 Units

AND

**COMM100 - Introduction to Interpersonal Communication** 3.0

OR

**COMM100H - Honors Introduction to Interpersonal Communication** 3.0

OR

**COMM101 - Group Dynamics** 3.0

AND

**MKTG113 - Principles of Marketing** 3.0

OR

**MKTG172 - Small Business Marketing and Advertising** 3.0

Certificate requirements: 2.0 - 3.0 Units

An additional course not used above (may not be a course used to satisfy the requirements from above) 3.0

AND

**CDEV221 - Living and Teaching in a Diverse Society** 3.0

AND

**CDEV230 - Child Guidance and Classroom Management** 3.0

AND

**COMM100 - Introduction to Interpersonal Communication** 2.0

OR

**COMM100H - Honors Introduction to Interpersonal Communication** 2.0

AND

**COMM101 - Group Dynamics** 3.0

AND

**MKTG113 - Principles of Marketing** 3.0

AND

**MKTG172 - Small Business Marketing and Advertising** 3.0

Total Units 16.0 - 17.0

**Learning Outcomes**

Demonstrate knowledge of developmentally appropriate curriculum planning, environments, observation and guidance to assess one’s own strengths in working with young children in order to implement quality care for young children in group setting.
Demonstrate basic knowledge of staffing, budgets, enrollment, professional development, and program planning for privately and publicly funded early childhood education programs.

**Curriculum Id:**

SCC.EDUEE.AA
The Associate of Arts degree in Elementary Education is designed to prepare students for transfer to a four-year university traditional or integrated elementary teacher education program. It incorporates elementary teaching subject matter requirements for preparation in subject matter competency as established by the California Teacher Credentialing Commission. The degree program requirements, and the general education recommended electives below, prepare students in content areas for the California Subject Examinations for Teachers (CSET) of Multiple Subjects. Additionally, the degree curriculum may also serve as preparation for paraprofessional positions in the K-12 classroom meeting unit requirements for paraprofessionals as established by the No Child Left Behind Act.

Level I - Early Childhood Exceptional Needs, CERT

Certificate of Proficiency

Control Number:

Curriculum Id:
SCC.CDEVE.CERT

The Level I - Early Childhood Exceptional Needs Certificate of Proficiency is an introductory professional development certificate for students working with children with disabilities and exceptional needs in public (Title.5) and private (Title.22) early intervention, special education, and educational settings that serve children with typical and atypical development and their families. This certificate will focus on defining typical and atypical development, the historical and societal influences, regulations, and the identification and referral processes leading to appropriate intervention. Field trips may be required. All state-mandated vaccinations must be completed.

Total Units 10.0 - 13.0

Learning Outcomes
Examine the learning environment of children with special needs that support emotional well-being limiting classroom induced trauma and promoting positive and prosocial interactions. Students will examine research-based strategies to create motivational and instructional interventions for exceptional learners augmenting their efforts to learn and respond effectively.

Examine the role that effective and culturally responsive collaboration with families, other educators and providers, ancillary services, and personnel from community agencies have on families and children with exceptional learning abilities.

Social Work and Human Services, AA-T

A.A. Degree for Transfer

Control Number:
37164

Curriculum Id:
SCC.CSWHS.AAT

The Social Work and Human Services Associate in Arts Degree for Transfer provides an interdisciplinary exploration of courses and content that prepares students to transfer to a four-year university as either Social Work or Human Services majors. This program allows students to blend theory with fieldwork experience while incorporating critical thinking and self-exploration. Successful completion of this degree will guarantee admission to a California State University that has a similar degree program, but not to a particular campus, and allow students to complete a bachelors degree. Students are strongly encouraged to meet with a counselor to discuss transfer options.

The Certificate of Achievement in Special Education Paraprofessional will prepare the student for an entry-level position requiring practical skills and knowledge to work with persons with disabilities in a variety of educational settings. This certificate program also supports the requirements of federal legislation that all paraprofessionals/instructional assistants/aides in Title schools be “highly qualified.” In addition, the courses introduce the student to career opportunities in special education or other disability-related fields and/or provide major preparation for transfer to four-year institutions to continue a course of study in special education.

Curriculum Id:
OEC.BT.CC

The Behavior Technician Program prepares individuals for a certification exam and frontline work in the field of applied behavior analysis. This is an entry-level program designed to meet training national requirements for certification as a behavior technician. Classes in this certificate will cover defining behavior, teaching methodologies based on Applied Behavior Analysis (ABA), prompting, generalization and maintenance, data collection for skill acquisition, Functional Behavior Assessment, Antecedent and Consequence Interventions, measurement, community and social skills, ethics and professionalism. Students who complete the program will learn the skills required to sit for any of the three nationally accredited behavior technician exams, such as Applied Behavior Analysis Technician (ABAT), Board Certified Autism Technician (BCAT), and Registered Behavior Technician (RBT).

Home Health Aide, CC
Certificate of Completion

Control Number:
Curriculum Id:
SCC.HHA.CC

The home health aide (HHA) program prepares individuals who already hold their Certified Nurse Assistant (CNA) to become Certified Home Health Aides. This course provides an overview of the requirements to transition from CNA to HHA. Instruction builds and expands on the CNA training with increased focus and experience in the areas of patient needs, personal care services, nutrition, cleaning and care in the home. Successful students will be eligible to complete their California Home Health Aide (HHA) Certification.

**Curriculum Id:**
SCC.KIN.AAT

The Associate in Arts in Kinesiology for Transfer degree prepares students to transfer to a four-year institution leading to a baccalaureate degree in Kinesiology. Completion of the degree also provides guaranteed admission with junior status to the CSU system in the Kinesiology major. Please consult a counselor regarding specific course requirements for your transfer institution. Upon completion of the Associate in Arts in Kinesiology for Transfer, students will have a general understanding of the human anatomy, human physiology, and mechanics of human movement, and be able to apply fitness-based concepts.

Learning Outcomes

Demonstrate a general understanding of human anatomy, human physiology, and the mechanics of human movement. Demonstrate practical application of fitness concepts.

Kinesiology - Health Promotion, AS

A.S. Degree Major

Control Number:

Curriculum Id:

SCC.KINH.AS

The Associate in Science degree in Kinesiology - Health Promotion provides students with a qualification in Kinesiology, and may also be used in transferring to a CSU or private institution for completion of a 4-year degree. Please consult a counselor regarding specific course requirements for transfer. Upon completion of the Associate in Science degree in Kinesiology - Health Promotion, students will have a general understanding of Kinesiology and Health Promotion and be able to apply fitness-based concepts.

Kinesiology - Health Promotion, CA

Certificate of Achievement

Control Number:

Curriculum Id:
SCC.KINH.CA

The Certificate of Achievement in Kinesiology - Health Promotion provides students with a qualification in Kinesiology, and may also be used in transferring to a CSU or private institution for completion of a 4-year degree. Please consult a counselor regarding specific course requirements for transfer. Upon completion of the Certificate of Achievement in Kinesiology - Health Promotion, students will have a general understanding of Kinesiology and Health Promotion and be able to apply fitness-based concepts.

Kinesiology - Fitness and Active Lifestyle, CA

Certificate of Achievement

Control Number:

Curriculum Id:

The Certificate of Achievement in Kinesiology - Fitness and Active Lifestyle provides students with a qualification in Kinesiology, and may also be used in transferring to a CSU or private institution for completion of a 4-year degree. Please consult a counselor regarding specific course requirements for transfer. Upon completion of the Certificate of Achievement in Kinesiology - Fitness and Active Lifestyle, students will have a general understanding and appreciation of human movement for personal expression and wellness, and be able to apply fitness-based concepts.

Medical Assistant, CC

Certificate of Completion

Control Number:
36212

Curriculum Id:
OEC.MDAST.CC

The Medical Assistant Certificate is designed to provide the hands-on training, practical experience, and industry support it takes to pursue a professional healthcare career. The program includes practical, real-world experience working with knowledgeable medical professionals and making important industry connections. An emphasis is placed on preparing the student to pass the examination to become a Registered Medical Assistant (RMA).

Medical Billing, CC

Certificate of Completion

Control Number:

24052

Curriculum Id:

OEC.MEDBL.CC

The Certificate of Completion in Medical Billing is designed to give students the necessary knowledge and skills to hold a medical billing position. Students will have practical experience using computers, medical coding, and patient billing software, be familiar with the rules and guidelines of health care plans in order to submit proper documentation for appropriate reimbursement of services rendered, and have the necessary customer service skills to succeed in this field.

Nurse Assistant Acute Care, CC

Certificate of Completion

Control Number:
37805

Curriculum Id:
OEC.RNAAC.CC

The Nurse Assistant Acute Care program is designed to train nurse assistants for employment in the acute care facility. Integrated throughout the program are essential employability skills for the healthcare industry. Content area skills focus on direct patient care of the chronically ill patient. Safety practices in the acute care setting will be emphasized. Students will learn skills associated with neonatal and postpartum care, elimination, and surgery, as well as patient admissions, transfers, and discharges. Students may complete the first course, VMED 070, prior to becoming nurse assistants.

The Certificate of Completion in Nursing Assistant is designed to provide students with the clinical and theoretical knowledge to prepare for the Certified Nursing Assistant (CNA) designation. Students will learn to be part of a healthcare team under the supervision of a nurse. The curriculum is based on the professional standards established by regulatory agencies, and it covers essential topics included in the Nurse Assistant Certification Exam. Due to Health Department regulations, a physical exam, CPR certification, and background check must be completed at the start of the program.

Mission

The mission of Santiago Canyon College’s Continuing Education Adult High School Diploma Program and Adult Basic Education Department is to empower students to learn, to act, to communicate, and to think critically. We are committed to maintaining standards of excellence while helping students maximize their potential by acquiring the necessary skills to reach their personal, educational, and vocational goals as productive, contributing community members.

### Learning Outcomes

Demonstrate how to appropriately ask for accommodations needed in the classroom.

### Personalized

**DON'T SEE YOUR PROGRAM LISTED?**

**TALK TO A COUNSELOR ABOUT BUILDING YOUR OWN!**

Santiago Canyon College offers three different Comprehensive Student Education Plans to personalize a pathway for you. PLAN A is a Comprehensive Student Education Plan for an Associate Degree is designed to have the student receive an AA/AS General Education Degree, after completing 24 units of General Education. PLAN B is a Comprehensive Student Education Plan for Transfer/CSU is designed to the students to complete the required courses to transfer to the California State University System. PLAN C is a Comprehensive Student Education Plan for Transfer under the (IGETC) - Intersegmental General Education Transfer Curriculum, students are to complete the required courses to transfer to either the California State University System or University of California System.

Santiago Canyon College also offers a number of Associate Degrees for Transfer. This degree may not be the best option for students intending to transfer to a particular CSU campus or to a university or college that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements.

### Requirements

The following is required for all AA-T or AS-T degrees:

- Completion of 60 CSU-transferable semester units.
- Minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework. While a minimum of 2.0 is required for admission, some majors may require a higher GPA. Please consult with a counselor for more information.
- Completion of a minimum of 18 semester units in an “AA-T” or “AS-T” major as detailed in the program section of the catalog. All courses in the major must be completed with a grade of C or better (Title 5 § 55063).
- Certified completion of the California State University General Education- Breadth pattern (CSU GE Breadth) (see page 8 for more information); OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern for CSU (see page 9 for more information).
The Student Transfer Achievement Reform Act (Senate Bill 1440, now codified in California Education Code sections 66746-66749) guarantees admission to a California State University (CSU) campus for any community college student who completes an “associate degree for transfer”, a newly established variation of the associate degrees traditionally offered at a California community college. The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor’s degree in a similar major at a CSU campus. Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system, but not to a particular campus or major. In order to earn one of these degrees, students must complete a minimum of 60 required semester units of CSU-transferable coursework with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the AA-T or AS-T will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated “high-unit” major).

Liberal Arts: Arts, Humanities, and Communication, AA
A.A. Degree Major

Control Number:
18317

Curriculum Id:
SCC.LAAHC.AA

The integrated curriculum of the Liberal Arts degree provides a broad exposure to the arts, humanities, sciences, and social sciences, while offering the opportunity for depth of knowledge within an area of emphasis. The program will enable students to develop an appreciation and understanding of the logic, aesthetic, and ethical values that have shaped and enriched our culture and to develop intellectual maturity, a deeper understanding of themselves, others, and the world. The curriculum provides a basic framework for lifelong individual study as well as preparation for university study. These courses emphasize the study of cultural literacy, humanistic activities and the artistic expression of human beings. Students will evaluate and interpret the ways in which people through the ages in different cultures have responded to themselves and the world around them in artistic and cultural creation. Students will also learn to value aesthetic understanding and incorporate these concepts when constructing value judgments. This area of emphasis will prepare students for a variety of majors within the Humanities discipline including Creative Writing, English, Foreign Language, Humanities and Art, and Philosophy. It will also provide lower-division preparation for a wide range of majors within the Communications discipline. Complete general education Plan A (associate degree only, non-transfer), Plan B (CSU-GE Breadth, CSU transfer) or Plan C (IGETC, UC or CSU transfer). Students are advised to meet with a counselor to select a general education pattern most appropriate to their educational goals. Units used to satisfy an area of emphasis may be used to satisfy general education requirements.

Courses M through Z: 0.0 Units

AND

CINE103 - History of Film to 1945 3.0

AND

CINE104 - History of Film From 1945 to Present 3.0

Total Units 18.0

Learning Outcomes

- Think critically in terms of constructing arguments and presenting evidence to support their views through oral, artistic and written communication.
- Understand and articulate how culture, society, and diversity shape the role of the individual within society and human relations across cultures and disciplines.

Liberal Arts: Mathematics and Sciences, AA

A.A. Degree Major

Control Number: 18318

Curriculum Id: SCC.LAMS.AA

The integrated curriculum of the Liberal Arts degree provides a broad exposure to the arts, humanities, sciences, and social sciences, while offering the opportunity for depth of knowledge within an area of emphasis. The program will enable students to develop an appreciation and understanding of the logic, aesthetic, and ethical values that have shaped and enriched our culture and to develop intellectual maturity, a deeper understanding of themselves, others, and the world. The curriculum provides a basic framework for lifelong individual study as well as preparation for university study. The science courses in this category examine the physical universe, its life forms and its natural phenomena. These courses will assist the student in developing an appreciation of the scientific method and encourage an understanding of the relationships between science and other human activities. The mathematics courses will encourage the understanding of mathematical concepts through the development of quantitative reasoning skills. Students are required to complete at least one mathematics course within this area of emphasis. This area of emphasis will provide students with lower-division preparation for a variety of majors within the scientific disciplines, including Astronomy, Biology, Chemistry, Earth Sciences, Geology and Physics and will provide preparation for Mathematics majors. Additionally, students may undertake preparation for Nursing, Kinesiology, Public Health and other Health Science majors. Many of the courses will also assist students in prerequisite preparation for graduate programs within Health Sciences. In addition to the area of emphasis, students are required to complete a general education pattern (Plan A, B, or C). Students are advised to meet with a counselor to select the general education pattern most appropriate to their educational goals. Units used to satisfy an area of emphasis may be used to satisfy general education requirements.

WATR107 - California Water Resources 3.0

Total Units 18.0

Learning Outcomes

Analyze and evaluate scientific and mathematical topics.
Clearly communicate scientific and mathematical reasoning and qualitative problem solving skills using appropriate vocabulary, methodologies and diverse technologies.

Liberal Arts: Multi-Cultural Studies, AA

A.A. Degree Major

Control Number: 18319

Curriculum Id: SCC.MCS.AA

The integrated curriculum of the Liberal Arts degree provides a broad exposure to the arts, humanities, sciences, and social sciences, while offering the opportunity for depth of knowledge within an area of emphasis. The program will enable students to develop an appreciation and understanding of the logic, aesthetic, and ethical values that have shaped and enriched our culture and to develop intellectual maturity, a deeper understanding of themselves, others, and the world. The curriculum provides a basic framework for lifelong individual study as well as preparation for university study. These inter-disciplinary courses promote an appreciation of multi-cultural influences in contemporary society. Courses in this category encourage students to acquire the knowledge, skills and attitude needed to function effectively in a pluralistic democratic society and to interact, negotiate and communicate with peoples from diverse groups in order to create a civic and moral community that works for the common good. This emphasis will provide students with lower-division major preparation for disciplines within the area of study devoted to culture and society. These majors include Chicano Studies, Ethnic Studies, Foreign Language, Global Studies, International Development and Women's Studies. Complete general education Plan A (associate degree only, non-transfer), Plan B (CSU-GE Breadth, CSU transfer) or Plan C (IGETC, UC or CSU transfer). Students are advised to meet with a counselor to select a general education pattern most appropriate to their educational goals. Units used to satisfy an area of emphasis may be used to satisfy general education requirements.

Total Units: 18.0

Learning Outcomes

- Demonstrate knowledge, skills, and attitudes to function positively and productively within a diverse society and in upper division coursework.
- Communicate effectively with individuals and groups from diverse populations.
- Appreciate the multi-cultural influences on our contemporary culture and society.

Liberal Arts: Social and Behavioral Sciences, AA

A.A. Degree Major

Control Number: 18320

Curriculum Id: SCC.SBS.AA

The integrated curriculum of the Liberal Arts degree provides a broad exposure to the arts, humanities, sciences, and social sciences, while offering the opportunity for depth of knowledge within an area of emphasis. The program will enable students to develop an appreciation and understanding of the logic, aesthetic, and ethical values that have shaped and enriched our culture and to develop intellectual maturity, a deeper understanding of themselves, others, and the world. The curriculum provides a basic framework for lifelong individual study as well as preparation for university study. Courses in this category emphasize the connection between human behavior and social, political and economic institutions and promote an understanding of how societies and social subgroups operate. Students will be encouraged to apply critical thinking techniques as they evaluate the way individuals act and have acted in response to their societies. The courses will ensure opportunities for students to develop an understanding of the perspectives and methods of
inquiry used in the social and behavioral sciences. This area of emphasis will provide students with lower-division major preparation for many disciplines within the social sciences including Criminal Justice, Economics, Political Science, Psychology, Sociology and History. Complete general education Plan A (associate degree only, non-transfer), Plan B (CSU-GE Breadth, CSU transfer) or Plan C (IGETC, UC or CSU transfer). Students are advised to meet with a counselor to select a general education pattern most appropriate to their educational goals. Units used to satisfy an area of emphasis may be used to satisfy general education requirements.

Total Units: 18.0

Learning Outcomes

- Think critically about how individuals are influenced by political, economic, cultural and family institutions in various cultural settings.
- Experience using social science methods of data collection and analysis in order to draw logical conclusions about individuals and society.
- Discuss, compare and contrast, and analyze U.S. and world political systems in various historical periods.

STEM

Does using mathematics to solve problems intrigue you? Do you like to figure out how things operate by taking them apart? The majors in the Interest Area of Science, Technology, Engineering and Math prepare students for careers in sciences, engineering, mathematics and more. Check out the list of majors below and explore them based on careers in the field, and degrees and courses offered.

Programs

- Applied Robotics and Embedded Programming, CERT
- Astronomy, AS
- Biology, AS
- Biology, AS-T
- Biotechnology, AS
- Biotechnology Biomanufacturing Technician, CA
- Biotechnology Laboratory Technician: Food Safety, CA
- Chemistry, AS
- Computer Retail Sales and Support, CA
- Computer Science, AS
- Computer Science, AS-T

- Physics, AS-T
- Wastewater/Environmental Sanitation, AS
- Wastewater/Environmental Sanitation, CA
Applied Robotics and Embedded Programming, CERT

Certificate of Proficiency

Control Number:

Curriculum Id:

SCC.CMPRA.CERT

The Certificate of Proficiency in Applied Robotics and Embedded Programming will lead to entry-level employment in computer science, engineering, and other areas where high aptitude in computer programming is recognized. The program prepares students for careers as robotics technicians, engineering technicians, and junior programmers.

### Biotechnology Biomanufacturing Technician, CA

Certificate of Achievement

**Control Number:**
32598

**Curriculum Id:**
SCC.BTMFT.CA
The Certificate of Achievement in Biotechnology Biomanufacturing Technician is designed for students who wish to obtain the skills required to gain employment in industries influenced by biotechnology as well as for incumbent workers seeking career opportunities. Upon completion of this certificate program, students will be eligible to obtain employment as laboratory assistants or biomanufacturing technicians.

SCC.CHEM.AS

The Associate of Science degree in Chemistry provides basic courses for a wide variety of occupations, or prepares the student to enter a curriculum in a four-year institution leading to a baccalaureate degree. The major fields of chemistry are inorganic and organic chemistry, biochemistry, and chemical engineering. These fields provide career opportunities in industry, research, and teaching, and also entry into graduate or professional programs such as medicine, pharmacy and other related health fields.

Major requirements: 24.0 Units
Major requirements: 24.0 Units

CHEM200A - General Chemistry A
5.0

OR

CHEM200AH - Honors General Chemistry A
5.0

AND

CHEM200B - General Chemistry B
5.0

AND

CHEM280A - Organic Chemistry A
5.0

AND

CHEM280B - Organic Chemistry B
5.0

AND

MATH180 - Single Variable Calculus I
4.0

OR

MATH180H - Honors Single Variable Calculus I
4.0

Total Units 24.0

Learning Outcomes

Solve problems that embody the intellectual principles of Chemistry.
Critically analyze, and interpret data to draw valid scientific conclusions and communicate those conclusions in a clear and articulate manner.

*For Program
The Certificate of Achievement in Computer Retail Sales and Support is the first stage of the statewide IT Technician pathway and prepares students to develop their fundamental IT Technician Skills. While completing coursework in customer service, communication, Microsoft Office, and information systems coursework, along with earning the CompTIA A+ industry certification, students gain practical experience as they learn how to succeed in an IT retail environment.

Computer Science, AS-T
A.S. Degree for Transfer

Control Number:
33379

Curriculum Id:
SCC.CMPR.AST

The Associate in Science in Computer Science for Transfer prepares students to move into a curriculum at a four-year institution leading to a baccalaureate degree. Employment opportunities are available as programmers in government, business and education. Successful completion of the transfer degree in Computer Science guarantees the student acceptance to a local California State University to pursue a baccalaureate degree in Computer Science or a related field.

# Earth Sciences, AS

**A.S. Degree Major**

**Control Number:**
11934

**Curriculum Id:**
SCC.ERTH.AS

The Associate of Science in Earth Sciences degree is designed to provide students who need or want broad knowledge of the Earth sciences for their profession, but do not necessarily plan on becoming professional geoscientists. In addition to the geosciences, professions where such knowledge could prove to be useful include environmental sciences, urban planning and land use, transportation, travel and tourism, education, park rangers and other recreation professionals.

Geology, AS-T
A.S. Degree for Transfer

Control Number:
32044

Curriculum Id:
SCC.GEOlast

The Associate in Science in Geology for Transfer degree prepares students for transfer to a four-year college or university to complete a baccalaureate degree in a geoscience major. Geoscientists find employment with environmental companies that clean up and monitor pollution problems. Geotechnical companies also employ geoscientists to evaluate risk from earthquakes, landslides, and other geological hazards. Oil and mining companies employ geoscientists to find new resources. The federal, state, county, and city governments also employ geoscientists for many of the same functions, as well as for geoscience research, and to monitor compliance with environmental regulations. Universities, colleges, and museums offer opportunities for teaching and/or research. Successful completion of the Associate in Science in Geology for Transfer guarantees the student acceptance to a California State University campus to pursue a baccalaureate degree in geology or a related field. While it does not guarantee the student acceptance to the University of California system, it does provide the major preparation needed by geology students transferring to a University of California campus in geology or related fields.

Land Surveying, AS
A.S. Degree Major

Control Number:
11906

Curriculum Id:
SCC.SURV.AS

The Associate of Science degree in Land Surveying provides the student a thorough background in land surveying and mapping in addition to an introduction to collection, manipulation, formatting and mapping of geospatial data. The successful graduate of this program will have the technical expertise necessary for an entry level position in the fields of Geographic Information Systems, Land Surveying, and Digital Photogrammetry. The program also assists those students preparing for the State Land Surveyor-In-Training and Land Surveyor’s Exams. The State Board of Registration for Professional Engineers and Land Surveyors will grant one year of experience credit for students completing an Associate Degree in Survey/Mapping Sciences.

Total Units: 18.0 - 22.0

Learning Outcomes

- Create mathematical models of real world phenomena, apply those models to make predictions about the behavior of the phenomena, apply appropriate problem solving techniques and critically evaluate the veracity of the obtained results.
- Clearly communicate mathematical reasoning and problem solving skills using a variety of formats, diverse technologies, and appropriate mathematical vocabulary and notation.
- Integrate into educational and professional conduct a calm, confident, and ethical approach to mathematical reasoning and problem solving while taking personal responsibility for mathematical success.

### Wastewater/Environmental Sanitation, AS

**A.S. Degree Major**

**Control Number:**
11908

**Curriculum Id:**
SCC.WATRW.AS

The Associate of Science degree in the Wastewater/Environmental Sanitation program is designed to prepare students for careers in the environmental protection field of waste water treatment. This program is also designed to enable those already working in the field to upgrade their skills. Subjects addressed include water quality and public health regulations, conventional wastewater treatment process operation, advanced treatment processes, and wastewater recycling and disposal.

Water Conservation, CERT

Certificate of Proficiency

Control Number:

Curriculum Id:
SCC.WATRC.CERT

This program prepares students for careers in Water Conservation, and certification by the California-Nevada Section of the American Water Works Association as a Water Use Efficiency Practitioner. Required courses explore drinking water distribution systems; regional water supply issues; current water consumption for residential, commercial, industrial, and agricultural customers; common conservation practices; and effective customer education and communication.

Curriculum Id:

SCC.WATRT.AS

The Associate of Science degree in Water Treatment is designed to prepare students for careers in the public health field of drinking water treatment. This program is also designed to enable those already working in the field to upgrade their skills. Subjects addressed include water quality and public health regulations, conventional water treatment processes, advanced water treatment processes, drinking water disinfection practices, and related water mathematics and hydraulic principles.

**Program Requirements**

A.S. Degree Major

Major requirements: 19.5 Units

- ACA061A - Acoustical Ceilings 1.5
- ACA062 - Standard Acoustical Grids 1.5
- ACA063 - Suspended Ceilings 1.5
- ACA064 - Acoustical Soffits 1.5
- ACA066 - Concealed/Glue-Up/Staple-Up Systems 1.5
- ACA067 - Designer and Specialty Trims 1.5
- ACA068 - Metal Pan and Security Systems 1.5
- ACA071A - Orientation 2.0
- ACA071B - Safety and Health Certifications 2.0
- ACA071C - Tool/Equipment Applications 1.5
- ACA074A - Print Reading 2.0
Major requirements:  

19.5 Units  

AND  

ACA079A - Drywall/Acoustical Ceilings 1.5  

Select four (4) courses from the following: 6.0 - 6.5 Units  

ACA061B - Advanced Acoustical Ceiling Layout 1.5  

OR  

ACA061C - Advanced Acoustical Ceiling Installation 1.5  

OR  

ACA065 - Prefab/Sound Panels 1.5  

OR  

ACA072A - Basic Metal Framing 1.5  

OR  

ACA073C - Framing Curves and Arches 1.5  

OR  

ACA074B - Advanced Print Reading 2.0  

OR  

ACA083 - Door/Door Frames 1.5  

Total Units 25.5 - 26.0  

Learning Outcomes  
Be eligible to work as an Acoustical Installer journeyworker.

Apprenticeship Carpentry, Acoustical Installer, CA

Certificate of Achievement

Control Number:
31109

Curriculum Id:
SCC.ACAAT.CA

The Certificate of Achievement in Apprenticeship Carpentry, Acoustical Installer provides the required related and supplemental instruction for interior systems apprentices in the technical skills required in the trade. Successful completion may result in journeyworker status. Interested apprentices should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

**Apprenticeship Carpentry, Concrete, AS**

A.S. Degree Major

**Control Number:**

13235

**Curriculum Id:**

SCC.ACACO.AS

The Associate of Science degree in Apprenticeship Carpentry, Concrete is designed to provide the related and supplemental instruction required for carpentry apprentices. Concrete finishers place and finish concrete floors, driveways, sidewalks, curbs, bridge decks and other concrete structures. They apply architectural exposed, patterned or stamped, broomed and smooth finishes on concrete surfaces.
They are skilled at repairing, waterproofing and restoring concrete surfaces. Successful completion may result in journeyworker status. Interested apprentices should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Carpentry, Drywall/Lather, AS
A.S. Degree Major

Control Number:
11988

Curriculum Id:
SCC.ACADL.AS

The Associate of Science degree in Apprenticeship Carpentry, Drywall/Lather provides the related and supplemental instruction required for interior systems apprentices. Drywall/Lathers install metal stud framing, drywall, and lath according to layout plans, blueprints, and specifications. They frame and construct walls and ceilings to the necessary height and dimensions, and complete the construction for the interior/exterior of a building including the heavy gage framing and application for the exterior of the project. Successful completion may result in journeyworker status. Interested apprentices should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Total Units: 26.0

Learning Outcomes

- Safely operate tools and equipment used by drywall applicators in the construction industry.
- Interpret prints to determine the appropriate use of construction methods and materials consistent with drywall applicator industry standards.

### Apprenticeship Carpentry, Framing, AS

**A.S. Degree Major**

**Control Number:**

13232

**Curriculum Id:**

SCC.ACAFR.AS

The Associate of Science degree in Apprenticeship Carpentry, Framing provides related and supplemental instruction including the technical skills and knowledge required in the trade. Framers work primarily on residential sites installing floor joists, interior and exterior walls, and roof trusses. They may also install exterior doors and windows, cornices, outside wall trim, and roof coverings. Successful completion may result in journeyworker status. Interested apprentices should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Carpentry, Insulator, AS
A.S. Degree Major
Control Number:
35233

Curriculum Id:
SCC.ACAIN.AS

The Associate of Science degree in Apprenticeship Carpentry, Insulator provides the highest quality training to those interested in a
career in the various carpentry fields. This training offers a pathway to career opportunities for the next generation of insulators to meet
the challenges of the rapidly changing technology in our industry, while achieving broadly marketable skills.

Apprenticeship Carpentry, Millwrighting, AS
A.S. Degree Major

Control Number: 11986

Curriculum Id:
SCC.ACAMI.AS

The Associate of Science degree in Apprenticeship Carpentry Millwrighting provide the required related and supplemental classroom instruction in the technical skills and knowledge required in the trade for state-indentured apprentices. The work of the Millwright involves installing conveyor systems, escalators, gas and steam turbines, and generators. Millwrights install and do maintenance on machinery in factories and do much of the precision work in nuclear power plants. Skilled construction Millwright mechanics study and interpret prints or working drawings, and then apply their knowledge and expertise to move, assemble, and erect machinery and rotating equipment. Interested apprentices should contact the Millwright Apprenticeship and Training Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Carpentry, Pile Driver, AS
A.S. Degree Major

Control Number:
31588

Curriculum Id:
SCC.ACAPI.AS

The Associate of Science degree in Apprenticeship Carpentry, Pile Driver is designed to provide the required related and supplemental classroom instruction in the technical skills and knowledge required in the trade. Pile drivers work with pile-driving rigs—those big machines that look like cranes, but shake the ground as they drive metal, concrete or wood piling into the earth during the early stages of construction. Usually, pile drivers are the first workers at the construction site. They drive metal sheet piling to hold back the dirt during excavations. They drive concrete and metal piling as part of the foundation system upon which skyscrapers are built, and they drive wood and concrete piling to hold up docks, wharfs and bridges. In some cases they work on off-shore oil rigs and as commercial divers involved in underwater construction. Pile drivers are also required to install heavy timbers and weld or cut large metal beams. Successful completion may result in journeyworker status. Interested apprentices should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Carpentry, Plastering, CA

Certificate of Achievement

Control Number: 31706

Curriculum Id: SCC.ACAPL.CA

The Certificate of Achievement in Apprenticeship Carpentry, Plastering provides the required related and supplemental instruction for apprentice plasterers in the technical skills and knowledge required in the trade. Plasterers apply various wet materials over surfaces on both exterior and interior walls, ceilings and other surfaces in the construction industry. Successful completion may result in journeyworker status. Those interested should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Carpentry, Tilt-Up, AS

A.S. Degree Major

Control Number:

13233

Curriculum Id:

SCC.ACATT.AS

The Associate of Science degree in Apprenticeship Carpentry, Tilt-Up is designed to provide related and supplemental instruction including the technical skills and knowledge required in the trade. Tilt-up apprentices work with slabs of concrete which, after attaining proper strength, are lifted (tilted) with a crane and set on prepared foundations to form the exterior walls of a building. The erected panels are temporarily braced, connected, and the joints between them caulked. Tilt-up workers may construct and attach the roof structure to the walls to complete the building shell. Tilt-up construction is used for nearly every type of one- to four-story building. Successful completion may result in journeyworker status. Interested apprentices should contact the Carpentry Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Electricity, Industrial, AS

A.S. Degree Major

Control Number:

11985

Curriculum Id:

SCC.AELIN.AS

The Associate of Science degree in Apprenticeship Electricity Industrial provides the required related and supplemental instruction for state-indentured electrical inside wiremen apprentices. They install conduit, electrical wiring, fixtures and electrical apparatus inside commercial buildings and in a multitude of industrial settings. They use many different kinds of tools, ranging from simple one- and two-hand tools to power-assisted tools. Interested apprentices should contact the Orange County Electrical Apprenticeship Training Committee and the Apprenticeship Office at Santiago Canyon College. Successful completion may result in journeyworker status. Meets the state requirements as an electrician trainee program.

**Apprenticeship Electricity, Industrial, CA**

Certificate of Achievement

**Control Number:**

21661

**Curriculum Id:**

SCC.AELIN.CA

The Certificate of Achievement in Apprenticeship Electricity, Industrial provides the required related and supplemental instruction for state-indentured electrical inside wiremen apprentices. They install conduit, electrical wiring, fixtures and electrical apparatus inside commercial buildings and in a multitude of industrial settings. They use many different kinds of tools, ranging from simple one- and
two-hand tools to power-assisted tools. Interested apprentices should contact the Orange County Electrical Apprenticeship Training Committee and the Apprenticeship Office at Santiago Canyon College. Successful completion may result in journeyworker status. Meets the state requirements as an electrician trainee program.

Apprenticeship Electricity, Intelligent Transportation Systems Electrician, AS
A.S. Degree Major

Control Number:
22271

Curriculum Id:
SCC.AELIT.AS

The Associate of Science degree in Apprenticeship Electricity Intelligent Transportation Systems Electrician provides related and supplemental instruction for electrical apprentices. The program is designed to train apprentices in the process of planning, installing and maintaining intelligent transportation signal systems beginning with the rudimentary elements of construction housekeeping and safety, and then continuing on through the more advanced techniques of job planning, layout, installation and start-up. Apprentices will learn to use the National Electrical Safety codes, Caltrans installation plans and specifications and IMSA standards and practices. Apprentices will receive hand-on training as well as instruction in electrical theory. Apprentices who successfully complete this program will be eligible for Intelligent Transportation Systems Electrician Journeyworker status. They will have the skills necessary to work for signatory Intelligent Transportation/Traffic Signal contractors and will be qualified to train apprentices.

**Apprenticeship Operating Engineers, Heavy Equipment/Landscape Operator Engineer, CA**

**Certificate of Achievement**

**Control Number:**

21655

**Curriculum Id:**

Apply Now Request Info
The Certificate of Achievement in Apprenticeship Operating Engineers, Heavy Equipment/Landscape Operator Engineer provides the related and supplemental instruction required for state-indentured apprentices. Heavy Equipment/Landscape Operator Engineers are highly trained, skilled professionals who operate heavy construction equipment on high-rise buildings, roads, and freeways. Interested apprentices should contact the Operating Engineers Apprenticeship Training Trust and the Apprenticeship Office at Santiago Canyon College. Successful completion may result in journeyworker status.

Apprenticeship Power Lineman, AS

A.S. Degree Major

Control Number:
11981

Curriculum Id:
SCC.APLAS

The Associate of Science degree in Apprenticeship Power Lineman provides the required related and supplemental instruction for power lineman apprentices. The work of the power lineman involves installing and maintaining power poles, erecting steel towers, stringing wire, building substations, climbing power poles and installing underground and street lighting systems. It’s highly skilled work that
requires a great deal of concentration, dexterity, and knowledge. Interested apprentices should contact the California-Nevada Joint Apprentice Training Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Surveying, Chainman, AS

A.S. Degree Major

Control Number: 13230

Curriculum Id: SCC.ASVCN.AS
The Associate of Science degree in Apprenticeship Surveying Chainman prepares students for a career in surveying and provides the related and supplemental instruction required for apprentice surveyors. Successful completion leads to journeyworker certification. Employers include land surveying and civil engineering firms, and general construction contractors throughout Southern California. Those interested should contact the Southern California Surveying Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

Apprenticeship Surveying, Chief of Party, AS
A.S. Degree Major

Control Number: 11990

Curriculum Id: SCC.ASVCF.AS

The Associate of Science degree in Apprenticeship Surveying, Chief of Party prepares students for career advancement in surveying. If combined with appropriate field experience, completion of the program may lead to employment as party chief and eventually to professional California state licensing as a land surveyor. The Chief of Party leads the work of a survey party in surveying Earth’s surface to determine precise locations and measurements. They are responsible for checking the accuracy of the survey party’s work, making accurate measurements, and solving survey problems. Those interested should contact the Southern California Surveying Apprenticeship Committee and the Apprenticeship Office at Santiago Canyon College.

WKPR600 - Attitudes for Success 36.0
AND
WKPR601 - Money Matters 36.0

Total Hours 72.0
Learning Outcomes

Explain how to achieve wellness through physical, emotional, social, intellectual and occupational development.

Create a personal budget.

Working with Students with Disabilities, CC

Certificate of Completion

Control Number:
38400

Curriculum Id:
OEC.WSD.CC

This program provides students with classroom discussion about creating an inclusive classroom for students with disabilities by developing an understanding of different approaches in teaching. It also provides students with in-class strategies to help all students succeed.

COURSE DESCRIPTIONS

Course descriptions include the course discipline, number, title, units, class hours, requisites, and any applicable additional information such as cross-listings, C-ID, field trips, material fees, open-entry/open-exit, pass/no pass, repeatability, transferability, and credit by exam.

Course Number

100-299:

Courses numbered 100-299 are transferable to California State University (CSU) or the University of California (UC) and are applicable to the associate degree. See Transferability of Courses on page 46 for additional information.
Honors: Courses numbered 100 and above followed by the letter "H" are offered as part of the Santiago Canyon College Honors Program.

001-099:
Courses numbered 001-099 are not transferable to California State University (CSU) or the University of California (UC). They are applicable to the associate degree unless the course number is preceded by the letter "N".

N01-N99:
Courses numbered N01-N99 are not transferable to California State University (CSU) or the University of California (UC) and are not applicable to the associate degree. These courses count toward the course load.

California State University (CSU) or University of California (CSU/ UC): Identifies courses that are transferable to California State University (CSU) or University of California (UC). A credit limitation may exist for some courses that transfer to UC. See page 46 for additional information. Course Identification Numbering System (C-ID): Identifies a lower-division, transferable course commonly articulated between California Community Colleges and four-year universities.

Credit by Exam

Experimental Courses

Grade Pass/No Pass

Prerequisites, Corequisites, and Advisories

Repeatable Courses

Accounting*

Mission
Prepare Accounting students for jobs in the field OR transfer to four-year institutions.

