

Instructions: How to Translate a Web Page on Your PC

1. Open the web page in your browser and click the **three lines**  or **three dots**  in the upper-right corner.
2. Select **“Translate Page”** from the menu.
3. In the **“Translate to”** dropdown menu, select the **language** you would like the page translated into.

The web page will automatically be translated into your selected language.
