Hi,

My name is Randy Scott (You will call me Mr. Scott.) and I am the professor for Math 150B-18, #19756. You are receiving this message because you are registered in the course or on the wait list. If you are on the wait list, receipt of this message in no way constitutes admission into the course. On a more positive note, I will add students as long as there are chairs in the classroom. If I add you to the class, then you are obligated to work your posterior off to insure that you pass the class!

Class begins at 5:30 pm sharp. I'll be in the room, MH-491, ready to begin class at 5:30 pm. I expect the same of you. If you suffer from persistent tardiness, then I recommend that you enroll in another professor's course.

A note to those of you who are repeating this class: You need to WORK EVEN HARDER than you did the first time you took the class. Many, many times I've had students say "I know this stuff because I took this class already" only to end up having to take the class for a third time.

It is very important in this course to get a strong start to the semester. For our Monday/Wednesday class in particular, we have 1 holiday. This may sound great at first, but it means we have to complete the same amount of material as all the other Math 150B sections, but with fewer class meetings.

To help get your brain back in gear, I would like for you to do two things BEFORE class begins. First, reply to this email, including your name. Second, sign onto TITANium and download the course outline (syllabus), assignment list, especially the document titled "150B Review Probs from 150A." Please do whatever review you need to complete those problems and have them ready to turn in on Monday, August 25, 2014, at 5:30 pm.

I look forward to meeting you all.

Sincerely,

Mr. Scott