Department Chair
Steven Deeley
(714) 628-4739
Deeley_Steven@sccollege.edu

Course

ACCT035 - QuickBooks
ACCT100 - Accounting for Small Business
ACCT101 - Financial Accounting
ACCT102 - Managerial Accounting
ACCT204 - Managerial Cost Accounting
ACCT205 - Intermediate Accounting I
Programs

American College English*

Mission

The courses in the ACE Department develop greater fluency in English as a second language students so that they can succeed in their academic, career and personal pursuits.

Department Chair

Pam Hilburn
(714) 628-4782
Hilburn_Pamela@sccollege.edu

Course

ACE091 - Improving Oral Expression and Pronunciation
ACE094 - Academic Listening and Speaking 1
ACE095 - Academic Listening and Speaking 2
ACE104 - Academic Reading and Writing 1
ACE106 - Academic Reading and Writing 2
ACE116 - Introduction to Academic Composition

American Sign Language*

Mission

The Languages Department at Santiago Canyon College offers quality languages experiences to expand awareness and understanding of cultural diversity, and of other worldviews through languages learning. The department is dedicated to providing timely university transfer courses, associate degree programs, certificates and community services learning activities. The Languages Department directs its efforts to help students be better world citizens.

Department Chair

Charlie Malone
(714) 628-5068
Malone_Charlie@sccollege.edu

Course

ASL110 - American Sign Language I
ASL111 - American Sign Language II
ASL113 - Introduction to Interpreting for the Deaf
ASL116 - Introduction to Deaf Studies
ASL210 - American Sign Language III

Anthropology*

Art*

Mission

The Santiago Canyon College Art Department is committed to creating a student-centered learning environment that encourages the development of students' aesthetic vision, knowledge of historical and contemporary art developments, awareness of the current art climate on a regional, national and international scale, and technical skills in all disciplines of the visual arts. The Department prepares students for further study and/or employment in the visual arts and related fields. (Reviewed Fall 2011)

Biology*

Mission

The mission of the Santiago Canyon College Department of Biology is to offer a comprehensive program of courses that promote interest in and understanding of the biological sciences. We will aid students in achieving their educational and career goals as they relate to the field of biology through excellent teaching and innovative laboratories. We will strive to provide numerous, diverse, and engaging opportunities for students to explore the science of life in all its complexity and diversity. It is our intention to enable students to acquire a basic knowledge of the theories of biology and to be able to critically evaluate scientific information.

Education*
Mission
The [Teacher] Education Department at Santiago Canyon College provides seamless TK-12 education pathways to high school and community college students through a robust integrated academic and field based learning curriculum of coursework, certificate and degrees. The Department's curriculum reflects entry-level preparation for students pursuing a career in TK-12 teaching with special emphasis on Special Education, Bilingual Education, CTE teaching and STEM teaching. All curriculum is designed with the end result in mind through partnerships with local high schools for CTAP articulation and pathway development for students matriculating students to SCC as well as partnerships and up to date articulation with local university teacher education programs. We are committed to providing students with culturally relevant coursework for certificate and degree pathways that are current in the field of teacher preparation and that lead to successful completion, gainful employment and/or transfer to the university.

Real Estate*

Mission

The mission of the Real Estate Program at Santiago Canyon College is to respond to the educational needs of students who are interested in a career in real estate, appraisal, or a real estate related career, by providing programs and services that reflect this need. The core courses are approved by the Department of Real Estate and satisfy licensing requirements for the Salesperson and Broker.
licenses. Our Appraisal classes are also approved by the Bureau of Real Estate Appraisers for Appraisal licensing. We will strive to provide numerous, diverse, and engaging opportunities for students to explore the real estate field and the many career paths that can be followed.

Spanish*

Mission
The Santiago Canyon College Spanish Department is committed to offering courses which provide quality language and cultural experiences which expand awareness and understanding of cultural diversity and other world views. In addition, all Spanish courses foster students’ acquisition of the language and progress in reading, writing, speaking and listening skills. It is also our commitment to offer an array of transfer level and enrichment courses to support students in meeting their educational, career or personal goals. Furthermore, our department takes pride in promoting opportunities for learning beyond the classroom by offering extracurricular cultural enrichment events and activities which also allow students to cultivate connections in and outside the classroom.

Continuing Education Courses

Open entry/open exit courses are noted in the course descriptions. Students may enroll at any time in these courses and begin class immediately, provided there is space available. Students progress at their own rate and may exit from the class at any time upon satisfactory completion of the required work.

All credits listed are high school credits. Ten high school credits represent a minimum of 144 hours of study. In open entry/open exit courses, students earn credits by meeting individual competency-based objectives.

Some courses offer a certificate of course completion upon completion of all course requirements. A certificate of course completion does not appear on the official transcript.

Completion of Career Development and College Preparation (CDCP) program coursework appears on the student transcript. In addition, the student may request an official program certificate be issued for successful completion of all CDCP program coursework.

The class schedule should be consulted for current offerings.

Adult Basic Education*

Mission

The mission of Santiago Canyon College’s Continuing Education Adult High School Diploma Program and Adult Basic Education Department is to empower students to learn, to act, to communicate, and to think critically. We are committed to maintaining standards of excellence while helping students maximize their potential by acquiring the necessary skills to reach their personal, educational, and vocational goals as productive, contributing community members.

Continuing Education Information

https://sccollege.elumenapp.com/catalog/all-pages/4a0d669-c6e1-4cbc-bed7-dd32ba6eb18
Mission Statement
The mission of the continuing education division is to offer a variety of free, noncredit classes, programs, and services that enable students to maximize their potential by acquiring the necessary skills to reach their personal, educational, and vocational goals so that they can benefit from, and contribute to changing American society as productive, active members of their communities.

Santiago Canyon College
Orange Education Center
1465 North Batavia Street
Orange, CA 92867
714-628-5900

The Santiago Canyon College Orange Education Center is the major adult education service provider in the Orange area. In addition, there are other sites in which instruction is offered. These facilities provide a broad-based program that meets the educational needs of the community. Open entry/open exit classes allow students to register anytime during the school year and provide maximum flexibility with course schedules. For the current class schedule, please visit the website at sccollege.edu/oec or call the Orange Education Center at 714-628-5900.

Classroom Instruction
Traditional and individualized, self-paced classroom instruction is offered in academic, vocational, and basic skills areas. The open entry/open exit format allows flexibility in planning.

Convenient Community Locations
Day and evening community locations make classes conveniently available to all adults in the district.

Weekend Classes
To meet the needs of working adults, continuing education classes are also offered Fridays and Saturdays.

Continuing Education Instructional Programs
INSTRUCTIONAL PROGRAMS

Adult Basic Education (ABE)
Assists students in strengthening their skills in reading, writing, spelling, mathematics, English usage, and grammar. ABE provides students with a strong educational foundation that can be used as a basis for employment preparation, entrance into high school subjects, GED preparation, HiSET preparation, and college and vocational programs. In addition, Native Language Basic Skills for Adults assists students in acquiring basic skills in their native language in order to facilitate the transition to beginning English as a Second Language courses. This program focuses on reading, math, and writing skills, as well as classroom and community coping skills.

Adult High School Diploma
Accommodates adults with varied responsibilities, backgrounds, and needs who desire to earn a high school diploma or California High School Equivalency Certificate (GED/HiSET). Individualized instruction is provided so that students may take classes that fit their personal schedules, thus enabling them to work and complete high school credits at their own pace.

Short-Term Career Education
Provides employment preparation focusing on specific career technical areas and on general workforce development skills. Provides certificate programs in occupational areas with high employment potential.

Citizenship
Introduces students to U.S. citizenship and the naturalization process, U.S. history, and government. Prepares students for the U.S. Citizenship and Immigration Services USCIS interview and exam.
English as a Second Language (ESL)
Provides English language instruction for speakers of languages other than English. Offers instruction in the beginning through advanced levels. Core classes integrate the acquisition of skills in speaking, listening, reading, and writing. Specialty classes focus on further improvement of specific skills, such as conversation, pronunciation, writing, civics, or employability. Provides certificate programs for successful completion of levels; beginning through advanced, as well as specialty courses.

Health and Safety
Provides courses specifically designed to offer lifelong education to promote the health, safety, and well-being of individuals, families, and communities.

Older Adults
Offers courses designed to meet the specific needs of older students in a variety of areas, including music, cooking, health & wellness, manipulative skills, and discussion seminars. Many classes are offered in facilities specifically serving older adults.

Parent Education
Provides courses that emphasize intellectual, physical, and emotional aspects of parenting.

Substantial Disabilities
Provides courses designed to address the educational limitations of persons with a verified physical or mental impairment that substantially limits one or more major life activities.

Workforce Preparation
Provides Workforce Preparation courses focusing on the basic skills of speaking, listening, reading, writing, mathematics, decision-making, and problem-solving skills that are necessary to participate in job-specific technical training.

PLEASE NOTE: Some workforce preparation courses are designed to meet the specific needs of adults with disabilities, including physical, intellectual, developmental, and learning disabilities.

Admissions and Student Services
Who May Attend
Persons 18 years of age or older, or high school graduates, are eligible to enroll in continuing education classes. Students currently enrolled in secondary schools who wish to attend continuing education classes may be admitted by special request of the secondary school and approval from continuing education administration.

Where to Register
Santiago Canyon College
Orange Education Center
1465 North Batavia Street
Orange, CA 92867
714-628-5900

Santiago Canyon College
OEC Provisional Education Facility
1937 West Chapman Avenue, 2nd Floor
Schedule of Classes
A schedule of classes is prepared each semester which includes general information, courses offered, hours, locations, and rooms. Schedules are available before registration each semester in each of the major continuing education sites and Rancho Santiago Community College District campuses. Registration is ongoing, provided there is space available in classes.

Open Enrollment
The policy of the Rancho Santiago Community College District and Santiago Canyon College is that, unless specifically exempted by statute or regulation, every course, course section, or class, reported for state aid, wherever offered and maintained by the college, shall be fully open to enrollment and participation by any person who has been admitted to the college, provided there is available space in classes.

Class Discontinuance Policy
Any class which does not have a total of at least 20 students enrolled by the beginning of instruction may be discontinued. Any class which does not maintain satisfactory attendance may be discontinued at any time during the term.

Student Identification Card
Each student may obtain a student identification card upon request. For more information, please call OEC Admissions and Records Office 714-628-5900.

Textbooks and Supplies
ESL textbooks are available for purchase (cash or check, no credit cards) at the OEC Provisional Education Facility Bookstore. A complete list of ESL textbooks required for each class, along with their costs, is posted. Supplementary books and supplies are also available. Phone 714-628-5924 for additional information. Students in classes held at Santiago Canyon College (SCC) can purchase textbooks and supplies at the Hawk Bookstore, located in A-101. For more information, phone 714-628-5900 or go to www.hawkbookstore.com.

Testing
A wide variety of academic, aptitude, vocational, interest, and other assessments are provided to assist the adult in educational and career planning. Diagnostic assessment tests are administered to advise placement for courses in English as a Second Language, Adult Basic Education, and High School Subjects.

Counseling and Guidance
Counselors are available to provide academic, career and personal counseling in a confidential office setting. Students may seek counseling for many reasons, including the planning of educational objectives, obtaining information about employment and job skills, resolving personal and family problems, examining aptitudes, interests, and achievement, finding new careers and vocational directions, and learning to adjust in a new country. Students enrolling in courses leading toward an adult high school diploma must see a counselor upon registering. Counselors are available by appointment or on a walk-in basis. For more information or to arrange an appointment, please call 714-628-5929.

Scholarships
Several scholarships are made available to continuing education ESL students and high school graduates. Selection of scholarship recipients will be based upon the recommendation of teachers and counselors, financial need, academic excellence, attendance, and minimum enrollment standards. For more information, call the Counseling office at 714-628-5929.

Photography
Santiago Canyon College, a non-profit California Community College, reserves the right to use photography and video images of students and visitors, age 18 and older, taken on our property and at college-sponsored events for marketing and promotional purposes. Objection to the use of an individual's photography may be made in writing to Public Affairs and Publications, RSCCD District Office, 2323 N. Broadway, Suite 408, Santa Ana, CA 92706.

Disabled
Students Policy The College will make reasonable accommodations for individuals with disabilities. To request services, contact the office of Disabled Students Programs and Services at 714-628-4860.

Career Services
Career information, materials, interest inventories, and counseling are provided for interested students. Appointments may be made by calling 714-628-5942.

Associated Student Government
The Associated Student Government was established to provide students with government and leadership experience. Opportunities are available to become involved as student representatives. Students will learn firsthand about group dynamics and decision making, event programming, and running effective meetings. Additionally, there are student clubs to join. For more information, please call 714-628-5947.

Child Development
A child development program center is available at Santiago Canyon College. There is no fee for eligible families. Arrangements may be made by calling 714-628-6952.

Transcripts
Students may obtain an official transcript of records by filing in person or mailing a request to the Admissions and Records Office, OEC Provisional Education Facility, 1937 West Chapman Avenue, 2nd Floor, Orange, CA 92868. The first two in-person transcripts will be issued without charge, thereafter, a $3 charge will be assessed for each additional transcript. All official transcripts are copies of the student's permanent record in the Office of Admissions and Records. Only records prepared and issued directly from that office will be considered official or certified for accuracy.

Policies Governing Students
Attendance
Students are expected to attend all class meetings. Students who are enrolled but absent on the first class session may be dropped. A student may also be dropped for excessive absences.
Students are expected to demonstrate academic progress throughout each course. Failure to meet academic goals and contracts may result in a student being dismissed from the program for more than one semester. Reentry enrollment is contingent upon a contractual agreement with the college administration.

Standards of Student Conduct

Guidelines for Student Conduct are set forth in the California Education Code, California Administrative Code, Title V, policies of the Board of Trustees, and all civil and criminal codes. Students enrolling in district educational programs assume an obligation to obey state law and district rules and regulations governing the conduct of students.

Standards of Conduct for Computer Classrooms and Computer Labs

In accordance with Board Policy (BP 3720) and Administrative Regulation (AR 3720) and in an effort to extend the life of the hardware, comply with the copyright laws, and adhere to appropriate computer network conduct and usage, standards of conduct are required of all students using computer classrooms, computer labs, and the wireless network.

Academic Honesty

Students at Santiago Canyon College are expected to be honest and forthright in their academic endeavors. To falsify the results of one’s research, to steal the words or ideas of another, or to cheat on an examination corrupts the essential process by which knowledge is advanced. Academic dishonesty is seen as an intentional act of fraud, in which a student seeks to claim credit for the work or efforts of another without authorization or uses unauthorized materials or fabricated information in any academic exercise. We as an institution, also consider academic dishonesty to include forgery of academic documents, intentionally impeding or damaging the academic work of others, assisting other students in acts of dishonesty, or coercing students into acts of dishonesty.

Disciplinary Action

Violations to any tenets within the standards of student conduct are subject to the following disciplinary actions: warning, reprimand, probation, restitution, removal, suspension, or expulsion. Disciplinary actions may be imposed singly or in combination.

Grading Standards

A - Superior - 4 grade points per unit
B - Above Average - 3 grade points per unit
C - Average - 2 grade points per unit
D - Below Average - 1 grade point But Passing per unit
F - Fail - 0 grade points (but counted in GPA)
CIP - Currently - In Progress 0 grade points
P - Pass - 0 grade points
COM - Completed - 0 grade points
SP - Satisfactory Progress - 0 grade points
NP - No Pass - 0 grade points

Credit by Examination

Credit by examination may be earned only for courses that are specifically designated as courses that are eligible for credit by examination. A student cannot take credit by examination to improve a substandard grade. High School Diploma Courses Information for receiving credit by examination may be obtained from a continuing education counselor.

High School Subjects:

English 066, 067, 084, 098
Mathematics 156, 157, 159, 163, 164, 165, 166 Science 168, 169, 190, 191, 192, 193
Social Sciences 215, 218, 219, 222, 229, 230

Math Continuing Education 206, 255

Career Technical Business Skills Courses Examinations are offered on specific dates. Students who demonstrate course competency are awarded a passing grade.

Vocational: Business 118, 119, 258, 260, 261, 262, 304 Food 005

Procedures for Student Complaints Regarding Grades

Education Code 76224 states: “When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor for the course; and the determination of the student’s grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetence, shall be final.”

Procedure

Students shall meet with an instructor to discuss the grade.

If the issue is not resolved, and the student believes that the grade is based on mistake, fraud, bad faith, or incompetency (EC 76224), an appeal in writing may be made to the Area Dean of Instruction and Student Services. Forms of written appeal may be found in the office of the Area Dean of Instruction and Student Services.

The student may be requested to set up an appointment with the Dean of Instruction and Student Services to discuss the written complaint.

The Dean of Instruction and Student Services will review the allegations and may consult with the instructor.

The Dean of Instruction and Student Services will review the issue and will notify the student and instructor in writing of the decision.

The decision of the Dean of Instruction and Student Services is final.

Complaint Procedures for Students

Students may file a complaint when they believe they have been deprived of a right granted to students by the Board of Trustees in any of the policies or regulations of the Rancho Santiago Community College District. The purpose of these complaint procedures is to resolve differences as fairly and expeditiously as possible while preserving the rights of students and staff members.

Definitions

Days: number of days refers to the days when the District offices are open.

Committee: Continuing Education Student Complaint Committee.

Procedure

Students shall first confer with the staff member who took action or made the ruling to which they object no later than ten days following the event which prompted the complaint. The Area Dean of Instruction and Student Services or designee will assist the student in arranging an appointment with the staff member.

If the difference is not satisfactorily resolved, the student shall confer with the staff member’s supervisor. The Area Dean of Instruction and Student Services or designee will assist the student and staff member’s supervisor.

If the complaint is unresolved, the student may file a written statement setting forth the nature of the complaint on the prescribed form with the Area Dean of Instruction and Student Services no later than ten days after conferring with the staff member’s supervisor.

The complaint form shall be completed in full and shall include a full description of the complaint, times, dates and pertinent facts, and the remedy sought by the student.

A Student Complaint-Staff Response form will be sent to both the staff member and supervisor for completion.

The Area Dean of Instruction and Student Services shall forward the completed forms to the Continuing Education Student Complaint Committee chairperson for review and recommendation. The committee shall have the power to make an appropriate investigation of the complaint and shall state the findings and make a recommendation.

If the complaint is sustained by the committee, it will recommend appropriate action for relief of the complaint and communicate this in writing to the staff member to whom the complaint was directed. If the staff member accepts the recommended action and if the student who filed the complaint is satisfied with the action, the complaint shall be considered resolved and closed.
If the findings of the committee do not sustain the complaint, the committee shall communicate this finding in writing to the student who filed the complaint. If the student accepts this finding, the complaint shall be considered resolved and closed.
If no resolution of the complaint is obtained under (g.) or (h.) above, the Area Dean of Instruction and Student Services shall forward the complaint together with the findings of the committee to the Chancellor for review and decision.
If this decision does not resolve the complaint in the opinion of the student, the Chancellor shall present the case to the Board of Trustees with the findings and recommendations. If the Board finds that the complaint is invalid, the Chancellor's recommendation shall stand in the final resolution. If the Board finds that the complaint is valid, it shall instruct the Chancellor as to how the complaint shall be resolved, and the Chancellor shall implement the Board's decision.

Student Records
Under the guidelines of the Family Educational Rights and Privacy Act of 1974, student records are confidential, and privacy is to be scrupulously maintained.

Right to Review and Challenge Records:
Under the provisions of the U.S. Department of Health, Education, and Welfare, students have the right to inspect and review any of the following files:
– admissions/records
– data processing
– financial aids
– placement
– veterans

After review and exploration, students may challenge any information relating to them if they believe the information to be inaccurate, misleading, or otherwise in violation of their rights of privacy or other rights. Forms for a challenge are available in the Area Dean of Instruction and Student Services office. District staff or other professionals who have a legitimate educational interest such as counseling and carrying out the normal operations of the educational program have access to student records. Any student has the right to file a complaint with the U.S. Department of Health, Education, and Welfare concerning alleged failure of the institution to comply with provisions above or Section 438 of the General Provision.

High School Petition Students
Secondary school students who wish to take course work in Rancho Santiago Community College District Continuing Education and have it transferred to another school must present a completed Petition for Registration in order to be considered for admission. Failure to comply fully with all conditions listed on the form may result in the immediate revocation of the petition and dismissal from Continuing Education classes.

Grading and Transfer of Credits: Students must satisfactorily complete all course requirements including exams, projects, papers, and attendances before credit or grades can be issued. Students are responsible for planning schedules and progress in order to earn credits in time to meet graduation deadlines in other school districts.
Conduct: A student's conduct must be productive, responsible, and courteous at all times. Unacceptable behavior may result in the immediate revocation of this petition and dismissal from class. Unacceptable behavior includes, but is not limited to, excessive talking, noncompliance with rules, failure to follow instructor directions, falsification of records, cheating or assisting others to cheat, destruction or theft of school property, disruption of classes, violence, or being under the influence of drugs or alcohol.

Special Rules, Regulations, and Student Obligations
Because of special program characteristics, the following programs must adhere to special rules, regulations, and student obligations beyond the Standard Guidelines for Student Conduct adopted by the Rancho Santiago Community College District. Students enrolled in any of the following programs are obligated to perform within those special program guidelines in order to maintain class attendance: any community-based organization or governmental agency with which the Rancho Santiago Community College District cooperates in a program offering.

Family Education Rights and Privacy
As required under the provisions of the Family Education Rights and Privacy Act of 1974, the Rancho Santiago Community College District will make public without student consent only certain directory information. This information consists of the following: a student's name; city of residence; a major field; participation in officially recognized activities and sports; weight, height, and age if a member of an athletic team; dates of attendance; degree and awards received; and the most recent previous educational institution or agency attended by the student. A student may request the Admissions and Records Office to withhold this information. Such requests must be in writing and submitted each semester.

Use of Public School Facilities for Adult Classes

Alcoholic Beverages and Controlled Substances: Both by policies instituted by local Boards of Education (Garden Grove Unified School District, Orange Unified School District, Rancho Santiago Community College District, and Santa Ana Unified School District) and California State Law specifically prohibit possession of alcoholic beverages and controlled substances on school premises at any time, by any person, regardless of age. Regulations also prohibit the use of alcoholic beverages at school events, whether on or off the campus, or the appearance at school events while under the influence of alcoholic beverages and/or controlled substances. The penalty for violation of these regulations is immediate suspension from school, followed by expulsion if imposed by the Board of Trustees. Additional penalties may be imposed by law enforcement agencies.

Smoking: Provisions of the Uniform Fire Code, Article 29, Section 29.06, Smoking Activity on School Property, state: "It shall be unlawful for any person or persons to engage in any smoking activity or to possess any flaming or glowing object or cause to be lighted any substance in any classroom or on school property at any time except in areas authorized by the local Board of Education." The only areas authorized for smoking are outside the school buildings in a designated smoking area. There is to be No Smoking by anyone in any of the classrooms at any time. Proper containers are provided in the smoking areas for the disposal of cigarettes.

Food and Beverages: Food and beverages are not to be brought into the classrooms at any time. Proper containers are provided for the disposal of trash in designated areas.

Adult High School Program

General Information

Rancho Santiago Community College District offers a comprehensive adult high school diploma program for adults who wish to continue their formal education. The Adult High School Diploma Program at Santiago Canyon College is approved by the California Community Colleges Chancellor's office. Santiago Canyon College is accredited by the Accrediting Commission for the Western Association of Schools and Colleges (Approval #31601). Diplomas are issued by the Rancho Santiago Community College District to students who complete the required course of study and demonstrate proficiency in basic skills. Graduation ceremonies are traditionally held each spring at Santiago Canyon College. Students may complete the diploma program at any time during the year and receive verification of completion of requirements at that time. Courses designed to meet adult high school graduation requirements are offered in both the traditional classroom setting or in open entry/open exit self-paced individualized learning. Elective credits may be earned in continuing education classes offered in a wide variety of locations throughout the community as listed in the schedule of classes published each semester.

Counseling and Guidance

Students must see a counselor to prepare an educational plan, discuss academic and career goals, and regularly update their educational plans. Counselors are available by appointment or on a walk-in basis. For more information or to arrange an appointment, please call 714-628-5929.

Registration

The Adult High School Diploma Program is available at the Santiago Canyon College. Students may obtain a schedule of classes and enroll at any time during the fall, spring, and summer semesters. For information, call 714-628-5929.

To qualify for an adult high school diploma, the candidate must meet the following requirements:

The Course of Study - Adult High School Graduation Requirements

The high school diploma requires a total of 160 credits taken from the following:

- **English** - 40.0 (a maximum of 10 credits of reading; must include at least one composition course)

- **Mathematics** - 20.0 Natural Sciences 20.0 (must include both a biological and a physical science course)
Social and Behavioral Sciences (must include U.S. History, 30.0 American Government, Economics, World History, Geography, and Culture)

Humanities - 10.0
Electives - 40.0
TOTAL 160.0

Limitations on Enrollment
A student who has received a passing grade (A, B, C, D) for a high school course may not re-enroll in the same course. A student who has graduated from the Adult High School Diploma Program may not enroll in Adult Basic Education (ABE) or high school courses without written permission from an administrator.

Residency
Residency Requirement: At least 20 of the 160 required high school credits must be completed in residence at Santiago Canyon College. Only 5 of the 20 residency credits may be challenged.

Petition for Graduation & Catalog Rights
A petition for graduation must be completed and submitted soon after the date a student completes the diploma requirements. Students who maintain continuous enrollment have the option to meet the certificate requirements as listed in the catalog in effect at the time of first enrollment or any subsequent year. Continuous enrollment is defined by earning a grade in continuing education for at least one course during any semester or session (fall/spring or summer), within that academic year. For the purposes of the catalog, an academic year begins with the fall semester and concludes with the summer session. If a student does not earn a grade on their transcript during any of the semesters, or sessions, during an academic year, then the student is no longer protected by previous diploma/certificate requirements and will be held to the additional requirements. The student must then reset their catalog rights clock to use the catalog at the time of readmission or subsequent enrollment. In the event a loss of catalog rights due to extenuating circumstances, a student wishes to waive or substitute a requirement for certificate requirements, the student could complete the appropriate form and submit to the Exceptions for Academic Regulations (EAR) Committee for final determination.

NOTE: Commencement exercises are held once a year at the end of the spring semester for those students who complete the requirements for graduation during the year or the summer session. Students transferring credits to complete the high school diploma must have Official Transcripts from all high schools and/or colleges attended on file in the Admissions and Records office prior to graduation.

Proficiency Requirements
Proficiency must be demonstrated in basic skills areas of reading, mathematics, and composition, according to the categories listed below:

- **Reading.** Students will be required to demonstrate a minimum eighth-grade reading ability as measured by an SCC Continuing Education approved reading proficiency examination.
- **Mathematics.** Students will be required to demonstrate math proficiency by passing an SCC Continuing Education approved mathematics examination with a minimum score of 70%, or by passing the Math Fundamentals 2 course.
- **English Composition.** Students will be required to demonstrate English composition proficiency by passing an SCC Continuing Education approved composition examination with a minimum score of 70% or by passing the Composition 2 course.

Grade Reports
Grade Reports: In-class progress is reported to the student in a number of ways. Tests are often given to show individual student progress.
Cumulative Records: The district will maintain cumulative records on each current high school diploma student. These records may contain pertinent information necessary to aid students in educational planning. Placement tests follow-up, interest inventories, and other data contained in the cumulative record will be available for review by the student upon request.
Previous Secondary Schools

All credits earned in the 9th, 10th, 11th, and 12th grades recorded on an official transcript will be accepted except physical education credits and credits which are a duplication of course work for which credit was previously granted.

Trade or Business Schools

Courses that are taken in trade or business schools will be evaluated for possible high school credit equivalency. Courses in this category must be approved by the Office of Private Postsecondary Education. It is the responsibility of the student to provide to the district transcripts, certificates, and/or other records requested for the evaluation and possible awarding of credit.

Armed Forces Schools and/or Programs

Credit may be granted for completion of training programs and other valid educational experiences provided they have been certified by the United States Armed Forces Institute or by a statement on the service record, and provided they parallel 1) courses usually taught in secondary schools, and 2) vocational training courses with counterparts in civilian life. The recommendations for credit for such programs and experiences are contained in three volumes published by the American Council on Education: The 2006 edition of the Guide To The Evaluation of Educational Experiences In The Armed Services, Vol. I.-Air Force; Vol. II.-Army; Vol. III-Coast Guard, Marine, and Navy.

This section is to be interpreted as including:
- Officer and enlisted service school courses;
- Off-duty classes offered by the armed forces and cooperating local institutions;
- Correspondence courses offered by the United States Armed Forces Institute, the Marine Corps Institute, the Coast Guard Institute, and cooperating colleges and universities;
- United States Armed Forces Institute courses and subject examinations. (Authorization for this procedure is contained in Title V, Section 99, part C, of the California Administrative Code.)

College Courses

College units to be used for high school credits may be evaluated in a ratio of 3 college units to 10 high school semester periods of credit. The college should be notified in writing when college credits are utilized to meet high school requirements. College credit equivalency recommended by the American Council on Education guides will be evaluated for high school credit on the same basis as other college credit courses.

Correspondence Courses

Courses taken by correspondence will be evaluated for possible high school credit equivalency. Courses in this category must be approved by the Office of Private Postsecondary Education. It is the responsibility of the student to provide the district transcripts, certificates, and/or other records requested for the evaluation and possible awarding of credit.

Adult School Courses

Courses taken at adult schools will be evaluated for possible high school credit equivalency. Courses in this category must be approved by the California State Department of Education. No credit will be allowed for physical education courses nor for courses from other adult schools if such courses are designated in the Rancho Santiago Community College District as “no high school credit.” It is the responsibility of the student to provide the district transcripts, certificates, and/or other records requested for the evaluation and possible awarding of credit.

Work Experience

Students may obtain credit for certain types of full-time work experience or for work experience that can be related to high school subject matter. In order to obtain credit for work experience, students must provide written verification from those employers with whom they have worked for at least one year. The Continuing Education administrators or counselors will evaluate the amount of work experience credit and the area of application. Evaluation will not be made for more credits than is necessary to meet graduation requirements and which the letters of verification justify. Combined work experience credit and consumer skills task credit may not exceed 40 credits.

Verification of work experience should be obtained by the student, requesting from each employer on official letterhead stationery the following information:
Dates of employment.
Job description.
Nature of duties performed, indicating progress to more complex operations justifying a division into the beginning and advanced skills.
Statements regarding successful performance.
Reason for termination of employment, if applicable.
The letter of self-employed students must be accompanied by a copy of the student's business license or W-2 form.
Upon receipt of verification of all work experience which the student wishes to be considered for credit, an evaluation will be made on the following basis:

- Up to 10 credits will be given for the first year of successful work experience.
- Up to 10 additional credits to a maximum of 40 will be granted for each additional full year of employment if the student has made successful progress each year on the job.
- After the initial 10 credits for the first year, a student may earn 5 credits for a period of six months of employment, provided there is evidence of successful progress.

Testing
The district may award a maximum of 80 high school credits on the basis of district-approved testing.

**Mathematics Achievement Test (ITED)** Credit may be earned in mathematics by obtaining a satisfactory score on the math section of the Iowa Tests of Education Development Form X5. No other subtests are accepted for credit purposes. Ten-semester credits will be awarded for a raw score of 14, provided these credits are not previously earned math credits. (These 5 credits may be used to satisfy Math Fundamentals 2 requirements.) Fifteen-semester credits will be awarded for a raw score of 20, provided these credits are not a duplication of previously earned math credits. (These 10 credits may be used to satisfy Math Fundamentals 2 requirements, and 5 elective credits.)

**Subject Matter Credit by Examination** Credit by examination may be earned only for courses that are specifically designated by the division curriculum committee as courses that are eligible for credit by examination. Information for receiving this credit may be obtained from a counselor in continuing education. Only 5 of the 20 residency credits may be challenged.

Regional Occupational Program Courses
Credit will be determined upon receipt of an official secondary or community college transcript which indicates credit and grades as appropriate.

Guidelines for issuance of ROP credit when not on a unified school district transcript:
RS CCD will accept an official Grade Reporting Sheet from the Central County Regional Occupational Program in lieu of a unified school district transcript provided it has a grade and a number of total hours.
The amount of credit issued is to be based on 16 clock hours per credit unit.
A maximum of 20 units toward electives will be accepted in this manner.
Students coming from outside the CCROP will have to validate their credits only through an official school district transcript.

Other Electives
Learning Skills A maximum of 40 credits in Learning Skills will be allowed toward high school graduation credit in the elective area, including work experience.
English as a Second Language (ESL) A maximum of 10 elective high school diploma credits may be awarded to students who pass English as a Second Language 304, 305, or 306.
Adult Basic Education (ABE) A maximum of 20 high school elective credits may be granted when students pass all or parts of the required ABE exit tests.

Academic Skills

ABE009:

288.0 Hours

Instructs students in basic skills including reading, writing, spelling, and mathematics. Prepares students to take High School Subjects courses, job training or college credit classes. Optional field trips may be offered. Open Entry/Open Exit. Minimum of 5 HS credits, a maximum of 20 HS credits - increments of 5 credits. Lecture hours range - 72 min hours to 288 max hours. Previous Title: Adult Basic Education (2017)

Requisites

Requisites:

Advisory

ESL460 - Intermediate ESL 1

or higher and/or placement by counselor assessment

Learning Outcomes

Course Objectives:

Read, comprehend, and utilize print information to succeed in school and function in society

Appreciate a variety of reading materials

Read at a level acceptable for entry into high school completion program, GED, or other education or job-training programs

Use context clues to understand text

Use critical thinking skills to interpret and analyze text

Broaden knowledge of word meaning through the use of vocabulary development

Increase sight vocabulary

Understand multiple meanings, synonyms, antonyms, homonyms, and frequently recurring prefixes and suffixes

Use reference tools, such as the dictionary, Internet, and library

Practice decoding skills including sight vocabulary, structural analysis, and phonic awareness

Develop a connection between reading and writing skills

Compose effective sentences, using the standard conventions of English including mechanics, sentence structure, spelling, and usage

Compose effective and well-organized paragraphs using the Writing Process

Produce a variety of written materials to meet personal, educational, and job-related needs

Use word processing software to assist in the publication of written materials

Complete Megawords workbook activities including computer activities and multi-sensory spelling concepts practiced in class lessons

Proof and correct written exercises, including using spell check on the computer

Understand number concepts including place value and rounding

Add, subtract, multiply, and divide whole numbers

Add, subtract, multiply, and divide fractions
Add, subtract, multiply, and divide decimals

Apply problem-solving techniques using the above skills in real-life situations

**Student Learning Outcomes:**

- Demonstrate proficiency in addition, subtraction, multiplication and division of all whole numbers, fractions, and decimals.
- Demonstrate level gains in reading.
- Develop and organize a 10-15 sentence paragraph unified by a central idea.
- Demonstrate improvement in spelling in everyday writing.

**Money Matters: Financial Literacy**

**ABE010:**

36.0 Hours

Prepares the student for the adult world of financial management by developing sound decision-making skills in personal and family money matters. Open Entry/Open Exit. 2.5 HS credits.

**Requisites**

None

**Learning Outcomes**

**Course Objectives:**

- Demonstrate how to manage personal spending
- Develop a personal budget that works
- Identify the advantages and disadvantages of credit and debt
- Explain how to avoid credit card fraud
- Demonstrate how to boost earning capacity.
- Develop an educational plan and set financial goals.
- Comprehend how to put personal assets to work to build wealth
- Identify the sources of money for college
- Use tables charts and graphs
- Identify means to earn extra money
- Explain education as an investment in future employment prospects.
- Identify the sources of investment information to make sound investment selections
- List steps to protect against identity theft.
- Recognize signs of a scam.
- List elements of internet safety

**Student Learning Outcomes:**

- Create a budget of monthly income and expenses.
- Develop a savings plan.
- Demonstrate ability to calculate interest on loans and credit cards.
Native Language Basic Skills for Adults
ABE011:

216.0 Hours
Assists students in acquiring basic skills in their native language in order to facilitate the transition to beginning ESL courses. Focuses on reading, math, and writing, as well as academic and life skills. Open Entry/Open Exit.

Requisites
Requisites:
None

Learning Outcomes
Course Objectives:
Identify sound/symbol relationship of alphabet.
Demonstrate understanding and ability to use decoding skills.
Build and develop vocabulary.
Read for meaning.
Read and print the alphabet, syllables, words, and simple sentences.
Recognize and use basic writing skills (punctuation, capitalization, and usage).
Understand how to gain vital information by reading and through community awareness.
Apply and reinforce reading and writing skills.
Recognize and identify basic parts of speech.
Understand and apply basic math concepts (addition, subtraction, and word problem application).
Develop basic life skills:
Fill out basic forms.
Express basic needs with simple words or phrases drawn from learned materials.
Produce basic personal identification.
Respond to simple commands as used in basic communication in the community.
Ask questions with words and phrases about personal information, family and time.

Student Learning Outcomes:
Increase basic reading and writing skills.
Increase basic math and life skills.

Adult Basic Education Reading
ABE023:

90.0 Hours
72.0 Hours
Instructs students in basic reading and functional literacy skills. Prepares students for Adult High School Diploma courses, job training, or the California High School Equivalency Certificate course. Open Entry/Open Exit. 5 HS credits.

Requisites
Requisites:
None

Learning Outcomes
Course Objectives:
Describe phonemic awareness and phonics decoding skills.
Perform skills in phonics, compound words, and syllabication.
Demonstrate skills including recognizing sight words and word parts.
Increase reading fluency.
Increase comprehension skills (recalling facts, main idea, fact and opinion, sequence of events) for more efficient reading.
Increase critical thinking and reading skills such as making inferences and drawing conclusions.
Demonstrate skills for studying and vocabulary development.
Identify reference tools, such as dictionary, Internet, and library.
Increase understanding of word meanings.
Distinguish the meaning of frequently used synonyms, antonyms, and homonyms.
Describe meaning of vocabulary in context.

Student Learning Outcomes:
Increase basic vocabulary.
Improve reading comprehension and fluency.

Adult Basic Education Writing
ABE024:

72.0 Hours
Instructs students in basic writing and functional literacy skills. Prepares students for Adult High School Diploma courses, job training, or the California High School Equivalency Certificate course. Open Entry/Open Exit. 5 HS credits.

Requisites
Requisites:
None

Learning Outcomes
Course Objectives:
Employ basics of grammar, mechanics, punctuation, and word use.
Identify parts of speech.
Identify components of a complete sentence.
Use proper punctuation in varied sentences.

Identify sentence fragments and run-on sentences.

Write sentences with proper subject-verb agreement.

Identify paragraph components and development.

Write a topic sentence.

Write adequate supporting details for a topic sentence.

Write a concluding sentence.

Demonstrate the writing process by displaying prewriting, rough draft, revising, proofreading, and editing steps.

**Student Learning Outcomes:**

- Evaluate basic grammar and writing mechanics resulting in well-crafted sentences.
- Write a well-organized paragraph.

**Total Hours**

72.0

**Adult Basic Education Mathematics**

**ABE025:**

90.0 Hours

72.0 Hours

This class is designed to teach and enhance student's functional math skills. The areas covered are money management/budgeting, time, measurement, basic math computation and personal consumer skills. Open Entry/Open Exit. 5 HS credits.

