EV CHARGING STATION DESIGN

One of the most growing businesses in the USA and worldwide are electrical vehicle and EV charging station installation. Millions of electric cars, SUVs and trucks will be on the road by the next 10 years. To offset the carbon load on the environment, the California Government is hoping to make 100% vehicles operating by battery powered by year 2035. This will require millions of charging stations to be installed at the garages, parking lots, roadside electric poles, etc. Therefore, we need millions of EVCS installers and service providers all over the US and worldwide. This course will offer A to Z of EVCS design, Installation and operation, including troubleshooting the system. A chapter has been added on "How to Design and Calculate Solar Photovoltaic and Batteries while in Outdoor Installation".

GAME DEVELOPMENT (AGES 7-10)

This game design camp is all about coding games - and the awesomeness that comes from it! From Frogger to Tron or even classics like Breakout or Flappy Bird, our Code Coaches will help choose the right computer game(s) for our campers. In this day camp, we'll not only create a real functioning game from scratch, we'll practice the fundamental coding concepts required in any language, learn how to think logically, and have fun while doing game development. Using Scratch, MIT's popular drag-and-drop programming language, campers will code cool playable games with guidance from our seasoned Code Coaches, and have a sweet Friday afternoon demo for parents to see! Because we do all our coding online, campers can log into their account at any time during or after camp to show off what they've done, and even keep adding to their game!

PYTHON STARTUP (AGES 10-14)

Who's ready to get to learning PYTHON! Sounds a little gross, like a giant snake right? But it's actually one of the hottest programming languages around today. Take advantage of the easy-to-read style of coding while picking up on one of the most popular languages today for professional and beginner programmers alike. We'll start out by using an online python platform to learn some basics and practice some fundamental concepts, and time permitting and based on our camper skill set, we may jump on to some more complex Python programming, potentially getting into coding with PyGame for gaming apps.

POLYNESIAN DANCE KEIKI (AGES 4-9)

For children who dance to the beat of their own drum, our Keiki class is created for children (ages 4-9 years) to channel their energy into Polynesian dancing. We move at a pace that allows our youngest students to follow basic steps of Hula and Tahitian dancing. Keiki will be taught choreography to familiar songs heard in popular movies and on the islands. Hula skirts will be provided by the instructor for practice. Parents are welcome to stay but please limit distractions.

CYBERKIDS (AGES 9-15)

This course is designed to introduce young learners to the fundamentals of cybersecurity, helping them understand how to stay safe online. In a world increasingly influenced by digital technology, children will gain essential skills to navigate the internet responsibly and securely. Through age-appropriate lessons, learners will explore common digital threats such as phishing scams, cyberbullying, privacy issues, and exposure to inappropriate content. The course will focus on strategies to avoid these dangers, like creating strong passwords, understanding the importance of responsible social media use, and protecting personal information from cyber risks. In addition to these core topics, students will also be introduced to the fascinating world of artificial intelligence (AI), exploring how AI influences their online experiences and how to engage with it safely. Interactive activities, real-life scenarios, and engaging discussions will make the learning process enjoyable while reinforcing key concepts in cybersecurity. By the end of this course, young learners will be equipped with the knowledge and skills to protect themselves in the digital world, building habits that support safe and responsible online behavior.

ALL DAY FUN SCIENCE CAMP (AGES 5-12)

Introduce your child to the exciting world of science! Chemistry is everywhere! Learn how chemicals react to create cool, slimy, and bubbly reactions. Observe and investigate the science behind disappearing water...is it magic or science? Understand the world of our sense of taste and see how sugar turns into cotton candy with heat and centripetal force. Your Jr. scientist will learn how to make giant bubbles and create their own slime. Kids will be involved with wind tunnel experiments that will blow them away! They will not only learn but also see how air pressure flows and how gravity pulls in our water balloon drop challenge. We will broaden their scientific horizons as we explore our solar system, the sun and stars, and the moon and planets. They will learn how astronauts live in space and count down as they experience a live rocket launch. They will conduct hands-on simple experiments with lasers, magnetism and power sources. We will build simple circuits to learn how electricity flows. Kids will also be introduced to the science of sports, energy and motion, plus how the simple actions we do everyday are kinetic energy! We will work together using engineering and technology skills to build different types of bridges, and so much more!!