**Requisites**

**Requisites:**

None

**Learning Outcomes**

**Course Objectives:**

Describe strategies of money management.

Recognize the difference and similarities in analog and digital time.

Solve real-world problems involving customary and metric measurement.

Solve real-world problems involving whole numbers, fractions, and decimals.

Demonstrate personal consumer skills.

**Student Learning Outcomes:**

Analyze money management/budgeting, time, and measurement.

Employ basic math computation and personal consumer skills.

90.0

72.0

**Adult Basic Education Spelling**
ABE026:

90.0 Hours

72.0 Hours

Provides students with a multisensory approach to improving English spelling skills. Emphasizes phonetic structures using workbooks and audio lessons. Prepares students for Adult High School Diploma courses, job training, or the California High School Equivalency Certificate course. Open Entry/Open Exit. 5 HS credits.

Requisites

Requisites:
None

Learning Outcomes

Course Objectives:
Determine placement level.

Decode and encode multisyllabic words.

Identify common English spelling pattern.

Increase phonemic awareness.

Identify syllabication rules.

Correctly spell multisyllabic words.

Increase reading fluency.

Identify new vocabulary by learning definitions of spelling words.

Identify root words to determine meaning of unknown words.

Improve pronunciation of spoken vocabulary.

Student Learning Outcomes:
Identify common English spelling patterns.
Use phonetic structures to improve spelling.

Slabs/Interior-Exterior Footings

ACA002B:

1.5 Units

This class highlights the techniques and procedures used in the layout and setting of footing forms according to prints and shop drawings. Introduction of slab construction for casting tilt up panels will be discussed. Acceptable elevation tolerances, proper concrete placement and slab leveling will be stressed. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Define terms, tolerances, and footing characteristics
Describe form methods for interior and exterior footings
Place and align batter boards to print offsets
Utilize alignment techniques to square formwork
Set, elevate, and construct forms for footings where applicable
Level slab forms to tolerance given for casting tilt-up panels
Layout panel joints and grout pads to print specifications

Student Learning Outcomes:
- Accurately layout out and elevate formwork according to slab and footing plans.
- Level slab formwork to tolerance for casting tilt-up panels.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
40.0

Tilt-Up Introduction
ACA003A :

1.5 Units

Designed to familiarize tilt-up students with basic panel types and typical construction methods used in the tilt-up industry. This course identifies panel features, applications, specialty hardware, and provides an overview of the construction and placement of tilt-up panels. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Define terminology and identify tilt-up panel building methods used in the construction industry.
State the pros and cons of tilt-up building construction. Discuss the structural elements, components, and placement of tilt-up panels.

Identify materials and hardware used in the tilt-up industry.

Describe the characteristics and methods for placement of concrete.

Locate panel elements and features on prints.

Calculate dimensions for panel size and features using print information.

Determine materials and hardware for panel construction.

Layout panel and panel features using calculated dimension.

Demonstrate safe and proper use of all necessary hand and power tools.

Create a material cut list.

Frame a basic tilt-up panel using project print.

Accurately install hardware and embeds.

**Student Learning Outcomes:**

Interpret project plans to locate tilt-up panel sizes, quantity, and panel characteristics.

Construct typical tilt-up panel formwork to print specifications.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

40.0

**Lifting, and Bracing Safety**

**ACA004A:**

1.5 Units

This class will describe the lifting procedures and accident prevention measures necessary to safely raise and place tilt-up panels. Students will be introduced to various types of bond breakers used in the industry. Product catalogs will be used to review the proper use of each product. Safety practices on the connection points and bracing of wall panels will be discussed in detail. Manufacturers specification on specific hardware used to secure temporary braces will also be covered. Students will review all safety aspects of rigging and setting panels with the crane. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

Describe the purpose and use of bond breakers.
Match lifting hazards and accident prevention measures.

Conduct pre-lift checks and safety procedures.

Utilize the appropriate print views to determine pick-up points

Calculate dimension for layout of panel and pick-up points

Demonstrate the proper set up and use of builders' transit level

Sight and record elevation readings.

Explain the importance of pre-lift safety procedures.

Safely and properly rig and set panels with a crane.

Employ the correct bracing procedures to secure panels in place.

**Student Learning Outcomes:**

- Utilize project prints to establish finish floor elevation, and panel location-orientation.
- Demonstrate safe rigging procedures and correct placement of panels.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units:**

1.5

**Total Hours:**

45.0

**Poured-in-Place Wall Forms**

**ACA004B :**

1.5 Units

This course provides instruction for poured-in-place wall systems and will highlight decorative finish applications. Both basic formwork procedures and additional techniques to create embellished wall details on finished concrete surfaces will be presented. Students will identify materials such as exposed aggregate, faux veneers, and various artistic impressions used to create architectural features as part of the finished surface design. The importance of formwork alignment and reinforcement will be emphasized during manipulative exercises. Open Entry/Open Exit.

**Requisites**

**Requisites:**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- Describe how design features are incorporated in formwork.
- Determine formwork configuration for poured-in-place concrete wall forms.
Identify building lines and dimensions.
Estimate wall forming materials.
Demonstrate the proper use hand and power tools.
Install a single waler wall system to project specifications.
Correctly attach bracing to formwork for poured-in-place concrete walls.
Demonstrate the proper use hand and power tools.
Install a double waler wall system to project specifications.
Utilize the proper techniques incorporative decorative concrete template to formwork.
Correctly attach bracing to formwork for poured-in-place concrete walls.

**Student Learning Outcomes:**
- Construct and brace formwork for poured-in-place concrete walls.
- Correctly attach formwork templates to for decorative poured-in-place concrete wall.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units**
1.5

**Total Hours**
45.0

**Print Reading**

**ACA004C:**

1.5 Units

This course introduces basic visualization skills needed for reading and interpreting construction prints. Views, elevations and the role of specifications as they relate to insulation details on prints will be discussed. An awareness of sustainable and green building practices will be covered during the course. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Define terms and categorize print according to specific characteristics
- Identify drawing methods used to create prints
- Label the standard views used in orthographic projection
- Describe and use conventional lines, symbols and dimensioning methods
Locate beginning and ending measuring points and calculate dimensions
Interpret views to identify components details and layout features
Locate beginning and ending measuring points and accurately calculate dimensions
Interpret views to identify components details and layout features
Complete a detailed material list from print specifications (insulation)
Use plans to accurately establish construction layout

Student Learning Outcomes:
Apply the principles of orthographic project to visualize three dimensional images from two dimensional graphic representations.
Interpret prints to determine commercial and residential construction elements, size and arrangement.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Wall-Column Forms/Cutting and Burning
ACA005A :

1.5 Units

This course presents the forming methods and techniques used in the construction of reinforced concrete walls and columns. Form design, print reading, estimating, and hands-on projects for single and double waler forming systems will be included. Students will be introduced to safe operating and cutting procedures for the oxygen-acetylene torch. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify column and wall types, terms, uses, and manufactured materials
Locate dimensions for building line layout
Locate layout dimension on formwork prints
Apply mathematical formulas to design form systems by accurately calculating forms and materials needed
Design and install single and double waler wall systems
Utilize and interpret proper techniques for embed and hardware installations in wall construction
Select and use the appropriate bracing techniques for securing wall and column forms
Demonstrate safe and appropriate use of the oxygen and acetylene torch

Student Learning Outcomes:
- Analyze prints to determine and calculate the appropriate materials for cut lists used for single and double waler formwork construction.
- Demonstrate safe set-up and use of cutting and burning equipment.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Site Work/Curb and Gutter
ACA005B:

1.5 Units

This course covers the forming methods and techniques used in the construction of site work, curbs and gutters. Site work layout, elevation, and construction practices will be presented. Jobsite safety, print interpretation, material identification and site preparation will be included in the training. Students will construct sidewalk, curb and gutter forms to prints specifications. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
- Identify site work, curb, and gutter elements.
- Interpret prints to determine site work, curb, and gutter layout dimensions.
- Match safety hazards with accident prevention measures for site work.
- Utilize appropriate construction methods and materials.
- Construct site formwork to project plans specifications.
- Establish formwork elevation using correct methods and techniques.
- Calculate materials and estimate concrete placement requirements.
- Construct curb and gutter formwork to project plans specifications.

Student Learning Outcomes:
- Analyze prints to determine and calculate the appropriate materials for cut lists.
- Construct sidewalk, curb and gutter formwork to print specifications.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Specialized Forms and Rigging
ACA005C:

1.5 Units

This course will instruct students in the construction of specialized forms used to create exterior architectural design features on tilt-up buildings. An emphasis will be placed on interpretation of design feature details on prints, location of rigging points, and building methods for selected forms. In addition to concrete calculations, practical assignments will focus on rigging safety, load formulas, lifting hardware and procedures. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Describe typical features used in architectural designs.

Visualize geometric shapes using project plans.

Create panel design according to details on project plans.

Construct panel formwork to industry standards.

Identify rigging hardware and sling configurations.

Calculate the safe working loads.

List the crane hazards and accident prevention measures.

Apply safe-rigging practices to place panels.

Student Learning Outcomes:

Interpret prints to determine details for exterior building architectural design.

Apply the correct rigging procedures to determine safe lifting configurations.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5
Total Hours
45.0

Orientation
ACA021A :
1.5 - 2.0 Units

This course provides an overview of the construction industry, safety overview, with focus on tool identification and use. Upon successful completion, students will receive OSHA 10 Hour and Powder Actuated Tool Certifications. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify and describe trade terms, industry roles and responsibilities, and basic skills

Discuss trade applications, quality and productivity practices

Identify the Focus Four safety hazards and accident prevention practices

Define 10 construction safety regulations to complete OSHA 10-Hour Safety Certification

Explain the importance of proper interpersonal communication and respectful conduct

Discuss the types and benefits of sustainable/green building practices in the workplace

Calculate measurements and accurately perform basic mathematic functions for assigned tasks

Match safety hazards and precautions for tools, equipment and PPE using manufacturers’ guidelines

Select and safely use hand and power tools for assigned tasks

Set up and fire powder actuated tool to standards required for Operator Certification

Student Learning Outcomes:
Demonstrate compliance with the rules, role, and responsibilities required of apprentices working in the construction trades.
Evaluate potential hazards and site the appropriate accident prevention measures.
Demonstrate safe operating procedures for selected tools and equipment.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Safety and Health Certifications
ACA021B:

2.0 Units

This course promotes hand/power tool and equipment skill development for various construction applications. Scaffold building and equipment operating procedures will also be covered. Financial and life skills relevant to surviving the construction industry will be presented. Upon successful completion, students will be issued United Brotherhood of Carpenters (UBC) Scaffold Erector-Welded Frame Qualification Card. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:

Not transferable

Weekly Lecture Hours:

2.0

Learning Outcomes

Course Objectives:

- Identify scaffold components and applicable OSHA regulations
- Match safety hazards and precautions for scaffold erection procedures
- Conduct scaffold safety and equipment inspections
- Properly stage, assemble, and disassemble selected scaffolding
- Meet UBC criteria for erecting and dismantling scaffolds correctly
- Identify scaffold components and applicable OSHA regulations
- Match safety hazards and precautions for scaffold erection procedures
- Conduct scaffold safety and equipment inspections
- Properly stage, assemble, and disassemble selected scaffolding
- Meet UBC criteria for erecting and dismantling scaffolds correctly

Student Learning Outcomes:

Students will be able to demonstrate the proper erecting/dismantling procedures for welded frame scaffolds. Students will be able to demonstrate proficiency with various tools and equipment appropriate for the assigned construction tasks.

Units & Hours

Minimum Units:

2.0

Maximum Units:

2.0

Total Hours
Basic Wall Framing
ACA021C:

1.5 Units

This course presents wall construction theory, methods, and procedures required to frame basic residential walls. Practical experience using proper tool techniques and appropriate materials will provide students with fundamental skill development. An introduction to print reading will prepare students to locate measurements for determining wall lengths and size of openings. Students will perform basic wall layout tasks, use plating procedures, and assemble and brace framing before aligning and completing the selected wall construction project to industry standards. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify basic wall framing components and material types
Determine wall configurations from print information
Calculate and locate dimensions
Calculate dimensions for wall layout and location of openings
Complete a project material take-off list
Perform exterior/interior wall layout using 3, 4, 5 method
Execute plating-detail tasks
Construct, lift and connect framed walls using proper techniques
Install required bracing to print specifications
Plumb and align structures to 1/8" accuracy
Demonstrate safe and appropriate use of tools, materials and equipment

Student Learning Outcomes:
- Demonstrate proficient use of basic mathematics for construction preparation.
- Interpret prints to construct framed walls, using appropriate codes and materials.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0
Tool/Equipment Applications
ACA021E:

1.5 Units

This course promotes hand/power tool and equipment skill development for various construction applications. Scaffold building and aerial lift safety and operating procedures will also be covered. Upon successful completion, students will be issued United Brotherhood of Carpenters (UBC) Aerial Lift and Scaffold Erector-Welded Frame Qualification Cards. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
ACA021A - Orientation
AND
Prerequisite
ACA021B - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Identify scaffold components and applicable Occupational Safety and Health Administration (OSHA) regulations
Match safety hazards and precautions for scaffold erection procedures
Conduct scaffold safety and equipment inspections
Properly stage, assemble, and disassemble selected scaffolding
Meet United Brotherhood of Carpenters (UBC) criteria for erecting and dismantling scaffolds correctly
Identify boom/scissor aerial lift components and applicable OSHA regulations
Match safety hazards and precautions for aerial lift equipment operation
Conduct aerial lift safety inspections
Demonstrate the safe operation of two types of aerial lifts
Meet UBC criteria for the proper operation of aerial lift equipment
Select appropriate mathematic operations to measure and calculate materials
Practice using the mathematic techniques presented to layout materials for wall construction
Select appropriate hand and power tools/equipment for assigned tasks
Utilize proper fastener placement and driving techniques
Apply the appropriate tool/equipment manipulative techniques to complete wall construction tasks assigned

Student Learning Outcomes:
Identify and demonstrate safe operating procedures for aerial lift truck equipment.
Demonstrate the proper erecting/dismantling procedures for welded frame scaffolds.
Assess construction tasks to determine the appropriate tools, equipment and construction methods to apply.
Units & Hours
Minimum Units:
1.5
Maximum Units
1.5
Total Hours
45.0

Commercial Floor Framing
ACA022A:

1.5 Units

This course covers floor joist construction and the various installation techniques used in the commercial industry. Students will interpret floor plans for job planning, identify floor joist system, and calculate material take offs. Integration of wall plating, joist layout and floor sheathing methods will be included. Instruction will incorporate measuring skills, use of math operations, specialty hardware applications, and identification of appropriate building codes. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify floor components, installation techniques, hardware, terms, and building codes
Interpret prints and list components and materials for job planning
Demonstrate proper use of equipment and implement safety precautions
Calculate dimensions, verify angles, determine materials, and create take-off lists
Select and use the correct layout techniques to mark joists for flooring elements
Correctly install and fasten wall sections and floor joist members
Accurately measure and cut materials for floor members, wall plates and sheathing
Properly assemble and securely connect hardware, floor members and sheathing panels to complete selected projects to plan specifications

Student Learning Outcomes:
Analyze prints to determine and calculate the appropriate materials for cut lists used in the commercial floor framing process.
Demonstrate proper safety techniques and construction procedures to complete a commercial floor framing project.

Minimum Unidades:
1.5
Maximum Unidades
Total Hours
45.0

Basic Stairs
ACA022B:

1.5 Units

This course provides an introduction to stair framing theory, terminology and construction techniques. Students will interpret floor plans and drawing elevations for job planning, and to layout and detail stair stringers. Methods for calculating the number of stairs, landing height, stair threads and riser dimensions will be presented and practiced. Instruction will include measuring skills, mathematical principles, stair and handrail fabrication, assembly and installation. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify stair elements, terms, and building codes used in commercial construction.

Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.

Practice calculating stair stringer dimensions.

Create a stair construction cut list.

Select the appropriate layout techniques and tools to mark stringers for locating stair elements.

Accurately measure and cut materials to various lengths for required thread and riser members.

Accurately measure and cut materials for handrail assembly.

Install and securely fasten stair and handrail elements to stringers and stair supports to complete project according to plan specifications.

Demonstrate safe use of tools and equipment.

Student Learning Outcomes:
Utilize print views to determine stair configuration and stringer layout.

Demonstrate the proper use of construction procedures to build a straight stairway design to print specifications.

Exterior Finish Details
ACA022D :

1.5 Units

In this course the terminology, design considerations and construction techniques for various types of exterior detail installations will be covered. Students will use plan views and drawing elevations for job planning activities, including calculating dimensions and materials, identifying wall covering types and other exterior construction details. Students will apply the construction techniques presented to complete various exterior detail installations to print specifications. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify the terms, components, hardware, and techniques used in exterior detail construction.
List workplace considerations and site specific hazards.
Interpret blueprints to recognize and locate exterior elements, determine measurements, and to create material and cut lists.
Calculate dimensions and use formulas to verify angles.
Complete an exterior details sketch and job planning worksheet.
Identify and use the proper siding types and grades of lumber.
Complete project layout for roof and siding installations.
Select and use the proper types of siding and lumber grade.
Measure, cut, assemble, fasten and install various roofing and exterior wall coverings according to project plan.

Student Learning Outcomes:
Accurately layout out exterior wall lines and features according to print specifications given an exterior finish design.
Complete exterior wall framing and finish detail construction to meet project print specifications, and troubleshoot design flaws presented by the instructor.

Commercial Roof Framing
ACA022E :
1.5 Units

This course provides an introduction to basic gable roof framing, terminology and construction methods. Students will interpret plan and elevation views to determine rafter systems and layout details to complete project assignments. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- Demonstrate an applied understanding of introductory commercial roofing construction.
- Demonstrate an applied understanding of preparation and layout using established tools and methodologies.
- Demonstrate an applied understanding of the techniques and procedures for gable roof construction.

**Student Learning Outcomes:**

- Determine the necessary materials and methods of construction needed to complete a gable roof construction project.
- Construct a commercial gable roof to industry standards.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

45.0

**Basic Roof Framing**

**ACA023B:**

1.5 Units

This course provides an introduction to basic gable roof framing, terminology, characteristics and construction methods. Students will interpret print views and drawing elevations for job planning, and to determine rafter systems and layout details. Basic rise, run, rafter angles and length calculations will be practiced. Framed wall construction will be incorporated to facilitate the gable roof assembly techniques and installation procedures that are the focus of this training. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

Learning Outcomes
Course Objectives:
Identify gable roof elements, hardware, terms and building codes used in commercial construction.
Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.
Calculate common rafter angles and lengths, and dimensions, and apply math formulas to determine materials.
Create cut lists, and verify angle layouts.
Select and use the appropriate layout techniques and tools to mark ceiling joists for locating rafter elements.
Accurately measure and cut materials to various lengths and angles for required roofing members and sheathing.
Install and securely connect hardware, roof members and sheathing panels to complete project according to plan specifications.

Student Learning Outcomes:
- Accurately lay out roof lines and features based on a gable roof frame design.
- Assemble and install gable roof framing members to meet project print specifications.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Advanced Roof Framing
ACA023C:
1.5 Units

This course provides the advanced skills used to frame hip roof types, and includes terminology, roof characteristics and construction methods. Students will interpret print views and elevations for job planning to determine hip roof rafter systems and layout details. Students will perform rise, run, rafter angles and length calculations. Framed wall construction will be incorporate to facilitate the hip roof assembly techniques and installation procedures that are the focus of this training. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify hip roof elements, hardware, terms and building codes used in commercial framing construction.
Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.

Calculate dimensions and create a cut list for hip roof framing members.
Select and use the appropriate layout techniques and tools to mark ceiling joists for locating rafter elements.

Assemble and properly fasten cut hip roof framing members to support roof sheathing.

Install and securely connect hardware, hip roof members and sheathing panels to complete project according to plan specifications.

Demonstrate the proper selection and safe use of tools and equipment.

**Student Learning Outcomes:**
- Analyze prints to determine the hip roof construction elements and apply the appropriate framing methods.
- Accurately layout out and construct hip roof framing to print specifications.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units:**
1.5

**Total Hours:**
45.0

**Basic Commercial Framing**

**ACA024A**: 1.5 Units

This course provides an introduction to basic wall framing theory and commercial construction techniques. Floor plan interpretation will be used by students for job planning, design recognition, and to determine materials. Students will layout and detail wall plates for locating basic wall components and door openings typically found on commercial projects. Instruction will include measuring skills, mathematical principles, wall assembly and installation procedures, and detail how structural connections are made. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Identify basic rake wall framing elements used in commercial construction.
- Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.
- Determine applicable building codes.
- Calculate loads and dimensions, and apply mathematic formulas to determine materials.
- Create cut lists, and verify angle layouts.
- Select and use the appropriate layout techniques and tools to mark plates for locating rake wall elements and openings.
- Accurately measure and cut materials to various required lengths for rake wall.
- Assemble and properly fasten rake wall cut members to form basic wall sections.
Install and securely connect rake wall sections to complete project according to plan specifications.

**Student Learning Outcomes:**
- Identify basic rake wall framing elements for commercial construction applications.
- Accurately layout and construct rake wall framing according to print specifications.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units:**
1.5

**Total Hours**
45.0

**Advanced Commercial Framing**

**ACA024B:**

1.5 Units

This course incorporates advanced commercial wall framing theory and construction techniques with structural hardware and shear panel installation. Students will interpret floor plans for job planning to layout and detail plates for complex wall configurations, rake walls and wall openings. Instruction will include measuring skills, use of mathematical principles, wall construction, plywood shear panel installation, and structural hardware attachment. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Review and discuss rake wall framing elements.
- Discuss technical aspects of exterior and interior wall configurations.
- Determine the applicable building codes used in commercial wall construction.
- Identify structural considerations and framing hardware applications.
- Calculate dimensions, rake wall angles.
- Apply math formulas to determine materials, create cut lists, and to verify angle layouts.
- Select and use the appropriate layout techniques and tools to mark plates for locating wall elements and rake wall studs.
- Accurately measure and cut materials to various lengths for required rake wall members.
- Assemble and properly fasten cut members to frame rake wall sections.
- Utilize the appropriate hardware to connect exterior and interior wall sections to structural members.
- Attach shear panels to complete project according to plan.
- Inspect and verify installation meets project and code specifications.
Student Learning Outcomes:
Analyze prints and project specifications to determine wall configuration, applicable building code and construction methods. Construct exterior and interior walls to meet project scope and material/building specifications.

Units & Hours
Minimum Units:
1.5

Maximum Units

Panelized Roofing
ACA024C:
1.5 Units
This course covers the structural components and building techniques associated with heavy timber construction and panelized roof systems. The advantages and types of manufactured wood used, and their load carrying strength, span, and spacing will be discussed. A distinction between standard post and beam, and heavy timber construction will be emphasized. Students will interpret floor plan, section views and drawing elevations for job planning to layout and construct a heavy timber post and beam supported panelized roof. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify heavy timber post, beam and roof elements, hardware, terms and applicable building codes.
Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.
State appropriate safety measures for tools use and fall protection.
Select and use the appropriate layout techniques and tools to mark materials for locating walls, openings and roof elements.
Accurately measure and cut materials to various lengths and angles for required wall and roofing members, and structure sheathing.
Assemble exterior and interior walls.
Plumb and align building corners and wall sections to industry standards.
Install roof framing members using post and beam construction methods.
Install roof fascia and water drainage system (scupper).
Apply appropriate building codes for spacing, blocking, and nailing.
Demonstrate the proper use of safe operating procedures for tools and equipment.

Student Learning Outcomes:
Identify panelized roof framing construction methods and materials used in commercial applications.
Accurately layout out roof lines and features according to print specifications given a panelized roof frame design.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Transit Level/Laser
ACA024D:

1.0 - 2.0 Units

This course covers the terminology, optical principles, and operating procedures for the transit and laser levels. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.0

Learning Outcomes
Course Objectives:
- Identify equipment and construction terminology
- Discuss the operating principles of light and lens technology
- State construction applications for builders transit and laser levels
- Identify terms and label transit level components
- List the steps used in the set up and leveling of precision instruments
- Distinguish the increments on various reading rods and circular veneer scale
- Establish horizontal plane using transit levels (elevation)
- Apply techniques to establish a vertical plane (plumb)
- Identify terms and label laser level components
- List the steps used in the set up and leveling of laser instruments
- Explain how targets are positioned and read
- Establish horizontal plane using laser levels (elevation)
- Apply techniques for establish vertical plane (plumb)

Student Learning Outcomes:
- Explain optic principles and operating procedures for transit and laser levels.
- Level and plumb projects using both builders transit and laser levels.
Units & Hours
Minimum Units: 1.0
Maximum Units: 1.0
Total Hours: 36.0

Total Station I
ACA024E:
2.0 Units

This course discusses the evolution of survey and layout instruments and the advantages of using a total station for building layout over traditional methods. Students will set up a total station and configure the software. Exercises will include working in teams to stake out points and record point data using the total station. Equipment maintenance and troubleshooting are also discussed. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
ACA021A - Orientation
AND
ACA021B - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Describe the components of a total station and their functions
Compare and contrast total station and traditional methods
Convert dimensions to decimal unit measurements
Calculate distances and angles of layout points
Complete total station, instrument and backsight assembly
Identify common configuration settings
Set up a total station level, backsight and plumb over a point
Configure and edit data collector with survey software
Enter and edit points in data collector
Accurately shoot benchmark/remote elevation
Use a total station and data collector to accurately stake out points
Explain and demonstrate sideshot, resection, and inverse
Identify jobsite challenges and explain how total station technology can be used to solve them
Use total station technology to quickly solve complex jobsite challenges
Explain how to safely operate a total station
Perform preventative maintenance on the total station and its components
Describe how to recognize and identify layout inaccuracies

**Student Learning Outcomes:**
- Set up and properly adjust total station equipment using manufacturers' instructions.
- Digitally measure and compute angles and distances using the components of a total station system.

**Units & Hours**

**Welding Fabrication**

**ACA025:**

1.5 Units

This course provides an introduction to the layout, cutting, and basic welding skills used in the fabrication process. The students will practice using oxy-acetylene equipment and accessories to setup, cut, shape, grind, weld, file, heat and bend metal parts. Training will include fundamental arc welding techniques to fabricate project components. Open Entry/Open Exit.

**Requisites**

**Requisites:**

**Prerequisite**

ACA021A - Orientation

**AND**

**Prerequisite**

ACA021B - Safety and Health Certifications

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Learning Outcomes**

**Course Objectives:**

Identify terms, regulations, and torch/welding equipment components
Discuss safety practices/Personal Protective Equipment (PPE), and operating procedures for arc welding
Recognize fabrication symbols on prints
Discuss and evaluate arc welding methods
Identify electrode characteristics and use
Properly maintain and store equipment
Demonstrate proper setup and adjustment of torch cutting equipment
Utilize proper techniques to complete cutting and burning assignments
Demonstrate proper setup and adjustment of welding equipment
Utilize proper techniques to complete welding assignments

**Student Learning Outcomes:**

Demonstrate proper procedures to safely operate torch and arc welding equipment.
Perform torch cutting, and arc welding techniques to fabricate parts.
Units & Hours
Foundations and Flatwork
ACA025A:

1.5 Units

This course covers the design and function of several types of foundations and concrete flatwork. The methods, techniques and procedures for formwork layout, elevation, and construction will be presented and applied by students during practical assignments. Jobsite safety, print interpretation, material identification, and basic use of the builders' level will be included in the training. Students will construct three selected formwork projects. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Construct three types of foundation and flatwork forms to print specifications
Interpret prints to identify formwork elements and determine materials
Install and align batterboards
Discuss job site hazards and safety precautions
Identify foundation/flatwork types, function, and construction methods
Complete layout of building lines using plan views
Set formwork elevation using builders' levels
Install and accurately set form screed supports to elevation

Student Learning Outcomes:
Analyze prints to determine and calculate materials for cut list used in the formwork process.
Employ the proper techniques to lay out building lines construct formwork to print specifications.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Advanced Stairs
ACA025C:

1.5 Units
This course is designed to enhance the students' existing skills in the construction of basic stairs. Students will interpret floor plans and drawing elevations for job planning, and to layout and construct complex stair designs. Stair calculations will be adapted to determine the number of stairs, landing height, stair thread and riser dimensions. In addition to measuring skills, mathematical principles, stair and handrail fabrication and assembly, the installation techniques required for circular and u-shaped stair configurations will be covered. Open Entry/Open Exit.

**Requisites**

**Requisites:**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

Accurately measure and cut materials for required landing, thread, riser and handrail framing members.

State safety hazards and precautions.

Identify circular and u-shaped stair elements, terms, building codes, and commercial construction applications.

Proper tool selection and safe use of equipment.

Calculate stair and landing dimensions, and apply math formulas to determine materials, create cut lists, and to determine and verify angle layouts.

Install and securely fasten stair framing to complete projects according to plan specifications.

Demonstrate the correct framing techniques and procedures for multi-level stair construction.

Measure and mark stringers for locating stair elements.

Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.

**Student Learning Outcomes:**

Interpret plans to lay out and determine the materials required for multi-level stair projects.

Demonstrate ability to complete multi-level stair projects to print specifications.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

45.0

**Advanced Print Reading**

**ACA025D :**

1.5 - 2.0 Units

In this course, students will analyze multi-view drawings to determine construction type, locate benchmark and building elements; review codes, references, and perform calculations for construction planning. Open Entry/Open Exit.

**Requisites**
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Find framing and material details on drawings
Estimate time and labor for project based on print information
Explain what is included in specifications and find selected topics
Reference views and determine benchmark and reference dimensions on prints
Determine building lines and complete layout for foundations
Practice sketching views using orthographic method
Interpret prints to identify project elements, code compliance, and construction type
Determine wall configuration and layout building lines
Calculate material take-offs from representations in specific views and schedules
Record site location and orientation information from plot plan
Read beam and column schedules and determine materials

Student Learning Outcomes:
Interpret print specifications for project compliance and construction materials.
Determine construction tasks and work sequence using prints and specifications.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Tilt-Up Panel Construction
ACA026A:

1.5 Units

This class will cover layout techniques and building procedures for commercial structures using the tilt-up panel construction method. Various wall types, position, and sequence for raising panels will be discussed. Students will be able to explain the importance of layout methods in squaring panel formwork. A focus will be placed on identifying specific types of openings and on the location of finish floor and roof lines on prints. Open Entry/Open Exit.

Requisites
None
Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Locate panel elements and features on prints.
Calculate dimensions for panel size and features using print information.
Identify materials and hardware used in the tilt-up industry.
Frame a basic tilt-up panel using project print.
State the pros and cons of tilt-up building construction.
Demonstrate safe and proper use of all necessary hand and power tools.
Determine materials and hardware for panel construction.
Create a material cut list.
Define terminology and identify the tilt-up panel building methods used in the construction industry.
Accurately install hardware and embeds.
Layout panel and panel features using calculated dimension.

Student Learning Outcomes:
Interpret project plans to locate panel sizes, quantity, and panel characteristics.
Construct typical tilt-up panel formwork to print specifications.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Wall Forming

ACA026B:
1.5 Units

This course covers the skills and procedures for forming reinforced concrete walls using single and double waler systems. Students will identify the characteristics and application of built-in-place, per-fabricated, and specialty forms. Practical exercises will prepare students for locating wall forming information on project plans, calculating layout dimensions, and for estimating material requirements. Basic wall panel forming and reinforcement methods, material preparation, and hardware installation are included in training. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify factors affecting form strength and stability.
Identify terms and classification of wall forms.
Demonstrate the proper use hand and power tool and fall protection equipment.
Install a single waler wall system to project specifications.
List and describe form components and hardware.
Identify building lines and dimensions.
Estimate wall forming materials.
State the purpose and use of various types of wall forms.
Determine wall form configuration and forming method using project plans.
Install a double waler wall system to project specification.

Student Learning Outcomes:
Interpret wall form plans and accurately layout out exterior wall lines and features.
Construct typical exterior wall form panels to project specifications using two forming methods.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Gang Forms/Columns
ACA026C :

1.5 Units

This course presents the formwork types, applications and construction methods for gang and column forms using built and manufactured forming systems. Discussions will cover heavy timber gang forms and use of taper ties, bracing, and bulkhead tables. The course project will include gang and column formwork construction, assembly, and hardware using selected manufactured products. Related safety, mathematics and print reading will be covered in the training. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:
Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Demonstrate the proper use of hand and power tool and fall protection equipment.
Form a column using a Symons forming system to project specifications.
Determine wall form configuration and forming method using project plans.
State the purpose and use of various types of gang forms.
Estimate gang forming and column materials.
Identify terms and definitions association with gang forms and column construction.
List and describe gang form components and hardware.
Identify linear and elevation dimensions.
List and describe column form components and hardware.
Identify factors affecting form strength and stability.
Demonstrate the proper use of hand and power tool and fall protection equipment.
Form a wall using an Atlas wall forming system to project specifications.

Student Learning Outcomes:
- Analyze prints to determine formwork requirements for gang form and column form projects.
- Construct wall and column formwork using manufactured forming systems.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Abutments

ACA026D:

1.5 Units

This course provides formwork construction skills for the abutment support structure used in most bridges and heavy highway projects. Students will identify abutment anatomy and will be instructed on footing layout, form detailing, and construction techniques used in the industry. Terminology, components, form materials, building code requirements and sequence of construction will be presented. Students will work collaboratively to complete an abutment formwork project including keyway, panel, head wall and wing wall construction. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:
Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Lay out building lines for abutment project.
List the types of formwork used in abutment construction.
Convert fractional measurements and calculate dimensions in decimal units.
Define terms and state the purpose and use of abutments in heavy highway construction.
Apply chamfer and drip grooves according to print specifications.
Identify formwork materials and hardware.
Accurately measure and cut materials for panels.
Identify tools and equipment, materials, personal protective equipment.
Interpret prints to determine abutment configuration and layout dimensions.
Place, connect and securely attach panels in proper position.
Demonstrate ability to correctly install and fasten waler and strongbacks.
Label abutment components and describe its function.

Student Learning Outcomes:
Analyze prints to calculate dimensions for abutment footing layout and formwork elements.
Collaboratively construct all components of abutment formwork to print specifications.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Beam and Deck Forming
ACA027C:
1.5 Units

This course will introduce the use of various woods, and patented forming systems for construction of concrete beams and decks. Students will identify formwork types and installation techniques including calculating materials and setting beam & deck forms. Metal beam forms and capitals will be highlighted. Additionally, layout and builders level skills will be used in this class. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
### Learning Outcomes

**Course Objectives:**
- Label formwork components for beam and deck construction.
- Describe the types of formwork used to build beams and decks.
- Demonstrate safe and appropriate use of tools, materials and equipment.
- Inspect project and verify installation meets industry standards.
- Accurately calculate formwork dimensions and layout locations.
- Construct a beam and deck according to plan using proper construction techniques.
- Accurately layout building lines for beam and deck project.
- Identify terms, construction codes and beam and deck industry standards.
- Identify material types, grades and quantities using print specifications.
- Find bracing locations.
- Determine beam types and elevation for deck formwork.
- List safety hazards and accident prevention methods.
- Explain the factors that influence beam and deck construction design.
- Utilize the appropriate views to find details for formwork construction.
- Determine shoring details indicated on project plans.

**Student Learning Outcomes:**
- Interpret prints to accurately locate beam supports and formwork bracing.
- Work in groups to construct basic wood beam and deck shoring to project specifications.

### Units & Hours

**Minimum Units:**
1.5

**Maximum Units:**
1.5

**Total Hours:**
45.0

### Stairs and Ramp Forming

**ACA027D:**

1.5 Units

Provides related and supplemental instruction for apprentice carpenters in the areas of the various techniques to form stairs and ramp structures; related safety, mathematics, and blueprint reading. Open Entry/Open Exit.

### Requisites

**Requisites:**
None

### Transferability & General Education Options

**Transferable:**
Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Describe the procedures for curing and testing concrete.
Inspect completed ramp for compliance with applicable codes and regulations.
Define terms and identify building codes and ADA regulations.
Demonstrate proper construction techniques to build ramp formwork.
Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.
Accurately measure and cut materials to various lengths for required thread and riser members.
Calculate dimensions, and apply mathematic formulas to determine materials, create cut lists, and to determine and verify angle layouts.
Utilize print information to calculate volume of concrete.
Demonstrate proper construction techniques to build stairs.
Verify complete stairs meets applicable codes and regulations.
Identify stair and ramp components.

Select and use the appropriate layout techniques locating ramp elements.

Student Learning Outcomes:
Accurately layout out stair/ramp building lines and stringers according to print specifications.
Complete straight stair and connecting ramp construction in compliance with Americans with Disability Act regulations.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Bridge Construction

ACA028A:

1.5 Units

This course provides students with an overview of bridge types and the skills required to perform standard bridge construction tasks. Students will be able to describe the purpose and function of exterior and interior girders, edge forms, bulkheads and hinge forms. Bridge formwork project will include panel construction, assembly, and hardware installation tasks. Related safety, math and print reading will be covered in the training. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Identify and define the nomenclature of concrete box girder bridges and forms.

Explain the difference between various methods and types of construction.

List assembly steps for box girder bridges.

Inspect box girder bridge to verify it meets industry codes and standards.

Install bridge formwork using the proper sequence of construction.

State how seismic codes are applied to bridge construction.

Explain the purpose of substructure components.

Identify bridge orientation, elevation and drainage angle.

Utilize the proper bracing and re-shoring methods.

Describe the proper alignment of superstructure to substructure.

Analyze prints to determine the proper forming method and materials.

Student Learning Outcomes:
- Analyze prints to accurately determine and layout location for bridge formwork.
- Apply the correct methods and procedures to construct a bridge and deck project to industry standards.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Intermediate Commercial Framing

ACA028C:

1.5 Units

This course enhances basic wall framing theory, and wall construction techniques are applied at increased skill levels. A review of basic wall framing and floor plans used for job planning, design recognition, and materials lists is included. Students will layout and detail wall plates for locating basic wall components and door openings. Instruction will include measuring skills, mathematical principles, wall assembly and installation procedures, and detail how structural connections are made. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5
Learning Outcomes

Course Objectives:
Assemble and properly fasten cut members to form basic wall sections
Demonstrate proper use of equipment and implementation of safety precautions
Verify alignment
Accurately measure and cut materials to various lengths for required wall members
Recheck plumb line
Select and use the appropriate layout techniques and tools to mark plates for locating wall elements and openings
Install and securely connect wall sections to complete project according to plan specifications
Calculate loads and dimensions, and apply mathematic formulas to determine materials, create cut lists, and to verify angle layouts
Apply corrective measures for design flaws
Interpret prints and plan views to find dimensions, and identify materials for job planning and construction
Identify basic wall elements, terms and building codes used in commercial wall construction

Student Learning Outcomes:
- Determine project scope and wall framing methods to employ from prints and specifications.
- Demonstrate ability to coordinate and execute an exterior and interior wall construction project to print specifications.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Bridge Falsework
ACA028E:

1.5 Units

This course will focus on bridge falsework construction. The techniques for bent assemblies, base sub-assemblies, deck soffits and hardware installation will be presented. Falsework tasks will include rigging and alignment techniques. Related safety, math and print reading will be covered in the training. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
ACA021A - Orientation
AND
Prerequisite
ACA021B - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable
Learning Outcomes

Course Objectives:

- Identify and define the nomenclature of bridges and falsework
- List the sequence used in the construction of bridge falsework
- Discuss the factors that lead to falsework failures
- Identify construction building codes and state heavy highway requirements
- Identify materials and hardware used in falsework construction
- Complete a site safety inspection
- Prepare sub-assembly materials and sandboxes
- Demonstrate the safe use of hand/power tools and chain saw
- Practice converting units of measure
- Interpret prints to locate sub-assemblies and bent spacing
- Establish offset building line from reference points at given distance
- Set sub-assemblies to elevation
- Install bottom cap and verify elevation
- Assemble base and bent support posts
- Attach bracing and install hardware
- Inspect construction and verify alignment and elevation
- Accurately lay out deck form using project plans
- Measure, cut and assemble bridge deck supports
- Correctly install and secure in place hardware and bracing
- Utilize the proper nailing pattern for deck sheathing
- Demonstrate safe use of tools and personal protective equipment

Student Learning Outcomes:

Analyze construction prints to determine falsework supports and bent configuration.
Construct bridge falsework to industry standards.

Units & Hours

Rigging

ACA029A:

1.5 Units

This course presents both lifting theory and practical rigging methods and procedures. The design, characteristics and safety working load of lifting hardware will be discussed. Rigging attachment procedures, lifting equipment, limits of operation and communication practices will be covered. Upon successful completion, students will be issued United Brotherhood Of Carpenters (UBC) Rigging Qualification Cards. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:

Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Demonstrate proper use of signals for productive load movement.
Safely lift and place loads with smooth motion.
Communicate clearly during load movement.
Inspect rigging hardware for damage and wear.
Identify the theories, historical and modern rigging tools and inventions.
Demonstrate ability to correctly attach slings and hardware.
List the types of rigging hardware and applications.
Inspect slings for damage and wear.
Match crane hazards with rigging accident prevention measures.
Describe industry accepted safety standards and rigging regulations.
Identify the design, construction, and safe working load of various slings.
Describe industry accepted safety standards and rigging regulations.
Properly tie selected types of knots used in rigging.
Calculate center of gravity for asymmetrical loads.

Student Learning Outcomes:
Identify and properly select rigging hardware attachment to industry standards.
Demonstrate the correct use of rigging procedures and signaling to safely place loads.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Rigging Qualification Studies - Journeyworker
ACA029BJ:
0.5 Units

This course provides an overview of lifting theory and the practical rigging methods and procedures required to maintain industry credentials. Rigging standards, procedures and communication practices will be covered. Upon successful completion, a student will be issued United Brotherhood of Carpenters (UBC) Rigging Qualification Cards.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
0.5

Learning Outcomes

Course Objectives:
Demonstrate an applied understanding of slings with regard to evaluation points.
Demonstrate an applied understanding of rigging industry standards of lifting and configurations.
Demonstrate an applied understanding of rigging consideration terminology and theory.
Demonstrate an applied understanding of rigging hardware related to evaluation points.

Student Learning Outcomes:
Assess the load sling configurations presented to establish the application meets rigging standards and safe working load limits.
Evaluate attachment hardware to comply with safe lifting practices for designated loads.

Units & Hours

Minimum Units:
0.5

Maximum Units
0.5

Total Hours
9.0

Solar Installer Level 1
ACA029C:

1.5 Units

This course will provide workers with an industry overview and outlook for photovoltaic (renewable) energy production. Key terms and concepts of photovoltaic system operations will include solar cell technology, photovoltaic (PV) array configuration, series and parallel circuits, testing equipment, inspection, balance of system components, mounting methods, and applicable codes. Practical training will cover site analysis, system orientation based on site location, safety concerns, utilization of construction tools and skills for rooftop and ground mount system installations. Upon successful completion, students will receive a United Brotherhood of Carpenters (UBC) Solar Installer Level 1 Qualification Card.

Requisites

Requisites:
Prerequisite
ACA021A - Orientation

AND

Prerequisite
ACA021B - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Identify components and characteristics of several solar panel systems

Describe methods for laying out, orienting, and mounting modules or arrays

Examine the steps for measuring and analyzing system performance and operating parameters

Identify the characteristics and function of photovoltaic (PV) system devices

Explain criteria for inspecting and testing photovoltaic (PV) modules and devices

Determine materials, equipment, and installation sequences necessary to maximize installation efficiency

Assemble solar modules, panels, or support structures, as specified

Construct foundation forms to print specifications

Demonstrate safe operation and proper use of personal protection equipment (PPE), tools and equipment

Explain the tenants of sustainable construction practices and related green building/products rating systems

**Student Learning Outcomes:**

Describe electrical and solar power components of rooftop, ground mount and large scale photovoltaic (PV) systems.

Install several rooftop and ground mounted photovoltaic (PV) systems in accordance with codes and standards.

**Units & Hours**

**Standard First Aid**

ACA030A:

0.4 - 1.0 Units

Enables carpenters to cope with accidents and emergency situations with the goal of protecting and saving lives. American Red Cross certificate available upon successful completion. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

Transferable:

Not transferable

**Weekly Lecture Hours:**

1.0

**Learning Outcomes**

**Course Objectives:**

Discuss the value of AED along with CPR

Differentiate between cardiac arrest and heart attack

Discuss and demonstrate CPR appropriate use of compressions only CPR

Demonstrate the appropriate emergency action steps for choking, sudden illness, injury, and environmental emergencies

Recognize the signs and symptoms of heart attack

Define defibrillation and explain how to restore an effective heart rhythm

Discuss and demonstrate the Check-Call-Care action steps

Discuss and demonstrate CPR emergency care steps and rescue breathing

List the four key actions of responders in an emergency

Identify precautions to take when using AED
Describe the links in the Cardiac Chain of Survival

Discuss the factors that lead to deciding to take action in an emergency

Describe use of AED in various special situations

Demonstrate how to use an AED

**Student Learning Outcomes:**

Identify and perform the proper treatment for various sudden illnesses and injuries, given a set of emergency workplace situations.

Pass the American Red Cross certification exam.

**Units & Hours**

**Minimum Units:**

1.0

**Maximum Units**

1.0

**Total Hours**

43.2

**Cabinet Millwork and Assembly**

**ACA033A**:

1.5 Units

This course details cabinetry fabrication from design and function through the complete production process. An emphasis will be placed on print interpretation, job planning, and proper construction sequence. Countertops and hardware styles and types will be discussed. Students will use the methods and procedures presented to build a typical base unit. Open Entry/Open Exit.

**Requisites**

**Requisites:**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

Accurately measure and cut various cabinetry joints

Identify terms, components, and hardware

Correctly use hand and power saws to construct components

Calculate materials and create cut list for cabinet parts fabrication

Shape doors according to project plan.

Inspection cabinet function and properly adjust

Accurately measure and cut various cabinetry joints

Correctly use hand and power saws to construct components
Accurately measure and cut various cabinetry joints
Identify countertops types, styles and construction methods
List the type wood for cabinet components on project plans
List the steps in the cabinet fabrication and assembly process
State the classes and sizes of standard cabinets
Accurately measure and cut various cabinetry joints
Correctly use hand and power saws to construct components
Explain the similarities between commercial and residential installations

**Student Learning Outcomes:**
- Analyze a basic cabinet project plan to determine cabinet design and material requirements.
- Construct a basic base cabinet to industry standards.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units:**
1.5

**Total Hours:**
45.0

**Cabinet Installation**

**ACA033B:**

1.5 Units

This comprehensive course covers cabinet installation from establishing the design layout to attaching countertops. To enhance student’s skill level an emphasis will be placed on print interpretation, job planning and proper installation sequence. Students will use the methods and procedures presented to install typical upper and lower cabinetry units and countertops. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- State the classes and sizes of typical base and wall cabinets
- Install cabinetry components according to drawing specifications
- Correctly and safely use tools and equipment
- Inspect installed cabinetry function and properly adjust
- Install a countertop to drawing specifications
Install cabinetry components according to drawing specifications
List the steps in the installation sequence
Identify terms, components and hardware
Accurately measure, scribe and layout cabinetry
Accurately measure, scribe and layout cabinetry

Student Learning Outcomes:
- Work cooperatively to complete a base and wall hung cabinet installation to industry standards.
- Explain and demonstrate the importance of scribing in cabinet installation.

Units & Hours
Minimum Units: 1.5
Maximum Units: 1.5
Total Hours: 45.0

Show Case and Loose Store Fixtures
ACA033C:
1.5 Units

This course includes basic cabinetmaking construction techniques for the installation of commercial store fixtures. Students’ skill level will benefit from an emphasis placed on measuring, leveling, hand and power tool use, and safety. Students will interpret prints and material bills for the store fixture components included in the course project. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours: 1.5

Learning Outcomes
Course Objectives:
- Accurately layout, construct, position, install and align fixtures to 1/8” tolerance
- Use problem solving skills, repair techniques and procedures to modify fixtures
- Identify terms, types of fixtures, electrical components, and hardware
- Calculate measurements and create a detailed material and cut list
- Demonstrate the proper receiving, transporting and staging of fixtures
- Interpret prints to identify dimensions, components; layout and installation details

Student Learning Outcomes:
- Demonstrate ability to install a typical commercial arrangement of show case products.
- Interpret project plans and install loose store fixtures according to design criteria.
Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Molding and Trims
ACA033D:
1.5 Units

This course covers how moldings and trims are utilized to finish exterior and interior construction design features. Product styles, characteristics, applications, and installation methods are included in the discussions. The tools techniques for cutting, coping and installing various molding and trim types are presented and practiced throughout the training. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Describe the design, styles and types of molding and trim
Interpret prints to calculate materials
Perform inside and outside miters
Utilize specifications to problems solve material issues
Troubleshoot joints and angles
Accurately measure layout molding and trim
Compare and contrast commercial and residential applications
List finishing methods
Cope miter cuts accurately
Practice cutting materials using proper tools and techniques
Install, nail, chalk and putty various molding and trims

Student Learning Outcomes:
Complete a molding and trim project to meet industry standards.
Identify and describe the moldings and trims used in finish carpentry.
1.5

Maximum Units
1.5

Total Hours
45.0

Plastic Laminates
ACA034A :

1.5 Units

This course covers installation of plastic laminates including function and design. Suitable materials, styles, and textures will be identified. Students will review prints to determine laminate type and calculate quantities. Installation methods and techniques for drop edge and back splash together with cleaning and repair will be emphasized. A countertop will be designed and installed to specifications. Correct use of tools and other equipment will be stressed. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
List positive/negative factors affecting selection of laminate for countertops
Discuss the common types of countertop substrates
Identify terms, applications and characteristics of manufactured products
Finish and inspection countertop laminates for proper installation
Shape substrate countertop and backsplash
Select and apply the appropriate adhesives
Demonstrate the proper router techniques
Accurately measure and cut plastic laminates to size
Study plans and estimate materials for installation project
Adhere and trim laminates according to drawing specifications
Adhere and trim laminates according to drawing specifications
Demonstrate safe and correct use of tools and equipment

Student Learning Outcomes:
Install a plastic laminate countertop to industry standards.
Explain the pros and cons for plastic laminate installations.

Units & Hours
Minimum Units:
1.5
Maximum Units
1.5

Total Hours
45.0

Solid and Stone Surfaces
ACA034B :

1.5 Units

This course covers both basic and advanced assembly and installation techniques for solid surface, natural stone and manufactured materials. Various products, designs, materials, accessories, and safety considerations will be included. Students will use the procedures presented to fabricate countertops with backsplash, and create a design inlay. Open Entry/Open Exit. Previous Title: Apprenticeship Carpentry 034B, Solid Surface and Stone Countertops (2017)

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Interpret prints and plan views to find dimensions, and identify materials for job planning and construction.
Select and use the appropriate layout techniques and tools to mark material for locating joints.
Install and securely connect countertops using proper procedures to complete project according to plan.
Install and securely connect edge, backsplash and inlay design using the proper procedures.
Demonstrate proper use of equipment and implementation of safety precautions.
Accurately measure and cut materials to lengths per countertop specification.
Assemble and properly fasten cut members to form countertop joints.
Assemble and properly fasten cut material for edge, backsplash and inlay specifications.
Identify solid surface terms, materials, hardware and special tooling.
Calculate dimensions, and apply math formulas to determine materials, create cut lists, and to verify angle layouts.

Student Learning Outcomes:
Fabricate and install a solid surface/natural stone countertop project.
Troubleshoot installations to make repairs on solid surface materials.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5
Total Hours
45.0

Stair Trim
ACA034C:

1.5 Units

This course covers how various trims are utilized to finish stair construction design features. Product styles, characteristics, applications, and installation methods are included in the discussions. The tools techniques for cutting and installing selected trim types are presented and practiced throughout the training. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
Troubleshoot joints and angles
Verify handrail height meets code and ADA requirements
Correctly and safely use tools and equipment
Install, nail, chalk and putty various trims
Describe the design, styles and types of stairs and trims
Perform inside and outside miters
Cope miter cuts accurately
Match the appropriate trim type for stairs and wall application
Interpret prints to calculate materials
Demonstrate the proper use of installation techniques for wainscot
Accurately measure layout trim

Student Learning Outcomes:
Fabricate and fit trim material for a fine finish staircase.
Select the suitable trim materials for a fine finish staircase.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0
Doors and Door Hardware  
ACA034D :

1.5 Units

This course covers the installation process for several types of security and exit door hardware. Discussion of electrical and card reader systems will be included. An emphasis will be placed on print interpretation, codes, door schedules, symbols, and hardware recognition. Students will use the methods and procedures presented to install selected door and hardware systems. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
List the steps in the door and hardware installation sequence
Troubleshoot door frame openings
Identify “hand” “swing” labels
Identify codes, and doors and hardware components using door schedules on prints
Cut door for hinges, and locksets
Locate doors on floor and elevation views
Select the appropriate hinges, and locksets based on print specifications
Install door framing
Correctly and safely use tools and equipment
Select and hang appropriate door types
State the classes and sizes of typical doors
Ability to interpret door schedule details
Attach and inspect hardware for proper function

Student Learning Outcomes:
Install selected door and door hardware according to print specifications.
Explain what Occupational Safety and Health Administration (OSHA), American Disability Act (ADA), and fire code regulations govern the hardware industry.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0
Exit and Electrical Security Devices
ACA035C :

1.5 Units

This course will highlight the classification, types, models, codes, and uses for accident hazard exit ("panic") devices. A range of security products and door hardware used in the industry such as crossbars, latches, flush bolts, and kick plates will be discussed. Proper selection, installation and adjustment techniques for selected devices will be covered. Students will complete installation and adjustment of two types of exit devices. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Accurately install and adjust a concealed vertical rod exit device.
Describe four styles of exit devices.
Explain the differences between panic and fire exit devices.
Use adjustment procedures and techniques to modify exit/ electrical security devices.
Identify terms, types, classification and installation applications.
Complete a detailed material list for exit hardware selected installation projects.
Properly install a rim exit device on a door.
Accurately install and adjust a mortise exit device.
Interpret prints/schedules to identify dimensions, component layout and installation details.
Accurately install a surface vertical rod exit device on a door.

Student Learning Outcomes:
Install and adjust door exit hardware to manufacturer's instructions.
Select the proper types and models of exit hardware needed for an exit hardware project.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Scaffold Erector, Standard 40 Hour - Journeyworker
ACA040CJ :
1.5 Units
This course will cover the basic techniques and procedures associated with frame, system, and tube and clamp scaffolds. Upon successful completion, a student will be issued a United Brotherhood Carpenters (UBC) Scaffold Qualification Card.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Demonstrate an applied understanding of introductory frame, system and tube and clamp scaffolding.

Demonstrate an applied understanding of scaffolding inspection, assembly and removal in the areas of frame, system, tube and clamp.

Demonstrate an applied understanding of scaffolding configurations in the areas of frame, system, tube and clamp.

Student Learning Outcomes:
- Determine the proper scaffold configuration, layout and material list, provided with dimensions and load characteristics.
- Safely assemble and dismantle to industry standards three types of scaffolds.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Scaffold Erector, Systems Scaffold - Journeyworker
ACA040EJ:

0.5 - 0.6 Units

This course provides the required instruction in basic techniques and procedures associated with system scaffold components and focuses on terminology, component identification, construction practices, and safety considerations. Students will erect typical configurations to industry standards using system scaffold components. Upon successful completion, a student will be issued a United Brotherhood Carpenters (UBC) Scaffold Qualification Card. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
Learning Outcomes

Course Objectives:
Demonstrate an applied understanding of scaffolding inspection, assembly and removal.
Demonstrate an applied understanding of system scaffolding configurations and methods.
Demonstrate an applied understanding of introductory system scaffolding.

Student Learning Outcomes:
- Determine the proper scaffold configuration, layout and material list, provided with dimensions and load characteristics.
- Safely assemble and dismantle to industry standards System types of scaffolds.

Units & Hours

Minimum Units:
0.5

Maximum Units:
0.5

Total Hours:
10.8

Powered Industrial Truck Operator - Rough Terrain

ACA041A:

0.4 Units

This course covers an overview for safe operation of rough terrain lift trucks for the construction industry, Code of Federal Regulations (CFR), and training requirements. Upon successful completion, students will be issued a United Brotherhood of Carpenters (UBC) Powered Industrial Truck Operator-Rough Terrain (RT) Qualification Card. Open Entry/Open Exit.

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
- Identify the parts of a rough terrain lift truck
- Explain the proper sequence and recording for equipment inspection and refueling
- Demonstrate safe operation of a rough terrain lift truck in forward and backward movement
- Match safety hazards and operating precautions for equipment
- List and state the types and use of operational controls
- Perform a safety inspection using inspection criteria

Student Learning Outcomes:
- Explain potential hazards and site safe operating procedures for rough terrain lift trucks.
- Apply the proper inspection and maintenance procedures for rough terrain lift trucks.

Units & Hours
Total Hours
7.2

Powered Industrial Truck Operator - Industrial Terrain
ACA041B :

0.4 Units

This course covers an overview for safe operation of industrial lift trucks for the construction industry, Code of Federal Regulations (CFR) regulations, and training requirements. Upon successful completion, a student will be issued an United Brotherhood of Carpenters (UBC) Powered Industrial Truck Operator-Industrial Truck (IT) Qualification Card. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Perform a safety inspection using inspection criteria
Match safety hazards and operating precautions for equipment
Demonstrate safe operation of an industrial lift truck in forward and backward movement
Identify the parts of a industrial lift truck
List and state the types and use of operational controls
Explain the proper sequence and recording for equipment inspection and refueling

Student Learning Outcomes:
Articulate potential hazards and site safe operating procedures for industrial lift trucks.
Apply the proper inspection and maintenance procedures for industrial lift trucks.

Units & Hours
Total Hours
7.2

Acoustical Ceilings
ACA061A :

1.5 Units

This course provides an introduction to basic acoustical ceiling installation. Acoustical theory, engineering, and applicable building and seismic codes requirements will be covered. Students will install acoustical ceilings to industry standards using the proper techniques and procedures. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Inspect and verify attached ceiling materials are fastened according to seismic codes.

Explain the proper preparation and application of various wall molds and trims.

Employ the proper installation sequence to construct a basic acoustical ceiling.

Identify building and seismic codes required for installation of acoustical ceilings

Use the appropriate math functions to determine measurements and materials for basic grid pattern.

Recognize and describe the purpose of material components used in the acoustical ceiling installations.

Describe acoustical theory, engineering controls and explain how it is applied to ceiling design.

Demonstrate accurate layout of seismic grid supports to print specifications.

Select and safely use hand and power tools for assigned tasks.

Select and safely use hand and power tools for projects assigned.

Student Learning Outcomes:
- Describe acoustical engineering controls and materials used in acoustical ceiling designs.
- Demonstrate the proper installation of a basic acoustical grid ceiling to print specifications.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Advanced Acoustical Ceiling Layout
ACA061B :
1.5 Units

This course identifies the advanced layout methods used to complete complex acoustical system installations. Students will use the skills presented to complete selected multifaceted acoustical ceiling layout projects as part of this course. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Use appropriate techniques to layout complex multifaceted ceiling grids
Employ proper procedures to establish transfer marks
Assess architectural features and develop a layout plan
Demonstrate accurate layout of “beginning point”
Identify layout methods for various architectural design
Describe how lasers and transits are used in layout procedures
Practice calculating the dimensions for sample layouts
Demonstrate correct use of layout tools and equipment

Student Learning Outcomes:
Assess architectural features and determine the appropriate layout methods and techniques to apply.
Accurately layout several complex multi-surface ceiling grids to industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Advanced Acoustical Ceiling Installation
ACA061C :

1.5 Units

This course identifies the advanced layout methods used to complete complex acoustical system installations. Students will use the tool and framing techniques presented to complete selected multifaceted acoustical ceiling layout projects. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Utilize correct procedures for establishing level and plumb surfaces
Demonstrate the safety and proper use of tools and equipment
Explain the characteristics of multifaceted ceiling grid layouts
Employ proper techniques to prepare trim and mold materials
Calculate materials and select materials per shop specifications and drawings
Layout, cut, and install ceiling grids according to plans
Demonstrate proper use of framing techniques

Install drywall finish materials and specialty edging to plan specifications

Identify terms, methods, material characteristics, green rating systems, and building codes

**Student Learning Outcomes:**

- Analyze architectural ceiling features to determine the appropriate framing methods and installation techniques to apply.
- Complete construction of complex architectural acoustical ceiling to industry standards.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units:**
1.5

**Total Hours**
45.0

**Standard Acoustical Grids ACA062:**

1.5 Units

This course covers various grid patterns considered as standard for acoustical ceilings in the interior system construction industry. The methods and procedures used to form the patterns are the key focus of the course. Students will install several standard acoustical grid patterns to print specifications using the proper techniques and procedures. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**

- Use project plans to determine grid pattern and components
- State how wall configuration affects installation methods and procedures
- Demonstrate accurate layout of standard ceiling grid patterns to print specifications.
- Evaluate installed grids for compliance with industry standards.
- Identify building and seismic codes required for installation of acoustical ceilings
- List and describe the characteristics of standard acoustical grids styles and their applications.
- Use the appropriate math functions to determine measurements for standard grid patterns layout.
- Complete layouts for Horizontal Grid Pattern, Diagonal, Radius Wall, Gable Ceiling, Fine Line grids

**Student Learning Outcomes:**

- Interpret ceiling plans to distinguish the characteristics of various standard grid patterns.
- Accurately layout and install standard grid acoustical ceilings to print specifications.
Units & Hours
Minimum Units: 1.5
Maximum Units: 1.5
Total Hours: 45.0

Suspended Ceilings
ACA063:
1.5 Units
Provides instruction covering the installation of suspended ceilings in various configurations and will include both radius and square wall drywall suspension methods. Students will complete selected suspended ceiling installations using the techniques presented. Open Entry/Open Exit.

Requisites
Requisites: None

Transferability & General Education Options
Transferable: Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Apply the correct layout procedures for AH, gable ceiling and diagonal patterns.
Describe the characteristics of suspended acoustical ceilings and their applications.
Employ proper techniques to install suspended drywall grid for a circular space.
Use appropriate math functions to determine measurement for radius wall layout.
List the procedures used to install suspended drywall ceiling grids for a circular space.
Compare suspended ceilings with standard grid installation methods and procedures.
Explain the importance of the proper selection and use of tools and materials.
Demonstrate accurate layout of radius wall pattern to print specifications.
Inspect installed ceiling grid components for compliance with industry standards.
Evaluate drywall installation for proper attachment and use of fasteners.
Demonstrate proper material handling techniques.
Utilize the proper techniques to install suspended drywall grid for a square room.
Identify the procedures used to install a square suspended drywall ceiling.

Student Learning Outcomes:
Articulate the installation differences between standard and suspended grid ceiling systems.
Accurately layout and install selected suspended acoustical ceiling grids to print specifications.
Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Acoustical Soffits
ACA064:

1.5 Units

Provides instruction covering the construction of acoustical soffits in various configurations and will include square and slant faced, tapered, concealed, drywall suspension and sloped soffits methods. Students will complete selected acoustical soffit installations using the techniques presented. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Use appropriate math functions to determine materials for sloped and transition soffits.
Identify construction information on prints for installation of acoustical soffits.
Use appropriate math functions to determine measurements for square and slant faced soffit layout.
Inspect and verify soffit installations comply with industry standards.
List and describe the characteristics of two types of acoustical soffits.
Demonstrate the ability to construct a concealed system soffit.
Discuss the purpose and use of acoustical soffits in construction.
Demonstrate the ability to layout and construct both square and slant faced soffits.
Demonstrate the ability to construct a soffit using drywall suspension materials.
Use appropriate math functions to determine measurements for placing bracing.
Demonstrate the ability to construct a tapered and sloped transition soffits.

Student Learning Outcomes:
Differentiate construction elements for multiple variations of acoustical soffits.
Accurately layout and construct multiple variations of acoustical soffits to industry standards.

Units & Hours

Minimum Units:
Maximum Units
1.5

Total Hours
45.0

Prefab/Sound Panels
ACA065:

1.5 Units

This course will focus on the technical knowledge and skills needed for the installation of prefabricated wall and ceiling panel systems. Students will use the proper techniques and manufacturers’ guidelines to install various types of prefabricated wall and ceiling panels. Open Entry/Open Exit.

Requisites

None

Transferability & General Education Options

Transferable:

Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
Discuss where prefabricated /sound panels are used
Install fabric panels according to design application.
Install fabric panels according to design application
Use appropriate math functions to determine the number and size of panels.
Use appropriate math functions to determine the number and size of panels
Identify prefabricated /sound panel types and materials
Demonstrate proper ceiling attachment of pyramid diffusers.
Explain the difference between sound reduction and sound proofing
Demonstrate proper wall placement of selected styles of diffusers

Student Learning Outcomes:

Describe the acoustical characteristics for various types of prefabricated sound panels.
Complete wall and ceiling panel assembly and installation to print specifications.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
Concealed/Glue-Up/Staple-Up Systems
ACA066:

1.5 Units

This course illustrates the design flexibility of concealed, semi-concealed ceilings and soffits using glue-up and staple-up systems. Students will employ the glue-up and staple-up techniques presented to install concealed grid ceiling system. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Employ proper installation techniques to complete a concealed ceiling system.

Describe ceiling applications and installation procedures.

Use appropriate math functions to calculate dimensions for concealed ceiling and soffit layouts.

Identify concealed glue-up/staple-up system materials.

Use appropriate math functions to calculate mold and trim materials for installation.

Compare and contrast concealed glue-up and staple-up system with standard grid ceiling systems.

Demonstrate the ability to form various types of corners using molds and trims.

Comply with applicable building and seismic codes for installation.

List installation procedures based on type of material to be attached.

Demonstrate the ability to construct a soffit with concealed system materials to industry standards.

Student Learning Outcomes:

Compare and contrast installation methods between standard grids and concealed ceiling systems.

Construction a concealed ceiling and modify procedures to construct a concealed system soffit project to industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Designer and Specialty Trims
ACA067:
1.5 Units

This course covers specialty skills needed to produce professionally finished edges for designer ceiling installations. Students will use the techniques presented to produce multiple ceiling edge contours using the compasso trim system. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
Demonstrate accurate layout and installation of a free floating trimmed ceiling.
Use appropriate math functions and formulas for elliptical project layout.
Assess installation and verify compliance with industry standards.
Use appropriate math functions to determine dimensions for mold and trim preparation.
Perform layout using the correct techniques for installation of grid ceiling system designs assigned by the instructor.
Use appropriate math functions to calculate the materials needed to complete each project.
List installation procedures for compass mold and trim.
Select and prepare appropriate trim materials and integrate into grid ceiling.
Identify the custom perimeter trim products, Axiom, Infinity and Compasso.
Install "S" wave trimmed ceiling to comply with accuracy criteria on plans.

Student Learning Outcomes:
  Explain how designer and specialty trims are used to produce architecturally contoured finished edges.
  Complete multiple ceiling installations using the compasso trim system to industry standards.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Metal Pan and Security Systems

ACA068:

1.5 Units

This course will focus on design, function and installation of metal pan and security systems incorporated into construction of suspended ceilings. Students will demonstrate the ability to installation these components to direct wire and indirect channel suspension ceiling grid systems. Open Entry/Open Exit.
Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
State the sequence of procedures for basic component installation
Demonstrate proper metal pan soffit installation using square and radius techniques
Practice installing mold and trim using proper material handling and tool techniques
Identify ceiling components and product characteristics
Assess the accessibility of ceiling mechanical systems using snap-in and lay-in methods
Employ the applicable seismic installation requirements
Inspect and verify finished installation provides a monolithic appearance
Complete installation of a metal pan in a column to industry standards
State the proper sequence of installation of a metal pan into selected suspended ceiling system

Student Learning Outcomes:
Interpret products and installation methods used to incorporate metal pan and security systems in suspension ceiling grids.
Demonstrate suspended ceiling installation of various metal pan and security system components to industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Orientation
ACA071A:
1.5 Units
This course provides an overview of the construction industry, safety overview, with focus on tool identification and use. Upon successful completion, students will receive OSHA 10 Hour and Powder Actuated Tool Certifications. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Discuss trade applications, quality, and productivity practices
Match safety hazards and precautions for tools, equipment and PPE using manufacturers’ guidelines
Define 10 construction safety regulations to complete OSHA 10 Hour Safety Certification
Set up and fire powder actuated tool using standards required for Operator Certification
Explain the importance of proper interpersonal communication and respectful conduct
Identify the Focus Four safety hazards and accident prevention practices
Select and safely use hand and power tools for assigned tasks
Identify trade terms, industry roles and responsibilities, and basic skills
Discuss the types and benefits of sustainable/green building practices in the workplace
Calculate measurements and accurately perform basic math functions for assigned tasks

Student Learning Outcomes:
Apply Occupational Safety and Health Administration (OSHA) regulations and American National Standards Institute (ANSI) standards to evaluate potential hazards and cite the appropriate accident prevention measures.
Demonstrate safe operating procedures for selected tools and equipment.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Safety and Health Certifications
ACA071B :
2.0 Units

This course promotes hand/power tool and equipment skill development for various construction applications. Scaffold building and equipment operating procedures will also be covered. Financial and life skills will be presented to help them survive in the construction industry. Upon successful completion, students will be issued United Brotherhood of Carpenters (UBC) Scaffold Erector-Welded Frame Qualification Card. Open Entry/Open Exit.

Requisites

Transferability & General Education Options
Not transferable

Weekly Lecture Hours:
Learning Outcomes

Course Objectives:
- Match safety hazards and precautions for scaffold erection procedures
- Conduct scaffold safety and equipment inspections
- Identify scaffold components and applicable OSHA regulations
- Practice using the math techniques presented to layout materials
- Create a financial worksheet and sample budget
- Select appropriate hand and power tools/equipment for assigned tasks
- Identify the effect of economic cycles on construction careers
- Apply the appropriate manipulative techniques for projects
- Meet UBC criteria for erecting and dismantling scaffolds correctly
- Select appropriate math operations to measure and calculate materials
- Utilize proper fastener placement and driving techniques
- Properly stage, assemble, and disassemble selected scaffolding

Student Learning Outcomes:
- Students will be able to demonstrate proficiency with various tools and equipment appropriate for the assigned construction tasks.
- Students will be able to demonstrate the proper erecting/dismantling procedures for welded frame scaffolds.

Units & Hours

Minimum Units:
2.0

Maximum Units:
2.0

Total Hours:
54.0

Tool/Equipment Applications

ACA071C:

1.5 Units

This course covers the safe and appropriate use of fall protection, and emergency response procedures. Tool applications presented in this training will provide opportunities for tool skill mastery and equipment operation. Upon successful completion, students will be issued an American Red Cross First Aid/CPR Certification Card, and United Brotherhood of Carpenters (UBC) Fall Protection Qualification Card. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5
Learning Outcomes
Course Objectives:
Perform emergency response techniques and pass American Red Cross first aid, CPR and AED training tests.
Identify selected tools parts, operation, and accessories
Demonstrate the ability to select and use the appropriate fall prevention and personal fall arrest systems
Match safety hazards with appropriate fall protection equipment
Demonstrate the ability to select the appropriate tools for the tasks assigned
Demonstrate advanced tool manipulative proficiency
Identify fall protection methods and applicable OSHA regulations
Discuss health emergencies and identify first aid and CPR techniques

Student Learning Outcomes:
- Apply the appropriate first aid and CPR/AED techniques for specific emergencies.
- Demonstrate the proper don/doff of fall protection systems.
- Demonstrate proficiency with various tools to complete projects to industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Basic Metal Framing
ACA072A:

1.5 Units
Provides students with an overview of the use of metal framing materials in construction of building interiors. A comparison of metal framing and typical wood framing techniques will be presented. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Construct layout lines using project dimensions
Identify metal framing materials and components
Select and install drywall and lath trims
Apply the proper cutting and attachment techniques to attach drywall
Prepare and cut framing materials to size
Construct walls using metal framing components
Plumb and level components
Assess construction and material installation for quality standards
Identify and determine material quantities
Describe drywall and lath trims applications
Describe and calculate project materials

Student Learning Outcomes:

- Explain the major differences in materials and installation techniques for metal framing compared to typical wood framing.
- Use the proper tools and materials to complete basic metal framing construction sequence when presented with an installation plan.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Basic Lathing

ACA072B:

1.5 Units

This course presents the basic framing and lathing methods used in the industry for exterior/interior installations. The course will focus on exterior waterproofing, lath, and trim installation procedures. Students will use the skills presented to complete an exterior lathing project as part of this course. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:

- Describe lathing materials and trims
- Explain how poor and proper lath installation affects plaster finishing
- Describe the types of materials used to apply an exterior finish on lath
- List the steps in the sequence of construction
- Employ fastening criteria for paper and wire lath installation
Practice installation methods for selected lathing projects
Assess application surface for defects and installation issues
Calculate materials using project drawings
Complete layout for framing project prop
Prepare materials for installation
Assess completed project for standards and quality construction
Construct framing for lathing application

Student Learning Outcomes:
Identify exterior framing methods and lathing materials.
Complete an exterior lathing project to industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Advanced Lathing
ACA072C :

1.5 Units

This course presents advanced methods and application techniques for lath and trim products used on exterior-interior metal framing. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
ACA021A - Orientation

AND

Prerequisite
ACA021B - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Layout, cut, and safely handle various components, trims and beads
Identify terms, methods, material characteristics, and building codes
Employ layout sequence to accurately locate construction elements
Interpret prints to determine layout dimensions and assess designs flaws
Place and correctly fasten lath to exterior wood and steel substrates
Calculate materials and select trim products per shop specifications and drawings
Discuss the importance of communication on the jobsite
Describe uses and advanced application of lath and trims types
Utilize correct procedures for establishing level and plumb surfaces
Apply advanced techniques to install selected lath and trims to meet print criteria

Student Learning Outcomes:
- Analyze prints and evaluate suitable materials to complete complex lath installations.
- Assess design flaws and apply corrective measures based on applicable standards and codes.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Framing Ceilings and Soffits
ACA073A:

1.5 Units
This course identifies the materials used and their application for various types of fire rated walls, ceilings and soffits. It presents methods and procedures used for layout and template development. Drywall and trim applications are discussed. The types of tools used and their associated safety, applied math and print reading fundamentals are reviewed. Students will use the skills presented to complete a ceiling and soffit project as part of this course. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
- Execute framing construction sequence and verify allowable tolerances
- Describe the components and construction procedures for framing projects
- Use correct leveling tool procedures to set soffit elevation
- Calculate materials for project framing and trim installation
- List the steps used to develop a framing plan and detail worksheet
Select and use appropriate framing materials based on framing plan
Demonstrate proper fastening of ceiling joists to code requirements
Apply proper techniques to attach and fasten drywall and trims to wall and soffit framing
Demonstrate proper set up of leveling equipment
Construct fire-rated shaft wall and soffit framing to print specification

**Student Learning Outcomes:**
- Complete this course will be able to determine proper framing methods and materials using information on prints.
- Complete ceiling soffits framing projects using the proper sequence and procedures.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units:**
1.5

**Total Hours**
45.0

**Framing Suspended Ceilings**

**ACA073B:**
1.5 Units

Provides instruction covering the installation of circular ceilings with drops, and drywall suspension in both square and circular grids. Students will complete selected suspended ceiling installations using the techniques presented. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Install ceiling grid components to meet industry standards.
- Calculate measurements and accurately perform math functions for ceiling layout of suspended panel patterns.
- Demonstrate proper fastening techniques to industry standard
- Compare suspended ceiling installation techniques with standard grid installation methods and procedures
- Install ties to meet industry codes
- Accurately set wall mold and align
- Construct square grid as indicated on project plan
- Install ties to meet industry codes
- Place borders according to project plans
Correctly align drywall to framing

List and describe the characteristics of suspended acoustical styles and their applications.

Construct circular grid as indicated on project plan

Accurately set wall trim at given height

Demonstrate accurate layout of suspended ceiling grid patterns to print specifications.

Identify building and seismic codes required for installation of acoustical ceilings

Accurately layout AH, Radius Wall, Gable Ceiling, Diagonal, Fine Line Drywall circular and square grids.

**Student Learning Outcomes:**

- Illustrate the difference in techniques and procedures applied to suspended acoustical ceilings construction with standard acoustical grid construction.
- Organize layout and install selected suspended acoustical ceiling grids to print specifications.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

45.0

**Framing Curves and Arches**

ACA073C:

1.5 Units

This course provides instruction in framing methods for curves and arches and their related structural limitations. It identifies the various wall and ceiling types and the layout principles, and materials used for each Lath applications and trim are also discussed. Students will use the skills presented to complete a framing project that includes curves and arches. Open Entry/Open Exit.

**Requisites**

**Requisites:**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- Install wall track and studs to code using plan view layout
- Explain the difference between arched ceiling framing techniques and basic ceiling framing
- Discuss the structural limitations for curved and arched walls and ceilings
- Interpret project plan to calculate radius wall and material take-off
- Use proper framing techniques to create equally spaced window openings
- Construct framing for curved wall segment to code and industry standards
List the framing steps for constructing arched ceilings

Construct framing for arched ceiling and soffits according to project plan

**Student Learning Outcomes:**

- Compare and contrast basic metal framing techniques with framing techniques for curved walls and arched ceilings.
- Construct framed curved walls and arched ceiling to print specifications.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

45.0

**Print Reading**

ACA074A:

1.5 - 2.0 Units

This course introduces basic visualization skills needed for reading and interpreting construction prints. Views, elevations and the role of specifications as they relate to insulation details on prints will be discussed. An awareness of sustainable and green building practices will be covered during the course. Open Entry/Open Exit.

**Requisites**

**Requisites:**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- Define terms and categorize print according to specific characteristics
- Identify the major principles of sustainable building practices
- Interpret views to identify components details and layout features
- Locate beginning and ending measuring points and accurately calculate dimensions
- Use plans to accurately establish construction layout
- Label the standard views used in orthographic projection
- Describe and use conventional lines, symbols and dimensioning methods
- Identify drawing methods used to create prints
- Locate beginning and ending measuring points and calculate dimensions
- Interpret views to identify acoustical components details and layout features
- Complete a detailed material list from print specifications (insulation)
Student Learning Outcomes:
- Apply the principles of orthographic project to visualize three dimensional images from two dimensional graphic representations.
- Interpret prints to determine construction elements, size arrangement, and implication of energy efficiency considerations.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Advanced Print Reading
ACA074B:
1.5 - 2.0 Units

In this course, students will analyze multi-view drawings to determine acoustical ceiling construction types, locate benchmark and building/wall elements; review codes, references, and perform calculations for construction/ceiling grid planning. Open Entry/Open Exit.

Requisites
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
- Explain what is included in specifications and find selected topics.
- Interpret prints to identify project elements, code compliance and construction type
- Estimate time and labor for project based on print information
- Read beam and column schedules and determine materials
- Calculate material take-offs from representations in specific views and schedules
- Practice sketching views using orthographic method
- Record site location and orientation information from plot plan
- Reference views and determine benchmark and reference dimensions on prints
- Find framing/insulation details on drawings

Student Learning Outcomes:
- Apply the orthographic projection drawing method to sketch a three dimensional object in standard views.
- Estimate costs based on construction elements for various specialty crafts found on prints.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Air, Moisture, and Thermal Barriers
ACA074C:

1.5 Units

This course will demonstrate that correctly installed air, moisture and thermal barrier systems increase building envelope energy efficiency. Building sealing products and installation techniques will be the main focus of hands-on exercises. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
ACA071A - Orientation

AND

Prerequisite
ACA071B - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Identify terms, methods, material characteristics, and building codes
Describe uses and energy efficiency of air barrier systems
Discuss the importance of proper building sealing to achieve energy efficiency
Find air and moisture barrier and insulation details on plans
Interpret prints to determine layout dimensions and assess designs flaws
Employ layout sequence to accurately locate construction elements
Locate walls and openings as indicated on project plans
Assess allowances for air, vapor and moisture barriers
Describe installation procedures for sheet and spray air barrier products
Locate insulation details as indicated on project plans
Utilize the proper installation procedures for insulation methods
Select the correct materials for exterior and interior application
Demonstrate the proper installation of drywall materials
Describe the different levels of finish used for joint sealing
Demonstrate the proper application of tape and compound for sealing wall joints

Student Learning Outcomes:
Describe the sealing attributes of various air/vapor, moisture barrier and thermal products used to increase the integrity of the building envelope.
Install air, moisture and thermal barrier systems according to project instructions.

Units & Hours
Light Gage Welding AWS - A
ACA075A:

1.5 Units
This course covers light gage welding methods and techniques. American Welding Society (AWS) welding processes, symbols, materials and safety procedures will be presented. Students will practice setting up equipment and identifying the proper electrode position and speed. Instruction will include an explanation of typical metal frame welding practices. An emphasis on hands-on experience using 6013 electrodes will reinforce proper use of the welding procedures. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Describe the proper welding position for each type weld
Demonstrate safe work practices for welding tasks
Describe the welding process and electrodes used in the LAC certification exam
Identify electrode characteristics
Define welding terms
Demonstrate the ability to form welds used in metal stud framing
Explain the importance of using the proper safety attire
Identify the process and procedure used in the AWS welding standard
Interpret basic welding symbols
Properly adjust welding equipment settings
Describe applications for various types of welds
List the types weldments used in metal stud framing

Student Learning Outcomes:
Identify welding applications used in the interior systems industry.
Weld metal framing components to meet industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
Total Hours
45.0

Light Gage Welding LAC
ACA075B:

1.5 Units

This course covers light gage welding methods and techniques. American Welding Society (AWS) welding processes, symbols, materials and safety procedures will be presented. An emphasis on hands-on experience using 6010 electrodes will reinforce proper use of required welding procedures, and ability to perform welding tasks used to complete the Los Angeles City (LAC) certification process. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Identify electrode characteristics
Describe the proper welding position for each type weld
Explain the importance of using the proper safety attire
Locate code requirement to meet written testing criteria
Identify the process and procedure used in the LAC certification program
Demonstrate safe work practices for welding tasks
Demonstrate the ability to form welds to meet the performance testing criteria
Identify weld types on drawings
Describe the welding process and electrodes used in the LAC certification exam
Describe applications for various types of welds
List the weldments used in the LAC performance test
Properly adjust welding equipment settings

Student Learning Outcomes:
Research welding code books and write descriptions consistent with Los Angeles City (LAC) welding requirements under certification standards.
Produce weldments that meet the welding requirements stated in LAC performance certification standards.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Identify electrode characteristics
- Explain the importance of using the proper safety attire
- Demonstrate the ability to form welds required for AWS performance testing
- Demonstrate safe work practices for welding tasks
- Identify the process and procedure used in the AWS welding standard
- Describe the welding process and electrodes used in the AWS certification exam
- List the types weldments used in metal stud framing
- Define welding terms
- Describe the proper welding position for each type weld
- Interpret basic welding symbols
- Complete written code requirement exam
- Properly adjust welding equipment settings

**Student Learning Outcomes:**
- Research welding code books and write descriptions consistent with American Welding Society (AWS) welding requirements under certification standards.
- Produce weldments that meet the welding requirements stated in AWS performance certification standards.

Basic Hand Finishing
ACA076A:

1.5 Units

This course is designed to develop basic hand finishing skills using the correct tools and materials. The training will include terminology and description of finishing levels as well as hand tool manipulation techniques, material identification and selection criteria. Manufacturer’s guidelines will highlight the environmental conditions for proper mixture preparation and use. Key discussions will draw attention to typical finish issues, causes, and solutions frequently employed. Tool techniques and application sequence and will be explained and demonstrated. The importance of mixture consistency, proper coating sequence will be stressed during level four hand finishing exercises. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Construct prop wall
Select type and mix compound to the appropriate consistency
Apply compound and tape to surfaces using the correct hand tools and techniques.
Identify and state the proper use basic hand tools and equipment
Identify compound products
Use proper sequence to uniformly coat levels two, three and four
Discuss terms, characteristics and types of material and trims
List levels of the finishing process
Perform basic mathematics operations
Properly sand and smooth coats to industry standards
Prepare surfaces and mix compounds to the appropriate consistency

Student Learning Outcomes:
Manipulate hand tools with the proper motion.
Compare and contrast hand tool with mechanical tool methods.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5
Total Hours
45.0

Automatic Finishing Tools
ACA076B :

1.5 Units

This course will advance the methods, applications and sequences of the bazooka, skim boxes, nail spotters and angle boxes. Students will be required to demonstrate the ability to tape in different situations and the ability to coat all field and butt joints. The levels of finishing and the various finish trims will be discussed. The operation of automatic taping and finishing machine tools including those newly introduced to the industry will be covered. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Properly mix and load tools with joint compound
Properly mix and load tools with joint compound
Demonstrate basic ability to coat surfaces using automatic finishing tools
Practice trouble shooting techniques for automatic finish tools
List tool set up and safety inspection procedures
Locate finish levels on prints
Identify production sanding techniques
Identify the parts and operation of automatic finishing tools
Describe the sequence in which automatic and hand tools are used
Properly mix and load tools with joint compound
Discuss basic maintenance, troubleshooting, and tool repair techniques
Demonstrate basic ability to coat surfaces using automatic finishing tools
Demonstrate basic ability to coat surfaces using automatic finishing tools

Student Learning Outcomes:
Demonstrate ability to manipulate automatic finish tools to attain surface smoothness to industry standards.
Describe the advantages and disadvantages of mechanical equipment finishing techniques.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5
Total Hours
45.0

Drywall Installation/Finish Trims
ACA077A:

1.5 Units

This course will introduce drywall handling methods, applications and recommended levels of drywall finish to achieve the desired aesthetics. An emphasis will be placed on trim attachment and finishing techniques. Various types of finish trim will be identified. Students must demonstrate proficiency in the proper use of automatic taping tools. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
List the trim installation sequence
Marking joists and hanging ceilings
Identify terms, drywall and trim characteristics and uses
Hang walls with door and window openings
Apply codes and perform trim installation methods
Tape and first coat drywall/trim installation
Measure and cut corners
List the drywall hanging sequence
Discuss drywall codes and installation methods
Verify installation meets industry codes

Student Learning Outcomes:
Trims and finish drywall ceiling and wall surfaces according to project plans.
Describe corrective measure for typical drywall installation issues.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Advanced Hand Finishing
ACA077B:

1.5 Units

This course will focus on advanced methods and applications using hand tool techniques. The proper sequence of operation, phases and materials to be used in order to produce a higher level finished product to industry standards. Curved and radius wall characteristics for finish levels will be discussed. The course will cover wall frame components, materials used, surface preparation, and application methods. Students will complete a project to a Level Five standard. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Uniformly coat surfaces to Level Five finish
Install prop, drywall and trims
Discuss curved and radius wall characteristics for finish levels
Perform detailed sanding
Troubleshoot application flaws
Apply tape and compound to joints
Utilize hand lighting for inspection of finish surface
Use the correct joint sequence to apply compound
Properly finish sand surfaces
Identify advanced techniques for hand finishing applications
State the procedures for Level Five finishing
Check proosity of wall surface
Demonstrate proper application of third coat

Student Learning Outcomes:
Contour surfaces consistent with Level Five industry standards.
Explain the purpose of applying three coats of compound to tape drywall joints.

Units & Hours

Minimum Units:
1.5

Maximum Units:
1.5

Total Hours:
45.0
Advanced Automatic Finishing Tools
ACA077C:

1.5 Units

This course will advance the methods, applications and sequences of the bazooka, skim boxes, nail spotters and angle boxes. Students will be required to demonstrate the ability to tape in different situations and the ability to coat all field and butt joints. The levels of finishing and the various finish trims will be discussed. The operation of automatic taping and finishing machine tools including those newly introduced to the industry will be covered. Open Entry/Open Exit.

Requisites
Requisites: None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Discuss the finishing techniques for radius surfaces

Use finishing techniques and sequence used in advanced applications

Meet industry productivity rates for all finish levels

Demonstrate the ability to coat all field and butt joints to the required finish levels

Meet industry productivity rates for all finish levels

Meet industry productivity rates for all finish levels

Meet industry productivity rates for all finish levels

Demonstrate the ability to coat all field and butt joints to the required finish levels

Use the proper finishing techniques and sequence used in advanced applications

Explain how tool settings affect joint crowning and dishing

Use the proper finishing techniques and sequence used in advanced applications

Demonstrate the ability to coat all field and butt joints to the required finish levels

Identify advanced skill level productivity measures

Describe the visual cues that require tool setting adjustments (read walls)

Use the proper finishing techniques and sequence used in advanced applications

Student Learning Outcomes:

Visually “read” wall surfaces at each level and properly adjust tool settings.

Assess productivity levels for automatic finishing tool bead and molding applications.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5
Total Hours
45.0

Advanced Metal Framing
ACA078B :

1.5 Units

This course will begin with a quick review of basic metal framing followed by detailed procedures for framing curved, serpentine, and elliptical non load bearing partitions. Using standard light gage components and other materials, students will learn advanced techniques to expedite work processes. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Cut, shape and attach drywall to finish partition construction
Identify terms, methods, material characteristics, and building codes
Identify approprate substrate materials
Install framing to form curved, serpentine and elliptical partitions
Use geometric construction to layout building lines
Describe the uses and advanced application of light gage components
Utilize correct procedures for establishing level and plumb surfaces
Install substrate to industry standards

Student Learning Outcomes:
Construct an advanced metal framing project to print specifications.
Compare and contrast metal framing with convention framing methods.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Wet Wall Finishes
ACA078C :
1.5 Units

This course presents industry methods, mediums, and typical application of wet wall finishes. The training will include terminology and description of industry standard finishing levels; application tool types and techniques, material identification and selection. Manufacturer’s guidelines will highlight the environmental conditions for proper mixture preparation and use. Key discussions will draw attention to typical finish issues, causes for defects, and solutions frequently employed, and emphasize the selection and use of low volatile organic compounds (VOC) products. The importance of mixture consistency, proper coating sequence will be stressed during wet wall finishing exercises. Open Entry/Open Exit.

Requisites

Requisites:

None

Transferability & General Education Options

Transferable:

Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:

Discuss coating mediums and wet application methods
Identify terms, application methods
Perform sanding techniques specifically to produce the desired level
Describe procedures for applying base, primers and top coats
Inspect and take correct measures to eliminate any surface imperfections to achieve a Level Five Finish
Select and use appropriate coating application equipment for spray techniques
Apply compounds to achieve Level Five finish using selected products
Select and use appropriate coating application tools for hand application

Student Learning Outcomes:

Execute a Level Five finish and inspect paint-coated walls for accepted industry standards.
Evaluate wet finish hand application and spraying methods.

Units & Hours

Minimum Units:

1.5

Maximum Units

1.5

Total Hours

45.0

Ceiling and Soffit Finishing

ACA078D:

1.5 Units

This course is designed to develop an advanced level of finishing skill for applications with architecturally detailed ceilings and soffits. Students will be required to determine type and quantity of materials for various designs and differentiate between levels of finish. Guided practice with a combination of hand and automatic tool techniques will promote manipulative ability required for a successful result. A variety of finish trims will be integrated into each method of finish. Open Entry/Open Exit.
Requisites
Requisites:
None
Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Identify and use the proper joint coating sequence for all finish levels
Employ productivity measures
Identify fall hazards
Explain the purpose and function of soffits
Utilize production sanding procedures
Coat surfaces to finish Level Four
Take corrective measures where needed
Discuss power tool safety and operation
Describe the features of architectural ceiling and soffit designs
Create punch list
Identify framing ceiling elements
Inspect ceiling and soffit framing
Check drywall and trim installation for defects
Inspect level of finish and assess imperfections

Student Learning Outcomes:
Assess pre-finished surface defects and take corrective action.
Complete a ceiling and soffit project to meet industry standards for a Level Four finish.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Drywall and Acoustical Ceilings
ACA079A:
1.5 Units
This course identifies the materials and methods used for acoustical ceilings combined with drywall installation. Seismic codes, materials, and requirements are also reviewed. Green building rating systems will be applied to selected acoustical and drywall materials. Installation for various grid systems will be discussed. Students will use the skills learned to complete a drywall-acoustical ceiling project. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- Layout, cut, and install ceiling grids according to plans
- Explain the characteristics of three types of ceiling grid layouts
- Describe the tools and techniques used to install drywall for standard grid ceilings
- Layout ceiling grid according to project plan
- Place and correctly fasten drywall
- Identify terms, methods, material characteristics, and building codes
- Utilize correct procedures for establishing level and plumb surfaces
- Calculate materials and select materials per shop specifications and drawings
- Demonstrate safe and proper use of hand and power tools

**Student Learning Outcomes:**

- Install a drywall-acoustical ceiling system according to print specifications.
- Assess installation and identify modifications for overhead mechanicals.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

45.0

**Drywall Applications**

**ACA079C:**

1.5 Units

This course provides needed commercial and residential skills to properly handle and install drywall used in specialized applications. Productivity techniques will be discussed and practiced under jobsite conditions. Wall framing and drywall finishing methods will be incorporated into the hands-on activity. Open Entry/Open Exit. Previous Title: Apprenticeship Carpentry 079C, Drywall Applications (2016)

**Requisites**
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Demonstrate proper installation of wood and metal framing according to project plans.

Demonstrate accurate layout and leveling techniques.

Employ guidelines to select and safely use hand and power tools.

Apply time utilization techniques to maximize productivity as stated by instructor.

Compare residential and commercial framing methods for drywall applications.

Install and align finish trims and beads using the correct techniques.

Prepare and attach drywall materials as specified on project plans.

Interpret project plans to determine dimensions and specification details.

Incorporate time utilization techniques to maximize productivity for field conditions.

Apply drywall finishing materials using instructor’s criteria.

Identify material use and specialty drywall product characteristics.

Student Learning Outcomes:
State the proper use and handling of drywall and specialty drywall products in both commercial and residential applications.
Install drywall and specialty drywall products for residential and commercial applications to industry standards.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Drywall Applications
ACA079D:
1.5 Units

This course provides needed commercial and residential skills to properly handle and install drywall used in specialized applications. Productivity techniques will be discussed and practiced under jobsite conditions. Wall framing and drywall finishing methods will be incorporated into the hands-on activity. Open Entry/Open Exit.

Requisites
Requisites:

S/B Firestop/Fireproofing Procedures

ACA082B:

1.5 Units

This course covers various firestop/fireproofing systems and methods used as fire protection and fire control. Key discussions will highlight applicable fire codes and industry standards for testing firestop/fireproof methods. Manufacturer’s guidelines will identify application tool anatomy, instruction for job preparation, loading instructions, operating procedures, maintenance and care of equipment. Basic descriptions of penetration types and the materials used, including non-combustibles and B-Expands, will be covered. Students will apply and test firestop/fireproofing material in a controlled environment. Open Entry/Open Exit. Former Title: Apprenticeship Carpentry 082B, Firestopping Procedures (2020)

Requisites

Requisites:
None
Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Identify the characteristics of a firestop system
Identify the characteristics of a fire proofing system
Discuss the standards and testing methods for firestop/fireproof systems
Describe the functions of three different firestop/fireproof technologies
Utilize selected materials to form a firestopping seal
List typical firestop/fireproof system failures and abatement solutions
Perform testing methods for firestop systems
Utilize and apply selected materials to form a firestopping seal

Student Learning Outcomes:
   Form a firestop/fireproof system as indicated on project plans.
   Discuss the characteristics of several types of firestopping products.

Units & Hours

Decorative Trims and Textures

ACA082C:

1.5 Units

This course provides advanced hand and automatic tool finishing techniques used to apply decorative trims and special surface textures. Training includes product information for metal, paper, plastics and art beads. Special attention will be given to coating and sanding sequence of field and butt joints for selected surface textures. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
Match proper tools and methods to selected applications
Complete finish utilizing touch up and light sanding procedures
Use mechanical spray equipment to apply splattered texture to surfaces
Mix and applying texture using spray equipment
Calculate materials using project plans
Practice using manipulative tool movement to create selected texture
Complete finish utilizing touch up and light sanding procedures
Identify decorative trims types and specialty textures
Accurately measure and cut decorative trim inside/outside corners
Discuss the methods and techniques used to create typical textures
Apply skip trowel texture to surfaces using hand tool techniques
Apply skip trowel texture to surfaces using hand tool techniques

Student Learning Outcomes:
Attach decorative trims and apply two types of textures to finish surface.
Evaluate hand tool and mechanical tool methods for applying wall textures.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Door and Door Frames
ACA083:
1.5 Units

An introduction to the doors and door frames used in the interior systems industry. The course discussions will incorporate applicable regulations governing door openings and door selection. Hardware, controlling and locking devices, and door layout and installation techniques will be included. Basic math and print reading will be covered as will tool-related safety concerns. Students will use the skills presented to complete a selected door and door frame installation project as part of this course. Open Entry/Open Exit.

Requisites
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Locate metal door frame on door schedule
Identify the different door types, door sizes and regulations on blueprints
Identify door hand and swing
Demonstrate various door frame installations accurately
Practice converting dimensions
Demonstrate safe and proper use of all necessary hand, power tools and leveling instruments
Perform and complete a Timed Manipulative Evaluation as stated in the DW-310 performance objectives
Practice 3-4-5 layout method
Install and align a metal door frame

Install select door hardware

Successfully pass a written examination with a score of at least 80% accuracy and perform all practical tasks to within 1/8"

**Student Learning Outcomes:**
- Install a basic door frame to industry standards.
- Install various types of door hardware as indicated on project plans.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units**

**Door/Door Frame**

**ACA083C:**

1.5 Units

This course covers the installation process from constructing rough openings to hanging and adjusting doors. An emphasis will be placed on print interpretation, door schedules, symbols and hardware recognition. Students will use the methods and procedures presented to install selected frames and doors for wood framing applications. Open Entry/Open Exit.

**Requisites**

**Requisites:**

Prerequisite
- ACA021A - Orientation

AND

Prerequisite
- ACA021B - Safety and Health Certifications

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Learning Outcomes**

**Course Objectives:**
- State the classes and sizes of typical metal doors
- Identify doors and hardware components from door schedules
- Discuss applicable building and fire codes and ratings
- List metal door types and quantities from print door schedules
- Accurately measure layout door frame locations
- Calculate dimensions for door jamb layout for rough wood framing
- Correctly and safely use tools and equipment
- Measure and mark metal door frames for hardware
Install metal door frame using proper fasteners and nailing pattern
List the steps in the door and hardware installation sequence
Calculate dimensions for door hardware layout
Correctly and safely use tools and equipment
Measure and mark door for hardware
Install door hanging hardware
List the steps in the door lockset installation sequence
Correctly and safely use tools and equipment
Accurately measure layout lockset and closer locations
Attach and inspect exit/panic door hardware systems for proper function
Troubleshoot door and hardware installation

Student Learning Outcomes:
- Determine metal door and frame requirements using print specifications for wood framed structures.
- Wood frame and hang metal doors to meet industry standards.

Units & Hours

Exterior Insulation Finish Systems (EIFS)
ACA086A:

1.5 Units

This course is an introduction to exterior insulation finish systems including terminology, definitions, specifications, and properties. It will deal with reinforcing mesh installation and the application of insulation board. Application methods and techniques for primers and finishes will be presented. Students will use the skills presented to complete an EIFS installation project as part of this course. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
- Compare and evaluate manufactured products.
- Install drainage systems.
- Identify the climatic considerations.
- Utilize prints and detail views to determine EIFS installation.
- Inspect and troubleshoot installation.
- Utilize moisture barriers.
- Identify EIFS applications used in the Drywall/Lathing Industry.
Demonstrate accurate systems applications including substrate preparation to back wrapping, trims and accessories, adhesive and mechanical fastening, mesh types and uses, and aesthetic joints, sealants and foam shapes.

Apply sealant according to project requirements.

Demonstrate proper installation of both types of reinforcing mesh.

**Student Learning Outcomes:**
- Describe design features of exterior insulation finish systems.
- Install an exterior insulation finish system to project specifications.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units**
1.5

**Total Hours**
45.0

**Freeform Lathing**

**ACA089:**

1.5 Units

This course provides a comprehensive study of the theory and techniques used for the development of freeform lathing projects. This course will enable students to interpret gridline drawings; layout and build lath cage work and apply the appropriate lath(s) to achieve the desired or designed form or structure. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Demonstrate accurate graph and model interpretation, layout grids and form light iron and rebar cages to match
- Transfer design to substrate materials
- Complete a grid layout for project
- Identify and recognize the different tools, materials, methods, furring and framing requirements used in freeform lathing
- Create a design for freeform lath project execution
- Demonstrate safety use of welder and personal protective equipment
- Demonstrate safe cutting, handling and proper lath application
- Evaluate final project and compare to design
- Weld freeform design to secure framework
- Demonstrate basic welding and lath tying techniques
Student Learning Outcomes:
Complete a freeform lathing project.
Complete a plan for student designed freeform lathing project.

45.0

Residential Steel Stud Framing
ACA090:

1.5 Units
Provides the related and supplemental instruction required for interior systems apprentices in the new technology of cold-formed light gage steel framing for the residential market. Methods of constructing a structural floor, wall and truss system. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Learn how to use cold-formed light gage steel framing for the residential market, and to construct a structural floor, wall, and truss system.

Student Learning Outcomes:
- Demonstrate competence, proper safety techniques, and teamwork to complete a residential cold-formed light gage steel framing project.
- Demonstrate competence, proper safety techniques, and teamwork to construct a structural floor, wall, or truss system.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours

Confined Space - Journeyworker
ACA094J:
0.5 - 0.8 Units
This course covers both CAL-OSHA and Federal Occupational Safety and Health Administration (OSHA) regulation for safe access, entry and monitoring for confined space work. Upon successful completion, a student will be issued United Brotherhood of Carpenters (UBC) Confined Space Qualification Card.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
0.5

Learning Outcomes
Course Objectives:
Demonstrate an applied understanding of techniques and methods of scaffolding work practices in confined spaces.

Demonstrate an applied understanding of the techniques for monitoring and entering into confined spaces.

Demonstrate an applied understanding of introductory confined spaces.

Student Learning Outcomes:
Identify the necessary levels of personal protective equipment based on the four routes of entry, presented with a list of questions regarding symbols, hazardous materials and chemicals.

Complete work process in a simulated confined space and demonstrate proper use of two types of respirators.

Units & Hours
Minimum Units:
0.5

Maximum Units
0.5

Total Hours
14.4

Water Treatment Facilities
ACA095:
1.5 Units

This course provides instruction in the detailing, layout and construction of concrete formwork and waterstop used in water treatment facilities. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite

ACA021A - Orientation

AND

Prerequisite
Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Complete and pass written welding tests
Install water stop materials and imbeds
Identify the components and sequence of construction for gang forms used in water treatment applications
Discuss and evaluate the procedures for the safe lifting and placing of gang forms
Design and install radius gang form system
Utilize acquired safety skills in hand and power tool operation and fall protection
Identify the characteristics and functions of various manufactured forms products
Identify terms and characteristics of form systems
Locate formwork elements on prints
Design and install a single and double waler wall system
Install water stop materials and imbeds
Apply mathematical formulas to design form systems and calculate materials accurately

Student Learning Outcomes:
Analyze prints to determine formwork design and material requirements for water treatment formwork.
Apply the correct methods and procedures to construction a water treatment formwork project.

QuickBooks

ACCT035:

2.0 Units
Preparation of accounting records for businesses using the QuickBooks software in the Windows environment. Topics include customer transactions, vendor transactions, bank reconciliations, reports, company file setup, and customization of QuickBooks.

Requisites

Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
2.0

Learning Outcomes
Course Objectives:
Use QuickBooks software to create company files and input basic customer transactions.
Modify QuickBooks software to execute accounts receivable transactions.
Employ QuickBooks software to execute accounts receivable transactions.
Employ QuickBooks software to execute accounts payable transactions.
Use QuickBooks software to calculate and create bank reconciliation.
Employ QuickBooks software to illustrate accounts and create reports on vendors.
Use QuickBooks software to modify existing customers' accounts and create new customer accounts.
Apply the customizing tools to create unique reports and templates for a company.

Student Learning Outcomes:
- Use QuickBooks to set up the accounting system of an organization; enter accounting transactions, and prepare useful accounting reports.
- Apply QuickBooks to case studies, problem solving exercises and analysis.

Accounting for Small Business
ACCT100:
3.0 Units

Accounting for Small Business is a beginning course in basic accounting as applied to service or merchandising/retail small businesses. Students will learn basic accounting procedures, preparation of financial statements, banking procedures, and payroll processing. Students will complete web-based weekly assignments based on lectures and text readings. This course is recommended for entrepreneurs, CPA candidates, those seeking professional development, and business students needing an accounting foundation before enrolling in ACCT 101.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Transferable to CSU only

Weekly Lecture Hours:
3.0

**General Education Plan:**
Local - Plan A
   Area F1: Lifelong Understanding and Self-Development

**Learning Outcomes**

**Course Objectives:**
- Describe the basic financial accounting concepts and principles.
- Explain the psychology behind accounting and ethics and accounting exam anxiety.
- Explore the role of accounting in society.
- Identify the fundamental accounting equation and its components.
- Describe accounting systems for service enterprises.
- Learn basic accounting theory and practice as it relates to service operations.
- Explain the accounting cycle.
- Prepare the income statement, balance sheet and statement of owner’s equity.
- Explain merchandise accounting and prepare financial statements for merchandising firms.
- Prepare subsidiary ledgers and special journals.
- Reconcile bank accounts and cash funds.
- Explain the psychology behind the fraud triangle and preventing fraud.
- Explore the impact of fraud in society.
- Explain payroll accounting and compute employee earnings, deductions, employer taxes.

**Student Learning Outcomes:**
- Apply the accounting equation to transactions throughout the accounting cycle for a service company and a retail business.
- Interpret financial information including the use of journals, ledgers, and worksheets.
- Prepare basic financial statements for proprietorships.

**Units & Hours**

**Minimum Units:**
3.0

**Maximum Units**
3.0

**Total Hours**
54.0

**Financial Accounting**

**ACCT101:**
4.0 Units

The study of accounting as an information system, examining why it is important, and how it is used by investors and creditors to make decisions. Coverage includes the accounting information system and the recording and reporting of business transactions with a focus on the accounting cycle, the application of generally accepted accounting principles, the classified financial statements, and statement analysis. It also includes issues relating to asset, liability, and equity valuation, revenue and expense recognition, cash flow, internal controls and ethics.

**Requisites**
Requisites:
None

Transferability & General Education Options

Transferable:
Transferable to both UC and CSU

Weekly Lecture Hours:
4.0

General Education Plan:

UC Comparable Transfer Courses

Course Identifier (C-ID)
Accounting

Santa Ana College - Shared Course
Shared Course with SAC

Learning Outcomes

Course Objectives:
Explain the nature and purpose of generally accepted accounting principles (GAAP)
Explain and apply the components of the conceptual framework for financial accounting and reporting, including the qualitative characteristics of accounting information, the assumptions underlying accounting, the basic principles of financial accounting and
Define and use accounting and business terminology
Explain what a system is and how an accounting system is designed to satisfy the needs of specific businesses; summarize the purpose of a journal and a ledger.
Apply transaction analysis, input transactions into the accounting system, process this input, and prepare and interpret the four basic financial statements.
Distinguish between cash basis and accrual basis accounting and their impact on the financial statements, including the matching principle.
Identify and illustrate how the principles of internal controls are used to manage and control the firm's resources and minimize risk.
Explain the content, form, and purpose of the basic financial statements (including footnotes) and the annual report, and how they satisfy the information needs of investors, creditors, and other users.
Explain the nature of current asset issues including measuring and reporting receivables and bad debts, measuring and reporting inventory and cost of goods sold.
Identify and illustrate issues relating to long-term asset acquisition, use, depreciation, and disposal.
Distinguish between capital and revenue expenditures.
Explain the valuation and reporting of current liabilities, estimated liabilities, and other contingencies.
Identify and illustrate issues relating to long-term liabilities including valuation of debt, issuance, and retirement.
Identify and illustrate issues relating to stockholders' equity including issuance, repurchase of capital stock, and dividends.
Explain the importance of operating, investing and financing activities reported in the Statement of Cash Flows when evaluating solvency and liquidity of the firm.
Interpret company activity, profitability, and liquidity through selection and application of appropriate financial analysis tools.
Identify the ethical implications inherent in financial reporting and be able to apply strategies for addressing them.

Student Learning Outcomes:
Use ratios, common-size and other pertinent analysis and research to determine the financial health of a company, given a set of financial statements for a company.

Record transactions and complete the accounting cycle producing the required financial statements for a company.

Accounting

Santa Ana College - Shared Course

Shared Course with SAC

**Learning Outcomes**

**Course Objectives:**

Identify and illustrate the primary activities and informational needs of managers and explain the role of the managerial accountant as a member of the management team; compare and contrast financial and managerial accounting.

Define and illustrate various cost terms and concepts and evaluate their relevancy for different decision-making purposes.

Define relevant costs and benefits, giving proper treatment to sunk costs, opportunity costs, and unit costs; prepare analyses of special decisions - accept or reject a special order; outsource a product or service; add or drop a service or product; and s

Prepare traditional and contribution-margin income statements; define related terms; explain cost-volume-profit analysis, degree of operating leverage and safety margin and employ each as an analytical tool.

Describe the traditional types of product costing systems (including job-order and process), illustrate the flow of costs in each, and prepare related accounting records and reports.

Discuss the impact of technology on the manufacturing environment and its implications for product costs and the development of activity-based costing and management; prepare activity-based cost reports.

Explain the purposes of budgeting; prepare a master budget and its component schedules and relate the budget to planning and control.

Explain the development and use of standard costs, prepare and interpret variance analysis reports and relate them to cost center planning and controlling.

Explain the nature of and need for segment reporting and the relationship with cost, revenue, profit, and investment centers; prepare and analyze related segment reports for each segment of responsibility.

Compare and contrast absorption costing and variable costing, prepare income statements using both methods, and reconcile the resulting net incomes.

Explain the nature of capital expenditure decisions and apply and evaluate various methods used in making these decisions.

**Student Learning Outcomes:**
- Make short and long term management decisions for a company, given external and internal financial information for a company.
- Determine all of the product and period costs as well as the appropriate selling price, given a specific product or service.

**Units & Hours**

**Minimum Units:**
4.0

**Maximum Units:**
4.0

**Total Hours:**
72.0

**Managerial Cost Accounting**

**ACCT204:**

3.0 Units

Presents the theory of cost behavior, cost accounting, and cost control; the use of accounting information for management planning and decision making; cost systems, budgeting, and financial performance analysis.

**Requisites**

**Requisites:**

**Prerequisite**

[ACCT102 - Managerial Accounting](#)

**General Education Plan:**

**Learning Outcomes**
Course Objectives:
- Learn cost behaviors
- Understand cost behavior, different cost systems, inventory methods, overhead allocation procedures, and cost volume profit analysis
- Complete a job sheet and budget
- Understand basic cost accumulation and analysis strategies, and modern overhead allocation techniques
- Understand budgets and responsibility accounting reporting systems.
- Prepare various budgets
- Understand higher level budgeting, analysis, and cost allocation methods
- Prepare a production report
- Understand process costing, standard cost, and various other cost control techniques

Student Learning Outcomes:
- Cost a product and understand which costs are relevant.
- Demonstrate management uses of accounting information.

Units & Hours
Minimum Units: 3.0

Maximum Units: 3.0

Total Hours: 54.0

Intermediate Accounting I
ACCT205:

3.0 Units

An intermediate study of accounting theory and the conceptual framework; preparation of income statements and comprehensive income, balance sheets and statements of cash flows. Coverage includes present value and accounting concepts related to the asset side of the balance sheet.

Requisites
Requisites:

Prerequisite

ACCT102 - Managerial Accounting

Transferability & General Education Options
Transferable:
Transferable to CSU only

Weekly Lecture Hours: 3.0

General Education Plan:
Learning Outcomes
Course Objectives:
Explain the nature and purpose of generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS) and how they are used to measure and value financial transactions and how they affect the four basic financial statements.

Illustrate how the underlying measurement concepts and valuation differ under generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS).

Explain the content, form, and purpose of the basic financial statements (including footnotes) and the annual report as well as prepare the financial statements in accordance with GAAP.

Prepare the Statement of Cash Flows and explain the importance of operating, investing and financing activities reported.

Distinguish between cash basis and accrual basis accounting and their impact on the financial statements, including the revenue recognition and matching principles.

Explain the nature of current assets and related issues, including the measurement and reporting of cash and cash equivalents, short-term investments, receivables and bad debts, and inventory and cost of goods sold.

Understand the concept of present value and its effect on accounting transactions.

Explain the nature of current assets and related issues, including the measurement and reporting of cash and cash equivalents, short-term investments, receivables and bad debts, and inventory and cost of goods sold.

Explain the nature and valuation and other issues relating to long-term asset acquisition, use, cost allocation, disposal and interest capitalization.

Distinguish between capital and revenue expenditures.

Identify the ethical implications inherent in financial reporting.

Student Learning Outcomes:
- Prepare and analyze financial statements using GAAP.
- Demonstrate how GAAP is applied to value, record and report assets.
- Demonstrate their understanding of present value concepts.

Improving Oral Expression and Pronunciation
ACE091:

2.0 Units

Students will improve pronunciation of individual sounds, word stress, intonation and connected speech through dialogues, conversations, and presentations. Emphasis is on clarity of expression through control of word endings, thought group patterns, and targeted sounds. Former Title: ACE N81, Improving Pronunciation (Fall 2019)

Requisites:

None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
Learning Outcomes

Course Objectives:
Understand and use the jargon of pronunciation: vowels, consonants, consonant blends, word stress, syllables, intonation, points of articulation, IPA and/or dictionary symbols.

Receive individualized pronunciation assignments using lab software programs and online videos as needed.

Understand the points of articulation for consonant sounds and how vowel sounds are produced.

Identify and correctly stress syllables in words and thought groups.

Identify, understand, and prevent epenthesis

Improve control over commonly misspelled words.

Understand how vowel sounds correlate to spelling patterns.

Improve comprehensibility in English by practicing linking strategies and connected speech.

Identify linking needs and pauses between words, within phrases and at clause intersections.

Functional intonation for statements, questions, commands (rising, falling)

Increase comprehensibility within dialogues, conversations, and presentations.

Use appropriate nonverbal communication and follow-up comments or questions to demonstrate engagement in active listening.

Student Learning Outcomes:
- Demonstrate improved fluency and comprehensibility in various discourse activities.
- Demonstrate achievement of their targeted pronunciation goals.

Units & Hours

Minimum Units:
2.0

Maximum Units
2.0

Total Hours
36.0

Academic Listening and Speaking 1
ACE094:

2.0 Units

Intermediate level students expand their speaking skills in English. They will practice different types of speaking tasks such as expressing and supporting opinions, restating what others have said, and paraphrasing what they have heard or read. This course also strengthens students’ vocabulary and critical thinking skills. Former Title: ACE 053, Expanding Academic Speaking Skills (Fall 2019)

Requisites

None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
2.0
Learning Outcomes

Course Objectives:
Explain the main points in the course syllabus.

Practice specific listening involvement skills such as offering positive reinforcement to a speaker, asking questions, and taking notes

Learn note-taking strategies to help with rephrasing

Practice various casual speech formats and types of assignments to alleviate speech anxiety (e.g., introducing oneself and a classmate, telling a story, describing a souvenir or memory, explaining a memorable experience, using speech preparation worksheet)

Identify key words and transitions that indicate major points in a speech

Use key words and transitions correctly in speech activities

Use set phrases to express opinions during discussions

Identify and produce correct stress and intonation patterns for sentences, questions and exclamations

Learn to read aloud with expressive intonation and correct division of thought groups

Understand word linkages

Strengthen ability to accurately produce word endings when reading aloud and speaking extemporaneously (specifically, -s and -ed forms)

Increase ability to effectively complete a presentation within a time limit

Create a detailed outline and note cards to use during a presentation

Use transitional expressions effectively so that listeners can follow the speaker’s organization and thoughts easily

Determine the most effective use of visual aids during a presentation

Create a persuasive speech which aims at changing a belief, opinion or behavior

Follow the typical organizational plan for a persuasive speech

Evaluate the strengths and weaknesses of classmates’ speeches

Student Learning Outcomes:

Produce clear and accurate paraphrases of spoken discourse at an intermediate level.

Present comprehensible information in a short presentation with fluency that is reasonable for an intermediate level.

Units & Hours

Minimum Units:
2.0

Maximum Units
2.0

Total Hours
36.0

Academic Listening and Speaking 2
ACE095:

2.0 Units

High-intermediate speaking and listening skills course. Students will increase their ability to understand and summarize longer lectures, engage in group discussions and do effective presentations. Lab and online research may be required for some assignments. Former Title: ACE 093, Refining Academic Speaking Skills (Fall 2019)

Requisites
Requisites:
Advisory

ACE102 - Refining Academic Writing and Reading

Concurrent enrollment in ACE 102 is strongly advised. ACE 102 will be ACE 106 in Fall 2020.

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
2.0

Learning Outcomes

Course Objectives:
Recognize areas of pronunciation which require focus and practice

Navigate lab pronunciation programs in order to focus on the recommended areas of need

Practice the aspects of pronunciation recommended by instructor

Vocabulary Development Practice using different forms of a word correctly in sentences and phrases (e.g., succeed, success, successful, successfully) as well as collocations

Use a dictionary and thesaurus to expand vocabulary and identify word forms

Identify idiomatic and slang expressions and convert these to more academically appropriate choices

Use with increasing ease various transition expressions in speech

Improve ability to use new vocabulary and different word forms in speech

Expand skills in summarizing by using their notes to express opinions and ideas

Develop ability to paraphrase by using vocabulary choices and grammar/sentence variety

Identify where to expect main ideas to appear vs. supporting details

Develop more accuracy in note-taking and strengthen ability to rephrase original passages from notes

Learn and practice attentive listening and questioning strategies in group discussions

Plan, prepare, organize and delegate presentation tasks

Practice participating equally in group activities

Give successful and understandable presentations to small groups and to the class

Study vocabulary effectively

Student Learning Outcomes:

Demonstrate listening comprehension skills at a high intermediate level.

Demonstrate speaking skills which include control of English pronunciation, grammar and vocabulary.

4.5

General Education Plan:
Learning Outcomes
Course Objectives:
Analyze reading passages in a consistent way to differentiate between controlling ideas and supporting details.
Support opinions with logical reasons.
Understand charts, graphs and outlines and communicate that information in speech and in writing.
Develop strategies to paraphrase and summarize reading passages.
Develop skills in using a dictionary and thesaurus, as well as grammar-based vocabulary development through word forms.

GRAMMAR:
Demonstrate control of grammar concepts studied in class.
Understand and track their specific grammar problems so that they can focus on improving them by completing individualized lab tasks and rewriting sentences and paragraphs. LAB WRITING CONFERENCES:
 Demonstrate that they can complete a writing task at each lab session.
Analyze their writing with instructor input, noting ways to improve writing skills and grammar control.

Demonstrate improved control of grammar concepts by completing exercises in various ESL software programs.

Student Learning Outcomes:
Demonstrate reading comprehension skills at an intermediate level.
Demonstrate increasing fluency in academic writing which includes control of basic English grammar, mechanics, sentence combining strategies and vocabulary typical at an intermediate level.

General Education Plan:

UC Comparable Transfer Courses

Learning Outcomes
Course Objectives:
Analyze reading passages in a consistent way to find controlling ideas and basic support

Use instructor input to improve writing skills

Develop paraphrase and summary strategies

Connect information from different readings and respond to others’ ideas with well-reasoned comments

Correctly use basic punctuation patterns

Practice and improve control of verb tenses and forms, differentiating between active and passive ideas and controlling major verb tenses

Create strong topic sentences and develop them effectively

Avoid redundancy

Control basic grammar

Improve control of sentence combining and punctuation

Develop ability to use various transitional devices
Expand ability to use active/passive correctly
Use more advanced punctuation and sentence variety
Control verb environments for verb tense and forms
Strengthen their ability to stay focused on a topic and develop it effectively
Learn to check for pronoun consistency and avoid common pronoun reference problems with “it,” “this” and “that”
Develop conclusions which connect back to their introductions
Make inferences based on textual information
Differentiate between real and unreal and past vs. present verb forms
Control a sustained hypothetical, such as a regret, wishing for a different result, and imagining future possibilities
Use various conjunctions that indicate contrast and concession correctly
Create contrast paragraphs with solid development and clear transitioning
Expand sentence combining skills with appropriate choices for description and definition at both sentence and paragraph level
Strengthen ability to identify in their own writing places where they should use adjective clauses
Learn and use correctly the structures of direct and indirect speech as well as expressions that enable writers to give credit to others such as “according to”
Use quotes effectively and punctuate them correctly
Blend direct and indirect speech in paragraphs and short essays
Practice and improve control of structures of comparison and contrast as well as parallelism
Complete final exams in each of the course components

GRAMMAR:
Complete grammar exercises using lab programs and demonstrate increasing control of grammar concepts presented in class
Complete specific grammar activities identified and assigned by the instructor

WRITING CONFERENCES:
Take responsibility for coming to each conference prepared with a writing assignment to review with the instructor
Understand and express the notions of wish/hope and hypothetical ideas with the structures of the unreal conditionals, focusing on verb forms:

Student Learning Outcomes:
Demonstrate the ability to summarize reading passages accurately, using correct source information, word forms and targeted vocabulary.
Express a main idea, develop it effectively and control grammar and mechanics.

Introduction to Academic Composition
ACE116:
4.5 Units
Advanced students are introduced to common academic writing tasks such as comparing/contrasting and supporting an argument. Students also produce a short research paper. The course emphasizes control of grammar, punctuation and mechanics within student papers. Students will also strengthen critical reading and vocabulary skills. Laboratory is required and includes class assignments, individualized work and writing conferences with the instructor. Lab is part of the scheduled class meeting hours.

**Requisites**

**Requisites:**

**Prerequisite**

ACE102 - Refining Academic Writing and Reading

ACE 102 will become ACE 106 in Fall 2020

**Transferability & General Education Options**

**Transferable:**

Transferable to both UC and CSU

**Weekly Lecture Hours:**

4.5

**General Education Plan:**

**UC Comparable Transfer Courses**

**Learning Outcomes**

**Course Objectives:**

Learn strategies to analyze readings and increase comprehension

Demonstrate responsibility by preparing for instructor conference sessions with specific questions related to the essay

Use outlines and notes to create accurate summaries and paraphrases of reading selections

Expand vocabulary with a thesaurus and collocations

Use vocabulary and grammar strategies to manipulate word forms as a paraphrasing strategy

Identify the main structural features common to academic and nonfiction writing—main ideas, patterns of organization and development, and transitioning strategies

Develop clear, effective thesis statements

Practice with different types of introductions and hooks

Develop outlines of readings

Identify and correct main sentence-level errors which recur in their papers

Practice various sentence combining techniques to develop a broader range of sentence patterns used in their own writing

Use library resources to create a short research paper in correct MLA format.

Create essays with effective introductions, clear thesis statements, strong development, and conclusions that relate to the introduction

Demonstrate improvement in the areas targeted with their instructor at the start of the semester

Practice and complete grammar review activities applicable to the entire class as well as specific exercises selected by the instructor for individual practice

**Student Learning Outcomes:**

Demonstrate control of targeted concepts in grammar, punctuation and mechanics.

Create short essays which develop a main idea through relevant, effective and sufficient support.

4.5 Maximum Units

4.5 Total Hours

108.0 Orientation

ACPD021:

1.5 Units

This course examines fundamental trade skills, employee-employer roles and responsibilities, and safe work practices needed for entry level performance for pile drivers in the construction industry. While an emphasis will be placed on attaining standard industry safety credentials, the course is designed to provide students with practical experience using construction terminology, math operations and basic measuring techniques, and tool identification and use in preparation for the next level of training. Safety will cover OSHA training for jobsite hazard recognition, accident prevention, and safe tool and equipment operation. Open Entry/Open Exit.

Requisites

Requisites:

None

Transferability & General Education Options

Transferable:

Not transferable

Learning Outcomes

Course Objectives:

- Identify trade terms, industry roles and responsibilities, and basic skills
- Identify and discuss trade applications, quality and productivity practices
- Identify the Focus Four safety hazards and accident prevention practices
- Define 10 construction safety regulations to complete OSHA 10 Hour Safety Certification
- Explain the importance of proper interpersonal communication and respectful conduct
- Identify the types and benefits of sustainable/green building practices in the workplace
- Calculate measurements and accurately perform basic math functions for assigned tasks
- Match safety hazards and precautions for tools, equipment and PPE using manufacturers’ guidelines
- Select and safely use hand and power tools for assigned tasks

Student Learning Outcomes:

- Evaluate potential hazards and cite the appropriate accident prevention measures.
- Identify and perform the proper treatment for various sudden illnesses and injuries, given a set of emergency situations.
- Apply basic math operations to perform typical construction calculations.

Units & Hours

Safety and Health Certifications

ACPD022:

2.0 Units
This course is designed to increase the pile driver students’ awareness of construction hazard communication systems, proper tool/equipment operation, and will emphasize the importance of the individual responsibility for workplace safety and health. The students will discern that the construction environment has a higher potential for injuries and accidents than most workplaces and therefore requires the ability to assess danger, employ prevention measures, and take appropriate action in emergencies. This training will expose students to various health emergency scenarios, and provide students with ample opportunities to practice the appropriate CPR and first aid response. Because many injuries are the result of improper tool and equipment use, students will be trained on how to correctly select, inspect, use, and operate fall protection systems, tools, and powered lift truck equipment. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite

ACPD021 - Orientation

Transferability & General Education Options

Transferable:

Not transferable

Learning Outcomes

Course Objectives:

Identify placards, symbols, labels and documents used to ascertain hazards

Assess the information contained on chemical labeling

Locate safety and health information using safety data sheets

Identify tool parts, operation, and accessories

Demonstrate the ability to select and use the appropriate tools for the pile driver tasks assigned

Identify fall protection methods and applicable OSHA regulations

Match safety hazards with appropriate fall protection equipment

Demonstrate the ability to select and use the appropriate fall prevention and personal fall arrest systems

Identify lift truck components and applicable OSHA regulations

Match safety hazards and precautions for lift truck equipment

Conduct lift truck safety inspections

Demonstrate the safe operation of the selected lift truck

Meet UBC criteria for the proper operation of the selected lift truck

Discuss health emergencies and identify first aid and CPR techniques

Perform emergency response techniques and pass American Red Cross first aid, CPR and AED training tests

Student Learning Outcomes:

Apply the appropriate first aid and CPR/AED techniques for specific emergencies.

Identify the placards, symbols, and documents used to communicate safety precautions for physical and chemical hazards in the workplace.

Identify and demonstrate safe operating procedures for powered industrial lift truck equipment.

Demonstrate the proper installation and use of fall protection systems.

Units & Hours

Tool/Equipment Applications

ACPD023:

1.5 Units
This course promotes hand/power tool and equipment skill development for various construction applications. Scaffold building and aerial lift safety and operating procedures will also be covered. Upon successful completion, students will be issued United Brotherhood of Carpenters (UBC) Aerial Lift and Scaffold Erector-Welded Frame Qualification Cards. Open Entry/Open Exit.

**Requisites**

**Prerequisite**

ACPD021 - Orientation

AND

**Prerequisite**

ACPD022 - Safety and Health Certifications

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Learning Outcomes**

**Course Objectives:**

Identify scaffold components and applicable Occupational Safety and Health Administration (OSHA) regulations

Match safety hazards and precautions for scaffold erection procedures

Conduct scaffold safety and equipment inspections

Properly stage, assemble, and disassemble selected scaffolding

Meet United Brotherhood of Carpenters (UBC) criteria for erecting and dismantling scaffolds correctly

Identify boom/scissor aerial lift components and applicable OSHA regulations

Match safety hazards and precautions for aerial lift equipment operation

Conduct aerial lift safety inspections

Demonstrate the safe operation of two types of aerial lifts

Meet UBC criteria for the proper operation of aerial lift equipment

Select appropriate mathematic operations to measure and calculate materials

Use the mathematic techniques presented to lay out materials for wall construction

Select appropriate hand and power tools/equipment for assigned tasks

Utilize proper fastener placement and driving techniques

Apply the appropriate tool/equipment manipulative techniques to complete wall construction tasks assigned

**Student Learning Outcomes:**

Identify and demonstrate safe operating procedures for aerial lift truck equipment.

Demonstrate the proper erecting/dismantling procedures for welded frame scaffolds.

Assess construction tasks to determine the appropriate tools, equipment and construction methods.

**Units & Hours**

**Piles and Hammers A**

ACPD024A :

1.5 Units
This course provides an overview of the types of piles used in construction as load-bearing support for commercial buildings, bridges, and piers when ground stratum is insufficient in strength. The rigging methods, driving techniques, and pile hammers utilized in the installation process will be presented. Students will use the proper procedures to install a lap-joint wood sheet pile system during this part of the training. Open Entry/Open Exit.

**Requisites**

**Prerequisites:**
- ACPD021 - Orientation
- AND
- ACPD022 - Safety and Health Certifications

**Transferability & General Education Options**

Transferable:
Not transferable

**Learning Outcomes**

**Course Objectives:**
- Identify terms and definitions for piles and hammers used industry wide
- Describe the types of piles and their applications
- Classify types of pile driving hammers
- State the advantages and disadvantages of sheet pile materials
- Correctly label fabricated interlocking connectors used to shape piles
- Calculate concrete volume for selected types of cast-in-place piles
- Identify pile materials and applications
- Describe the characteristics of various types of pile
- List the advantages and disadvantages of selected types of pile
- Describe the process of wood grading
- Explain precautions for handling treated wood
- Identify tools and equipment, materials, personal protective equipment
- Use the proper procedures and construction sequence for lap-joint wood sheet pile installation
- Describe the two major types of cranes
- List six types of tower cranes
- Discuss factors that effect boom and crane selection
- Identify the parts and basic operation of crane used with pile driving equipment
- Use the proper construction and placement procedures to drive piles to industry standards

**Student Learning Outcomes:**
- Identify the purpose and types of piles used in construction.
- Demonstrate proper construction and installation of lap-joint wood pile.
- Demonstrate the proper use of rigging and pile driving equipment.

**Units & Hours**

Piles and Hammers B
ACPD024B:

1.5 Units

This course provides an overview of the types of piles used in construction as load-bearing support for commercial buildings, bridges, and piers when ground stratum is insufficient in strength. The rigging methods, driving techniques, and pile hammers utilized in the installation process will be presented. Students will use the proper procedures to install a tongue and groove wood sheet pile system during this part of the training. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite

ACPD021 - Orientation

AND

Prerequisite

ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:

Not transferable

Learning Outcomes

Course Objectives:

Identify terms and definitions for piles and hammers used industry wide

Describe the types of piles and their applications

Classify types of pile driving rigs

State the advantages and disadvantages of sheet pile materials

Correctly label cast in place materials to shape piles

Calculate concrete volume for selected types of cast-in-place piles

Identify pile materials and applications

Describe the characteristics of various types of pile

List the advantages and disadvantages of selected types of pile

Describe two methods of construction

Explain precautions for handling treated wood

Identify tools and equipment, materials, personal protective equipment

Use the proper procedures and construction sequence for tongue and groove wood sheet pile installation

Discuss the two major types of pile driving rigs

Explain the advantages and disadvantages of crawler and mobile rigs

Describe pile driving accessories used with various types of cranes

Identify the parts and basic operation of pile driving equipment

Use the proper construction and placement procedures to drive piles to industry standards

Student Learning Outcomes:

Identify the purpose and types of piles used in construction.

Demonstrate proper construction and installation of tongue-groove wood sheet pile.

Demonstrate the proper use of rigging and pile driving equipment.
Units & Hours
Falsework A
ACPD026A :

1.5 Units

As part one of two courses, training will focus on bridge falsework construction. The techniques for bent assemblies, base sub-assemblies, deck soffits, and hardware installation will be presented. The procedures presented will include timber construction methods and alignment techniques to install and level base and bent assemblies. Students will develop skills using sand jacks, transit levels, and rigging procedures to set corbels, beams, and posts. Related safety, math, and print reading will be covered in the training. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
ACPD021 - Orientation

AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Identify and define the nomenclature for falsework components
List materials used in the construction of box girder bridge falsework
Describe falsework methods and sequence of construction
Explain how loads are transferred to falsework components
Identify rigging hardware and crane equipment operating procedures
Interpret prints to determine base dimensions and falsework configuration
Accurately layout sub-assembly to project specifications
Demonstrate the safe use of power tools and personal protective equipment
Assembly sill beam and posts to print specifications
Measure, cut and attach bent bracing to industry standards
Correctly drill and insert coil bolts
Demonstrate proper use of tools and leveling equipment
Employ best practices for alignment of bents

Student Learning Outcomes:
Identify falsework construction methods and materials.
Install and align falsework assemblies to print specification.

Units & Hours
Falsework B
ACPD026B:

1.5 Units

As part two, this course continues the focus on box girder bridge falsework construction. The techniques for bent assemblies, base sub-assemblies, deck soffits, and hardware installation will be reviewed. During this part of the training, procedures will include setting and installation of deck soffit assemblies. Students will develop skills using layout and rigging procedures to set and secure cap beams, stringers and joists support. Related safety, math, and print reading will be covered in the training. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
ACPD021 - Orientation
AND
Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Review overall falsework base, bent and bracing construction procedures
Explain the importance of construction codes and inspections
Identify deck soffit falsework sequence of construction
Review crane and rigging safe practices
Interpret prints to determine deck soffit arrangement
Identify deck soffit sequence of construction
Complete falsework installation to industry standards
Verify elevation and alignment
Attach deck sheathing using proper procedures
Discuss examples of falsework failures and causes
Utilize inspection criteria to evaluate falsework installation
Report defects and employ appropriate corrective measures

Student Learning Outcomes:
Identify falsework deck soffit construction sequence and materials.
Complete box girder bridge falsework installation to industry standards.

Units & Hours

Abutment A

ACPD027A:

1.5 Units
This course provides students with the skills needed to layout abutment formwork and construction of footings to industry standards. A close look at assembly components will describe key terms and abutment anatomy. The importance of earth strata in the construction of footings, piers, and retaining walls will be covered. The techniques for laying out keyway centerline and footing formwork construction will be the main focus during this part of abutment training. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite

ACPD021 - Orientation

AND

Prerequisite

ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:

Not transferable

Learning Outcomes

Course Objectives:
Describe the materials and components used in abutment construction
Identify tools and equipment, materials, personal protective equipment
Read and recognize elements represented on project drawings
Convert and calculate measurements in decimal and fractional units
Complete layout of abutment keyway centerline and footings
Accurately measure and cut materials for abutment footings
Identify tools and equipment, materials, personal protective equipment
Use the proper procedures and sequence of construction for footings
Demonstrate ability to correctly level and align footing formwork
Install bracing and supports to industry standards

Student Learning Outcomes:

Identify the components and construction sequence of abutment structures.
Demonstrate layout and construction of abutment footings.

Units & Hours

Abutment B

ACPD027B:

1.5 Units

This course provides students with the skills needed to layout, and to construct abutment wall panel formwork to industry standards. A close look at assembly components will describe key terms and abutment anatomy. The importance of earth strata in the construction of footings, piers, and retaining walls will be covered. The techniques for layout, and keyway, wing/headwall panel formwork construction will be the main focus during this part of abutment training. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite

ACPD021 - Orientation
AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Describe the materials and components used in abutment wall panel formwork
Identify tools and equipment, materials, personal protective equipment
Read and recognize abutment wall elements represented on project drawings
Convert and calculate measurements in decimal and fractional units
Complete layout of abutment keyway and wing/head walls
Accurately measure and cut materials for abutment formwork panels
Identify tools and equipment, materials, personal protective equipment
Accurately measure and cut materials for panels
Demonstrate ability to correctly install and fasten waler and strongbacks
Place, connect and securely attach panels in proper position
Apply chamfer and drip grooves according to specifications

Student Learning Outcomes:
- Identify the components and construction sequence of abutment wall panel structures.
- Demonstrate layout and construction of abutment formwork.

Units & Hours

Bridge and Deck Forms A
ACPD028A:

1.5 Units

This course provides students with an overview of basic bridge and deck construction. Descriptions for exterior and interior girders; edge forms; bulkheads; hinge and deck forms will be presented. Bridge and deck formwork projects will include bridge panel construction, assembly, and hardware attachment tasks. Related safety, math, and print reading will be covered in the training. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite
ACPD021 - Orientation

AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable
Learning Outcomes

Course Objectives:
- Identify and define the nomenclature of bridge deck forms
- List materials used in the construction of concrete bridge formwork
- Describe bridge form construction methods
- Interpret prints to locate Bridge forms and determine dimensions
- Calculate concrete volume for bridge forms
- Accurately layout bridge formwork to project specifications
- Cut Top and bottom plate
- Cut studs to length
- Assemble and sheet with plywood
- Describe trim types and purpose
- Measure, cut and attach trims to print specifications
- Demonstrate safe use of tools and personal protective equipment

Student Learning Outcomes:
- Utilize the proper bridge and deck installation form layout procedures.
- Assemble bridge formwork panels to print specification.

Units & Hours

Bridge and Deck Forms B
ACPD028B:

1.5 Units

This course provides students with an overview of basic bridge and deck construction. Descriptions for exterior and interior girders; edge forms; bulkheads; hinge and deck forms will be presented. Bridge and deck formwork projects will include bridge panel construction, assembly, and hardware attachment tasks. Related safety, math, and print reading will be covered in the training. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite
ACPD021 - Orientation

AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
- Identify and define the nomenclature of bridge deck forms
List materials used in the construction of concrete bridge formwork

Describe bridge form construction methods

Interpret prints to locate deck forms and determine dimensions

Calculate concrete volume for deck forms

Accurately layout deck formwork to project specifications

Install panel formwork using proper installation sequence

Correctly install and secure form hardware

Demonstrate safe use of tools and personal protective equipment

Correctly install and secure falsework and bracing

Measure, cut and assemble deck formwork using proper installation sequence

Demonstrate safe use of tools and personal protective equipment

**Student Learning Outcomes:**

- Utilize the proper bridge and deck installation sequence of construction.
- Construct a bridge and deck project to print specification.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units:**

1.5

**Total Hours**

45.0

**Structural Welding-AWS A**

**ACPD029A:**

1.5 Units

This course is designed to be compliant with the American Welding Society (AWS) D1.1 code requirements and provide workers with industry-recognized structural welding credentials. A careful examination of the applicable codes will include terminology, shielded metal arc welding processes (SMAW), equipment and safety requirement, electrode identification and applications, welding positions, and deposits. Practical experience will include symbol identification, print interpretation, code citation, safe equipment set-up and operation, and recognition/remediation of welding flaws. This course will focus on the written examination and production of practical test plates required for AWS D1.1 certification. Open Entry/Open Exit.

**Requisites**

**Requisites:**

**Prerequisite**

**ACPD021 - Orientation**

**AND**

**Prerequisite**

**ACPD022 - Safety and Health Certifications**

**Transferability & General Education Options**

**Transferable:**

Not transferable
Learning Outcomes

Course Objectives:
- Identify and explain the requirements needed to successfully obtain an AWS Certification
- Discuss components of safe welding practices
- Demonstrate proper use of personal protective equipment (PPE)
- Discuss shielded metal arc welding (SMAW) methods and equipment used throughout the industry
- Demonstrate proper setup and adjustment for welding equipment
- Identify the proper electrode selection, position and movement to form specific weldments
- Discuss the important role current and polarity play in welding process and the impact on weld types
- Apply proper techniques for selected SMAW welding assignments
- Utilize safety practices and procedures; including proper PPE
- Evaluate performance and complete written tests

Student Learning Outcomes:
- Demonstrate correct shielded metal arc welding (SMAW) procedures and observe safe welding practices.
- Perform fillet, butt and vertical fillet welds to meet certification criteria.

Units & Hours

Structural Welding-AWS B
ACPD029B:

1.5 Units

This course provides practical experience for structural welding skills used in commercial and industrial construction. Instruction will include a review of welding terminology, welding processes, welding equipment, and safety requirements. Key discussions will be used to identify electrode characteristics and metal inert gas/tungsten inert gas (MIG/TIG) welding applications. Practical experience will include safety procedures, proper equipment set-up and operation, electrode selection, fillet and groove weld formation in three positions, and recognition/remediation of welding flaws. This course will focus on developing the manipulative ability required for producing test plates acceptable for AWS D1.1 certification. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
ACPD021 - Orientation

AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
- Identify and describe four welding methods associated with AWS Certifications
Describe the proper use of applicable welding codes and print symbols

Discuss components of safe welding practices

Demonstrate proper use of personal protective equipment

Discuss, MIG, TIG welding methods and equipment used throughout the industry

Demonstrate proper setup and adjustment for MIG and TIG welding equipment

Identify the proper electrode selection, position and movement for forming various weldments (welding Symbols)

Discuss the differences each process has on the productivity and skill level required

Apply proper techniques to selected TIG/MIG welding assignments

Utilize safety practices and procedures including proper personal protective equipment (PPE)

Evaluate performance and complete written tests

Student Learning Outcomes:

- Identify and describe four different welding processes.
- Identify standard welding symbols and form corresponding weldments.

Units & Hours

Minimum Units:

1.5

Maximum Units:

1.5

Total Hours:

45.0

Print Reading

ACPD030:

1.5 - 2.0 Units

This course introduces print reading skills as a basic communication tool of the trades. The material covered will focus on developing the students' ability to interpret two-dimensional views in such a way to convey the shape and characteristics of construction elements, and provide an overview of the scope of the project. Students will be able to recognize standard drawing methods, pictorial views, and how to read visual and verbal communication cues. Students will develop skills through a series of exercises including identifying parts of drawings, locating the building, pier, and heavy highway features, calculating dimensions, and using views to determine construction methods. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite

ACPD021 - Orientation

AND

Prerequisite

ACPD022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:

Not transferable
Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Define terms and categorize print according to specific characteristics for commercial and residential applications
Identify drawing methods used to create prints
Label the standard views used in orthographic projection
Describe and use conventional lines, symbols and dimensioning methods
State how beginning and ending measuring points are indicated
Determine calculated dimensions
Match views to identify design scope, components and layout arrangement
Translate construction information using conventional lines and symbols
Determine beginning and ending measuring points and accurately calculate dimensions for project plans
Practice sketching construction elements using standard views
Interpret project plan views to identify construction elements and layout details
Complete a detailed material list from project plans (foundation/framing/finish)
Practice using plan/elevation views to determine construction elements and layout arrangement
Complete a detailed material list from print specifications
Use plans to accurately establish construction layout (footings/pier/bridge)

Student Learning Outcomes:
Apply the principles of orthographic project to visualize three dimensional images from two dimensional graphic representations.
Interpret prints to determine building, pier and heavy highway construction elements, size and arrangement.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Welding Fabrication A
ACP031A :
1.5 Units

This course provides an introduction to fabrication skills using oxygen/acetylene torch and welding equipment. A review of torch cutting principles will cover parts identification, gas characteristics, torch accessories and tips, safe operating and inspection criteria, and manufacturer’s guidelines for use and care. Instruction will include inspection, torch set-up, criteria for interchanging of cutting tips and attachments, and identification of applicable symbols and codes. An emphasis will be placed on interpreting fabrication drawings, cutting stock materials, and torch heating and welding of parts. The importance of fire and shop safety, reading and monitoring of gages, and the importance of following project instructions will be stressed during cutting/welding fabrication exercises. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
ACPD021 - Orientation

AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Identify terms, regulations, and welding equipment components
Discuss safety practices/personal protective equipment (PPE), and operating procedures for arc welding
Recognize fabrication symbols on prints
Discuss and evaluate oxy-acetylene welding methods, characteristics, equipment use and storage
Demonstrate proper setup and adjustment for torch cutting equipment; utilize proper techniques to complete cutting and burning assignments
Demonstrate proper setup and adjustment for torch welding equipment; utilize proper techniques to complete torch welding assignments

Student Learning Outcomes:
Demonstrate proper procedures to safely operate torch and welding equipment
Fabricate basic parts using torch cutting/welding techniques

Units & Hours
Welding Fabrication B
ACPD031B:

1.5 Units

This course provides an introduction to fabrication skills using oxygen/acetylene torch and arc welding equipment. A review of arc welding principles will cover equipment parts identification, gas characteristics, arc welding accessories, and electrodes, safe operating and inspection criteria, and manufacturer’s guidelines for use and care of the machinery. Instruction will include inspection, torch set-up, criteria for welding machine settings, applications for electrodes use, and identification of applicable symbols and codes. An emphasis will be placed on interpreting fabrication drawings, cutting stock materials, and torch heating and welding of parts. The importance of fire and shop safety, reading and monitoring of equipment gages and settings, and following project instructions will be stressed during welding fabrication exercises. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
ACPD021 - Orientation

AND

Prerequisite
ACPD022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Identify terms, regulations, and welding equipment components
Discuss safety practices/personal protective equipment (PPE), and operating procedures for arc welding
Recognize fabrication symbols on prints
Discuss and evaluate shielded metal arc welding methods, characteristics, equipment use and storage
Demonstrate proper setup and adjustment for torch cutting equipment; utilize proper techniques to complete cutting and burning assignments
Demonstrate ability to form joints using SMA procedures
Demonstrate proper setup and adjustment for torch welding equipment
Utilize proper techniques to complete torch and arc welding assignments

Student Learning Outcomes:
Demonstrate proper procedures to safely operate arc welding equipment.
Fabricate basic parts using arc welding techniques.

Units & Hours

Tool/Equipment Applications

ACPL023:

1.5 Units

This course promotes hand/power tool and equipment skill development for various interior systems construction applications. Aerial lift safety and operating procedures, and scaffold building will also be covered. Upon successful completion, students will be issued the United Brotherhood of Carpenters (UBC) Aerial Lift and Scaffold Erector-Welded Frame Qualification Cards. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite
ACA071A - Orientation
AND

Prerequisite
ACA071B - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Learning Outcomes

Course Objectives:
Identify scaffold components and applicable Occupational Safety and Health Administration (OSHA) regulations
Match safety hazards and precautions for scaffold erection procedures
Conduct scaffold safety and equipment inspections
Properly stage, assemble, and disassemble selected scaffolding
Meet United Brotherhood of Carpenters (UBC) criteria for erecting and dismantling scaffolds correctly
Identify boom/scissor aerial lift components and applicable OSHA regulations
Match safety hazards and precautions for aerial lift equipment operation
Conduct aerial lift safety inspections
Demonstrate the safe operation of two types of aerial lifts
Meet UBC criteria for the proper operation of aerial lift equipment
Select appropriate mathematical operations to measure and calculate materials
Practice using the mathematic techniques presented to complete layout of materials
Select appropriate hand and power tools/equipment for assigned interior systems tasks
Utilize proper fastener placement and driving techniques
Apply the appropriate tool/equipment manipulative techniques to complete interior systems construction tasks assigned

Student Learning Outcomes:
- Identify and demonstrate safe operating procedures for aerial lift truck equipment.
- Demonstrate the proper erecting/dismantling procedures for welded frame scaffolds.
- Assess interior systems construction tasks to determine the appropriate tools, equipment and construction methods to apply.

Units & Hours
Basic Plastering
ACPL025:

1.5 Units

This course covers common terms, safety procedures, building codes, and basic plastering production practices. Students will compare and use lath and plastering products for installation projects. Finish levels and hand tool manipulation will be covered with an emphasis on proper hawk and trowel techniques. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Identify terminology and applicable building codes
Prepare surfaces and mix material to the appropriate consistency
Uniformly apply plaster coats establishing true planes
Follow the procedures used for all plaster coats
Use basic hand tools and equipment safely
List workplace safety considerations and site specific hazards
Compare plastering finishes to other types of construction finishes
Work effectively off the heel and toe of a trowel

Student Learning Outcomes:
- Compare and contrast various types of plastering methods used in the construction industry.
- Complete a basic plastering project to industry standards.
Units & Hours
Exterior Plastering
ACPL026:

1.5 Units

This course is designed to provide the students with the methods, procedures, and practices used in Exterior Plastering. Special attention will be given to Portland Cement Plaster. Mixing and proportions, curing rates, and quality workmanship will be included. Students will enhance their plastering application and tool manipulation skills with guided practice in the scratch coat, brown coat, and a variety of finish coats. Training will conclude with inspection criteria for evaluating coat levels. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Discuss terms, characteristics, tools and types of material
Identify various mixes and proportions of cement, sand, lime and water
Measure project area and calculate material needs
List three-coat work procedures and precautions
Use proper techniques to uniformly coat scratch, brown and finish levels
Properly moist cure coats to industry standards
Prepare surfaces and mix material to the appropriate consistency
Demonstrate ability to complete surface finishing to project specifications

Student Learning Outcomes:
Correctly mix each coat of an exterior plastering project.
Properly apply exterior plastering coats to project specifications.

Units & Hours
Dot and Screed Techniques
ACPL027:

1.0 Units

This course is designed to teach the apprentice the importance of plumb and square projects. The students will use 3-4-5 or center line methods to square the project, establish control lines and wall finish lines. The plumbing of the project will be learned through the dotting and screeding portion of instruction. The student will brown up and finish a project using methods of application previously covered. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable
Learning Outcomes

Course Objectives:
- Identify terms and applicable building codes
- Describe the proper spacing, setting and pressing of dots
- Measure project area and calculate material needs
- Interpret prints to find dimensions and identify materials for job planning
- Accurately plumb and square walls using dots and screeds
- Establish benchmarks using a water level, laser and transom
- Select and use appropriate tools bringing walls to a true surface with precise plaster thickness according to plans
- Use placed dots to correctly run horizontal and vertical screeds

Student Learning Outcomes:
- Apply the proper techniques for wall layout projects.
- Complete a dot and screed wall layout.

Units & Hours

Interior Plastering

ACPL028:

1.5 Units

This course is designed to introduce the student to modern gypsum interior plastering. They will learn the most widely used systems today. Proper methods of application, proper proportioning and mixing, and good workmanship will be stressed in this course. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:

Not transferable

Learning Outcomes

Course Objectives:
- Compare finished surface to industry standards for veener applications.
- Describe variations in coating techniques.
- Identify types and characteristics of plaster.
- Select and use the appropriate application techniques and tools for gypsum coating.
- Demonstrate the proper surface and material preparation techniques.
- Use proper proportioning and mixing techniques.
- Apply a one coat veneer system to surface.
- Identify materials for job planning.
- Compare finished surface to industry standards for smoothness.
- Use proper proportioning and mixing techniques for gypsum three-coat and veneer one-coat work.
- List advantages of a plaster system over other interior finish systems.
- Identify materials used to sheath wall framing.
Interpret prints to find surface area.

Practice attaching substrates to wall framing.

Select and use the appropriate application techniques and tools for gypsum and veneer systems.

**Student Learning Outcomes:**
- Properly apply the appropriate interior plastering coatings to industry standards.
- Correctly apply veneer plaster on interior surfaces.

**Units & Hours**

**Tender and Plastering Equipment**

**ACPL029:**

1.5 Units

This course covers the terminology, components, and operating procedures for plastering equipment and machinery. Machine maintenance, safety, troubleshooting procedures, limits of operation, and communication practices will be covered. Students will inspect and properly set up and clean a plastering pump. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Learning Outcomes**

**Course Objectives:**
- Identify terms, machinery components and applicable Occupational Safety and Health Administration (OSHA) regulations
- Compare the quality and production of machinery use from hand tools
- Demonstrate safe and proper use of machinery
- Match safety hazards and precautions for machinery handling
- List the steps used in the set up and operation of the machinery
- Perform machinery maintenance and repairs
- Describe common problems and repair solutions that may occur when handling machinery
- Conduct machinery safety and maintenance inspections
- Learn safe and proper use of machinery, good housekeeping techniques, proper us of personal protective equipment, and to identify site specific hazards

**Student Learning Outcomes:**
- Properly set up and operate pump equipment according to manufacturer's instructions.
- Perform maintenance checks and complete common repairs.

**Units & Hours**

**Exterior Insulation Finish Systems (EIFS)**

**ACPL030:**

1.5 Units
This course will teach the basic working knowledge and technical skills needed to successfully install Exterior Insulation and Finish Systems (EIFS) to meet industry specifications and standards. Introduction to the proper usage of products and materials will be discussed and used. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Prepare surfaces and mix material to the appropriate consistency
Accurately layout, install and finish architectural shapes
Demonstrate the proper methods for laying out and installing expanded polystyrene (EPS) boards over substrate
Properly layout and cut reveals and drips
Measure project area and calculate material needs
Identify terminology, materials and applicable building codes
Use proper techniques to apply base coat, reinforcing mesh and synthetic finishes
State the procedures used for installing EPS boards and all plaster coats

Student Learning Outcomes:
Install an Exterior Insulation Finish System (EIFS) to industry standards.
Locate EIFS construction details on prints and in specification.

Units & Hours
Ornamental Plastering
ACPL031:
1.5 Units

This course provides practical experience using applied geometry for plastering ornamental designs. Students will use the plastering skills presented to create molds and complete an ornamental installation to print specifications. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Create and install molds according to print specifications.
Build a sturdy bench with a good working surface.
Run bench and trammel molds.
Describe sequence of mathematical operations used to layout materials for ornamental plaster elements.
Demonstrate proper set up and run of a keystone at the apex of an arch.
Discuss design elements for ornamental features.

Horse all required molds.

Use the appropriate print views to identify and calculate materials.

Set required pieces of staff and point up.

Describe various methods and techniques used in ornamental plastering.

Identify terms, types of molds and building codes.

Practice layout of arches and various angles for plaster ornamental designs.

Lay out an elliptical arch that is true to working drawings.

**Student Learning Outcomes:**

Apply geometric calculations to achieve ornamental features according project design.

Create, install and plaster ornamental details to meet industry standards.

**Units & Hours**

**Plastering Equipment Application**

**ACPL032:**

1.5 Units

This course identifies the materials, application methods, and techniques for operating a plaster pump. Students will complete a three-coat work application to industry standards. An emphasis will be placed on proper pump set-up, washout, and maintenance. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

Not transferable

**Learning Outcomes**

**Course Objectives:**

Identify terms, materials and building codes

Interpret prints to find dimensions and identify materials for job planning

Compare hand application from pump application

Use proper proportioning and mixing techniques

Select and use the appropriate application techniques and tools

Apply three coat work using proper pumping techniques

Identify and properly use good housekeeping skills, personal protective equipment, and tools and equipment

Practice effective communication skills

**Student Learning Outcomes:**

Correctly execute a three coat plastering project.

Interpret plastering details in print specifications.

**Units & Hours**

**Finish Applications**

**ACPL033:**
1.5 Units
This course covers the coating techniques for various types of finishing materials used in the plastering industry. Students will review construction drawings and specifications to identify finish materials and surface placement. Instruction will include mixing proportions, consistency, additives, and application procedures. The techniques for cement-based, acrylic and specialty materials will be the focus of the class. Students will coat multiple surfaces using the correct material and finish details on project prints. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Learning Outcomes**

**Course Objectives:**
- Identify various styles and design factors.
- Explain how to achieve various finishes indicated on project plans.
- Prepare surfaces and materials.
- Ability to demonstrate proper tools motion for finish application.
- Use the proper coating method for assignments.
- Complete a finish application acceptable for skill level.
- Explain the coating procedures for each type of finish application.
- Develop the ability to work with colored mediums.
- Practice using coating procedures for several speciality finishes.

**Student Learning Outcomes:**
- Determine the correct finish materials for multiple surfaces using project prints.
- Demonstrate ability to apply selected plaster products to achieve surface finish as indicated on project prints.

**Units & Hours**

**Theme Plastering**

**ACPL034:**

1.5 Units

This course is designed to encourage the development of artistic skills and the ability to plan and execute the plastered imitation of natural rock formations. Students will study irregular surfaces, cracks, and color variations of real rock formations to aid the creative process. Students will employ specialty tooling and material techniques to replicate live like rock features. Painting, highlighting, and carving skills will be explored and utilized to complete assignments. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Learning Outcomes**

**Course Objectives:**
Describe natural settings suitable for replication in plaster.
List ways visual cues contribute to the creative process.
List three types of rock formation, their names and origin.
Use proper layout techniques for rock positioning.
Demonstrate ability to recreate natural appearance of rock surfaces.
State the procedures used to recreate real rock colorations.
Demonstrate ability to color plaster in varying hues for rock-like appearance.
Apply plaster coats to shade and recreate the look of natural rocks.
Interpret architectural drawings to identify materials for job planning.
Create rock formations to project specifications.
Prepare mixtures to proper consistency for project coating.
Demonstrate safe carving techniques for a rock formation.

**Student Learning Outcomes:**

- Accurately interpret drawings and prints to complete manufactured and carved in place rock projects.
- Transfer the visual characteristics viewed during study of natural rock formations.

**Units & Hours**

**Cosmetology Apprentice**

**ACS035:**

0.5 - 14.0 Units

Provides the related and supplemental instruction required for cosmetology apprentices leading to a cosmetology license. 0.5 unit earned for each 8 hours of successfully completed coursework. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

0.5

**Learning Outcomes**

**Course Objectives:**

- Practice the application of cosmetology chemistry and hazardous chemicals in the workplace.
- Demonstrate proficiency in the technique of permanent waving.
- Demonstrate proficiency in the technique of hair coloring.
- Demonstrate proficiency in the techniques of manicuring, pedicuring and artificial nails.
- Demonstrate an understanding of professional ethics and communication.
- Demonstrate proficiency in the technique of chemical relaxing.
- Demonstrate proficiency in the techniques of scalp treatment and hair conditioning.
- Understand, practice and apply the theories of bacteriology.
Apply the principles of anatomy and physiology as it relates to cosmetology.

Demonstrate proficiency in the technique of haircutting.

Demonstrate proficiency in the technique of wet hairstyling.

Follow the Consumer Affairs guidelines regarding thermal styling, pressing and curling.

Demonstrate an understanding of the theory of electricity.

Demonstrate proficiency in the techniques and terminology of makeup.

Demonstrate proficiency in the technique of eyebrow arching and hair removal.

Demonstrate application for proper procedures in working with patrons on facials.

**Student Learning Outcomes:**

- Follow Board of Barbering and Cosmetology safety and sanitation rules and regulations when working with patrons in a cosmetology salon, performing all procedures required to be a successful, licensed cosmetologist.
- List, explain, articulate and apply chemistry, anatomy and physiology principles used in cosmetology.

**Units & Hours**

**Minimum Units:**

0.5

**Maximum Units:**

0.5

**Total Hours:**

9.0

**Sound and Communication Apprentice 1**

AEL021:

4.0 - 4.5 Units

Provides related and supplemental instruction for Sound Electrician Apprentices in the structure and requirements of the International Brotherhood of Electrical Workers (IBEW) and the National Electrical Contractors Association (NECA) Apprenticeship program, tools and test instruments and electricity in Direct Current (DC) Theory Series Circuits. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

4.0

**Learning Outcomes**

**Course Objectives:**

- Examine this course and achieve personal goals
- Recognize the attributes of an IBEW/NECA Apprenticeship
- Interpret Apprenticeship and responsibilities
- Examine the International Brotherhood of Electrical Workers (IBEW) and its history
- Examine the National Contractors Electrical Association (NECA) structure and heritage
Recognize your job and the future it holds for you

Distinguish Sexual Harassment

Recognize Safety never takes a Break

Identify Basic Tools of the Trade

Identify Basic Telecom Tools of the Trade

Choose Test Instruments

Identify Voice-Data-Video (VDV) Test Instruments

Practice the Proper use of Ladders

Choose Fastening Devices

Demonstrate Basic Knots

Identify Electrical Energy Sources

Identify Electrical Switches

Calculate Conductors, Conductor Resistance and Wattage Loss

Identify Electrical Devices

Explain Current, Voltage and Resistance in a Circuit

Analyze Electrical Units and Ohm’s Law

Define Power in DC Series Circuits

Illustrate DC Series Circuits

Calculate Resistance in DC Series Circuits

Calculate Current in DC Series Circuits

Calculate Voltage in a DC Series Circuits

Calculate How Current Reacts in DC Parallel Circuits

Calculate Resistance in DC Parallel Circuits

Recognize Resistors of Equal Value in Parallel

Recognize Resistors in Parallel

Calculate Voltage in DC Parallel Circuits

Calculate Power in DC Parallel Circuits

Calculate Voltage in DC Combination Circuits

Calculate Power in DC Combination Circuits

Illustrate Voltage and Current Dividers

Demonstrate the Principles of Magnetism

Demonstrate the Principles of Electromagnetism

**Student Learning Outcomes:**

Analyze the attributes of an IBEW-NECA Apprenticeship Program and identify basic tools of the trade.

Demonstrate electricity and describe how power, current and resistance works in direct current (DC) series and parallel circuits.

**Units & Hours**

**Minimum Units:**

4.0
Maximum Units
4.0

Total Hours
81.0

Sound and Communication Apprentice 2
AEL022:

4.5 Units

Provides related and supplemental instruction for indentured Sound Electrician Apprentices in Commercial Building Telecommunications Cable Standards, Residential and Light Commercial Telecommunications Wiring and Fiber Optic Cabling. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.5

Learning Outcomes
Course Objectives:
Interpret TIA/EIA standards and codes
Discuss structured cabling systems overview
Review safety codes
Discuss cabling system performance
Identify unshielded twisted pair sonnecting hardware
Identify telecommunications pathways and spaces
Describe telecommunications cabling administration
Demonstrate telecommunications grounding and bonding
Identify telecommunications cabling
Identify UTP cabling system
Demonstrate terminating multi-pair cables on 110-terminal blocks
Recognize fiber-optic terminology
Distinguish fiber-optic communications
Identify fiber-optic transmission systems and components
Select optical fiber
Use fiber-optic cable
Identify connectors and splices
Demonstrate fiber-optic testing
Illustrate fiber-optic network design
Practice addition, subtraction, multiplication and division of whole numbers

Practice fractions, decimals and the metric system

Practice prefixes and powers of ten

Practice basic algebra equations to solve problems

Student Learning Outcomes:
   Read, interpret and apply Standards and Codes relating to Structured Cabling Systems.
   Understand Fiber Optic Terminology and Install and Test Fiber Optic Cables and Devices.
   Apply Proper Math Computations as used on Construction Jobsites.

Units & Hours

Minimum Units:
4.5

Maximum Units:
4.5

Total Hours:
81.0

Sound and Communication Apprentice 3
AEL023:

4.0 - 4.5 Units

Provides related and supplemental instruction for indentured Sound Electrician Apprentices in the International Brotherhood of Electrical Workers (IBEW), National Electrical Code, Alternating Current (AC) theory, analog and digital telephone systems and Distributed/Paging systems. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
Discuss and interpret the IBEW constitution
Discuss and interpret the local union by-laws
Practice and discuss parliamentary procedures
Calculate AC resistive circuits
Recognize inductance and how it affects a circuit
Interpret inductive reactance
Identify vectors in circuits
Identify basic characteristics of AC circuits
Examine parameters of series RL circuits
Recognize capacitance
Illustrate capacitive reactance
Demonstrate working safely with capacitors
Calculate inductors in series and parallel
Interpret basics of power quality
Illustrate safety
Demonstrate using the right tool
Demonstrate monitor setup
Record data collection and analysis
Explain telephone definitions
Demonstrate an understanding a telephone system
Identify and calculate telephone circuitry
Demonstrate basic telephone cabling
Identify analog vs. digital signals
Distinguish constant voltage and self-amplified systems
Identify mixers, amplifiers and interface devices
Identify telephone interface devices
Demonstrate speakers, horns and installation techniques
Recognize distribute sound systems
Demonstrate design and layout
Illustrate sound masking systems

Student Learning Outcomes:
- Read and Interpret the IBEW Constitution and By-Laws. Review Applications of DC Theory and compare to AC Theory.
- Calculate ampacity, voltage and resistance in Alternating Current (AC) Circuits.
- Identify and install Analog and Digital Telephone Systems and Distributed Sound and Paging Systems.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
81.0

Sound and Communication Apprentice 4
AEL024:

4.0 - 4.5 Units

Provides related and supplemental instruction for indentured Sound Electrician Apprentices in commercial building grounding and bonding requirements for telecommunications, security systems and installing Local Area Networks (LAN). Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
Discuss and explain the terms and definitions
Identify, select and use magnetic contacts
Identify, select and use motion sensors
Identify, select and use glassbreak sensors
Identify, select and use control panels, keypads and modules
Review and illustrate security system design
Interpret and identify access control
Identify and choose cards, codes and biometrics
Identify and choose doors, gates, turnstiles and electric locks
Identify sensor technology used in EAC
Explain computers and communications
Illustrate electronic access control system design
Interpret fundamentals and system requirements
Choose and use initiating devices
Choose and use notification appliances
Recognize and interpret wiring and wiring methods
Identify and describe system interfaces and safety control functions
Describe emergency communication systems
Describe emergency voice/alarm communication systems
Practice and record inspection, testing and maintenance
Review network definitions
Explain ethernet basics
Identify Local Area Networks (LAN)
Explain network operating systems
Identify and use switches, routers and Network Attached Storage (NAS)
Describe and identify TCP/IP internet addressing
Examine technologies and protocols
Illustrate circuit basics and overcurrent protection
Demonstrate code arrangement and application
Identify grounding electrodes and grounding electrode system
Illustrate bonding requirements
Identify Equipment Grounding Conductors (EGC's)
Describe and illustrate grounding for communications systems
Describe sizing of wire
Examine conduit and raceway basics
Examine wiring methods and materials
Identify conductors for general wiring
Identify power and limited circuits
Interpret fire alarm systems requirements
Select optical fiber and raceways
Identify communications circuits

Student Learning Outcomes:
Read, interpret, and apply electrical drawings and the National Electrical Code to install fire alarm life safety systems and grounding and bonding requirements.
Read, interpret, and apply electrical drawings and the National Electrical Code to install security alarm systems and computer networks.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
81.0

Sound and Communication Apprentice 5
AEL025:

4.0 - 4.5 Units

Provides related and supplemental instruction for indentured Sound Electrician Apprentices in basic semiconductor diodes, transistors and rectifiers in electronic applications and Closed Circuit Television (CCTV) distribution systems. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Practice pride in your industry
Discuss National Electrical Benefit Fund (NEBF)
Discuss after apprenticeship
Demonstrate motivation and leadership
Discuss and review the economics of unemployment
Discuss and identify semiconductors
Recognize and illustrate diodes
Recognize and illustrate rectifiers
Identify and choose power supplies in electronic circuits
Examine and select transistors
Examine and select amplifiers
Recognize and calculate SCR circuits
Illustrate photoconductive cells
Discuss and identify Light Emitting Diodes (LED's)
Discuss and identify lasers and phototransistors
Calculate power ratios
Recognize and use power/frequency applications
Illustrate and use filters
Identify waveforms and harmonics
Choose antennas
Analyze video security systems
Interpret video technology
Discuss and recognize lenses, optics and lighting characteristics
Identify camera types and characteristics
Illustrate signal transmission methods
discuss and classify switchers, quads and multiplexers
Identify and explain motion detectors

Student Learning Outcomes:
Read, interpret and apply electrical drawings and the National Electrical Code to install solid state semiconductor transistor circuits.
Read, interpret and apply electrical drawings and the National Electrical Code to install Closed Circuit Television Monitoring Equipment.
Analyze the National Electrical Benefit Fund and Demonstrate Motivation and Leadership Skills to become a Supervisor in the Sound Industry.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
81.0
Sound and Communication Apprentice 6
AEL026:

4.0 Units

Provides related and supplemental instruction for indentured Sound Electrician Apprentices in Closed Circuit Television Cameras (CCTV), Fiber Optic Certification, and prepares students for state required Fire Alarm and Voice Data Video Exam. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

4.0

Learning Outcomes

Course Objectives:
Select and use pan/tilt, mechanisms
Select and use cameras, housing and accessories
Analyze and use video motion detectors
Identify system power sources
Illustrate and practice remote monitoring and video communications control
Interpret National Electrical Code (NEC) article 760
Employ the NEC table of contents
Organize NEC article outlines
Discuss and review the NEC index study guide
Discuss and review the NFPA 72 fire alarm standards
Interpret National Electrical Code (NEC) Article 725, 770, 800, 810 and 820
Employ the NEC table of contents
Organize NEC article outlines
Discuss and review the NEC index study guide
Examine and describe CFOS (Certified Outside Plant Fiber Optic Specialist)
Analyze and illustrate FTTA (Fiber to the Antenna)
Analyze DAS (Distributed Antenna Systems)
Review Data centers
Prepare for the CPCT (Premesis Cabling Systems) certification

Student Learning Outcomes:
Read, interpret, and apply electrical drawings and the National Electrical Code to install Closed Circuit Television Cameras (CCTV).
Read, interpret, and apply electrical drawings and the National Electrical Code to install fiber optics.
Read, interpret, and apply the National Electrical Code to pass Fire Alarm and Voice Data Video (VDV) state exam as required.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
81.0

Sound and Communication Apprentice 7
AEL027:

4.0 Units

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:

Recognize codes and standards
Illustrate layout systems
Demonstrate installation
Demonstrate acceptance testing
Analyze troubleshooting and servicing
Recognize codes and standards
Demonstrate cable testing and troubleshooting
Identify and use category 6 connectors
Analyze and illustrate bonding and grounding
Examine and assemble installing premises cabling
Examine and review management of premises cabling
Demonstrate terminating premises cabling

Student Learning Outcomes:

Identify, analyze and install Category 6 cabling, connectors for premises cabling installations as required by Building Industry Consulting Services International (BICSI) and AMP ACT 1 exam requirements.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
81.0

Sound and Communication Apprentice 8
AEL028:

4.0 Units

Requisites
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
Demonstrate cable stripping and cleaning
Analyze preparing for a splice
Demonstrate toning, testing and troubleshooting 25 pair splices
Recognize and use manhole and confined space training
Recognize and discuss the ins and outs of connectors
Examine and assemble connectors used in the audio, video, and communications system industry
Analyze and demonstrate distribution networks basics and configurations
Examine and explain headend equipment; alignment basics
Select distribution and amplifiers

Student Learning Outcomes:
Strip, clean, prepare, tone, test, and troubleshoot high pair count copper slicings.
Select and install connectors used in the audio, video, and communications systems industry.

Units & Hours

Minimum Units:
4.0

Maximum Units
4.0
Total Hours
81.0

Intelligent Transportation Systems Electrician Apprentice 1
AEL031:

4.0 - 4.5 Units
Provides the related and supplement instruction required for apprentice electricians in the intelligent transportation industry in tools and fasteners, National Electrical Code (NEC), math, building materials, conduit bending, electrical safety and proper use of tools and ladders. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Choose personal goals

Understand and appreciate the attributes of the International Brotherhood of Electrical Workers (IBEW) and National Electrical Contractors Association (NECA)

Review the history of apprenticeship

Review NECA's structure and heritage

Identify sexual harassment

Understand the economics of employment

Practice jobsite safety

Identify basic tools of the trade

Discuss the workplace of an electrical worker

Choose and install masonry fasteners

Calculate alignment and measurement

Understand electrical shock

Practice electrical safety

Understand the function of ground-fault circuit interrupters

Select the safe safety procedures on overhead work

Choose how to hoist loads properly

Select the proper hand signal communications

Evaluate building wire construction, insulation properties

Demonstrate how to size building wire

Choose firestop applications
Demonstrate working with fractions
Demonstrate basic trigonometric functions
Practice hand bending offsets, 90's, kicks and saddles
Choose the correct conduit for the application
Demonstrate basic lighting circuitry, 3-way and 4-way switching
Select and properly use aluminum conductors
Evaluate and identify electrical material
Calculate using prefixes and powers of 10
Calculate using the metric system and algebra
Interpret articles 90, 100, 110 and conductor insulation
Choose wiring devices
Identify general wiring requirements relating to installing wiring devices
Distinguish specific receptacle and switch installation requirements
Identify and choose industrial wiring

Student Learning Outcomes:
Use trigonometry to hand bend pipe, offsets, 90’s, kicks and saddles.
Identify the proper use of tools and ladders.
Understand and apply Article 100 & 110 of the NEC (National Electrical Code).

Units & Hours

Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 2

AEL032:

4.0 - 4.5 Units

Provides the related and supplement instruction for Intelligent Transportation Apprentice Electricians in Direct Current (DC) theory, the National Electrical Code, safe work practices, series circuits, combination circuits and hand bending. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
- Understand what electricity is
- Explain Ohm’s law
- Calculate Power in DC circuits
- Distinguish electrical and electronic devices
- Describe potential hazards of electrical circuits
- Calculate and solve power, resistance, current and voltage in DC series circuits
- Illustrate electrical circuits
- Calculate and solve power, resistance, current and voltage in DC combination circuits.
- Demonstrate ratios and proportions
- Calculate and solve power, resistance, currents and voltage in combination DC theory circuits
- Illustrate the operation and design and operation of the three-wire single phase system
- Recognize electrical generators
- Review principles of superposition
- Apply DC theory principles to solve real world problems
- Use overcurrent protections
- Identify Ground Fault Circuit Interrupters (GFCI)

Student Learning Outcomes:
- Calculate power, resistance, currents and voltage in DC series circuits, parallel circuits and combination circuits.
- Demonstrate knowledge of Ohm’s law regarding current, voltage and resistance in DC circuits.
- Demonstrate knowledge of hand bending conduit.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 3
AEL033:

4.0 - 4.5 Units

Provides the related and supplemental instruction for Intelligent Transportation Apprentice Electricians in Codeology, Direct Current (DC), Alternating Current (AC) and commercial blueprints. Continued study of Caltrans Plans and Specifications. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable
Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
- Interpret local-union bylaws
- Interpret the International Brotherhood of Electrical Workers (IBEW) constitution
- Discuss how parliamentary procedure
- Evaluate and understand the COMET program
- Show pride in the electrical industry
- Discuss American labor history
- Analyze hazards of drug abuse
- Analyze the layout, language, and structure of the (NEC) National Electrical Codebook.
- Demonstrate the system used to search and understand the (NEC) National Electrical Codebook.
- Recognize keywords and phrases in (NEC) National Electrical Codebook
- Interpret and utilize the plan, build, use system of information lookup in (NEC) National Electrical Codebook.
- Discuss and review of DC (Direct Current) theory
- Illustrate circuit calculations for basic circuits
- Analyze DC (Direct Current) compared to AC (Alternating Current sine waves voltages)
- Explain the basic characteristics of AC (Alternating Current) circuits
- Explain inductance and how it affects a circuit
- Recognize inductive reactance
- Illustrate frequency, inductance, and inductive reactance
- Analyze inductors in series
- Analyze inductors in parallel
- Demonstrate capacitance and how it affects a circuit
- Analyze RC time constant
- Become familiar with capacitive reactance
- Differentiate capacitance, frequency, and capacitive reactance
- Analyze the basic fundamentals of blueprints and how they are drawn
- Identify architectural views
- Recognize common scales used on blueprints
- Interpret and understand blueprint specifications, elevations, and schedules
- Illustrate electrical symbols
- Illustrate mechanical symbols

Student Learning Outcomes:
- Read, interpret, and articulate blueprints, drawings, and specifications to calculate the cost of a job.
- Use codeology to understand the layout of the (NEC) National Electrical Code using the Plan, Build, Use method.
- Calculate Direct and Alternating Current used in Electrical Circuits.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 4
AEL034:

4.0 - 4.5 Units

Provides the related and supplemental instruction for Intelligent Transportation Apprentice Electricians in Electrical Alternating Current (AC) theory, transformers and National Electrical Code applications. Continued study of Caltrans Plans and Specifications. Open Entry/Open Exit.

Requisites
Requisites: None

Transferability & General Education Options
Transferable: Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Analyze and calculate series RL circuits
Analyze and calculate series RC circuits
Analyze and calculate series RLC circuits
Analyze and calculate parallel RL circuits
Analyze and calculate parallel RC circuits
Analyze and calculate parallel RLC circuits
Analyze and calculate LC circuits
Analyze and calculate series and Parallel RLC circuits
Analyze and calculate combination RLC circuits
Identify inductors in series and/or parallel
Analyze and solve series RC circuits
Analyze and solve series RLC circuits
Analyze and solve parallel RL circuits
Analyze and solve parallel RC circuits
Analyze and solve parallel RLC circuits
Analyze and solve series and parallel RLC circuits
Calculate sizing of building wire
Calculate conductor ampacity
Identify branch circuits 1
Identify branch circuits 2
Identify and locate outside branch circuits and feeders
Identify and locate services
Identify and illustrate switches, receptacles and luminaires
Recognize conduit and raceways
Recognize cable assemblies
Interpret and demonstrate wiring methods and material
Recognize conductors for general wiring
Recognize Electrical Nonmetallic Tubing (ENT)
Recognize liquidtight flexible conduit
Recognize and select boxes and fittings defined by the NEC (National Electrical Code)
Illustrate magnetism and electromagnetism
Demonstrate transformer operation principles
Identify transformer connections
Apply real world transformer connections
Explain power generation and distribution

Student Learning Outcomes:
Calculate ampacity, voltage and resistance in Alternating Current (AC) circuits.
Read, interpret and apply the NEC to calculate ampacity, circuits, wiring and conduits for wiring installations.
Identify, install and connect transformers.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 5
AEL035:

4.0 - 4.5 Units
Provides the related and supplemental instruction required for Intelligent Transportation Apprentice Electricians in Rigging, Hoisting, Signaling, National Electrical Code, Grounding and Bonding and Electrical Safety Related Work Practices. Continued study of Caltrans Plans and Specifications. Open Entry/Open Exit.

Requisites
Requisites:
None
Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
Identify and discuss overcurrent protection types
Identify and calculate overcurrent protective device categories, protective device ratings
Identify circuit breakers
Identify fuses
Recognize conductor tap rules
Demonstrate ground fault protection
Interpret electrical safety culture
Recognize electrical hazard awareness
Demonstrate OSHA considerations
Demonstrate lockout tagout
Analyze 3-Phase bolted fault currents
Demonstrate hoisting safety
Recognize and employ cranes
Organize lift planning
Demonstrate the proper use of signaling
Practice load and weight balance
Choose proper slings and sling hitches
Choose proper rigging hardware

Student Learning Outcomes:
Ground an AC (Alternating Current) system, electrode system, equipment and conductors. Understand and identify overcurrent protection and types of overcurrent.
Find the corresponding references and information in the NEC (National Electrical Code), given grounding related questions.
Properly rig and hoist equipment with signals, slings or chains.

Units & Hours

Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 6
AEL036:

https://sccollege.elumenapp.com/catalog/all-pages/4a0d0669-c6e1-4cbc-bed7-dd32ba6eb18
4.0 - 4.5 Units

Provides the related and supplemental instruction required for Intelligent Transportation Apprentice Electricians in grounding and bonding, fire alarm systems, transformers and electrical safety-related work practices for Intelligent Transportation Apprentices. Continued study of Caltrans Plans and Specifications. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

4.0

Learning Outcomes

Course Objectives:
- Interpret NFPA 70E
- Identify arc flash hazards
- Demonstrate energized work practices
- Calculate fault current magnitude and duration
- Describe overcurrent protection
- Interpret code arrangement and application
- Analyze grounding electrodes
- Describe services and grounded conductors
- Identify bonding requirements
- Solve grounding electrical equipment
- Describe and install grounding circuits and receptacles
- Recognize fire alarm systems
- Analyze system requirements
- Describe initiating devices
- Describe notification appliances
- Apply wiring and wiring methods
- Use plans and specifications

Transformers Level 2:
- Demonstrate transformer connections
- Recognize harmonics
- Analyze power generation and distribution
- Identify reactors and isolation transformers
- Explain autotransformers

Student Learning Outcomes:

Read, interpret and apply the National Electrical Code as it applies to grounding and bonding.
Plan design and implement Transformers.
Plan, design and implement fire alarm systems.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 7
AEL037:

4.0 - 4.5 Units

Provides the related and supplemental instruction required for Intelligent Transportation Apprentice Electricians in Code Calculations, Blueprints, Electrical Grounding and Bonding and Motors. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Recognize special occupancies
Choose electrical equipment
Choose special equipment
Distinguish cable tray systems
Recognize surface metallic raceways
Calculate ampacity of conductors in cable trays
Review and analyze industrial specifications
Review and analyze industrial prints I
Review and analyze industrial prints II
Review and analyze industrial prints III
Identify grounding at separate buildings or structures
Practice grounding electrical Systems
Interpret grounding requirements for separately derived systems
Identify special occupancies
Select ground-fault circuit interrupters (GFCI) and ground-fault protection of equipment (GFPE)
Analyze and demonstrate grounding systems and earth ground test instruments
Explain magnetism and induction
Examine motor nameplates
Recognize Alternating Current (AC) alternators
Recognize three-phase motors
Recognize squirrel-cage motors
Recognize wound rotor motors
Recognize single phase motors
Solve motor protection

Student Learning Outcomes:
Compute Electrical Calculations for Electrical Equipment, Special Occupancies, Special Equipment and Ampacity of Cable Trays. Read and interpret blueprints for industrial job applications. Understand bonding and grounding requirements for separate buildings, separately derived systems, ground-fault circuit interrupters (GFCI) and ground-fault protection of equipment (GFPE) and use of ground earth test instruments.

Units & Hours
Minimum Units:
4.0
Maximum Units
4.0
Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 8
AEL038:
4.0 - 4.5 Units

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Interpret and demonstrate magnetic motor control
Recognize, select and use manual pilot devices
Recognize, select and use automatic pilot devices
Recognize, select and use magnetic control relays
Recognize, select and use control transformers
Recognize, select and use magnetic contactors
Recognize, select and use basic motor starters
Recognize, select and use basic timers
Identify and select electrical devices
Discuss swimming pools and fountains
Explain emergency and standby systems installation requirements
Illustrate over 600-volt and 1000-volt installations
Discuss changes to the NEC-part I
Discuss changes to the NEC-part II
Calculate conductor ampacity
Practice ampacity calculations
Calculate box size and fill conductor
Calculate raceway fill
Explain electrical load calculations

**Student Learning Outcomes:**
- Research, Identify and Implement Codes, Standards and Specifications to Install an Electrical System.
- Install, Troubleshoot and Maintain Motor Control Devices.
- Pass mock versions of the California State Electrical Exam.

**Units & Hours**

**Minimum Units:**
4.0

**Maximum Units**
4.0

**Total Hours**
99.0

**Intelligent Transportation Systems Electrician Apprentice 9**

**AEL039:**

4.0 - 4.5 Units

Ninth semester of a five-year program. Provides related and supplemental instruction in becoming a Journeyworker in the Intelligent Transportation Systems Industry. Torquing methods and requirements for electrical equipment, Solid State Systems and OSHA 30 safety practices in construction for intelligent transportation systems apprentices. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**

https://sccollege.elumenapp.com/catalog/all-pages/4a0d0669-c6e1-4cbc-bed7-dd321a64eb18
Learning Outcomes

Course Objectives:
Evaluate the National Electrical Benefit Fund (NEBF)
Differentiate After Apprenticeship to Journeyworker Status
Demonstrate Motivation and Leadership
Calculate and Assess Economics of Unemployment
Examine the Realities of Construction
Describe Electronics for Motor Control Devices
Identify and Choose Solid-State Motor Control Pilot Devices
Identify and Choose Solid-State Relays
Examine Motor Control Centers
Choose Fall Protection
Recognize Electrocuton
Choose Personal Protective Equipment
Operate Scaffolds
Recognize and Solve Excavations
Recognize and List Confined Space Areas
Demonstrate Proper Use of Hand and Power Tools
Examine Threaded Fastener Basics
Demonstrate Torque Applications
Identify Torque Products / Tools
Define Electrical Torque Applications

Student Learning Outcomes:
Identify and explain the National Electrical Benefit Fund, understand and relate to being a journeyworker intelligent transportation systems in the Electrical Industry, practice motivation, and leadership skills on the job.
Research, identify and implement codes, standards, and specifications to install an electrical system.
Recognize and choose Electrical Devices for Motor Control and Equipment Operation.
Recognize and identify safe work practices described in OSHA 30 training.

Units & Hours

Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Intelligent Transportation Systems Electrician Apprentice 10 AEL040:
4.0 - 4.5 Units
Provides related and supplemental instruction required for Intelligent Transportation Apprentice Electricians in Torquing methods and requirements for electrical equipment, Photovoltaic Systems and OSHA 30 safety practices in construction for inside wireman apprentices. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**

4.0

**Learning Outcomes**

**Course Objectives:**

- Demonstrate Managing Employees
- Setup Managing the Job
- Categorize Documents Required by Job Foreman
- Relate Safety Updates
- Analyze Lighting systems and light sources
- Recognize Lighting systems control devices, dimmers, photosensors, occupancy sensors, ballasts
- Apply Lighting system control applications
- Review Advanced lighting control systems
- Interpret Title 24
- Explain Daylighting
- Explain Solar radiation
- Appraise Site surveys and preplanning
- Identify System components and configuration
- Recognize Modules, and Arrays
- Describe Inverters

**Student Learning Outcomes:**

- Determine how to handle the job site in the most successful and profitable way, given a series of employee and job site situations.
- Demonstrate competence, proper safety techniques, and teamwork to install commercial solar installations, including the determination of the type and size of solar systems to comply with customer needs.
- Evaluate, understand and install devices under Title 24 requirements regarding energy efficient lighting control systems.

**Units & Hours**

**Minimum Units:**

4.0

**Maximum Units:**

4.0

**Total Hours**

99.0
Inside Wireman 1  
AEL051:

4.0 - 4.5 Units

First semester of a five-year program. Provides related and supplemental instruction in tools and fasteners, National Electrical Code (NEC), math, building materials, conduit bending, electrical safety, and proper use of tools and ladders required for entry-level inside wireman apprentices. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Choose personal goals

Understand and appreciate the history of IBEW and NECA

Identity signs of sexual harassment and how to report incidents

Practice jobsite safety for themselves and others

Identify basic tools of the trade

Choose and install correct masonry fasteners

Align and measure equipment material

Understand what causes electrical

Practice safety when dealing with electricity

Understand the function and design of ground-fault interrupters

Select the safe procedure when doing overhead work

Choose how to hoist loads properly

Select the proper hand signal for communication

Evaluate Building wire construction, insulation properties

Choose How to size building wire

Choose Firestop Applications

Apply Fractions and use trigonometry

Practice Hand bending pipe, offsets, 90’s, kicks, and saddles

Practice bending conduit

Choose the correct conduit for the application

Demonstrate Basic lighting circuitry, 3 way, and 4 way switching

Select and properly use aluminum conductors

Evaluate and identify electrical material
Practice Prefixes and powers of 10
Calculate with the Metric System and algebra
Interpret Article’s 90, 100 & 100 of the NEC (National Electrical Code)
Choose wiring devices
Identify correct installation requirement for wiring devices
Distinguish installation requirements of receptacles and switches
Identify industrial wiring

**Student Learning Outcomes:**
- Use trigonometry to hand bend pipe, offsets, 90’s, kicks, and saddles.
- Identify the proper use of tools and ladders. Understand and Applying Article 100 & 110 of the NEC (National Electrical Code).

**Units & Hours**

**Minimum Units:**
4.0

**Maximum Units**
4.0

**Total Hours**
99.0

**Inside Wireman 2**

**AEL052:**
4.0 - 4.5 Units

Second semester of a five year program. Provides related and supplemental instruction in Direct Current (DC) theory, the National Electrical Code, safe work practices, series circuits, parallel circuits, combination circuits and hand bending conduit for inside wireman apprentices. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
4.0

**Learning Outcomes**

**Course Objectives:**
- Interpret what electricity is
- Explain Ohm’s Law
- Calculate Power in DC circuits
- Distinguish Electrical and electronic devices
- Describe potential hazards of electrical circuits
- Calculate and solve power, resistance, current and voltage in DC series circuits
Illustrate electrical circuits
Calculate and solve power, resistance, current and voltage in DC parallel circuits
Demonstrate ratios and proportions
Calculate and solve power, resistance, currents and voltage in combination circuits
Illustrate the Operation of the Three-Wire, Single Phase System
Recognize Electrical generators
Calculate Principles of superposition
Apply DC theory principles to solve real world problems
Use Overcurrent protections
Identify Ground fault circuit interrupters

**Student Learning Outcomes:**
- Calculate power, resistance, currents and voltage in DC series circuits, parallel circuits, and combination circuits.
- Demonstrate knowledge of Ohm's Law regarding current, voltage and resistance in DC Circuits.
- Demonstrate knowledge of Hand Bending Conduit

**Units & Hours**

**Minimum Units:**
4.0

**Maximum Units**
4.0

**Total Hours**
99.0

**Inside Wireman 3**

**AEL053:**

4.0 - 4.5 Units

Third semester of a five year program. Provides related and supplemental instruction in codeology, Direct Current (DC), Alternating Current (AC), and commercial blueprints, for inside wireman apprentices. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
4.0

**Learning Outcomes**

**Course Objectives:**
- Interpret the local union by-laws
- Interpret the International Brotherhood of Electrical Workers (IBEW) Constitution
- Discuss how parliamentary procedure is used
Evaluate and understand the COMET program
Show pride in the electrical industry
Discuss american labor history
Analyze hazards of drug use
Analyze the layout, language and structure of the National Electrical Code (NEC) electrical code book
Demonstrate the system used to search and understand the (NEC) National Electrical Codebook
Recognize keywords and phrases in the (NEC) National Electrical Codebook
Interpret and utilize the plan, build uses system of information lookup in the (NEC) National Electrical Codebook
Discuss and review of DC theory
Illustrate circuit calculations for basic circuits
Analyze DC (Direct Current) compared to AC (Alternating Current)
Analyze Direct Current and AC (Alternating Current) sine wave voltages
Explain the basic characteristics of AC (Alternating Current) Circuits
Explain inductance and how it affects a circuit
Recognize inductive reactance
Illustrate frequency, inductance and inductive reactance
Analyze inductors in series
Analyze inductors in parallel
Demonstrate capacitance and how it effects a circuit
Analyze RC time constant
Demonstrate familiarity with capacitive reactance
Differentiate capacitance, frequency, and capacitive reactance
Analyze the basic fundamentals of blueprints and how they are drawn
Identify architectural views
Recognize common scales used on blueprints
Interpret and understand blueprint specifications
Illustrate electrical symbols
Illustrate mechanical symbols

Student Learning Outcomes:
Read, interpret, and articulate blueprints, drawings, and specifications to calculate the cost of a job.
Use codeology to understand the layout of the (NEC) National Electrical Code using the plan, build use method.
Calculate direct and alternating current used in electrical circuits

Units & Hours
Minimum Units:
4.0

Maximum Units:
4.0

Total Hours
99.0
Inside Wireman 4
AEL054:

4.0 - 4.5 Units

Fourth semester of a five-year program. Provides related and supplemental instruction in electrical alternating current (ac) theory, transformers, and National Electrical Code application for inside wireman apprentices. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:

4.0

Learning Outcomes

Course Objectives:
Analyze and Calculate Series RL Circuits
Analyze and Calculate Series RC Circuits
Analyze and Calculate Series RLC Circuits
Analyze and Calculate Parallel RL Circuits
Analyze and Calculate Parallel RC Circuits
Analyze and Calculate Parallel RLC Circuits
Analyze and Calculate LC Circuits
Analyze and Calculate Series and Parallel RLC Circuits
Analyze and Calculate Combination RLC Circuits
Identify Inductors in Series and/or Parallel
Analyze and solve Series RC Circuits
Analyze and solve Series RLC Circuits
Analyze and solve Parallel RL Circuits
Analyze and solve Parallel RC Circuits
Analyze and solve Parallel RLC Circuits
Analyze and solve Series and Parallel RLC Circuits
Calculate Sizing of Building Wire
Calculate Conductor Ampacity
Identify Branch Circuits 1
Identify Branch Circuits 2
Identify and Locate Outside Branch Circuits and Feeders
Identify and Locate Services
Identify and Illustrate Switches, Receptacles and Luminaires
Recognize Conduit and Raceways
Recognize Cable Assemblies
Interpret and Demonstrate Wiring Methods and Material
Recognize Conductors for General Wiring
Recognize Electrical Nonmetallic Tubing (ENT)
Recognize Liquidtight Flexible Conduit
Recognize and Select Boxes and Fittings Defined by the NEC (National Electrical Code)
Illustrate Magnetism and Electromagnetism
Demonstrate Transformer Operation Principals
Identify Transformer Connections
Apply Real World Transformer Connections
Explain Power Generation and Distribution

Student Learning Outcomes:
- Calculate ampacity, voltage and resistance in Alternating Current (AC) Circuits.
- Read, interpret, and apply the NEC to calculate ampacity, circuits, wiring, and conduits for wiring installations.
- Identify, install, and connect transformers.

Units & Hours

Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Inside Wireman 5
AEL055:

4.0 - 4.5 Units

Fifth semester of a five year program. Provides related and supplemental instruction in rigging, hoisting and signaling, national electric code, grounding and bonding, electrical safety related work practices and blueprints for inside wireman apprentices. Open Entry/Open Exit.

Requisites
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
Identify and discuss overcurrent protection and types
Identify and calculate overcurrent protective device categories, protective device ratings

Identify circuit breakers

Identify fuses

Recognize conductor tap rules

Demonstrate ground fault protection

Interpret electrical safety culture

Recognize electrical hazard awareness

Demonstrate OSHA considerations

Demonstrate lockout tagout

Analyze 3-Phase bolted fault currents

Demonstrate hoisting safety

Recognize cranes

Organize lift planning

Demonstrate the proper use of signaling

Practice load and weight balance

Choose proper slings and sling hitches

Choose proper rigging hardware

Illustrate blueprints and how they are drawn

Analyze laying out circuits

Analyze job cost and takeoffs

Review blueprint specifications

Identify components on blueprints

**Student Learning Outcomes:**

Ground an AC system, electrode system, equipment, and conductors. Understand and identify overcurrent protection and types of overcurrent. Find the corresponding references and information in the NEC, given grounding related questions.

Properly rig and hoist equipment with signals, slings or chains.

Interpret and practice electrical safety, hazard awareness following OSHA consideration with lockout tagout procedures.

Review, analyze and interpret blueprints to comply with specifications, circuitry and layout of projects.

**Units & Hours**

**Minimum Units:**

4.0

**Maximum Units**

4.0

**Total Hours**

99.0

**Inside Wireman 6**

**AEL056:**

4.0 - 4.5 Units
Sixth semester of a five year program. Provides related and supplemental instruction in Grounding and Bonding, Fire Alarm Systems, Transformers and Electrical Safety Related Work Practices for inside wireman apprentices. Open Entry/Open Exit.

**Requisites**

None

**Transferability & General Education Options**

Transferable:
Not transferable

**Weekly Lecture Hours:**

4.0

**Learning Outcomes**

**Course Objectives:**

Interpret NFPA 70E

Identify Arc Flash Hazard

Demonstrate Energized Work Practices

Calculate Fault Current Magnitude and Duration

Describe Overcurrent Protection

Interpret Code Arrangement and Application

Analyze Grounding Electrodes

Describe Services and Grounded Conductors

Identify Bonding Requirements

Solve Grounding Electrical Equipment

Ground Circuits and Receptacles

Recognize Fire Alarm Systems

Analyze System Requirements

Describe Initiating Devices

Describe Notification Appliances

Apply Wiring and Wiring Methods

Use Plans and Specifications

Demonstrate Transformer Connections

Recognize Harmonics

Analyze Power Generation and Distribution

Identify Reactors and Isolation Transformers

Explain Autotransformers

**Student Learning Outcomes:**

Plan, design and implement Fire Alarm Systems.

Read, interpret and apply the National Electrical Code as it applies to Grounding and Bonding.

Plan, design and implement Transformers.

**Units & Hours**

**Minimum Units:**
Maximum Units
4.0

Total Hours
99.0

Inside Wireman 7
AEL057:

4.0 - 4.5 Units

Seventh semester of a five year program. Provides related and supplemental instruction in Code Calculations, Blueprints, Electrical Grounding and Bonding and Motors. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes

Course Objectives:
Recognize Special Occupancies
Choose Electrical Equipment
Choose Special Equipment
Distinguish Cable Tray Systems
Recognize Surface Metallic Raceways
Calculate Ampacity of Conductors in Cable Trays
Identify Grounding at Separate Buildings or Structures
Practice Grounding Electrical Systems
Interpret Grounding Requirements for Separately Derived Systems
Identify Special Occupancies
Select Ground-Fault Circuit Interrupters (GFCI) and Ground-Fault Protection of Equipment (GFPE)
Analyze and Demonstrate Grounding Systems and Earth Ground Test Instruments
Review and Analyze Industrial Specifications
Review and Analyze Industrial Prints I
Review and Analyze Industrial Prints II
Review and Analyze Industrial Prints III
Explain Magnetism and Induction
Examine Motor Nameplates
Identify Alternating Current (AC) Alternators
Recognize Three-Phase Motors
Recognize Squirrel-Cage Motors
Recognize Wound Rotor Motors
Recognize Single Phase Motors
Solve Motor Protection

Student Learning Outcomes:
Compute Electrical Calculations for Electrical Equipment, Special Occupancies, Special Equipment and Ampacity of Conductors in Cable Trays.
Read and Interpret Blueprints for Industrial Job Applications.
Understand Bonding and Grounding Requirements for Separate Buildings, Separately Derived Systems, Ground-Fault Circuit Interrupters (GFCI) and Ground-Fault Protection of Equipment (GFCI) and use Earth Ground Test Instruments.
Differentiate between Magnetism and Induction, Single Phase and Three Phase Motors, DC Motors and Generators, and Motor Branch Circuit Protection and Motor Overload Protection.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Inside Wireman 8
AEL058:

4.0 - 4.5 Units

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Interpret and Demonstrate Magnetic Motor Control
Recognize Select and Use Manual Pilot Devices
Recognize Select and Use Automatic Pilot Devices
Recognize Select and Use Magnetic Control Relays
Recognize Select and Use Control Transformers
Recognize Select and Use Magnetic Contactors
Recognize Select and Use Basic Motor Starters
Recognize Select and Use Basic Timers
Identify and Select Electrical Devices
Discuss Swimming Pools and Fountain Installations
Explain Emergency and Standby Systems Installation Requirements
Illustrate Over 600-Volt and 1000-Volt Installations
Discuss Changes to the NEC-Part I
Discuss Changes to the NEC-Part II
Calculate Conductor Ampacity
Solve Ampacity Calculations
Calculate Box Size and Fill Conductors
Calculate Raceway Fill
Explain Electrical Load Calculations

**Student Learning Outcomes:**

- Research, Identify, and Implement Codes, Standards and Specifications to Install and Electrical System.
- Install, Troubleshoot, and Maintain Motor Control Devices.
- Pass Mock Versions of the California State Electrical Examination.

**Units & Hours**

**Minimum Units:**
4.0

**Maximum Units:**
4.0

**Total Hours:**
99.0

**Inside Wireman 9**

**AEL059:**

4.0 - 4.5 Units

Ninth semester of a five year program. Provides related and supplemental instruction in becoming a Journeyworker in the Electrical Industry, Torqueing methods and requirements for electrical equipment, Solid State Devices for Motor Control and OSHA 30 safety practices in construction for inside wireman apprentices. Open Entry/Open Exit.

**Requisites**

**Requisites:**

None

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

4.0
Learning Outcomes

Course Objectives:
Evaluate the National Electrical Benefit Fund (NEBF)
Differentiate After Apprenticeship to Journeyworker Status
Demonstrate Motivation and Leadership
Calculate and Assess Economics of Unemployment
Examine the Realities of Construction
Describe Electronics for Motor Control Devices
Identify and Choose Solid-State Motor Control Pilot Devices
Identify and Choose Solid-State Relays
Examine Motor Control Centers
Choose Fall Protection
Recognize Electrocution
Choose Personal Protective Equipment
Operate Scaffolds
Recognize and Solve Excavations
Recognize and List Confined Space Areas
Demonstrate Proper Use of Hand and Power Tools
Examine Threaded Fastener Basics
Demonstrate Torque Applications
Identify Torque Products / Tools
Define Electrical Torque Applications

Student Learning Outcomes:
Identify and Explain the National Electrical Benefit Fund, understand and relate to being a journeyworker in the Electrical Industry,
practice motivation and leadership skills on the job.
Research, identify, and implement codes, standards and specifications to install an electrical system.
Recognize and Identify safe work practices described in OSHA 30 training.

Units & Hours

Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Inside Wireman 10

AEL060:
4.0 - 4.5 Units
Final semester of a five year program. Provides related and supplemental instruction in jobsite management, lighting control and photovoltaic systems for inside wireman apprentices. Open Entry/Open Exit.

Requisites

Requisites:

None

Transferability & General Education Options

Transferable:

Not transferable

Weekly Lecture Hours:

4.0

Learning Outcomes

Course Objectives:

Demonstrate Managing Employees

Setup Managing the Job

Categorize Documents Required by Job Foreman

Relate Safety Updates

Analyze Lighting systems and light sources

Recognize Lighting systems control devices, dimmers, photosensors, occupancy sensors, ballasts

Apply Lighting system control applications

Review Advanced lighting control systems

Interpret Title 24

Explain Daylighting

Explain Solar radiation

Appraise Site surveys and preplanning

Identify System components and configuration

Recognize Modules, and Arrays

Describe Inverters

Student Learning Outcomes:

Determine how to handle the jobsite in the most successful and profitable way, given a series of employee and job site situations. Demonstrate competence, proper safety techniques, and teamwork to install both residential and commercial solar installations, including the determination of the type and size of solar systems to comply with customer needs. Evaluate, understand and install devices under Title 24 requirements regarding energy efficient lighting control systems.

Units & Hours

Minimum Units:

4.0

Maximum Units

4.0

Total Hours

99.0

Electrical Safety and First Aid
AEL061:

1.5 Units

Provides related and supplemental instruction in Occupational Safety and Health Administration (OSHA) workplace requirements, the identification and use of safe work practices, coping with accidents and emergency situations, and one person CPR for inside wireman apprentices. American Red Cross certification available upon successful completion. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Identify required policies and procedures
Identify and use safe work practices
Recognize and properly react to emergency situations

Student Learning Outcomes:
- Safely and properly interpret and follow Occupational Safety and Health Administration (OSHA) requirements in workplace settings.
- Identify and perform the proper treatment for various sudden illnesses and injuries given a set of emergency workplace situations.
- Interpret policies and procedures, study skills and record keeping required in the Inside Wireman apprenticeship program.

Units & Hours
Orientation
AIN021:

1.5 - 2.0 Units

This course provides an overview of the construction industry, safety, and green building awareness. Upon successful completion, students will receive Occupational Safety and Health Administration (OSHA) 10 hour and Powder Actuated Tool certification, and United Brotherhood of Carpenters (UBC) Fall Protection qualification cards. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Define 10 construction safety regulations to complete OSHA 10 Hour Safety Certification
Match safety hazards and precautions for tools, equipment and PPE using manufacturers guidelines
Calculate measurements and accurately perform basic math functions for assigned tasks
Explain the importance of proper interpersonal communication and respectful conduct

Identify the proper procedures for using fall protection systems using UBC Construction Fall Protection Qualification guidelines

Comprehend trade terms, industry roles and responsibilities, and basic skills

Identify the Focus Four safety hazards and accident prevention practices

Select and safely use hand and power tools for assigned tasks

Set up and fire powder actuated tool to standards required for Operator Certification

Discuss trade applications, quality, and productivity practices

**Student Learning Outcomes:**
- Evaluate potential hazards and cite the appropriate accident prevention measures.
- Demonstrate safe operating procedures for selected tools and equipment.

**Units & Hours**

**Minimum Units:**
1.5

**Maximum Units**
1.5

**Total Hours**
36.0

**Safety and Health Certifications**

**AIN022:**

1.5 - 2.0 Units

This course covers the safe and appropriate use of scaffolds, aerial lift and fork lift equipment, and emergency response procedures. Upon successful completion, students will be issued American Red Cross First Aid and cardiopulmonary resuscitation (CPR) certification and United Brotherhood of Carpenters (UBC) scaffold, Aerial Lift and Forklift Qualification Cards. Open Entry/Open Exit.

**Requisites**

**Requisites:**

**Prerequisite**

**AIN021 - Orientation**

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
1.5

**Learning Outcomes**

**Course Objectives:**
- Demonstrate the safe operation of the selected lift truck
- Identify lift truck components and applicable OSHA regulations
- Identify aerial lift components and applicable OSHA regulations
- Discuss health emergencies and name first aid and CPR techniques
- Properly stage, assemble, and disassemble selected scaffolding
Conduct lift truck safety inspections
Meet UBC criteria for the proper operation of the selected lift truck
Conduct scaffold safety and equipment inspections
Conduct aerial lift safety inspections
Match safety hazards and precautions for aerial lift equipment
Identify scaffold components and applicable OSHA regulations
Demonstrate the safe operation of two types of aerial lifts
Meet United Brotherhood of Carpenters (UBC) criteria for erecting and dismantling scaffolds correctly
Perform emergency response techniques and pass American Red Cross first aid, CPR and AED training tests
Match safety hazards and precautions for scaffold erection rules
Match safety hazards and precautions for lift truck equipment
Meet UBC criteria for the proper operation of aerial lift equipment

Student Learning Outcomes:
Apply the appropriate first aid and CPR/AED techniques for specific emergencies.
Identify scaffold regulations and correctly apply them to complete scaffold erection projects.
Identify and demonstrate safe operating procedures for aerial lift and Forklift equipment.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Insulation Basics
AIN023:
1.5 Units

This course provides an introduction into insulation as an energy efficiency technology and covers common types of insulating products and typical industry applications. Job planning, preparation and personal protective equipment will be included in performance exercises. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
- Demonstrate proper handling and attachment of selected faced and un-faced batt insulation
- Calculate material quantities in lineal and square footage
- Employ jobsite communication methods and production practices
- Describe respirators characteristics, and the importance inspection, fit tests and maintenance procedures.
- Discuss the value good communication has on worksite safety
- Install sound blankets at surface locations using information on project prints
- Utilize proper ventilation, and respiratory PPE
- Categorize types of commonly used insulation products
- Define residential/commercial building terms and applicable building codes
- Stress the importance of communication and identify the proper chain-of-command
- Discuss the impact of R-Values on energy efficiency
- Explain the importance of work efficiency and describe productivity tips
- Apply procedures for the safe and appropriate use of tools, materials and equipment
- Evaluate insulation scenarios and problem-solve inadequacies or possible air infiltration at the building envelope

Student Learning Outcomes:
- Interpret project prints to determine insulation methods, codes and materials.
- Employ proper procedures to place and secure batt insulation to wall cavities.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Construction Methods
AIN024:
1.5 Units

This course presents the theory, methods, and procedures required to frame basic walls. Hands-on practice using proper tool techniques and appropriate materials will enhance fundamental skill development. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN021 - Orientation

AND

Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Calculate horizontal and vertical layout using prints
Create a list of the materials and hardware used for wall framing
Construct, lift and connect framed walls using proper techniques
Execute wall layout using the 3,4,5 method, and complete plating-detail tasks
Identify basic wall framing components and material types
Plumb and align structures to 1/8" accuracy
Install required bracing to print specifications
Demonstrate safe and appropriate use of tools, materials and equipment

Student Learning Outcomes:
Demonstrate proficient use of basic math for construction preparation.
Interpret prints to determine wall elements, codes and materials.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Print Reading
AIN025A:
1.5 - 2.0 Units

This course introduces basic visualization skills needed for reading and interpreting construction prints. Views, elevations and the role of specifications as they relate to insulation details on prints will be discussed. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN021 - Orientation
AND
Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:
Locate beginning and ending measuring points and calculate dimensions
Locate beginning and ending measuring points and calculate dimensions
Define terms and categorize print according to specific characteristics
Use plans to accurately set up a construction layout
Interpret views to find component details and layout features

Complete written tests and final evaluations
Describe and use conventional lines, symbols and dimensioning methods
Label the standard views used in orthographic projection
Complete a detailed material list from print specifications (insulation)
Interpret views to find components details and layout features

Identify drawing methods used to create prints

Student Learning Outcomes:

Apply the principles of orthographic projection to visualize three-dimensional images from two-dimensional graphic representations.
Interpret prints to determine construction elements, size and arrangement.

Units & Hours

Minimum Units:

1.5

Maximum Units

1.5

Total Hours

36.0

Advanced Print Reading

AIN025B:

1.5 - 2.0 Units

In this course, students will analyze multi-view drawings to determine construction type, locate benchmark and building elements; review codes, references, and perform calculations for construction/insulation planning. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite

AIN021 - Orientation

AND

Prerequisite

AIN022 - Safety and Health Certifications
Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Calculate material take-offs from representations in specific views and schedules
Read beam and column schedules and determine material
Record site location and orientation information from plot plan
Explain what is included in specifications and find selected topics.
Reference views and determine benchmark and reference dimensions on prints
Practice sketching views using orthographic method
Estimate time and labor for project based on print information
Interpret prints to identify project elements, code compliance and construction type
Find framing/insulation details on drawings

Student Learning Outcomes:
Apply the orthographic projection drawing method to sketch a three dimensional object in standard views.
Estimate costs based on construction elements and insulation methods found on prints.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
36.0

Sound Control and Weatherstripping
AIN026:

1.5 Units

This course explores building construction systems and materials used to control sound. How sound travels and/or is absorbed by building materials will be presented. Practical experience will be gained during installation of wall systems, weatherstripping, and insulating materials designed to absorb, diffuse, disperse and/or control sound. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN021 - Orientation

AND

Prerequisite
AIN022 - Safety and Health Certifications
Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
- Identify adhesive characteristics and safety precautions
- Evaluate soundproofing scenarios and problem solve inadequacies
- Demonstrate proper tool techniques and correct use of adhesives
- List the various types and styles of weatherstripping products
- Compare noise reduction and noise absorption characteristics
- State the sound rating for selected types of soundproofing materials
- Interpret prints to determine materials requirements and fabrication details
- Install selected sound control systems and weatherstripping material to industry standards
- Describe terms, sound theory, and identify sound ratings
- Describe characteristics of various weatherstripping products and application methods

Student Learning Outcomes:
- Assess potential sound transmission at building envelope to determine the appropriate insulation and weatherstripping solution.
- Install insulation and weatherstripping to form suitable noise control for building.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Flexible Foam Insulation
AIN027:

1.5 Units

This course covers the identification of flexible foam materials, installation methods, and industry applications. The procedures and tool techniques used to fabricate and install several types of equipment covers using flexible foam insulation will be presented and practiced shop floor exercises. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite

AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable: 
Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Prepare and install materials based on print specifications and industry standards
List steps for flexible foam installation and inspection procedures
Interpret prints to determine materials requirements and fabrication details
Describe thermal principles, terms, codes, methods, and common applications
Identify open/closed cell foam properties and state the product thermal values
Demonstrate proper tool techniques and correct use of adhesives
List steps for flexible foam fabrication procedures
Identify adhesive characteristics and safety precautions
Explain the steps used to fabricate flexible foam equipment covers

Student Learning Outcomes:
Interpret prints to determine the proper application of insulation materials.
Create patterns and fabricate selected types of equipment covers.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Green Building and Weatherization
AIN031:
1.5 Units

This course explains in detail building envelope science. Audit procedures, as well as testing and reporting mechanisms used to measure inefficiencies will be covered. Training will provide novice workers with fundamental skills to properly install the beneficial ["green"] and cost effective energy efficient retro-fits for residential buildings. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN021 - Orientation

AND

Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Prepare and discuss audits reports and retro-fits recommendations
Observe proper procedures for recognition and safe removal/control of hazardous materials
Discuss energy efficient retro-fits; renewable and local materials
Explain the tenants of sustainable construction practices and related green building/products rating systems
Inspect and evaluate installed materials and components
Analyze Energy Conservation Codes, including any State Green Building Code Discuss renewable, "local" and "green rated materials
Perform audits in both as found and post retro-fit condition
Compare and contrast and cost effective retro-fit measures
Define sustainable and efficient use of energy; technology and terminology
Install retro-fit measures using the proper techniques and procedures
Select and utilize the correct levels of personal protective equipment
Explain how testing equipment is used to collect pre/post audit measurements
Comprehend insulation, window, Heating, Ventilation, and Air-Conditioning (HVAC), and lighting ratings

Student Learning Outcomes:
Assess site conditions and select retro-fit materials based on efficiency levels.
Install building components to meet green codes and audit energy efficiency goals.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Specialty Insulation
AIN032:
1.5 Units

This course describes insulation systems materials and installation methods that usually performed by specialty contractors. Instruction will include refrigeration, curtain walls, plenums, access hatches, and spray systems. Students will calculate and prepare materials, and utilize the proper installation techniques during shop exercises. Open Entry/Open Exit.

Requisites

Prerequisite
AIN021 - Orientation
AND
Prerequisite

AIN022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes

Course Objectives:
Explain how typical insulating techniques and procedures are adapted to specialty insulation projects.
Describe the components prefabricated panels, curtain walls and plenums
Describe the inherent characteristics and insulation methods associated with various specialty applications
Discuss façade metal framing structure and function of curtain wall
Install selected specialty insulation systems and weatherstripping material to meet industry standards
State the purpose of thermal insulation and saffing at curtain walls and plenums
Explain the purpose and use prefabricated panel system, curtain walls, and plenums
Interpret prints to determine materials requirements and fabrication details
Evaluate insulation scenarios using building codes to problem solve stated issues
Demonstrate proper tool techniques and correct use of adhesives

Student Learning Outcomes:
Utilize project plans to identify components, determine appropriate insulation methods and materials.
Use the proper procedures to install specialty insulation to print specifications.

Units & Hours

Minimum Units:
1.5

Maximum Units
1.5

Total Hours
45.0

Energy Audit

AIN033:

1.5 Units
This course covers the building envelope-science, audit procedures, testing and reporting mechanisms used to measure inefficiencies and identify beneficial and cost effective energy efficient retro-fits for residential buildings. Open Entry/Open Exit.

Requisites

Requisites:

Prerequisite

AIN021 - Orientation
Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Explain the tenants of sustainable construction practices and related green building/products rating systems
Identify industry standard for whole house audits and reports; applicable codes
Discuss how testing equipment is used to collect pre/post audit measurements
Prepare and discuss audits reports and retro-fits recommendations
Comprehend insulation, window, HVAC (heating, ventilating, and air conditioning) and lighting ratings
Define green building and whole house science terminology
Identify common building components that lead to energy losses
Perform audits in both as found and post retro-fit condition

Student Learning Outcomes:
Assess residential energy efficiency using whole house testing approach.
Record and analyze building envelope data; report cost effective retro-fits.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
40.0

Firestop/Fireproofing Procedures
AIN034:
1.5 Units
This course will focus on the correct methods, technical skills, and firestop/fireproofing materials required in the work place today. Strict building codes mandate the importance of certified training. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN021 - Orientation
Prerequisite

AIN022 - Safety and Health Certifications

Transferability & General Education Options

Transferable:

Not transferable

Weekly Lecture Hours:

1.5

Learning Outcomes

Course Objectives:

Explain methods of controlling and fighting fires

Describe building construction elements where sealing is necessary to prevent fire spreading

Describe the functions of three different firestop/fireproof technologies

Utilize selected materials to form a firestopping seal

Identify the characteristics of a firestop/fireproof system

Discuss the standards and testing methods for firestop/fireproof systems

Utilize selected materials to form a firestopping seal

List typical firestop/fireproof system failures and abatement solutions

Describe product firestop and fireproofing characteristics and application method

Evaluate application method, tool and equipment operation and maintenance

List typical firestop/fireproof system failures and abatement solutions

Student Learning Outcomes:

Articulate the importance of fire and building codes applicable in firestop and fireproofing systems.

Apply the proper firestop and fireproofing methods and application techniques.

Units & Hours

Minimum Units:

1.5

Maximum Units

1.5

Total Hours

40.0

Infiltration and Moisture Control

AIN035:

1.5 Units

This course covers air infiltration and how it affects the energy efficiency of a building, as well as the techniques, strategies and insulation installation skills designed to prevent energy loss, and damage due to condensation and infiltration described as “moisture build up” inside the building envelope. Open Entry/Open Exit.

Requisites

Requisites:
Prerequisite
AIN021 - Orientation

AND

Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
1.5

Learning Outcomes
Course Objectives:
Describe potential and kinetic energy and define “R” values and British thermal unit’s (BTU)
Demonstrate safe and appropriate use of tools, materials and equipment
Identify safety practices and use of personal protection equipment (PPE)
Describe the characteristics of various sealing methods and products
Evaluate insulation scenarios and problem-solve inadequacies or possible air infiltration at the building envelope
Explain the difference between conduction, convection and radiant heat
Compare calculated “R” values with specific environment “R” value recommendation
Install selected heat transfer and infiltration systems
Calculate BTU for selected examples
Describe the cause and affect for air infiltration and moisture issues at entry or building envelope contact points
Detect air leaks and apply proper sealing/weatherstripping materials

Student Learning Outcomes:
Communicate the effects of air movement in respect to moisture migration, and discern potential issues for air and vapor barrier effectiveness.
Determine and select barrier type and insulation to form suitable thermal boundary for building components.

Units & Hours
Minimum Units:
1.5

Maximum Units
1.5

Total Hours
40.0

Loose Fill and Spray Insulation
AIN036:
1.5 Units
This course presents the differences between batt, ridged, loose-fill, and spray types of thermal insulation. The product distinctions, thermal advantages, and variation of typical installation practices will be covered. An in depth discussion of safety precautions and operating procedures for spray equipment and blow rigs (trucks) used in loose fill applications will be presented. Open Entry/Open Exit.

**Requisites**

**Requisites:**

**Prerequisite**

AIN021 - Orientation

AND

**Prerequisite**

AIN022 - Safety and Health Certifications

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- Identify terms and explain thermal characteristics for building energy efficiency and related codes
- Use proper care and maintenance procedures for cleaning and storing equipment
- Calculate materials, stage product and install cellulose insulation to project specifications.
- List and name the parts of a typical blow rig; spray equipment
- Classify and describe the characteristics for the selected insulation types
- Identify all safety and equipment procedures for rigs, vacuums, feeders and sprayers
- Install selected spray and foam insulating products to surfaces indicated on project prints
- Demonstrate safe operation of selected blow rigs, vacuums and feeders; sprayer

**Student Learning Outcomes:**

- Differentiate between loose-fill and spray foam materials and application methods.
- Demonstrate proficiency in the use of spray insulation equipment.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units**

1.5

**Total Hours**

45.0

**Rigid Foam and Cellular Glass Insulation Installations**

AIN037:

1.5 Units
This course covers the identification of rigid and cellular glass materials, installation methods, and industry applications. The proper handling and installation techniques for molded and extruded polystyrene foam boards, and cellular glass insulation will be stressed during shop exercises. Open Entry/Open Exit.

**Requisites**

**Prerequisites:**

AIN021 - Orientation

AND

AIN022 - Safety and Health Certifications

**Transferability & General Education Options**

**Transferable:**

Not transferable

**Weekly Lecture Hours:**

1.5

**Learning Outcomes**

**Course Objectives:**

- List steps for handling rigid foam and cellular glass for installation
- Explain expansion/contraction of joints and vapor stops
- Interpret prints to determine materials requirements and installation details
- Demonstrate proper tool techniques and correct use of mastics
- Identify open/closed cell foam properties and state the product thermal values
- Prepare and install materials based on print specifications and industry standards
- Explain the steps used to fabricate rigid foam and cellular foam equipment covers
- Discuss temperatures; moisture effects; stress cracking;
- Describe thermal principles, terms, codes, methods, and common applications
- List the steps used to install rigid and cellular glass insulation
- List steps for rigid foam and cellular glass installation and inspection procedures
- Identify adhesive characteristics and safety precautions
- Identify open/closed cell foam properties and state the product thermal K values

**Student Learning Outcomes:**

- Apply thermal principles to assess the suitability of rigid and cellular glass insulation based on specific project information.
- Employ the proper procedures to fabricate and install selected rigid and cellular glass insulation to industry standards.

**Units & Hours**

**Minimum Units:**

1.5

**Maximum Units:**

1.5

**Total Hours:**

40.0
S/B Crew Lead Training
AIN041:

2.5 Units

This course covers the supervisory and leadership skills required for professional development, including the typical work processes, communication methods, motivational concepts, and problem-solving techniques, that when employed, result in the efficient and effective management of construction projects. Open Entry/Open Exit. Former Title: Apprenticeship Insulation 041, Supervisory Training (2020)

Requisites
Requisites:
Prerequisite
AIN021 - Orientation

AND

Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Identify and list the responsibilities associated with lead-man management's role

Describe the contributing factors and personal attributes that motivate individuals to want leadership

Record ways to improve communication and address diversity with management and others

Practice a systematic approach to developing problem solving skills

Complete productivity analysis, scheduling and project documentation worksheet

List ways to carry out quality control measures

List ways to carry out quality control measures

Conduct a mock job site safety meeting

Student Learning Outcomes:
Developed and create a plan for scheduling crew work assignments.
Produce an accurate project timeline and coordinate material orders.
Apply tools for effective and clear communication in a diverse work environment.

Units & Hours
Tool/Equipment Applications
AIN043:

1.5 Units

This course promotes hand/power tool and equipment skill development for various construction applications. Scaffold building and aerial lift safety and operating procedures will also be covered. Upon successful completion, interior systems students will be issued United Brotherhood of Carpenters (UBC) Aerial Lift and Scaffold Erector-Welded Frame Qualification Cards. Open Entry/Open Exit.

Requisites
Requisites:
Prerequisite
AIN021 - Orientation

AND

Prerequisite
AIN022 - Safety and Health Certifications

Transferability & General Education Options
Transferable:
Not transferable

Learning Outcomes
Course Objectives:
Apply the appropriate tool/equipment manipulative techniques to complete assigned interior systems tasks
Identify drywall, finishing, and acoustical ceiling measuring techniques for accuracy
Utilize proper fastener placement and driving techniques
Practice using the math techniques presented to lay out materials
Conduct aerial lift safety inspections
Identify boom/scissor aerial lift components and applicable OSHA regulations
Meet UBC criteria for the proper operation of aerial lift equipment
Math Operations: Conversion, formulas, calculating quantities
Match safety hazards and precautions for scaffold erection procedures
Assignments: Measuring, material calculations, and layout techniques for various interior systems/drywall applications
Identify drywall, finishing and acoustical ceiling material preparation and layout techniques for productivity and accuracy
Meet United Brotherhood of Carpenters (UBC) criteria for erecting and dismantling scaffolds correctly
Match safety hazards and precautions for aerial lift equipment operation
Properly stage, assemble, and disassemble selected scaffolding
Select appropriate hand and power tools/equipment for assigned tasks
Select appropriate math operations to measure and calculate materials
Demonstrate the safe operation of two types of aerial lifts
Identify scaffold components and applicable Occupational Safety and Health Administration (OSHA) regulations
Conduct scaffold safety and equipment inspections

Student Learning Outcomes:
Identify and demonstrate safe operating procedures for aerial lift truck equipment.
Demonstrate the proper erecting/dismantling procedures for welded frame scaffolds.
Assess interior systems construction tasks to determine the appropriate tools, equipment and construction methods.

Units & Hours
Period 1
AME021:
4.0 - 4.5 Units
Provides the related and supplemental instruction required for the first level Maintenance Electrician Apprentice in mathematics, industrial safety and health, using hand and portable power tools, basic measurements, basic electricity, and basic mechanics. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Demonstrate knowledge of safety practices with machinery and electricity
Practice safe techniques when using hand tools
Identify hazards in different work environments
Recognize the required PPEs required by MWD safety policy
Demonstrate safe use tools such as electric drills, hammers, saws, screwdrivers, grinders, shears, and sharpening tools
Identify correct tool and use according to application
Determine the best practice of efficiency using tools
Calculate problems using trigonometry and algebra
Identify the correlation of math as a necessity when working with mechanics and electricity
Apply the math to measurements
Recognize the risks and precautions required with electricity
Calculate generated leverage when using mechanical advantages with torque, lever, screw, and pulleys
Describe the required lubrication necessary for different bearings
Identify the correct bearing required for different applications

Student Learning Outcomes:
Accurately measure items in the plant using various measuring instruments.
Recognize, identify, and follow required industrial health and safety practices while using the personal protective equipment, hand and power tools in performing operations and maintenance tasks.
Apply, manipulate, and perform basic electrical and mechanical math calculations and concepts to determine equipment conditions in the plant, given a sample mechanical/electrical component.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0
Period 2
AME052:

4.5 Units

Provides the related and supplemental instruction required for the second level Maintenance Electrician Apprentice in basic principles of electricity, Direct Current (DC) circuit components and calculations, electric power and energy, batteries, electromagnetism, electrical safety in the workplace (NFPA 70E), electrical protective devices, introduction to industrial rigging for electricians, and introduction to the National Electric Code (NEC). Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.5

Learning Outcomes

Course Objectives:
Recognize electrical hazards; importance of grounding and bonding; and identify fuses and circuit breakers

Practice electrical safety by demonstrating proper use of Personal Protective Equipment (PPE); fall protection devices; lockout/tagout procedures; National Electric Code (NEC); and Standard for Electrical Safety in the Workplace (NFPA 70E)

Describe principles of electricity

Identify properties of circuit components, conductors, and insulators, and resistors.

Describe principles of electron theory and flow.

Use Ohm’s Law to calculate voltage, current and resistance.

Describe basic principles of static electricity; and solar and thermal energy.

Apply the fundamentals of magnetic fields and the use of electromagnets.

Identify the different types of chemical cells.

Practice proper application, charge, and maintenance of lead-acid, nickel-alkaline, and nickel-cadmium batteries.

Maintain service and storage records for batteries.

Recognize the fundamentals of DC circuits.

Practice techniques to solve simple Series, Parallel and Series-Parallel circuits.

Identify electrical symbols.

Discuss basic electrical diagrams.

Identify machine parts from machine drawings

Identify basic rigging equipment, calculate loads, calculate angle loading of rigging devices

Demonstrate basic rigging practices, bridge crane operations and signals

Student Learning Outcomes:
Manipulate the fundamental components of volts, ohms, and amperes to solve circuit parameters.
Identify and interpret symbols used for equipment and component identification on circuit diagrams, schematics, and drawings.
Properly operate, maintain, and store batteries safely.
Units & Hours
Minimum Units:
4.5

Maximum Units
4.5

Total Hours
117.0

Period 3
AME053:

4.0 - 4.5 Units

Provides the related and supplemental instruction required for the third level Maintenance Electrician Apprentice in reading blueprints, schematics, symbols, drawings and diagrams; rigging principles and practices for electricians; AC/DC equipment and controls; AC generation, transmission and distribution; over-current protective devices; and continuing education with the NEC and NFPA 70E Workplace Electrical Safety. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
Demonstrate proper application and operation of various electrical test instruments to include: voltmeter, ammeter, wattmeter, ohmmeter, and megohmmeter

Discuss AC metering, split-core ammeter, use of current and potential transformers

Demonstrate use of multimeters and oscilloscopes

Apply principles of AC generation; transmission and distribution; and troubleshooting of same

Read time-current curves

Demonstrate coordination of AC power distribution

Distinguish between AC and DC circuits

Describe AC power relationships in single-phase and three-phase circuits

Use vectors to solve AC circuits

Calculate impedance in circuits containing inductance and capacitance.

Apply principles of transformer maintenance

Identify power applications in industry

Recognize types of DC relays, AC relays, and AC/DC controllers

Demonstrate knowledge of overspeed and overload protection and AC/DC maintenance practices.
Identify and select proper fuse, breaker and relay for protection
Understand GFCI circuits
Discuss use of grounded conductors and branch circuits
Calculate arc-flash and incident energy

**Student Learning Outcomes:**
- Identify, install, maintain, modify, and troubleshoot control equipment in both Alternating Current (AC) and Direct Current (DC) circuits used for electrical industrial processing systems.
- Manipulate relays, fuses, and breakers for motor control and over-current protection
- Operate electrical measuring and metering instruments.
- Apply principles of AC power generation, transmission, and distribution.
- Distinguish between and solve various types of circuits.

**Units & Hours**

**Minimum Units:**
4.0

**Maximum Units:**
4.0

**Total Hours:**
99.0

**Period 4**
**AME054:**

4.5 Units

Provides the related and supplemental instruction required for the fourth level Maintenance Electrician Apprentice in the application of code requirements; intermediate electricity; single phase motors; three phase systems; AC/DC equipment control and generators; and electrical troubleshooting skills. Open Entry/Open Exit.

**Requisites**

**Requisites:**
None

**Transferability & General Education Options**

**Transferable:**
Not transferable

**Weekly Lecture Hours:**
4.5

**Learning Outcomes**

**Course Objectives:**
- Recognize types of generators
- Discuss operating characteristics of motors
- Explain DC armature principles, maintenance and repair
- Troubleshoot AC/DC motors, a motor starter, and power and control components
- Troubleshoot single-phase and three-phase motors
- Operate test equipment for troubleshooting
- Demonstrate on-delay and off-delay troubleshooting
Manipulate limit switches, float switches, pressure switches, and sequence control
Recognize different applications of technical drawings and diagrams
Determine sequence of operations using schematic diagrams
Practice communication within the trade when troubleshooting
Identify branch circuits and feeders
Identify unmarked leads on three-phase delta and Y-connected motors
Build diagrams and single-line diagrams
Apply intermediate-level troubleshooting fundamentals and techniques
Calculate various temperatures between Fahrenheit and Celsius
Demonstrate over-current protection and grounding
Apply the National Electrical Code (NEC) to maintenance involving motors; heating, ventilation, air conditioning and refrigeration (HVACR); generator; and transformer installations
Comply with Occupational Safety and Health Administration (OSHA) standards and Metropolitan Water District (MWD) policies

Student Learning Outcomes:
- Apply the theory of three-phase motors to troubleshoot and maintain pumps, sump pumps, machine-tool equipment, and other power conversion equipment.
- Apply the theory of single phase motors to troubleshoot and maintain chemical feed pumps, sump pumps, machine-tool equipment, and room ventilation fans.
- Select, install and troubleshoot industrial electrical systems using the principles of coordinated sequence of overcurrent protection and the rules of the National Electrical Code (NEC).

Units & Hours
Minimum Units:
4.5

Maximum Units
4.5

Total Hours
117.0

Period 5
AME055:

4.0 - 4.5 Units

Provides the related and supplemental instruction required for the fifth level Maintenance Electrician Apprentice in the application of code requirements, variable frequency drives (VFD), VFD faults and troubleshooting, input/output devices, semi-conductors, and power supplies. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0
Learning Outcomes

Course Objectives:
- Demonstrate various techniques to measure current
- Determine wire type and bundle methods for various applications
- Identify and explain application of circuit components
- Describe the components and applications of variable frequency drives (VFD)
- Demonstrate speed and torque controls for VFD's
- Wire and program VFD's
- Perform fault diagnosis and troubleshoot VFD
- Discuss the fundamental principles of semi-conductors, computers and power supplies
- Demonstrate proper application of codes, instruments, and techniques for troubleshooting electrical problems

Student Learning Outcomes:
- Install, modify, maintain, and troubleshoot Variable Frequency (Speed) Drives (VFDs).
- House, support, transmit and terminate basic circuits.

Units & Hours

Minimum Units:
4.0

Maximum Units:
4.0

Total Hours:
99.0

Period 6

AME056:
4.5 Units

Provides the related and supplemental instruction required for the sixth level Maintenance Electrician Apprentice in the application of code requirements, introductory programming, programmable logic controllers (PLC), and advanced electricity. Open Entry/Open Exit.

Requisites

Requisites:
None

Transferability & General Education Options

Transferable:
Not transferable

Weekly Lecture Hours:
4.5

Learning Outcomes

Course Objectives:
- Describe process controls, control loops, data transmission and computers in process controls
- Apply fundamentals of PLC programming and basic troubleshooting techniques
- Define and discuss event sequencing, timer controls, and counter controls
Demonstrate competency in Logix Pro
Demonstrate Karnaugh Map for ladder logic
Apply practical code – capacitors, resistors, reactors, hazard classifications and equipment greater than 600V
Discuss mechanical and solid state switches
Discuss applicable codes for solar installation, fire pumps and generators
Discuss emergency systems

Student Learning Outcomes:
- Install, program and troubleshoot programmable logic controllers (PLC).
- Apply practical code to hazard classification and equipment greater than 600V.

Units & Hours
Minimum Units:
4.5

Maximum Units
4.5

Total Hours
117.0

Period 7
AME057:

4.0 - 4.5 Units
Provides the related and supplemental instruction required for the seventh level Maintenance Electrician Apprentice in water treatment plant and water distribution system operations and advanced electricity and electrical systems. Open Entry/Open Exit.

Requisites
Requisites:
None
Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.0

Learning Outcomes
Course Objectives:
- Calculate flows, grades, elevations, pressure, and feed rates in water treatment plants and water distribution systems.
- Identify and apply distribution system configuration, components and controls
- Identify associated regulatory procedures as they apply to operations and maintenance in water treatment and distribution
- Apply proven skills to apply single and three-phase circuits – vector relationship for current, voltage and power factor
- Apply commercial and industrial transformers appropriately
- Demonstrate advanced troubleshooting of AC motors, generators, DC circuits, and machinery
- Discuss energy savings through the use of energy-efficient electric motors, properly sizing existing motors, and effective process control
- Perform hazard analysis
Demonstrate testing resistance of line and load circuits to ground
Perform fuse check
Describe the three phase system design
Describe the single phase system design
Describe the high leg system design
Discuss considerations in lighting design
Troubleshoot lighting systems
Identify types and functions of luminaries, lamps, and lamp holders
Identify types of lighting circuits (loop-in, junction box)

Student Learning Outcomes:
- Identify, operate, and maintain the process of wholesale water treatment and delivery through component recognition, configuration and control while adhering to Federal and State regulations for delivering water to the public.
- Design, install, maintain and troubleshoot electrical systems using vector analysis as a relations of dependent components acting with differing time relations.
- Calculate flows, grades, elevations, pressure, and feed rates in water treatment plants and water distribution systems.

Units & Hours
Minimum Units:
4.0

Maximum Units
4.0

Total Hours
99.0

Period 8
AME058:

4.5 Units
Provides the related and supplemental instruction required for the eighth level Maintenance Electrician Apprentice in the application of code requirements, advanced electricity and electrical systems, maintenance and operations procedures, project planning, layout, estimating and scheduling. Open Entry/Open Exit.

Requisites
Requisites:
None

Transferability & General Education Options
Transferable:
Not transferable

Weekly Lecture Hours:
4.5

Learning Outcomes
Course Objectives:
Demonstrate advanced application of industry codes and standards in maintenance and operations procedures
Demonstrate safe operation of testing equipment
Identify hazardous locations
Prove advanced competency in equipment sizing
Prove advanced competency in over-current protection; and grounding and bonding.
Develop a written rough draft of Project Plan
Determine a logistics plan for project
Determine control of labor for project
Determine a plan to maximize assets and materials for project
Determine method to control budget for project
Prepare a final written Project Plan

**Student Learning Outcomes:**

- Perform a battery of electrical testing to maintain the serviceability of electrical systems and equipment with proven competency applying industrial safety codes and standards for electricity.
- Develop a project plan that includes layout of task details and schedule; estimate of materials, equipment, and labor required; research and implementation of special techniques; and coordination with other crafts for a hypothetical project involving comp

**Units & Hours**

**Minimum Units:**
4.5
